The proposal is also coming under attack from the weak signal community. They point to the ARRL's willingness to permit all bandplans to be codified as good operating practice. The weak signal people are worried that different bandplans could develop in different parts of the country. They say it would make SSB and CW DXing impossible. They say that the only acceptable solution is a single national bandplan where certain pieces of spectrum are designated as off limits to FM.

In issuing Rule Making number RM-9259, the FCC has indicated that is not going to accept the League's

call for it to issue a declatory ruling in this matter. Rather, it has set May 21st as the due date for the first round of comments. What it hears back from the ham pubic will probably be the deciding factor as to whether it will issue the ruling that the league requests, issue a formal Notice of Proposed Rule Making or simply let the matter die. Again, comments on RM-9259 are due to the FCC no later than May the 21st.

Michigan Doctor ham saves lives

A retired Michigan doctor has been proclaimed as a hero after saving the lives of four men shipwrecked on a deserted island. And Earl Weston, W8BXO, did it right from the basement of his home in the town of Bloomfield.

Usually, Amateur Radio is recognized for its value during disasters. In this instance, disaster was averted.

It all started Tuesday morning, April 21. That's when Earl 'Doc' Weston, W8BXO, was monitoring the Intercontinental Traffic Net on 14.313 MHZ from his suburban Detroit, Michigan basement:

"A captain from a fifty foot sailing yacht; Capt. Heinze Schilling, HB9HFS; called in with emergency traffic.

The captain was sailing off the coast of a small island in the Bahamas and was attracted by a flashing mirror" Earl Weston, W8BXO

Four men, all believed to be Cuban refugees, were shipwrecked on that island. They had been there several days without food or water. The Coast Guard was contacted:

"The Coast Guard said '...very fine...we will get right into action.' Within an hour Capt. Heinze reported that a Coast Guard helicopter was overhead and landing to pick up the men. They were taken to the city of Nassau because they were in Bahamian waters.

Capt. Schilling certainly is a hero in this event. He even took time to go ashore to talk with the men. He certainly is a fine radio amateur." Earl Weston,

W8BXO

And so is Earl 'Doc' Weston, W8BXO, a fine radio amateur.

Nashville Hams and CB'ers

We have more information regarding the involvement of both hams and CB radio operators in the aftermath of tornadoes that hit Nashville, Tennessee on Thursday, April 16th. According to Tom Delker, K1KY, the communications center was activated with hams responding from Sumner, Rutherford, Davidson, Dickson, Robertson, Wilson, and other Tennessee counties. For several days following the twisters, hams provided communications in support of Red Cross relief operations, primarily in the areas of feeding victims and relief workers, and assessing damage.

But hams were not alone this time. Al Smith of Brentwood, Tennessee tells Newsline that members of his off road CB group were asked by county officials to do welfare checks on several people who live in had to access areas. Smith says that the off roaders used their 11 meter equipped four wheel drive vehicles to reach over two dozen isolated homes in rural areas outside of the city.

Newsline Special Bulletin

Here the report on Newsline financial condition. The good news is that Newsline is here this week. This is because some people close to Newsline and the Newsline staff have chipped in to pay a substantial part of the back bills. The bad news is that Newsline is still broke and could disappear without warning.

As reported last week, Newsline is currently operating without any meaningful funds. The service literally exists day to day and is struggling to survive.

Newsline must raise an estimated $1200 a month each month to keep the service operational. All support

is welcome. The address is the:

Newsline Support Fund
P.O.Box 660937
Arcadia, California
91066

Now, back to the news.

(Via Newsline)

<*>

Japanese economy affecting ham radio

The combined net profits of major Japanese companies plunged almost 25 percent in the last fiscal year. This, as the slumping Japanese economy is forcing many firms to dump bad assets including investments in the United States. This say some might even impact on imported ham radio gear.

A survey by a leading Japanese financial newspaper of 1,744 listed companies shows that net profits for fiscal 1997 nosedived 24.5 percent. Non-manufacturing businesses were in particularly bad shape. Their net profits fell 51.5 percent in the fiscal year that ended March 31.

This is both good news and bad news for the domestic U.S. buyer of ham radio gear. As the Yen and dollar continue to collide, prices will continue to drop. The downside is that the slide cannot go on forever. It means lower ad lower profits that can reach a point where there is no profit at all. At that point some companies might decide to withdraw from the North American market, eventually drying up the supply of new gear available to hams.

(Via various published news reports)

<*>

Buy and Sell Website

Speaking about buying and selling, Karen Johansen, KC5FCU of Metrie, Louisiana tells Newsline that the ARES National web site has established a classifieds page. This, to help hams buy, sell or trade equipment. Karen says that this is a free service. The URL is very simple to remember. It's:

www.ares.org

(Via KC5FCU)

<*>

Radio station license revocation

The FCC has revoked a Texas radio station's license after a judge's finding that the owner engaged in a pattern of outright falsehoods, evasiveness and deception.

The Commission's action was issued on Wednesday, April 22nd. It was the first revocation of a station's license since 1993.

<*>

New WTB Chief

Still with the FCC, word that D'wana R. Terry has been named Chief of the Public Safety and Private Wireless Division of the FCC's Wireless Telecommunications Bureau. This is the bureau that oversees both the Amateur Part 97 and Citizens Radio Part 95 services. Terry has been acting chief since January.

(Via FCC Press Release)

<*>

Arnold on the radio

Bob Arnold, N2JEU, the New York state ham who runs a remotely controllable shortwave receiver on the world wide web is about to become a personality on the radio. Bob tells Newsline that he has completed talks with Radio New Zealand International to host a seven minute computer report as part of their bi-weekly "Mailbox" program. He starts on the air in late May.

(Via N2JEU)

<*>

New Nebraska EC

Matt Anderson, KA0BOJ has been appointed the Emergency Coordinator for Saunders County, Nebraska. He replaces Jim Sweeney, KB0DYY.

(Via news release)

<*>

Five year old YL passes element 1A

A New Jersey pre-teen is on her way to becoming the nations youngest ham radio operator. On Saturday, April 25, Ashley Kopacki, age 5, passed her 5 word per minute Morse code test at an ARRL VEC administered examination session hosted by the County Line Amateur Radio Club.

Ashley is a kindergarten student in Mount Olive, New Jersey. She frequently attends radio club meetings with her father Dave Kopacki, KF2EW. There, she helps with the sign in sheets, and is Official Cookie Taster. Ashley now has a year to study for the Novice written exam.

(Via Hudson Division Loop)

<*>

Big passing grade

A Las Cruces, New Mexico, radio club had eleven candidates pass their Technician exam after a recent Friday night, all day Saturday, and half a day Sunday weekend course.

According to information supplied by Jay Miller, WA5WHN, Mesilla Valley Radio Club had eighteen at the start. Eleven passed both elements, two more passed one element, but five failed both elements. The club also had two upgrades to Tech Plus and one attempt to upgrade to Extra. That candidate passed the theory but failed the code.

K5OI coordinated the effort with help was from five other hams. Tim says that it was heavily based on the ARRL video tapes and the accompanying workbook. This was a lot of work but it was well worth the effort.

(Via WA5WHN)

<*>

The Ian Varley Fund Established

Ian Varley, N2XUB, is in need of assistance from his fellow hams. This, according to Brenda Lee Spagna, N2TTO, writing in the Hudson Division Loop newsletter Spagna says that Ian, who has had epilepsy since childhood, is now also suffering from failing eyesight and frequent seizures. Arrangements have been made for an animal handler called Sheppy's Disability Dogs to training a puppy

to act as Ian's companion and to come to his aid in time of a seizure. The pup will be able to press an alarm pedal in the Varley home and stay by Ian's side until help arrives.

Spagna says that having a dog like this will give Ian back his independence. It will let him go back to enjoying his club meetings and helping out with radio communications at the various charity events with which he has been so active in the past. But the price of Ian's independence will not be cheap. The cost of this dog is $4,300.

As a result, any financial help Ian and his parents can get to help pay for the dog would truly be appreciated. All donations would go directly to Sheppy's for Dogs" and marked to the attention of the 'Ian Varley Fund.' The address is:

Sheppy's Disability Dogs Inc.
125 Marie Drive
Clarksville, Tennessee
37042

For more information about the 'Ian Varley Fund,' you can contact Brenda by e-mail to:

kf2sb@bestweb.net

(Via N2TTO)

<*>

VITA-SAT

Volunteers in Technical Assistance, an organization with close ties to ham radio has received FCC authorization to launch and operate an additional satellite. The bird will be in low Earth orbit operating on 149.81 to 149.9 MHZ for uplink and 400.5983 to 400.645 MHZ as downlink. The satellite will be licensed for non-voice, non-geostationary operation in the Mobile Satellite Service.

<*>

Dayton AMSAT Eatfest

Amateur satellite operators who plan to attend the 1998 Dayton Hamvention are invited to also drop by the AMSAT-North America dinner. This years food extravaganza will be held on Friday, May 15th, starting at 7:00 p.m. at Dayton's Amber Rose Caf&#65533;. Cost including tax and tip is $20.00 per person.

Those interested are asked to please pre-register
with Ed Collins at his e-mail to:

edcollins@worldnet.att.net

<*>

UK Pirate operations

On the International front, the Radio Society of Great Britain reports that ham radio style pirate operations are on the rise in the United Kingdom. The nations Radiocommunications Agency says that the pirates are centered around 6.600 MHZ. The regulatory agency also says that it plans to take enforcement action against any unlicensed operations it hears in the 6.525 to 6.767 MHZ spectrum, This band is assigned in the U.K. for exclusive use by aeronautical services.

<*>

92 year old CW test

Congratulations to British amateur Les Breeze, 2E1FXS who has become the oldest known U.K. citizen to pass a 5 word per minute Morse code test. It was even more of a challenge for Breeze because he is blind. He was assisted in learning the code by his wife Doreen who is not a ham but studied with him in order to help him understand the code.

But Les Breeze is not finished yet. He has announced his intention to study the code and theory so he can upgrade to a full privilege U.K. Class A license.

<*>

DX

In DX, the "DX News Sheet" reports that DL1DA, is expected to be active from Mayotte as FH/DL1DA, on CW. The details on his stay are not known.

And F5PFO will be active from New Caledonia for the next three years. As of air time his callsign is not yet known.

And there are several stations active from Estonia using the special prefix ES80. This is in celebration of the 80th Anniversary of the Estonian Republic. The length of their activity is unknown. QSL as directed on the air.

And the World Association of Christian Radio Amateurs and Listeners will celebrate its 40th Anniversary with a live operation from the grounds of the Newsome South Methodist Church in West Yorkshire, England. Using a unique radio callsign GB4OWR, the on air celebration will take place the on May 5th, 6th, 8th, 9th and-10th. Listen for GB4OWR on 3.747, 7.047, 14.333, 18.133, 21.350 and 28.333 MHz. Times of operation subject to propagation and operator availability. Further information available from Harold Turner, G4YRH, at his callbook address.

Also, effective immediately the addresses and managers for the ARRL W5 and Alaska Incoming QSL Bureaus have changed. The W5 QSL Bureau now is the:

Magnolia DX Association
P.O.Box 999
Wiggins, MS
39577

The new Alaska QSL Bureau is at:

P.O.Box 520343
Big Lake, Alaska
99652

Newsline around the world

And finally, each week we recognize a bulletin station or organization that retransmits the Newsline service. This week, we are proud to announce that Newsline is now part of a Sunday Morning net in Western Australia.

Word from Will McGhie, VK6UU, that for the past eight weeks, Newsline is heard Sunday Mornings at 10:15 local time -- that's 02:15 UTC on a repeater network originating on 2 meters at VK6RAP and on 70 cm on VK6RUF, both in Perth. The linked 2 meter stations include VK6RCT, VK6RMS, VK6RAW, VK6RMW and VK6RBN. Add an FM simplex HF gateway on 29.120 MHZ in Perth and the Network is complete. Almost.

VK6UU says there is a possibility of High Frequency re-broadcast on 80M through to 15 meters depending how many HF rebroadcast stations stay on after the VK6WIA QST.

Our thanks and 73 to Will and the Hams down under who make Newsline available to Amateurs in Western

Australia.

(Via VK6UU)

<*>

With thanks to AMSAT, the ARRL, the Hudson Division Loop, Australia'a Q-News and the W5YI Report, that's all from the Amateur Radio Newsline. You can write to us at:

Newsline
P.O.Box 660937
Arcadia, California
91066

Our web page is at:

www.arnewsline.org

and our e-mail address is:

newsline@ix.netcom.com

A quick item before we go. Thanks to Hap Holly, KC9RP of RAIN, Newsline will have a booth location at the upcoming Dayton Hamvention. Hap has graciously extended an invitation for Newsline to share his booth. The location number is 719 and we hope that you can drop by.

For now, with Bill Pasternak, WA6ITF at our editors desk, we at Newsline say 73 and we thank you for listening.

Hi Ed,

Given the transient nature of your interference, suppression at the source is a problem for which I have no good answer. Even if jamming was legal it wouldn't likely help. You would interfere with yourself! Would also probably elicit even more from the truckers in retaliation.

All may not be lost. You might be able to make your system more immune to the signals. Not a bad idea, since fully legal signals, should transmitters pass by, can cause the same problem. The amp is acting as a receiver as well as an amp - it shouldn't, but apparently is.

A likely point of entry for the interference is the power line. A GOOD filter on the power line where it enters the amp may help. Beware of "junk", cheapo filters. Another very likely point of entry is the input line (guitar?). "Bypass capacitors" of the right value at amp (and maybe instrument) will short-out interfering radio freq, but not the signal from the instrument. Exact values will vary with details, but would expect 500 pf -to- .01 uf will be the value needed. Another trick is to slide ferrite beads over the line and instrument cords.

Woody

Okay, here's my dilemna.
I play guitar. I have a guitar amplifier. I live along a well-traveled highway.

When the amplifier is on, I pick up amplified cb signals from truckers who have illegally amplified cb rigs. I have to hurry and shut the amplifier off, because even with the volume turned all the way down, the signal is amplified loud enough to leave my ears ringing.

Also, I am worried about damage to my amp, I have a 1965 Fender Super Reverb, which runs on vacuum tubes. This amp is a highly sought after piece.

I am pissed off beyond belief at these hillbilly jackasses with their cb radios. Is there any way to stop this? or to jam their signals? I don't care if it's illegal, after all, no one can trace a 10 second burst of interference. What they're doing is illegal too.

: amplifier off, because even with the volume turned all the way down,
: the signal is amplified loud enough to leave my ears ringing.

The volume control won't help, because the interference is being picked up
after the volume control.

It's possible for a legal CB to cause interference too, but your assumtion
that amplifiers are involved could be vaild as well.

: Also, I am worried about damage to my amp, I have a 1965 Fender Super
: Reverb, which runs on vacuum tubes. This amp is a highly sought after
: piece.

It's VERY difficult to damage a tube amp, except maybe the speakers

: I am pissed off beyond belief at these hillbilly jackasses with their
: cb radios. Is there any way to stop this?

You won't have much luck stopping them.

: or to jam their signals?

Jamming them would have no effect.

: I don't care if it's illegal, after all, no one can trace a 10 second
: burst of interference. What they're doing is illegal too.

Your best bet is to throw caps and/or inductors(ferrite beads will do) on
the tube grids.
But first, try unplugging the guitar cable-if the problem goes away, then
if the plugs open, put a ferrite bead on the center lead on both ends, if
that helps, but not enough, then use a low value ceramic cap across the
center and shield leads in the plugs-the value is not critical, but if you
use too high a value, your guitar will sound muffled(loss of high freqs).
Start with a .01 Mf or .05 Mf to start.
If your cable has molded plugs, then put the parts on the jack.

sheesh! What a grouchy post! Seriously, though, I favor diddying down to Rat Shack and picking up a bunch of ferrite split beads and applying them liberally on pickup and audio out cables, power cord, etc, and maybe trying a more effective ground and possibly aluminum foil applied to the inside of the enclosure if it is not metal, taking due care not to short anything out and cause a fire. Invest in higher quality cables, too, with proper shielding. Even if the CBers are using illegal power levels, "power mikes", etc, you should still be able to keep the interference down with the above measures, and not have to shell out big bucks to do it. The experience and knowledge you acquire as you work on this from a technical angle will probably come in handy again sometime.

Forget about trying to "get" those pesky CBers. Next thing you know, they will be circling your block with kilowatt rigs and making sure you can't even make a decent phone call anymore. A mobile bootlegger is pretty hard to catch, and any interference you cause to him is easily remedied by his simply driving a couple of miles down the road; meanwhile, you will be interfering with your neighbors' enjoyment of their TV, phone, stereo, etc. More physically violent, confrontational approaches would probably also backfire. Don't let it get to you. Just stay cool, have a brewskie, not a tantrum, try the ferrite-choke/bypass-capacitor/shielding approach, and if that doesn't work, either move or go acoustic.

1X, CHECHNYA REPUBLIC. Khamzat, 1X5AA, located near the city of Grozny, continues to be very active on 20 meters CW. Activity seems to take place between 2300 and 0130z around 14015 kHz. Many ask if this is a new entity. The answer now is NO. For DXCC purposes, if license and documentation is acceptable, 1X5AA counts for European Russia. QSL via W3HNK.

3B7, ST. BRANDON (UPDATE). A press release by Urs, HB9ABO, reports that HB9JAI just received the licence for their 3B7 DXpedition from the Mauritian Telecommunication authorities. The callsign that was issued is 3B7RF. The updated list of operators will be: 3B8CF, HB9ABO, HB9ADP, HB9AFH, HB9AFI, HB9AHL, HB9AJW, HB9BQI, HB9BQW, HB9BXE, HB9JAI, JA3IG, K5KG and W7SE. Four stations will be active from two sites on Raphael Island, one of the 22 islands making up the archipelago. The operation is scheduled to start May 7th and last until May 17th. The operation has received an ARRL Colvin Award grant of $5000 (USD) to help in funding. During the first three days, operations will be on mainly 40, 20 and 15 meters, but the announced suggested frequency are:

CW - 1826.5, 3507, 7007, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 1842, 3799, 7065, 14195, 18145, 21295, 24945 and 28475
RTTY - 7035, 14080, 18105, 21080 and 28080 kHz

The QSL information is via HB9RF: P.O. Box 37, CH-6319 Allenwinden, Switzerland. Cards received via bureau will be replied via the bureau. For further information regarding the DXpedition can be found on the WEB site: http://www.3b7-brandon.ch
ADDED NOTE: OPDX InterNet Subscribers will receive an additional bulletin

containing the complete press release by Urs, HB9ABO.

5X, UGANDA. Peter, ON6TT, signing 5X1T, has been quite active on the WARC bands. Look for him on 17 or 12 meters beginning around 1800z. QSL via ON5NT.

6th ANNUAL DAYTON HAMVENTION CONTEST DINNER will be held on May 16th at 6:30 PM. There will be inductees into the CQ Contest Hall of Fame "Class of 1998", door prizes and more. Roger, G3SXW, will be the guest dinner speaker. There is LIMITED seating of 300. Ticket sales are ahead of last year. Place your ticket order now at Radio BookStore at 1-800-457-7373 or 603-899-6957 (10 am to 6 pm eastern USA time). Ticket order deadline is approaching fast. Don't be left out!

6Y5, JAMAICA. Mitsumasa, N2HNQ, has been active on 15 and 12 meters. Activity on CW, SSB and RTTY have been reported. Look for him signing N2HNQ/6Y5. QSL via JH4IFF. Also, look for Katsuyuki, N8QDB, signing N8QDB/6Y5. Activity has been mainly on CW, with some SSB, on 12, 15, 20 and 40 meters. QSL via JR4ISF. The length of both operations is unknown.

BI, XI-SHA ISLAND (CHINA). Operators BD7IA, BD7IX, BD7JA, BD7KW, BG7NQ, and BD7YA are planning to operate from here. The team of operators call themselves the "BI7Y Ham Group" and will use the callsign BI7Y from Xi-Sha. Activity should have begun, but no QSNs have been reported. Their operation is to last until May 10th. Their departure may have been delayed because the team has mentioned that a ship only travels there once a month, and they were not sure on the exact day. The group plans to be active on 40, 20, 15, 10 meters with operations on SSB, CW and RTTY. QSL via BD7JA (QSL direct only) to: Yang, P.O. Box 1713 Guangzhou (510600) P.R. China.

BI3H, SHIJIUTUO ISLANDS (Upcoming operation and QSL Update). The group of Chinese who activated this new IOTA (AS-134) during the April 24-26th BI3H operation will be going back again. The group made 2698 QSOs (922 on CW and 1776 on SSB) in 23 hours. They will return to the island again in July during the IOTA Contest. QSL cards for the BI3H DXpedition will be printed after the July operation. QSL Manager Mac, W3HC, has received over 200 letters already for cards and some wanted their cards ASAP so they could send them in to ARRL for credit for China. The sponsors for the QSLs are: N1XME/Joe, AA8GQ/Helmut, K5AB/Alan, and AD4LX/Ray.

EP, IRAN. Ali, EP2MKO, has been active recently on the bottom portion on 20 meters (14011 kHz) bewteen 2000 and 2100z. Also, check 15 meters (21004 kHz) after 2130z. QSL via UA6HCW.

FO0/H40 SUMMARY LETTER FROM JA1BK (provided by Kaz, JH1ORA). OPDX InteNet Subscribers will receive a letter from Kan, JA1BK, as an additional bulletin.

FO0FI/FO0FR SUMMARY FROM Bob/W6RJ AND Rob/W6KR (provide by Ham Radio Oulet, HRO). OPDX InteNet Subscribers will receive information posted on the HRO WEB SITE (http://hamradio.com) as an additional bulletin.

FR5/T, TROMELIN ISLAND. Henri, FR5ZQ/T, continues to be active and has been appearing on 14272 kHz at or around 1400z, sometimes with Hito, JA8FCG. It has been mentioned by Hito that Henri doesn't like pile-ups, so he makes a list for Henri.

HP3, PANAMA. Gary, K4GZ, and Bill, W4WX, will be active from Volcan, Panama, May 12-18th. Both will be signing /HP3 on SSB, CW and RTTY. QSL to home callsigns with SASE or via bureau.

IOTA NEWS.....
Tony/WF1N and Lou/W1DIG (ex KA1DIG) will be on Pot Island (NA-136, Thimble Island Group) May 15-17th. Operation will start around 1600z Friday and end about 1800z Sunday. They plan to operate with a tribander and 40 meters dipole, and amp (provided Murphy leaves the generator alone). Look for them on/near the usual IOTA SSB frequencies. QSL to home callsign direct or via the bureau. Pot Island also has a USI number of CT-017S. Anyone needing info or have any special requests or questions can E-mail Tony at: megahertz@webconn.net

QSL INFO AND NEWS.....
TA QSL BUREAU SERVICE. Yuksel Hak, TA1BY, Secretary of the Turkish Amateur Radio Society, reports that all QSL correspondence should be made to the following mentioned address as of May 1, 1998: TRAC, QSL Bureau, P.O. Box 699, 80005 Karakoy, Istanbul - TURKEY

Several have asked for K6SLO (ex-WA6SLO). Here it is: Richard Whisler, 716 Hill Ave, South San Francisco, CA 94080-4242.

RX1, FRANZ JOSEF LAND. RX1OX/FJL was heard this past week on 30 and 20 meters CW. Check between 2100 and 2200z.

SPECIAL CALLSIGN ON THE AIR FROM AFRICA TELECOM 98. A special callsign, ZS98IARU, will be on the air from Monday, May 4th, to Saturday, May 9t, from the IARU Region One stand at Africa Telecom 98. The conference and exhibition are being held at the Expo Centre in Johannesburg, South Africa. Amateur Radio is well represented at this important ITU event. The station will be on the air during the exhibition opening times: 0800-1600z. Arrangements are being made to operate the station outside exhibition hours. A special QSL card will be issued. The QSL address is: P.O. BOX 1842, Hillcrest 3650.

SPECIAL EVENT STATION. Look for special event station GI6YM to be active until the end of the year end. The station is on the air in celebration of the 75th Anniversary of the YMCA Radio Club. Activity will be on 80-10 meters CW and SSB. QSL via K1WY.

SPECIAL EVENT STATION. The Guayaquil Radio Club (GRC) is celebrating 75 years of their foundation with a special commemorative QSL. The GRC invites all ham operators of the world to make a contact with the official GRC station, HC2GRC, on May 9th, from the 0000-2400 (Ecuador time, -5 GMT) on the HF bands.

SPECIAL EVENT STATION. The WAMRAC and the World Amateur Radio Christian Association (WACRAL) from Hudderfields will be celebrating its 40th

anniversary and will be on the air as GB4OWR during May 5-6th and May 8-10th on the following suggested frequencies and time periods. On Friday, May 8th, and Saturday, May 9th: 14333 (0600-0700z), 3747 (0700-0745z), 7045-7050 (0815-0930z), 14333 (0930-1100z), 21350 (1230-1330z), 28333 (1600-1800z) and 21350 (1800-1900z). On Sunday, May 10th: The usual Sunday a.m. U.K. WACRAL Net on 3747 kHz at 0700-0800z. The station will be in use on Tuesday the 5th and Wednesday the 6th on 3747 kHz between 0900-1100z and 1230-1430z, although other bands may be used briefly. For earlier times or later times on these two days, the frequencies assigned for Friday and Saturday can be used. NOTE: All planned frequencies are +/- QRM.

SPECIAL EVENT UPDATE. Last week in OPDX.354 we mentioned details on the special events stations that would be active during 1998 World Football Cup. This event is organized by FRANCE and the REF-UNION (French Amateur Radio Society) and they have decided to propose during this world competition a Diploma (1998 WORLD FOOTBALL CUP AWARD) for all Hams and SWLs in the world. Between June 10th and July 12th, 10 specials callsigns will be activated from each city where competition will take place (Please refer to OPDX.354 for callsigns and locations). They have now announced that French hams will use a special prefix FBC (for FootBall Cup, ex. FBC6REF). ONLY contacts/heard made between June 10th and July 12, 1998, are valid for the awards. Awards that are available:

First CLASS - 5 different TM stations plus 20 different FBC
Second CLASS
or EXCELLENCE - The 10 different TM stations plus 50 different FBC. Only a certified list of contacts/heard is necessary with application, NO QSLs
FEE: 60FF or 12 IRC or 12 U.S. green stamps (any other money is NOT ACCEPTED)
MANAGER: FB1NAN, Patrick ROCHE, 33 Rue de Terre Blanche, F-63118 CEBAZAT, FRANCE

S2,BANGLADESH. The "DX News Sheet" reports that S21K is newly licensed and is a resident on Bhola Island. This also may be a new IOTA, but no other details have been provided and no QSNs have been reported.

TJ, CAMEROON. The "DX News Letter" reports John, WB4MBU/TT8JFC, currently in Chad, will be going here for 2 months. Activity will possibly take place during May and June. No other details and dates were mentioned, but he has applied for a license.

TT8, CHAD. Erci, TT8JE, has been very active on 20 meters CW/SSB. Activity seems to be around/between 2100z and 0100z. Check 14025 and 14195 kHz. QSL via F6FNU.

VP2V, BRITISH VIRGIN ISLANDS. Look for operators Tom/K6CT, Terry/N6CW and Frederick/K9VV to be active as VP2VDX in the CQWW WPX CW Contest as a Multi/Single entry. The group will be here May 27th through June 2nd. Activity outside the contest will be on the WARC bands and 6 meters. QSL via K6CT.

VP8/G, SOUTH GEORGIA. "The Daily DX" reports that Carl, G4VFU, who will be leaving the Falkland Islands by the time you read this, plans to be active from here sometime between December, 1998, and February, 1999.

Are you in the habit of operating on 2 mtrs FM on another radio while
connected to the Packetcluster? I occassionally lose my connection to
the cluster because of desense when I'm chatting with one of the
locals on simplex. The same thing you described happens. I notice I
haven't gotten a spot in awhile, and hit the enter key only to find
I'm disconnected. Just a thought. . .

Hi Vic...

When the cluster is relatively quiet activity-wise, watch ur xmit indicator
on the radio.. hit the enter key, you should xmit a packet, see one
come back from the cluster and see ur xmit indicator ack one packet
back. If it repeatedly retries on a quiet cluster something isn't set
properly.

Give the TNC plenty of audio drive and if your TNC depends on the channel
being clear of traffic before it allows the radio to xmit, make sure the
squelch is set properly. Also make sure your PC ot TNC isn't putting
out garbage on the cluster freq. causing the TNC to hold off sending acks
back to the cluster, which will also cause a timeout on that end.

Hard to diagnose without actually being in the shack!

73/DX from Arizona

Gary

Thursday, May 7, 1998, KF2GV Jack Herrick and his legal team will take on the Town of Oyster Bay on Long Island, NY to obtain approval for his 120 ft amateur radio tower. What we need is to show support for Jack by coming down to the hearing with you amateur radio name tag on. We are not asking you to speak, just be there for support.

The hearing officially starts at 7:00 PM but since we are the last case on the docket we will not be on until after 9:00 PM. So PLEASE spread the word and do all you can to support amateur radio on Long Island.

Source record: 29402

I know the survey was over a short period of time,
and probably not very scientific but here are
the results:

40% DX4WIN
20% LOGIC
20% Log-EQF
20% Other

So, I seems that DX4WIN is 2 to 1 over the next 2
most popular programs for general logging.

Super Duper (SD) was the favorite contest logging
program, followed by (CT)?, then TR-Log and Log-EQF

Thanks to everyone who sent their information.

I ordered DX4WIN today!

Answer to your problem...get a good audio frequency filter and put it at
the input to your
amp. That will keep those nasty CBers out of it. Else you might move away
from a major
highway.

You did not say what kind of music you play. If it is not Country Western
let me know where
you live. I am fixing to make a tour of the U. S. I will be running HF
Mbile with a 600 watt
amp and I will be sure to program that highway into my tour.

When the audio amplifier tends to pick up RF and the level of
interference is independent from setting of the volume control, I find
that the most effective way is to use ferrite rods and wind the AC
cord and speaker cords. This cures 90 per cent of all problems!!
Bypassing with capacitors can affect the audio sound and in some cases
turn the amp into an oscillator.

Your sysop may have a setting which disconnects inactive subs.

To get around that, set your 'CONPERM' to 'ON'.

Hans

Try putting some ferrit filters on you power cord and speaker leads.
You should be able to get the information on how to do that from a
book on Amateur Radio in most libraries.

Good Luck,
Bob

I have an ALPHA 87A for sale from a silent key. He was a fanatic about keeping his equipment mint!
Very little use as he's been sick for a while.

A new one from the factory is $6390 + shipping.

Grab this one for $4950 (Firm) pick up in West LA or you pay packing/shipping.

(310) 478-4987 or e-mail below

10 Kw military surplus generator. 220/110 vac. 4-cyl gas engine.
Totally Self-contained. Engine runs like a clock! Gen set regulation
needs heavy load to flash the field coils but runs well otherwise. Could
probably use a cleaning of the relay contacts.

Set is on an 'un-sprung' two wheel trailer which is ok for short distance
towing... would recommend it for a long trip...

Price $750 obo. Will trade for small hf mobile.

Please e-mail responses

ZCZC AE18
QST de W1AW
DX Bulletin 18 ARLD018
From ARRL Headquarters
Newington CT May 7, 1998
To all radio amateurs

SB DX ARL ARLD018
ARLD018 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, DXNS, The 599Rpt and Contest Corral from QST. Thanks to all.

AGALEGA AND SAINT BRANDON ISLANDS, 3B7. 3B7RF is QRV until May 14. They have been spotted 24 khz up from the band edges. QSL via HB9RF.

MAURITIUS, 3B8. Michael, DL1MHM, is QRV as 3B8/DL1MHM until May 13. QSL to home call.

UGANDA, 5X. Peter, ON6TT, is QRV as 5X1T, and is quite active on the newer bands. Look for him on 17 or 12 meters around 1800z. QSL via ON5NT.

PHILIPPINES, DU. Klaus, DL5ZAH, is QRV from Manila as DU1/DL5ZAH for the next four years. He operates only CW on 80 to 10 meters. He will be active in the CQ WW WPX Contest. QSL via the DARC QSL bureau.

BELARUS, EU. Look for Special Event Stations EV2DP, EV3DP, EV6DP, EV6ZK, and EV5W to be QRV until May 10 to commemorate the Liberation of Belarus in 1944. QSL via operator's instructions.

PANAMA, HP. Gary, K4GZ, and Bill, W4WX, will be QRV from May 12 to 18 from Volcan as K4GZ/HP3 and W4WX/HP3, respectively. They will operate CW, SSB and RTTY. QSL to home calls.

VATICAN, HV. HV4NAC has been QRV on 14195 khz around 1030z. QSL via IK0FVC.

OGASAWARA ISLANDS, JD1. 7L1UVF/JD1 is active from Chuchi Jima, the largest island in the Ogasawara group. QSL to home call.

SINT MAARTEN, PJ5. Don, KF4KRZ is active as PJ8DM from Saba Island and is here indefinitely. QSL to home call.

EUROPEAN RUSSIA, UA. Members of the Russian Robinson Club will be QRV as RK3DZJ/3 from May 8 to 11 from Ramensky Island in the Rybinsk Sea. QSL to home call.

GREECE, SV. Peter, DK1RP, is QRV until May 12 as SV8/DK1RP/p from Skiathos Island, IOTA EU-072. He will operate CW on 80 to 10 meters. QSL to home call. Meanwhile, Special Event Station J47LAF is active until May 17. QSL via SV7CO.

CHAD, TT. TT8JE is generally active on 20 meters using CW and SSB around 2100 and 0100z. Check 14025 and 14195 kHz. QSL via F6FNU.

CAMBODIA, XU. Ichinose, JA6BND, will be active as XU6BND for 30 days. He can be found most days on 15 meters SSB around 0000 and 1200z. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL VHF/UHF Spring Sprint, CQ-M International DX Contest, FISTS CW Club Spring Sprint and the Indiana, Nevada and Oregon QSO Parties will certainly keep contesters busy this upcoming weekend. Please see May QST, page 96 for details.

Why don't you cover some of those old CB inspired songs like "Convoy"
and that way the audience will think it's all part of the show.

Hello,

If you like, take a peek at our new located site....

And download the ode to Bill Mitchell: A bitter Free Symphony
(a large part, at least...) produced exclusive for FRS-H by Joop ter
Zee and Mido.

The file is in .wav format and is about 2 mb, so it will take you
some 12 min. at 33k

Get it at our *new* address

http://www.gironet.nl/home/freak55/home.htm

Greetings,

FRS-H

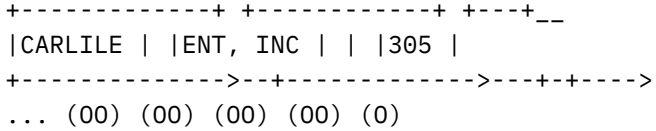
Mike (KD4LLA) and Rose (KL0LY)
Fairbanks, AK



Alaska is alot like Georgia, well-kept cabins with neatly trimmed lawns sit next to plywood shacks and rusting trailers with yards full of blue tarps, junk cars, and various works in progress!

Alaska has over $23,000,000,000 (twenty-three billion dollars) in the Permanent Dividend Fund. Enough to send every man, woman, and child to Hawaii for a week. But do you think that the roads will get fixed, NO!

Windows 95 (win-DOH-z), n. A thirty-two bit extension and graphical shell to a sixteen bit patch to an eight bit operating system originally coded for a four bit microprocessor which was written by a two bit company that can't stand one bit of competition.

A 68 K resistor at the grid of the first tube
your guitar connects to and another 68 K resistor
at the tube right after the volume control
should coreect your problems.

The resistors have one end connected to the grid directly.
To do that U will have to pull the grid leak R and C, and then
connect this Suppresor resitor of 68K to grid, and then
connect the grid leaks RC to the other end of the Suppresor R.

This should fix the problems.

Off topically speaking about grid leaks;
As i remember it, a grid dipper was intended to
replace grids that had leaked from a tube type rig.

There was a grid tank under the bench for the grids
to leak into, (got kinda smelly at times) and the grid dipper
was kept in or near the tank.

They never worked well at this.
Know why?

The Bias on the simple oscillator in a grid dipper?

Grid leak, of cuss.

Wherefore you could not keep the dipper full of grids
long enuff to get them back into the rig.

Thought you'd like to know.

For Sale, Henry 2K-2 Amplifier

I have a Henry 2K-2 floor console Amp for
sale. It is in very good condition. It
runs a pair of 3-400Z tubes that have full
output 1400+ watts output. It works on 10
through 80 meters. Has tuned inputs. It
uses forced air cooling with chimneys on
each tube. It will run eater 3-400Z or
3-500Z tubes. Very clean inside and out.
With book.

$600.00 Or trade for a HF Rig.

Will not ship, but would meet within 200
miles of Eureka Ca.

Hi

As far as I know, SM0CCM handles the QSLs himself, for this activity.

Fellow hams:

The AM transmission on 3945 in the evening eminates from the Deutsche Telekom station at Juelich, Germany, and is a programme of The Overcomer Ministry by Brother Stair in Walterboro (USA).

If you wish to make comments to Deutsche Telekom you may Email them at:

info@dtag.de

If you wish to contact the source of the subject content of these transmissions, contact Brother Stair at:

overcomer@lowcountry.com

I am sure both Deutsche Telekom and Brother Stair would like to receive mail from all those interested in this problem.

Bill W2BLC

Howdy, folks. I just launched an Amateur Radio website that is
focused on HF radio. It is at http://hfradio.org - come by and visit.
It is very new. Feedback is most welcomed - what is it you most want
on an HF Radio Amateur website?

Current features at http://hfradio.org include

+ Propagational data, forcasts, and related information.
+ Online discussion forums (Elmer, DX, and more coming)
+ AZ_PROJ server (under development to bring propagation overlays)
+ and more...

Please stop by http://hfradio.org

Thanks.

Are they not required to beam their transmissions within Region I? (or at least, away from Region II) The BBC transmissions (and others already existant in that band) have not been a problem for Region II; this signal seems to be of unusual strength.

Actually, I'd like to recommend they QSY to one of our "jammer net" frequencies. That way, they'll provide a broadcast service to their own country and a public service to U.S. amateurs at the same time!

Having some hum problems with my K.W. TS-140s and a PK232. When I have the din connector plugged into the rig for rtty, I get hum on my audio when transmitting on phone. I could have the pk232 turned off and i still get hum. I pull the din connector out and the hum goes away. Bad ground? Bad connection? BTW, rtty works like a champ. Any ideas would be greatly appreciated.

Hello

If you interisting for a programm Locator/geographicals Cordinates and
to calculate with city, country, and HAM prefix... It give the antenna
azimut and distance (Km). You can see the result on the very nice
World Map and you can to zoom....

You can to download this programm at the url address :

http://www.mygale.org/07/f1usc/ra/winlocat.htm

Best regards, 73's

All of the equipment listed below is my personal equipmnet!
I have not had the time to get my license! It is about 1.5 years old. All the equipment is new and has manuals. It works well as it has not been run for more than 5-10 hours per piece...I have no time to get my license so I have deceided to sell it all.....

1- Yaesu FT1000D with manuals excellent shape this is the deluxe model , I have many extras with this.
a.) Kam-Kamtronics
b.) Cushcraft 5 Band Vertical Antenna
c.) Elctorinic Keyer-
d.) Yeasu Heavy Duty Rotor
e.) Rotor Wire 100ft.

I also have a FT2400 brand new and a 12 volt power supply

I also have an FT470 with large battery..

Make me a reasonable offer on the above items...

I hae invested over $7000 in all this equipment .

I will not give them away so please don't embarrass me and you by some low stupid offer. I will sell for a fair price for these Unused pieces of equipment. Make me and offer by the piece or all of it.

If you don't want to be embarassed with a stupid offer why don't you put
prices on the items foresale? I always make the assumption that anyone
who doesn't have an aasking price wants too much for the item...

SB DX @ WW $OPDX.356
Ohio/Penn DX Bulletin No. 356

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 356
BID: $OPDX.356
May 11, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1KSZ, WB2RAJ/WB2YQH & The 59(9) DXReport, NG3K, KH6BZF, N6ED, W6RGG, W6TER, K8RF, WD8MGQ, AH0W/OH2LVG, DL7VSN, EA2BUF, F6AJA & LNDX, G0PSE, IK4CIE, LA6LHA, LW8EZU, ON4CEL, PP5LL, SM0AGD, VE7TCP, VE9AA, VK1TX, VK3AJJ and ZS5BBO following DX information.

FEW NOTES FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I can not guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please, continue to send your information (you never know!).
THE Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.
OPDX InterNet Subscribers will receive a few extra bulletins this week containing: KH6BZF Propagation Report (Part One and Two), 3B7RF Press Release, Details on the 3B7RF Log Search (by Lyndon, VE7TCP) and Hamradio Vention 1998 (Germany).

3B7, ST. BRANDON. 3B7RF is on the air. Activity should last until May 17th. Search engines are available to verify contacts at either of the following WEB sites:

http://ve7tcp.ampr.org/cgi-bin/logsearch-3b7rf
http://www.3b7-brandon.ch/

A5, BHUTAN. It was announced at last weekend's International DX Convention at Visalia that an invitation has been extended to Yasuo "Zorro" Miyazawa, JH1AJT, by the Kingdom of Bhutan to conduct a return DXpedition from that country. Zorro, who operated from Bhutan in February, 1995, has assembled a team of operators representing six countries from Asia, Europe

and the USA and New Zealand. The DXpedition is expected to occur in early 1999 with propagation being the main factor in timing. Frank Smith, AH0W/OH2LVG, states the Midway-Kure DX Foundation will actively update the DX Community with all details as this project moves forward.

CY9AA, ST. PAUL ISLAND UPDATE. Mike, VE9AA, reports that the CY9AA team would like to welcome 2 new operators to the operations:
Brian, ND3F, well-known Rover and VHF/hf contester.
Mike, N7MB, member of the Voo-Dudes contest/DXpedition group.
Mike states that they are still looking for another one or two more operators to travel with them to St. Paul Island from June 25th to July 15th for a 10 day stay during that window (probably June 25th-July 7th or so depending on unpredictable WX).

CY9RF, ST. PAUL ISLAND UPDATE. Dan, K8RF, reports the CY9 team will be using the callsign CY9RF for their upcoming DXpedition to St. Paul Island. They will be a Multi-Operator/ Multi-Transmitter entry in the CQWW WPX CW Contest May 30-31st. QSL CY9RF via K8RF. The start-up date will be on May 28th and last until June 2nd. A serious effort will be put into Topband operation, as well as 80 and 40 meters. On 160 meters, they will use an Inverted L, on 80 a full size vertical, and on 40 a pair of phased verticals. They will string some short beverages to USA and EU. On the high bands, they will use a Cushcraft A3S Tribander and a Cushcraft 3 element monobander for 10 meters. Unfortunately, one of their operators, Geoff/W0CG, has had to drop out due to work conflicts, so they are in need of another good CW operator. If you are interested, please drop Dan a line at (k8rf@fuse.net) or call Dan at (513) 232-2182.

ER9, MOLDOVA. The Secretary of ARM, Valery Metaxa, ER1DA, reports that now until May 17th, the special callsign ER9V will be active in commemoration of the Victory Day on all bands CW/SSB. QSL via ER1DA:
P.O.B. 9537 KISHINEV MD-2071 MOLDOVA EUROPE

FRENCH NEWS. French operators now have the permission to use the 1810-1830 kHz segment in a secondary status in addition to the 1830-1850 kHz segment they have been using before.

F, OISEAUX ISLAND (France). Alvaro, EA2BUF, reports he has permission to activate this French island reservation, which normally has a "NO ENTRY" policy, using the callsign F/EA2BUF/p. This island will count for the French Island Award and has a new island reference number of DIFM AT-29. Permission was granted for two days during the mornings. Alvaro is hoping for May 17th and May 24th. QSL via EA2BUF direct or REF (France-Bureau).

H75, ISLA DE VENADO (New IOTA!). Mike/AD5A, Michael/AB5EB, Buzz/N5FTR and Buzz/N5UR will activate a new IOTA from the Nicaraguan Caribbean Sea Coast South Group, little letter b. They will be on from May 22nd until May 24th, running two stations. They will be using a 5 band beam for 20, 17, 15, 12, and 10 meters, and a vertical for 80-10 meters. The focus will be on the IOTA frequencies using CW and SSB, and they will work 40 meters CW (check 7010 and 7040 kHz) after dark to try and work Europe in

their Nicaraguan evening, and then Japan at their sunrise. They hope to have the special callsign H75A, but will not receive the callsign until they arrive! Otherwise, they will operate /YN4. John, WD8MGQ, will be the PILOT STATION for the expedition. Please let John know via E-mail (wd8mgq@tir.com) of any input or suggestions for the expedition. While the expedition will not have access to E-mail, they will maintain a regular schedule with John and adjust strategies as necessary. They have to carry all their own food, water and gasoline, and the temperature will be near 100 every day unless it rains! They are hoping to put 4000 QSOs in their logs if the propagation settles down. QSL via N5FTR: Buzz Loeschman, 717 Milton, Angleton TX 77515. At this time they have no corporate sponsorship.

IA5, ELBA ISLAND (ITALY). Victor, IK4CIE, reports to us that he will be activating an island in the Tuscany Region Group (IOTA EU-028) from May 23rd through June 5th. He will be signing IA5/IK4CIE. Activity will be only CW with 100W and vertical GP on all band 80-10 meters including the WARC bands. Victor will also participate in the CQWW WPX Contest for some hours. QSLs are "OK" via bureau.

MORE IOTA NEWS FROM LNDX.....
Gerard, who is now HR5/F2JD up to May 24th, will try to be active from Cayos Cochinos (IOTA NA-160) or from Roatan (IOTA NA-57) next week.

F5NBX and F5RBB will be active from Chateau d'If (IOTA EU-95) from May 22-24th. They will be active on CW and SSB.

F5HA, F5OCP, F1SDQ, F5IQC, F5LOW, F5SZA, F5SZB, F6ANA and F5RRW will use the TM0AIX call sign from Aix island (IOTA EU-32) from May 21 to 24th. They will be on 40/20/10 meters.

F5MRP and ON4ZD will be from Fort Enet (IOTA EU-32) from June 12th (around 1200z) to June 14th (around 1200z). They will be active mostly in CW.

NCDXF PRESS RELEASE. Bob Vallio, W6RGG, Vice President of NCDXF, reports that at its meeting during the International DX Convention held May 1-3rd in Visalia, CA, the Northern California DX Foundation elected Chuck Ternes, N6OJ, to the position of Director. Chuck has previously served as an Advisor to the Board of Directors. Information on the Foundation may be found at < http://www.ncdxf.org >.

PQ5/PR5, MEL ISLAND (Brazil). Operators PP5AP/Rod, PP5AVM/Luc, PP5LL/Jay, PP5YZ/John, PY2HN, PY5GB/Gab, PY5BF/Fox and PY5ZT/Wil will activate this Brazilian island in the Parana State Group May 28-31st. This island has the following reference numbers: SA-047, DIB-24, DFH(PR-01) and DFB(PR-01). Look for PR5R to be used on SSB and PQ5L on CW. Look for them to be on the IOTA frequencies, the Brazil DX Net and the 247 DX Net. QSl via PP5LL DIRECT.

QSL INFO AND NEWS.....
AX1TX QSLS. Tex, VK1TX, reports to OPDX that cards for this special

callsign, which was activate for Australia Day on January 26th (1998), have been received from the printer. Look for them to start coming out. Please QSL via the bureau or direct to: Alex (TEX) Ihasz, 27 Buckley Cct., KAMBAH A.C.T., 2902 Australia.

TXK8K QSLS. It has been reported that FK8VHN is stating one "U.S. Green Stamp" is not enough postage for a QSL from this contest station which was active during 1998 CQWW WPX SSB. QSL cards are being received with the following message: "1 $ is equivalent to 100 XPF and stamping for North America, South America and Asia is 135 XPF, and for Europe it is 155 XPF, so 1 $ is not enough for stamping."

The log of GB0SM (IOTA EU-011) which ran from April 25th to May 1st, is now accessible on the Web. It resides in the "Islands on the Web" homepage of N1HRW/Chris. To check if your call is in the log, connect to: http://islandchaser.com
Click on the "Logs" window and you will find the GB0SM log in the "On Line Logs" menu. This is an interactive web site, so just type your callsign into the box, and if you are in the log, the date, time, band and mode of the QSO will appear. It is also possible to request a QSL card via Bureau QSL while connected.

5A21PA QSLS. It was reported to OPDX that the QSL cards for the 5A21PA DXpedition arrived from the printer, and they have started to mail them out. QSL via Piesen Patrick, Koolkerkesteenweg 141, B-8000 BRUGGE, BELGIUM or via bureau to ON4APS

NEED A QSL MANAGER? Javier, LW8EZU, states that he could be the QSL Manager for any station. He states that he has plenty of time and he is responsible. He can be contacted via E-mail at: lw8ezu@cibergamo.com Or via Snail Mail at: P.O.Box 99, Zip code 6000, Junin, Buenos Aires, Argentina.

LA4GHA/P which was active from EU-79, Hareidlandet this past weekend should be QSLed via the home callsign, direct or via bureau.

XW30 QSLS. Eric, SM0AGD, reports receiving the first 4000 XW30-QSLs from the printer. All direct cards received up to now will be confirmed and should go in the mail within a couple of weeks. Thank you for your patience.

H40AA logs are now available on the following WEB page at:
http://www.iglou.com/n4gn/h40aa

SPECIAL EVENT STATION. "The 59(9) DXReport" states to look for CT98ARL to be active May 22nd and 23th from "Castle Or Leira" on all HF bands plus 144 & 432 MHz. QSL via CT1EWA.

SPECIAL EVENT STATION. On Saturday, May 16th, a special event station, ZS4SOA, will be operating from the "School Of Armour" in Bloemfontein, South Africa. They will be active on all the normal DX frequencies from 0800-1400z. There will be a special QSL card, QSL is via ZS4BS.

SV9, CRETE. Dick, W1KSZ, states he is "planning a trip to SV9, along with the wine and women", he may also turn on his radio. He hopes to sign W1KSZ/SV9. He has not announced any dates, but states he plans to take an FT-890 and external tuner to use with a G5RV which exists at the rental apartment on SV9.

TM5, THE CHAUSEY ISLANDS (France). The Belgian DXPedition Committee will be heading to this French island, which is rarely activated, to take part in the next IOTA Contest on July 25-26th. The Chausey Islands have the reference numbers IOTA EU-039 and DIFM MA-004. The Belgian team will be composed of ON4LAM/Mike, ON4LCW/Maxime, ON5PV/Phil, ON5OO/Jack, ON6QR/ Fred, ON7LX/Carine, ON7PC/Pierre, ON7RN/Eric and ON7TK/Claude. Both the CW and SSB mode will be worked on the 5 bands during the contest. Listen also near the IOTA frequencies and on the WARC bands to catch them before or after the contest. The QSL Manager is ON4GO. Also, look for F/ON4LCW during the month of July to activate a lot of little islands from the Chausey archipelago which counts for the French Islands Award (DIFM). For more information, contact Fred, ON6QR, via E-mail at: on6qr@ping.be Or check out the Belgian DXPedition Committee's Web Page at: http://www.ping.be/on6qr

VK3, GABO ISLAND. Paul/VK3AJJ and Norman/VK3PGR have announced that they will be traveling to the Victoria State East Group to activate IOTA OC-196 for 4 days from August 29th to September 1st. More details will follow closer to proposed departure date.

YA, AFGHANISTAN. Europeans report working a station signing YA5MKO on 40 meters May 7th at 2033z. No others QSNs have been spotted since, but as always WFWL! Might this be EP2MKO in Afghanistan?

YO, ROMANIA. Jean, F6AJA, from the French DX Bulletin (LNDX) will be active as YO/F6AJA May 17-24th, from YO8FZ or YO8KGA station when he has free time. Also, look for him to sign YO0/F6AJA during the CQWW WPX Contest.

ZD9, TRISTAN DA CUNHA. QSL Manager Edwin, ZS5BBO, reports that Ian, ZD9IL, continues to operate daily from +/- 0900-1600z on the following frequencies +/- : 14205, 18135, 21260, 21295, 24955 and 28490 kHz (Always look slightly up or down the band). Edwin also mentions that all cards that have been received for ZD9IL up until December 5, 1997, have been processed. ZD9IL's log did go astray, but Edwin eventually did receive it. The next log scheduled to arrive from the island is at the end of July. Edwin also requests all stations to be patient and not to send second cards. You WILL get your QSL card, but you must be patient as there are not many frequent commerical services from the island. He is looking at putting Ian on a computer logging system, and this will make things a lot easier (maybe there is someone who wants to make a donation!!!). QSL cards are sent direct to: Edwin Musto (ZS5BBO), P.O.Box 211032, Bluff, South Africa 4036.

Hi Tom,

Sounds familiar, I too had a bad coupled noise problem that may be related to what you are hearing. After several attempts using ferrites, filters, etc., an isolation transformer (1:1 inexpensive Radio Shack type) in the speaker/output audio or mic/input audio or both. I found this solved the problem for me. Hope it helps you.

Actually drill into the tube and directly connect. That will be the only way to guarantee a solution.

I have an Alpha 87A in excellant condition from a silent key.
Hasn't seen much use lately as he's been sick for a while. Virtually like new!

Beautiful condition and longing for a new home.
New these amps run $6390 + shipping.

Same as what you get if you called the factory to order one (except no wait for delivery!)

Grab this one at $4675 + packing/shipping.

Also have a near mint Icom IC-765 with CW filter from the same SK $1350 + ship

See all the neat stuff on my site

Hi Tom, I can't offer you much advice on this but just FYI, I had the
same problem with a KAM and the TS-440SAT. It's been a while ago
and I dont' remember if I fixed it or not. Maybe the audio inputs
on the DIN somehow interact with the mike audio in some way (loading,
etc?)

How would the "stuff" get from the rails to the counters? I guess you'd have to put rail up to every store that sells or stocks anything - groceries, ham gear, hospitals, schools, nordstroms, McD's, etc.....

check your cable - both ends - sounds like maybe an open ground and shield
might be acting as antenna for computer rf. I haven't had the problem, but
know several who have and cutting off the computer eliminated the hum,i.e.
computer rf. checking the shield ground connections found one end no longer
connected. Evan KE4BWD

Gee, are you sure? Well, dohhh...

What I was trying to say is that if the general truck / trucking
company
operators were to maintain their attitude as they are now then the hell
with them.
I realize that not all of them are like that and I apologize to those
who
might get offended, but after years and years of highway driving I've
seen
it all. The stunts and tricks they can pull off are just amazing but
that's
OK 'cause my cell phone is ready to go anytime one of the pisses me off.

All those who are about to respond that this topic doesn't belong here,
I agree.
Let's take this somewhere else boys.

IMHO, You missed the point. It is not the short range distribution with trucks, which makes the problems, it is the long haul transport. It may be slightly different in the USA, but here in Europe the *big* problems with traffic are due to the fact, that e.g. Finnish trees are sent to Italian sawmills and then to danish furniture companies to be brought back to Spain and sold there. Even worse, cattle is transported all over Europe, just because the slaughterhouse at the other end is slightly cheaper. This is perverse, period.
Independently if such ping-pong transports are reasonable, the overall costs (road maintenance costs, air pollution, public costs due to accidents, traffic jams etc) of trucks would be ways higher, than those of trains. The problem is simply, that not the truck companies (or their customers) have to pay it, but the public (via taxes, etc). This is why the cost comparisons between truck and train transportation are so distorted for the advantage for trucks.

73 Robert

PS: we should move this discussion to a more appropriate NG.

This summer I'm planning on taking my HF rig in the car and try
making contacts during the day from the road. (My XYL will be
driving when I try the contacts.)

For SSB, which band would be the "best" to use: 10M, 15M, 20M, . . . ?

OK, I know there's no one "best" band, because conditions change,
but if you had to work just one band from your car, what would you pick ?

73,

Bob

SIX CLUB'S FIRST SPRINT
MAY 16th and 17th 1998
IN CONJUNCTION WITH ARRL 50MHZ SPRINT

The Six Club Sprint will be from 2300Z Saturday of the following week until
0300Z Sunday (May 16-17, 1998) .
THIS WILL BE THE FIRST AND ONLY SPRINT THAT WILL BE IN CONJUNCTION WITH ANY
OTHER SPRINT.
SPRINT RULES
The Six Club rules are simple, score one point for all qso contacts and the
grids are the multiplier. Explanation: If you have 10 qso's and 25 grids
your score would be total grids times total qso's. Other words 25 times 10.
ROVERS ARE WELCOME TO JOIN IN ON THE FUN. ROVER RULES ARE THE SAME AS THE
OLD STYLE ARRL.
HAVE FUN

For further information on forms and instructions to email your results
please go to:

Good question. I haven't done much HF mobile, but when I do, I like
40M phone, 40M CW, and 20M CW. When the band opens, 10M phone is fun.
I'd stay away from 75 because of the lids, 20 Phone because it is
crowded with DXing and a mobile rig is disadvantaged, I'd recommend a
decent antenna tuner in the car and one of the multi-resonator tops on
the whip so you don't have to change hardware to change bands.

GL es have fun.

Hey Bob,

If I had to pick one band it would be 20 meters. It typically provides
the most reliable communications over most of the day. You can usually find
activity on 20 most any time. I've operated mobile with my TS-430S and worked
well over 40 countries without even trying. With the sunspot count rising
dx openings will increase even more. I've also been able to work domestic
stations reliably too. The band can be a bit crowded at times but I've
always been able to find a spot to call CQ.

The higher bands (20 thru 10 m) allow for easier and more efficient antenna
installations than do 40 m and below, but don't let that limit you. You
can get a pretty decent signal out even with these less efficient antennas.
There are a number of good nets to check into on those bands also.

Like Dave said before, if you have a multiband rig, use an antenna with
changeable resonators and a mobile tuner. You will be surprised what you can
work mobile! Good luck and have fun!

1573. Re: What would be the "best" HF band for use in the car ?

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-14 00:00:00 UTC
From: Steve Jepsen <NoSpam@NoSpam.com>
Message-ID: <355B49C8.F7FB5D84@NoSpam.com>
Source record: 29148

Hi Bob,
I've mobiled on and off for about 25 years. I've used lots different equipment, both multiband and monoband, and several different antennas. There's no easy answer to your question. As a general rule (assuming propagation doesn't change dramatically) I'd say If you want 'local communications' (200 miles or so) use 40 meters (gets longer at night) and it's open most of the time. If you want longer range, use 20 meters.
As you said, there's no 'best' band. Each one has its advantages and disadvantages.
80: great nighttime band, lots of nets so there's always someone to talk to and make a phone call for you. Local communication (100 miles or so) in the daytime but not much activity.
40: good general purpose band in the daytime but crowded with BC stations at night.
20: good band over all for long distance but closed most nights with current propagation conditions.
15: excellent DX band when conditions are good but propagation is too poor right now for much activity from the mobile.
10: when conditions are good, this is the best band we have for DX but right now it's closed most of the time.

Just a couple of comments about your equipment. Take your time and install it right, it makes a LOT of difference. Make sure the rig is secure, a loose radio is dangerous. Tune your antenna very carefully, then do it again. Get the best match you can, move the car to different locations and match it again. If you can, use a field strength meter instead of an SWR bridge. I can't stress this enough, the antenna is the key to a good mobile signal.

If you're interested in mobile antennas, read '40 years of HF mobileering' by W6AAQ .

SB DX ARL ARLD019
ARLD019 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, 425DXnews, The 599Rpt, QRZ DX and Contest Corral from QST. Thanks to all.

JAMAICA, 6Y. Katsuyuki has been QRV as N8QDB/6Y5 using mostly CW on 40, 20, 15 and 12 meters. QSL via JR4ISF.

MADEIRA ISLANDS, CT3. Rudi, DK4KL, is QRV on 30 to 10 meters using CW and SSB as CT3/DK4KL until May 27. QSL to home call.

MOLDOVA, ER. Look for Special Event Station ER9V to be QRV on all bands using CW and SSB until May 17 in commemoration of Victory Day. QSL via ER1DA.

CORSICA, TK. Bert, PA3GIO, will be QRV as TK/PA3GIO/m from May 16 to 30 on the usual IOTA DX frequencies. He will also try to operate from Lavezzi Island, IOTA EU-164, as TK/PA3GIO/p. QSL to home call.

ENGLAND, G. Look for Special Event Station GB2PPE to be QRV until May 28 in memory of Peter Pendleton Eckersly, G2OO, founder member of the BBC. QSL via operator's instructions.

GALAPAGOS ISLANDS, HC8. Joe, DK5VP, and Frank, DL4VCG, are QRV as DK5VP/HC8 and DL4VCG/HC8, respectively. QSL to operator's home calls.

IRAN, EP. Ali, EP2MKO, is QRV on 20 meters around 2000 to 2100z and on 15 meters after 2130z. QSL via UA6HCW.

MONGOLIA, JT. Members of the Hungarian Pannon DX Club are QRV as JU1HA. Activity is on all HF bands, using CW, SSB, RTTY and some satellite operations. QSL via HA0HW.

EGYPT, SU. Look for Ahmed, SU1AH, to be QRV using RTTY on 14087 khz from 2230 to 2300z.

MICRONESIA, V6. N6VV, NG7S and W7DR will be QRV as V63VV from May 24 to 31, including an entry in the CQ WW WPX Contest. After the contest, they will be QRV from Mokil Atoll, a new IOTA, as V63VV/p from June 1 to 7. QSL both calls via N6VV.

INDIA, VU. Marc, ON4AVO, is QRV as VU3MCV using mostly CW. He hopes to soon get permission to operate SSB. QSL via ON7LX.

ROMANIA, YO. Jean-Michel, F6AJA, will sign YO/F6AJA from May 17 to 24 from the QTHs of either YO8FZ or YO8KGA. QSL to home call.

TRISTAN DA CUNHA, ZD9. Ian, ZD9IL, is QRV daily around 0900 to 1600z on 14205, 18135, 21260, 21295, 24955 and 28490 khz. QSL via ZS5BBO.

THIS WEEKEND ON THE RADIO. The ARRL VHF/UHF Spring Sprint for 50 MHz and the EU CW Spring Sprint are on tap for this weekend. Please see May QST, page 96 for details.

1579. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-15 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6jgqjo$lsa@news.Hawaii.Edu>
Source record: 29154
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH2PZ, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec-radio-info@stat.com. Inquires and other administrivia should be directed to rec-radio-info-request@stat.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to:
majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see
http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while

still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

1580. Re: What would be the "best" HF band for use in the car ?

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-15 00:00:00 UTC
From: wk1v@aqsl.net
Message-ID: <355c2e68.1445376@news.shore.net>
Source record: 29155

In article <355A665C.914@pacbell.net>, cqbdiaz@pacbell.net says...
>
>This summer I'm planning on taking my HF rig in the car and try
>making contacts during the day from the road. (My XYL will be
>driving when I try the contacts.)

I haven't run much mobile HF recently but when I was, 20m was my choice during the day. Occasionally I would switch to 15m or 10m but 20 yielded the most QSOs.....and most of those were CW.

In the evenings I would move to 40m and then later to 75m or 80m depending if I was going to do the 3905 Century Club thing or just make CW contacts. I''ve done the other bands too, 30m, 17m and 12m from the mobile.

Your best bet, is just to go out there and do it. If you know how propogation is running go to the appropriate band. I use the Hustler antennas myself and have a couple of sets of resonators that I managed to collect. I don't care about efficiency of these antennas from the mobile just as long as they work. There are a myriad of mobile antennas, some better than others, some more popular than others--like the Outbacker Perth, and quite a few home brew jobs. I've used the Hustler mast with a coil of my own making. You know the PVC pipe with the AWG 14 wire wrapped around it [thanks for the help AK5D - Den in Alamogordo, NM] and have had a lot of fun not only making QSOs but making the antennas too.

I love HF mobiling but I haven't made any trips since I retired from the Air Force in '93. I guess my most memorable QSOs were the ones where I was driving on dark Nevada roads late at night in '93, with everyone else in the car asleep. I had the key on my lap and was chatting with hams on 40m in and around Nevada via CW. Yup, lottsa fun.

It's a good question, "Which band is best?" I guess to find out, you're just gonna have to do it and learn for yourself. :)

Good mobiling to ya....work a lot of DX too.

1584. Need Mod Standard C-468A

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-15 00:00:00 UTC
From: CARL DOMANICO <cmd-dell@worldnet.att.net>
Message-ID: <6ji6la$qur@bgtnsc02.worldnet.att.net>
Source record: 29159

I need the Modification for the Standard C-468A 440 MHZ Handi-Talkie.
That would allow me to open up the Transmit Range from 400 to 474 MHz. I
know there
Is a mod for this radio, I just don't know where to find itï¿½.I've tried
QRZ and OAK but no help.
I own the C-528A and the C-628A Dual-Band Handi-Talkies and have found
the Keypad modifications
For both and have done them. They worked out fine. I'm sure there is a
mod to open up the C-468A.

Anyone who could either pass the Modification along to me, or could tell
me where to find it. I would be in debted to foreverï¿½ï¿½.

Thanks Very Much,

Carl Domanico N2MFW

From: thompson@mindspring.com
Message-ID: <6jkikfrue1@camel15.mindspring.com>
Source record: 29162

Why is it with 70% of the hams on SSB and 30% on CW (DX wise) that so many of the Dxpeditions slight SSB. Usually it takes several days or asking to get many Dxpeditions to work 40 SSB and that has been my best DX band for rare ones the past year (with 17 meter second). Now the 3B7RF ops have shut SSB down (1600Z 16 May) with 12 and 10 open to 3B7 but the CW continues until 0800Z 17 may. Why not leave 1 CW and 1 SSB open instead?

I pull up the OH2BUA packet (excuse me the new DX Summit) and so often all the Dxpeditions are on CW especially on 17 and even 12. I like CW but come on Dxpers at least give SSB 50% of the time....

Being an SWL'r, I have a few basic question on DXpeditions. What call sign do they use? How do they get them? Do they use their domestic sign or a temporary local one or both?

What about if it is a US territory, say Nevassa Island. Would K4xxx use KP1/K4xxx or some such? Or would they apply for a new KP1 sign?

Second, what are the rules for working IOTA? Does a sailboat at anchor near the island count or must the station be physically on shore?

Glenn

Date: 1998-05-17 00:00:00 UTC
From: geo@ipass.net
Message-ID: <355f11aa.10936170@news.ipass.net>
Source record: 29026

Actually, I think this whole premise is flawed. These are as reported in the DX Magazine:

Call SSB CW RTTY
ZK1XXP 6708 8101 490
ZL8RI 10,150 6,800 560
5R8FI 654 664
ZK1PEQ 20% 80%

From VK0IR
VK0IR 33,081 45,536 2,056

From 3Y0PI
3Y0PI 39,125 19,700 1,175

From XR0Y
XR0Y 20,213 17,974
XR0Z 1,896 475

There are some like ZK1PEQ that are individuals who prefer certain modes (I've seen some that do NO CW also). But as far as large multi-member DXPeditions go, it seems fairly balanced.

Regards,

George (KQ4QM)

BTW I think RTTY should be the priority mode! ;-)

Mark your calendar for the Portland Amateur Wireless Association
International Hamfest. July 25, 1998.

The PAWA International hamfest will begin at 8:00 am for general admission
at the Elks Club on US. Rte. 1. It is 2 miles north of the I-195/US Rte 1
interchange at Saco Maine. Talk-in will be on the BRA 147.09/+ repeater or
146.52 simplex. Volunteers are needed who are French/English bi-lingual
for talk-in duty.

The hamfest is directly across the highway from Fun Town amusement park and
3 miles from scenic Old Orchard Beach.

Seminars / talks / discussions will be presented on various topics. For
more information email: ka4ati@ime.net

Well Dave, since you can clearly do a better job, I think you should commit the time and money to go to a rare DX country and give the mulitudes on 40 SSB a QSO. Since you'll be the one doing the Dxpedition you'll get to decide your operating pattern (just like the 3B7RF group). Of course you'll have to listen to the whiners sitting in their reclines complain because you didn't spend enough time on their favorite (band/ mode).

When operating from 5A2A, we mainly operated CW/RTTY bcus of the fact, that SSB was done by the local operators pretty well.

CW pile ups were - by the way - much easier to handle than the SSBers, who constalntly ignored our wish for "full calls only". Asking a second time for the complete calls slows down the rate a lot. When every third op additionally asks something (sked? QSY? when 80?) we answered three minutes before, you may imagine why I prefer CW on dxpns...

Because 70% of the DX'ERS are on CW and 30% on SSB! :-)

Actually, I don't know if this is true, but from the sound of the pileups, there are at least as many DXers on CW as on SSB. And some of the operations in the past have only been SSB operations. A few countries are rare on CW but not on SSB. Listen to the pileups if some D4 should happen to surface on CW!

Moscow is 8 hours ahead of you. So 1900 est is 2700 or 3am the next day in Moscow.

IMHO not much chance.

20 meters and higher won't work in the dark which spans from the middle of the atlantic ocean over. 80 and 40 won't work in the daylight part.

I believe I share the same 80 and 40 meter bands as Russia, which are 3500-3800 and 7000-7100. So if you had a dark path, you would have to be using CW.

This would occur later in the day about 8-10pm your time. If you were lucky, you could get some early risers as you go to bed on the tail end of grey line propagation.

A daylight path later in the summer might work. You would have to work before or around local sunset in Moscow which would be about 8pm which is about noon in the US. This would also be more likely, because not many hams are up at 3am.

In about 3 years 10 meters will be open to Russia all day. You will just have to coordinate your schedules.

One thing to help would be to find out Radio Moscow's schedule of broadcasts from local (to them) transmitters. Then you could determine the approximate frequencies that would work. Even if your radio is ham-band only, 7100-7300 is a broadcast band here and so is 3900-4000 kHz.

From the responses I got I still don't see any reasoning to why 3B7 shut down SSB and left CW running. I got the number 70/30 SSB/CW from a Dx magazine. Even if its 50/50 this no excuse.

I do agree most of the Dxpeditions do try to balance the operations. Of course some are SSB only or CW only and if thats known before hand Ok we know what to expect.

After 4 days of sending messages to the pilot (I dislike the stations breaking in while a band is hot asking about QSY on either mode) in the USA they (3B7RF) finally comes up on 40 SSB. I work them as I did 9M0, 8Q7AA, S21, XU , Heard Is et al on first call. If the BS7 and BV9 last groups had come up on 40 SSB I would have them on SSB, too as they were not readible on 20!

So there many of us sat on a day when the 12 and even 10 were open but no SSB.

I am sure we would have had more chances but the solar flares knocked ot the bands at least three times during the 3B7 stay.

As to how hard it is to operate on SSB.....I have worked many well run operations that make SSB an art. If conditions are right you can work more on SSB than CW. You must ignore those who operate improperly. say no questions please. full calls please. HB9TL does an excellent job with full calls as did the late N6RJ on his contest trips. I remember several years ago HB9TL/rare pacific Isle was working both the USA and Eu on 17 and one guy kept calling with "Quebec Papa". Finally he asked if a station was issued QP as a call sign...that shuts them up fast!

73 Dave K4JRB

Full call signs.... no last two letters = the best SSB

Hi,

I am in need of a little bit of help here. There is a radio show on BBC's Radio 1 that I love and need to somehow receive. The problem is that I live in Cincinnati, Ohio and Radio 1 is in the UK. I have heard something about "satellite sidebands" rebroadcasting Radio 1, as well as a few other ways. So does anyone out there know how I can receive Radio 1 broadcasts here in Cincinnati? I am willing to buy whatever equiptment necessary. Radio 1 does have Real Audio broadcasts, but they stream them to 28.8k so the quality SUCKS. I need to get high quality reception if possible so I can record the broadcasts. Any help here would be most appreciated. You will have to excuse my ignorance with Radio stuff, I am a network engineer not a radio guy. Thanks.....

-Joe

I honestly do not know why I am replying to this....but here it goes....

Our founding fathers actually expected the government to probably get out of control, and wanted the people to have the rights to gain it back, "The right to bear Arms". The right to bear arms is "necessary to the security of a free state". The problem being you may find this to be a "free state", but many of us are finding it increasingly restrictive.

As a matter of note, most world dictatorships and monarchies start by relieving the public of there weapons so they may seize and maintain power and control. Its in the history books, and in the news.

I do not own a weapon, have no immediate desire to purchase one, but find that most anti gun ownership lobbies to lack a logical basis, usually spouting gun related deaths without mentioning that if a gun was not available a pick axe might have been used to the same affect.

Regards

Christopher Cox

PS Sorry for the inconvenience as am replying to a post that Mr. Fisher has linked to many newsgroups.

Ok... Rail... Now this is really smart. Only rail transport?
Picture this:
A railroad line, running to every Winn-Dixie, Bi-Lo, Wal-Mart,
SAM's, shopping mall, ad nauseum.
Don't forget fueling the trains.
And of course, don't forget the total pain-in-the-ass of waiting
at a RailRoad crossing EVERYWHERE YOU GO, and the poor guy who
becomes a statistic thinking he can beat the train through the
crossing.
SURE, we could totally eliminate the trucking system and replace
it with rails...
REALLY bright.

>> It says NOTHING about INDIVIDUALS, N O T H I N G .

Since when don't you acknowledge that "People" = "Individuals" ?
Just who do you think "the people" are? certainly NOT the established
government. When in the Declaration of Independence it states ... WE
THE PEOPLE ... who do you think that is? It is US, the citizens.

1623. ASAPS V4 HF Prediction Software Out Now

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-19 00:00:00 UTC
From: patrick@icarus.syd.ips.gov.au
Message-ID: <6jqvvv$lkv@ipso.ips.gov.au>
Source record: 29049

IPS RADIO AND SPACE SERVICES - ASAPS V4 HF SOFTWARE

A new version of ASAPS, the IPS HF Frequency Management Software, is out now.

ASAPS V4 features include:

* Point to area predictions for the best usable frequency (BUF), S/N ratios, noise, probability and take-off angles.

* 3-D antenna gain patterns, specified in terms of bearing as well as take-off angle and frequency. These can now be imported from standard packages and text files.

* Step-by-step printed tutorial. The tutorial includes a number of exercises to help the user make the most of the program. Areas covered include HF propagation principles, background information on terms used in ASAPS, how to use ASAPS databases and how to generate and interpret ASAPS predictions.

* Year 2000 compliance.

Free demonstration copies are available upon request from IPS, or you can download them from our web site at www.ips.gov.au/asaps/

ASAPS V4 is available directly from IPS for AUD350, or as an upgrade from ASAPS versions 2.0 or higher for AUD50. Pricing and delivery details are available from distributors on request. For more information, please contact:

We don't really need to argue about truck .vs. trains on the
rec.radio.amateur.??? newsgroups do we? America needs both.. let's just leave
it at that :)

Hey moron! Obviously you haven't followed the thread all the way.
Your 'smart' opinions have already been covered, why dontcha read
the rest of the stuff before you open your mouth.
I take it that you also missed me saying that this should be moved
to another NG.

Figures...

1626. Re: Dxpeditions and SSB

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-19 00:00:00 UTC
From: w9sz@prairienet.org
Message-ID: <6jr4vc$4mu$1@wildfire.prairienet.org>
Source record: 29052

In a previous article, thompson@mindspring.com (David L. Thompson) says:

>From the responses I got I still don't see any reasoning to why 3B7
>shut down SSB and left CW running. I got the number 70/30 SSB/CW from
>a Dx magazine. Even if its 50/50 this no excuse.
>

Maybe to balance out the fact that 3Y0PI closed down their wonderful
operation with a 10 meter SSB station as the last one running? :-)

(I swear they had a waveguide with signals right into the Midwest USA that
last day and I was one of the last QSO's in the log on 10 SSB).

1627. A61AN QSL route?

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-19 00:00:00 UTC
From: w9sz@prairienet.org
Message-ID: <6jr5dc$4t8$1@wildfire.prairienet.org>
Source record: 29053

I saw several spots on PacketCluster for A61AN the other day that stated "QSL via WA2JUN". One of the QSL servers on the Web noted that WA2JUN was no longer his QSL manager as of mid-1997, and that he only QSL's direct.

Does Nasser have WA2JUN as his manager again? Does anyone have any idea on this?

How many of the estimated eighty thousand to 2.5 million persons that have used a gun per year in defense of themselves as reported by the NCVS and others are you willing to sacrifice to those that would have done them grievous bodily harm? Would you tolerate the increase in violent crimes and deaths as long as the potential victim couldn't defend themselves with a gun? Are you satisfied that the increase in deaths caused by violent criminals will justify making guns illegal?

average'Average' means being run-of-the-mill,
mediocre, insignificant, an also-ran, a non-entity.
'Average' is the top of the bottom, the best of the worst,
the bottom of the top, the worst of the best.Which of these is you?
Being 'average' is the lazy person's cop out,
it's lacking the guts to take a stand in life;it's living by default.
Being 'average' is to take up space for no purpose,
to take the trip through life but never to pay the fare.
Being 'average' is to pass one's life away with time,
rather than to pass one's time away with life.
To be 'average' is to be forgotten once you pass from this life.
The successful are remembered for their contributions,
the failures are remembered because they tried,
but the'average', the silent majority, is just forgotten."

No, nor does Bank Robbery constitute a major number in violent crime
related deaths.

> No kids ever killed teachers and students with a pick ax.

Really...I find that surprising, world wide? How about Rwanda?...BUT if you
do your homework you will find world wide that violent crime related deaths
is not attributed to gun ownership...indeed just the opposite was found to
be true. A fellow at OSU finished his findings last your if you are
interested. It is gruesome.....

~~~W4ABC Writes...

Read those words and choke Burt. Knowing that you come from an overprotective (overbearing) anti-gun state like Massachusetts, I have no doubts who does the thinking for you Burt. I was born there, and I'm not looking back.

My brother still lives there, and he tells me that there is a proviso that states that if an intruder enters your place of dwelling, that you must first attempt to flee. Talk about "BULLSHIT." Here in Florida, you are already eating the wrong end of Mr. Mossberg's M590A1. It is not there to kill, but to "STOP" the unlawfull individual's entry into my home. Sometimes they don't live to draw their own gun though Burt!

Since we are talking about the rights of the "Individual," "Groups," "People," let's talk about one well known individual in history, that disarmed his country so that all would be safe from the ravages of the "gun." His name was non other than "Adolf Hitler."

Burt if you are serious about being "taken seriously," then may I suggest a couple of books that you may wish to peruse.

"More Guns - Less Crime" by John R. Lott Jr. The University of Chicago Press

"The Second Amendment Primer" by Les Adams Palladium Press

Let me tell you the story about this caveman that beat his wife on the head with a gun...

Jon Pearl W4ABC

(stuff about 3B7RF & the CW/SSB ratio)

I'm both amused & disappointed by the comments (most not from Mr.
Thompson - I've seen some downright *nasty* comments on the Cluster
during this operation and some other recent DXpeditions..) about this
expedition.

Hey guys, these people spent lots of money and time (and in many
expeditions, risk of physical harm) to travel to a country that's been
inactive for decades. And we're complaining about how they activate
it? I'm in a rare county (answered 9 envelopes full of bureau QSLs
last night...), am I a lid because I work more CW than SSB?

Well, I recently got a wake up call. Tuesday night I was arrested in Newington CT outside of the ARRL headquarters. Apparently, I was almost naked and assaulted David Sumner as he left work for the day. I say apparently because I was very, very drunk and remember nothing but throwing my clothes out the window on I-95. In addition to assault and indecent exposure, I face DUI charges and illegal possession of a firearm. God only knows what I intended to do, but there was a pawnshop receipt from a Boston area pawnshop, and a box of rifle shells. I want to thank all you guys for not letting me get by with my trolling and relentless ham bashing. I realize now that I have led a frustrating, boring life, and with the help of the treatment program my school's EAP has sent me to, I hope to pick up the pieces of my life someday. It all went wrong after high school, when I was no longer president of the ham radio club at South Dennis High, and couldn't really cut it in college. Ham radio was my life, I had no balance, so eventually, when I realized how empty my life had become, I lashed out. I am truly sorry if I have caused anyone here any pain or anger.

Burt

I just passed my Tech no-code test yesterday and I'm anxiously awaiting my call sign. In the meantime, I'm wondering about the difference between all the bands. As a tech, I can't use a larger wavelength than 6m (if I knew the code, I'd have some other bands). My understanding is that 2m is used for contacts around town, repeater usage, etc. A book I have says 6m can get some far propegation via skywave skip. Is 6m really my best bet for DXing? In theory, I thought while longer waves degrade less over distance, shorter waves (i.e. VHF) can bounce off the ionosphere easier.

Bottom line, as a tech no-code, what's my best bet for hitting Michigan from New York City? Can it be done on 2m? Thanks.

Peter,

First welcome to ham radio!

Second, 6M is your best bet until you upgrade, but seriously, the amount of antenna work and operating effort on 6M required to give you only minimal results is much greater than the same effort dedicated to your Tech+ ticket. At that point, Michigan to NYC will be an every day possibility on 40 and often on 15 and 10 in a few months when the band opens.

You will find the W5YI tapes to be an excellent way to learn the code. It should take you about 15 hours or less spread over two weeks or less. You should find HF equipment easy to locate and antennas for these bands are easy to build. Dipoles work great.

Once you have your Tech+ ticket, the General is pretty easy. I've known a whole lot of people to get the theory with one (intensive) day of study. The code speed is just practice, although there is another set of tapes you can use.

Why continue to respond to this lonely and sad individual? His only joy in life seems to be to get a rise out of YOU. Rebuffed in his attempts to have normal conversations with other humans, he resorts to a lame form of Cybersniping. And it's the same old song each time.

And he's not even a SKILLED flamer. If he were, I'd at least respect him for THAT. He's a twinkie. Don't give the dweeb what he wants. Bah -- let him go masturbate on the IRC with other dinks like himself.

You can take any dictator. This is certainly the most extreme (and most undemocratic) way of a government to control "its" people.
You should be careful, however, to compare the government's monopole of using force, as it is used in (quite democratic) countries like Switzerland, Germany or Great Britain with a dictatorship like Nazi-Germany. It is rather arrogant to condemn any idea other than Your own one. The American system of justice may be one way to go, but there are other democratic systems in the world, which realize the same idea of a free society in a slightly different manner.
BTW, do You have a reference for what You mentioned above? I have never heard, that Hitler ever seriously hided his true intentions, why he wanted to disarm the "man on the street" (except in his and Goebbels propaganda, which You won't count much on, do You?). I'd be really interested, where You have that idea from.

Regards

Robert

From time to time, one hears stations with YU4 callsigns.
A curious question: Are these located in Bosnia-Hercegovina
and still using their old callsigns, or are these stations
in Yugoslavia itself?

Congratulations on the ticket, and welcome to the hobby!

You will find that 2 Meters, FM, is the most popular band and mode in general, with 70 cM close behind. There is also activity on the 222 MHz band and some on 6 meters.

If you can swing for an all mode rig, you will also find some "weak signal" activity on the low end of 2 meters. The real fun for the SSB user is on 6 meters in the late spring/early summer when sporadic E propagation occurs. Then you can hit Michigan from New York, and Florida, Texas, Ohio...

I think it is safe to say that 6M is the DX band for the Tech licensee, and it can be a lot of fun. There are some DX modes on 2M as well, but they are pretty specialized, such as aurora backscatter, meteor scatter, and tropospheric ducting. I recommend looking at the ARRL Handbook for info on the different bands and modes.

Yup. Knives, and simply threats, are also highly popular, and
effective.

>No kids ever killed teachers and students with a pick ax.
>

Don't count on it. Here, in Rochester, the weapon of choice to kill
teachers and students is also the knife. Unfortunately, it has proven to
be a highly effective one.

As an educator you might try a standard deviation hypograph to determine what the term "Average" really means. I dont know where you acquired your definitive nomenclature, however your assumptions are clearly wrong. DO THE MATH!

Actually, the National Socialists, though they were far from Second Amendment-type purists, considerably loosened gun restrictions in Germany compared to the previous "Social Democratic" regime. Just compare the 1928 and 1938 laws. (A book has been published which prints the two laws side by side, so they can be easily compared. It's called _Gun Control in Germany, 1928-1945_ and I think Noontide Press in California, among others, has it. It is also for sale at a lot of gun shows.)

Guns were widely owned by private individuals in Germany from 1933-1945, but were required to be turned in to the Communist and other Allied authorities when the occupation governments were set up after the war.

....
> The American system of justice may be one way to go, but

....

I'm not necessarily disagreeing with you re the Swiss and the Americans, but this "democracy" bit is a poor use of the language.

Switzerland and the United States are republics, and have constitutions for a very important reason -- to protect us from the tyranny of the majority; to secure rights that no majority and no legislature can ever take away, no matter how large or passionate the majority is that wants to do so.

Democracy and tyranny are perfectly compatible. It's called mob rule.

Democracy and freedom are mutually exclusive.

I'll take freedom.

Cheers,

Kevin, WB4AIO.

The argument is about the definition of people.
I believe it to be we the people as in every citizen in the United
States os America. Therefore Congress can not pass a law which
infringes on ME as a person covered in the group called people.
So in that context the second amendment bars congress from passing
ant gun law.
How did a debate about guns get into the newsgroup?

It is against the law to sell ivory...but criminals do
It is against the law to sell cocaine....but criminals do
It is against the law to kill or steal...but criminals do
It is against the law for convicted felons to own guns...but they still do

Outlawing guns will have no effect on criminal use or aquisition of weapons.
It will only prevent law abiding citizens from owning guns. It is a
documented fact that private gun ownership thwarts thousands of crimes per
day.

Curtis .. N5HDQ .. http://wf.quik.com/n5hdq
I can't think of anything witty to say here.
Oh well, no one is perfect.

What do you know about what is scheduled to happen
in November as regards the Brady Law?

Do you remember that back in 93 when it was being
debated it was presented as a 5 year Law that would
prevent handguns from falling into the hands of
Criminals and fade into the sunset in 98 ...???

Not so. It was in the original language that five
years after enactment that the word handgun be
replaced with firearm, and an instant background
check be conducted for the purchase of a FIREARM.

It seems that the law has been modified by various
agencies (is this legal in itself) to the point
that a National Firearm registration program will

be attempted. This does not pertain to new guns alone as if you take in a gun for repair a background check is supposed to be ran on you.

How do you feel about a law that was ruled, at least in part, as un-constitutional being beefed up to suit Clinton and his gun grabbing Corps..?

There is a bill (H.R. 2721) going around on Capitol Hill now that would kill Brady cxompletely should it become law. It needs help now as there are only four signed on to it now.

If you want to help you could contact your people in Washington urging them to sponsor H.R. 2721.

For more information and links to Your Congressmen and Senators please visit:

PLEASE take these discussions to the newsgroups where they belong!

I suppose the people who post these on the rec.radio.amateur newsgroups
go to a hardware store to get a haircut. I suppose they go to a grocery
store to get their cars repaired. Maybe they even go to a restaurant to
check out library books.

If I want to read about opinions on gun laws I'll go to the appropriate
newsgroup. If I want to read about DX I'll go to the
rec.radio.amateur.dx newsgroup. Let's keep the budgies in the pet shops,
not in the welding shops!

Not another responce...but Yes!

The median demographic for ham operators is the following..
Middle aged white with above average income.
(read: $500,000+ net worth and three vehicles)
And what is that group's average belief system?
Republican, christian right wing, and paranoya theory reactionary.
Just listen to 3853..or now even 20 meters.
Why? The white power base in this country is loosing power.
The country is becoming browner. Get used to it.
And the gun ownership issue is just an outgrowth of the basic
fear and insecurity of people who are having their unchallenged
supremacy threatened. All the bravado is inspired by fear. All
the "loss of freedom" paranoya is fear talking. When you cannot
adapt to the new reality, you scream and yell and act as if
you are not scared. The truth is- you are.
Remember that nothing will protect you from a tidal wave of south
americans immigrating. You will know 30 words of spanish.

How about taking responcibility for the fact that- if your life
seems to stink- it is YOU that is to blame. It is not some guy and
his wife in D.C. of whom you have no direct knowledge. Of whom you
have been spoon-fed information by people with an adgenda. Unless
you indeed have ESP, your opinion is the direct result of a multi-
million dollar (and now tax dollar) campaign by the sore loosers.
(what a simple and overlooked concept! Huh!)
It wouldn't take 50 million to indite anyone reading this.
And if the whigs were "getting any", they would forget all about
those who were- and do the job they were sent to do. -I don't
know any attractive women who like crusty -teeth grinding paranoids
with bad attitudes. Go ahead, take a picture of your right hand
and put it in your wallet.

So...get your self tharapy flames fired up...but remember that
true personal power comes from within...you can't buy it in a gun
store, and you can't get it from a bible beater. Your investments
will pay out, and your padded ass will wither on a feather pillow.
So Shut Up.

Bob

PS: Repeat this tharapy mantra: Hillery is richer than me, better looking
than me, and smarter than me - and it doesn't bother me a bit.

This should not even be approached in this newsgroup. It has nothing to do
with
amateur radio.

If your next door neighbor chops down your antenna mast and makes a mess of
your DX, because you are interfering with his TV quiz programs, does this
entitle you to invade his property and empty your magazine into him, his
wife, his children, and anyone else who interferes with your hobby?

ZCZC AE20
QST de W1AW
DX Bulletin 20 ARLD020
From ARRL Headquarters
Newington CT May 21, 1998
To all radio amateurs

SB DX ARL ARLD020
ARLD020 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, QRZ DX, Mark, N5OGP and Contest Corral from QST. Thanks to all.

ALGERIA, 7X. Afif, 7X2RO, has been QRV on 17 meters between 2040 and 2100z. QSL via F6FNU.

NEPAL, 9N. Vlad, 9N1FP, has been found on the low end of 20 meters from 0000 to 0200z. QSL via RU6FP.

SAINT PAUL ISLAND, CY9. CY9RF will be QRV from May 28 to June 2. A Multi/Multi entry in the CQ WW WPX CW Contest is also planned. Operations will be on all HF bands, with a major effort planned for 160 to 40 meters. QSL via K8RF.

BOLIVIA, CP. Mats, LU9AUY, will be QRV as CP6/LU9AUY from May 27 to June 3. He will also sign CP6AA during the CQ WW WPX CW Contest. QSL to home call.

CANARY ISLANDS, EA8. Fernando, EA3KU, will be active from Gran Canary Island from May 28 to June 2 as EA8ZS. He will also be a Single Op entry in the CQ WW WPX CW Contest. QSL to home call.

REUNION ISLAND, FR. Michael, DL1MBM, will be active as FR/DL1MBM beginning the end of May. QSL to home call.

VATICAN, HV. Francesco, HV4NAC, has been active on 80 and 20 meters. QSL via IK0FVC.

GREECE, SV. Harry, GM0UTD, will be active using QRP CW from Crete, IOTA EU-015, until June 2. QSL to home call.

WESTERN KIRIBATI, T30. Ron, ZL1AMO, is QRV as T30RW, and has been active on 40 meters from 1130 to 1330z. QSL to home call.

ANTIGUA, V2. Two members from the Oklahoma DX Association will be QRV as V26TT and V26GG from May 26 to June 2. Activity is expected on 160 to 10 meters, including the newer bands. They will also be active in the CQ WW WPX CW contest. QSL via operator's instructions.

BRITISH VIRGIN ISLANDS, VP2V. K6CT, N6CW and K9VV will be active as VP2VDX from May 27 to June 2. They will also be a Multi/Single entry in the CQ WW WPX CW Contest. Outside the contest period, they plan to concentrate their operations on the newer bands. QSL via K6CT.

NEW ZEALAND, ZL. Ed, K8VIR, will be QRV as ZL4IR. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARCI QRP Hoot Owl CW Sprint, South American CW Contest and the Texas QSO Party are on tap for the weekend. On May 25 and 26, the Memorial Day CW Sprint is also scheduled. Please see May QST, page 96 for details.

If I unloaded my magazine(s) on him, he'd be covered with ink and
newsprint. AND probably about 200# of old QSTs.

Come to think of it, that'd be a great way to get rid of a lot of old
publications.

Stations using the YU, YZ, 4N4 prefixes are operating from Bosnia with
now illegal call signs. These stations do not count for DXCC or a
mult in any ARRL or CQ sponsored contest. They are urged to get a T9
call sign to again be legal.

Burt has no guts to post his drivel on an appropriate news group
where he knows that he will be torn to shreds. There are plenty of
hams over at TPG for him to vent on. It is he that is the wimp and
without guts. I invited him over the last time he posted his rant and
I see that he hasn't had the balls to show up.

I'm a ham in Oregon. I DIDN'T APPROVE OF ANYTHING to do with shooting anyone. Thank you Butt Fisher for your kind, accurate portraying of how we here in Oregon feel about this tragedy. It's so nice to know you are interested and well versed in how we think. You know, there could easily be someone on one of these list that did know a person or the family of a person injured or killed by that kid in Springfield. But then, you are only doing your part to clean up the world, aren't you. Nice to know you care so...

Myself and most of my schoolmates had a history of killing animals when we were young......

Deer during deer season; fish during fishing season; hogs, steers, and sheep during fall butchering season;.....

...... so why were we in school in the first place?

What's your point?

Kevin - I don't know where you got this info, but I've received and
sent IRCs 4-5 years old. I was under the impression that there is no
expiration date, but they only "expire" when they change to a
different series, such as when they went from covering ground mail vs/
airmail, color change, etc. Any other opinions out there?

I have an IRC that I purchased a year ago from my local postoffice since I wanted to see what one looked like. It was never stamped and is blank except for the purchase price. Is this worthless or can I go back to the postoffice and have them validate it?

Terry,

Don't blame Burt. It's common knowledge in New England he's got no feelings for anyone but Burt. The rest of us in the east wish nothing but the best for you folks out there where the tragedy occurred. No one would wish this sort of thing on their worst enemy.

Hams support the Oregon shooting? Funny, I'm a ham, and a gun owner, but I don't recall showing support for it. Matter of fact, I think it's disgusting. To broadly label such thing against a GROUP is pretty hard to do and be able to back it up with facts.

My weapons are kept where I can get to them, but then I don't have kids to worry about. IN MOST CASES, parents ARE (SHOULD BE) responsible for the actions of their children. But, in this case if he killed them too, then you can't hold the parents other than for that which they may have failed to do PRIOR TO their own demise. Like the day before, when he took the gun to school and was thrown out, but hey, they may have been dead already too, at that time.

It is PEOPLE who kill, NOT THE GUNS. Just like when a drunk takes a car and kills. It isn't the car. Cars, guns, knives, baseball bats, bricks, pipes, etc. Any weapon of choice, does NOT have a mind nor a consciounce to make the choice.

But it is WRONG to say OPENLY that a GROUP supports such a thing. You are speaking for me as well by that statement, and I sir, NEVER support such a dastardly deed. Let me speak for myself, PLEASE.

>the postoffice and have them validate it?

Yes, it's worthless. You can try bringing it back to the PO, and see
what they say. Seems most US POs don't even know what an IRC is.
BTW, it's a lot cheaper to buy IRCs on the "secondary market," such as
from QSL managers who receive a lot of them. Going rate is about 70
cents apiece...

Source record: 28989

Hi , I'm looking to Buy either a Homebrew or commercially made Two Meter (144 MHz) and or a (440 MHz) Tube Amplifier. It must be able to amplify an FM Signal and of course have a built in or external power supply. The Power Rating would have to be in the 500 Watt Class. Designed to run off a 120 volt AC Line. I don't want any junk ! I want a good solid reliable amplifier. I will be using it with a Kenwood 144/440 MHz.FM Mobile Radio, so the drive requirements would have to match the exciterï¿½.144 MHz. 5 Watts, 10 Watts or 50 Wattsï¿½.440 MHz.. 5 Watts, 10 Watts or 35 Wattsï¿½.I intend on using it for long distance simplex operationï¿½..

Thank You
Very Much,

Carl Domanico N2MFW

DUI...hmmm.... sounds to me as if we should ban alcohol. No alcohol, no drunks, no drunk drivers, no DUI deaths. Yes, ban alcohol.

Oh, wait. Wasn't that tried earlier this century? Anyone remember the outcome?

I fail to see any connection between Amateur Radio and the pros and cons of gun ownership. Perhaps alt.talk.guns would be a good place to "shoot this one out"? ;-)

There is no question about the legality of the broadcasts in Europe.
3.945 is allocated for broadcasting in Region 1. The problem lies in
the fact that the content of the broadcast in question is clearly
directed at an audience in Region 2, where broadcasting on that
frequency is not allowed.

If you do not believe that the ITU convention requires a broadcaster
in Region 1 on 3.945 not deliberately beam into Region 2, I would
suggest a more careful reading of the treaty.

Attention Fellow Computer Enthusiast:

***** C O M P U T E R S O F T W A R E F R A U D A L E R T *****

%%%%%%%%%% C O R E L S O F T W A R E E X P O S E D %%%%%%%%%%

HERE'S A TIP TO HELP YOU AVOID SOME FUTURE GRIEF (AND SAVE SOME OF YOUR HARD EARNED MONEY)

PC World Magazine, in their February issue made reference to a particular software title as

'THE SOFTWARE FROM HELL'.

I've never used the product they were referring to, so I can't comment about it.

Nevertheless, if PC World had been talking about software from

COREL CORPORATION (Word Perfect, etc), it would have been MOST APPROPRIATE.

COREL SOFTWARE PRODUCTS, IN ALL THEIR FORMS, TRULY DESERVE THE TITLE

****** S O F T W A R E F R O M H E L L ******

because they are buggy (and dysfunctional) beyond belief. Corel products make Microsoft look like the knight in shinning armor, even including Windoze 95.

YOU CAN'T READ INFO LIKE THIS IN THE COMPUTER MAGAZINES BECAUSE COREL SPENDS FAR TOO MUCH MONEY VIA ADVERTISING REVENUE WITH ALL THE COMPUTER PUBLICATIONS, AND THEY DON'T DARE EXPOSE ONE OF THEIR BIGGEST ADVERTISERS, FOR REASONS WHICH SHOULD BE OBVIOUS. THEREFORE, WE CAN ONLY HOPE TO PASS THE WORD VIA NEWS GROUPS AND SIMILAR OUTLETS.

Corel Corporation, a Canadian firm, based in Ottawa, Ontario, has zero regard and zero respect for their customers, and is probably the best example of why Ziff Davis (publishers of dozens of computer magazines, both on the PC and Mac platforms), are now calling for a mandatory (and legally binding) 30, 60 or 90 day software money back guarantee.

Using data from Corel's own website, the following is more than sufficient proof to demonstrate the dysfunctional character of Corel's Word Perfect product:

THE FOLLOWING BUG LIST IS TAKEN FROM COREL'S WORLD WIDE WEBSITE:
==========

ftp://ftp.corel.com/pub/WordPerfect/wpmac/-WPMac ftp Index.html

(scroll way down, almost to the bottom)

What follows is the list of bug fixes initiated by Corel in an attempt to repair their cockroach infested product known as Word Perfect, version 3.5, which can easily be construed as a clear admission of bugs which existed with version 3.5 as shipped to customers on CD ROM. What makes this issue all the more criminal is the fact that Corel refused to inform customers who sent in their warranty registration cards that bug fixes had been released for this product. Corel Corporation refused to send warranty/registered customers the patches on floppy disk, and if this was too expensive, Corel Corporation even refused to send registered customers a postcard informing their customers where they could find the patches on the Internet. Customers were simply left to struggle with a totally dysfunctional product. And customers like myself who finally figured out Corel Word Perfect could NOT be made to function properly, and who first requested assistance, were ignored, and who later requested a refund, were also ignored.

TO THIS DAY, 17 MONTHS AFTER THE PURCHASE OF THE DYSFUNCTION AND COCKROACH INFESTED COREL WORD PERFECT PROGRAM, THIS COMPANY CONTINUES TO IGNORE ALL INTERNET E-MAIL MESSGES AND ALL UNITED STATES AND CANADIAN POSTAL SERVICES LETTERS.

==========

Corel Document ID: 10339

The information in this document applies to:
WordPerfect 3.5 for Macintosh

This Updater works with all versions of Corel WordPerfect 3.5. Including: Novell WordPerfect 3.5, Corel WordPerfect 3.5.1, Corel WordPerfect 3.5.2 and Corel WordPerfect in the CorelDraw Suite.

The Corel WordPerfect 3.5.3 patch replaces all previous patches for WordPerfect 3.5, including the Corel WordPerfect 3.5.2 patch shipped in October of 1996.

Fixes in 3.5.3 patch
==========

- Conversions should now function normally under System 7.6.
- A bug was fixed that repairs some display problems.
- Sporadic warnings that the common library could not be found will no longer occur.

Fixes in 3.5.2 patch
==========

- Text Selection now works properly.

- The Print Envelope feature will print addresses in the correct position on the LaserWriter 8.4 printer driver.

- Deleting to the right at the beginning of a line will no longer cause the cursor to reposition incorrectly in the text above.

- Deleting just before a Style no longer causes the cursor to reposition incorrectly and delete text within the Style.

- Editing a document in ?Show Codes? no longer causes the cursor to reposition incorrectly.

- Headers/Footers with text attributes (bold, underline...) are no longer affected by text attributes that cross a page break.

- Deleting addresses in the Print Envelope delivery or return address window now functions properly.

- The German Dictionary no longer stops and marks incorrect every word that contains a ? (esset).

- The French Dictionary on a Power Macintosh no longer stops and marks incorrect words that contain a ? (acute).

- Delivery Point of a bar code is no longer automatically calculated.

- Import of tables from various document types has been improved.

- The title of the ?WP6.x Export? now reads ?WP6.x,7.x Export? in both the patched and resale CD product from Corel.

- HTML export now saves Corel WordPerfect graphics or .wpg formatted images as JPEG?s.

Fixes in 3.5.1 patch
====================

- Editing some long blocks of Japanese characters will not crash the computer.

- Screen display is faster after scrolling through large documents or tables, or making editing changes.

- Captions can now be positioned above a graphic or text box.

- Return and delivery addresses in Print Envelope will now allow 255 characters (including line breaks).

- Dictionaries are now listed under the Dictionary menu instead of the Check menu.

- Ruler Bar display problems with PCI Power Macintosh computers have been fixed.

- WP 6.x and WP 7.x conversions can now be canceled.

- While working in subdocuments?such as headers or footnotes on black and white screens, Corel WordPerfect does not quit unexpectedly when clicking in the ruler area of the subdocument.

- Zip codes beginning with zero which did not have extended zip code digits now function properly in the Print Envelope feature.

- Font menus in Preferences and Print Envelopes now work properly on small monitors.

- Cleared tabs will no longer unexpectedly reappear on the ruler.

- Hyperlink copy and paste are now working.

- Cell Protection now disables the deletion of the contents of a cell.

- The bottom border of a table which crosses a page break is now visible.

- Patterns in a cell will no longer disappear when performing a Split or Join.

- Joining with the first cell of a table now functions properly.

- Row selection of tables in a text box is now available.

- Scroll bar does not stick when scrolling.

- Corel WordPerfect will use the Language Resource file designed for your system if present, or default to English (USA).

- Page Setup is now enabled in the Print Envelope feature (this allows the selection of paper sizes and envelope trays).

- Changing QuickCorrect preferences with no documents open will no longer crash the computer.

- Tables and Page Borders now work together.

- The PowerTalk Mailer can exceed 4096 characters.

- In the new Corel WordPerfect 3.5 CD-ROM, Norton Utilities will no longer report an error in the WordPerfect Installer Read Me. This fix is not available in the patch, but if you use Norton Utilities, we suggest you delete the WordPerfect Installer Read Me since it is not required for proper operation of the software.

- Corel WordPerfect Dictionaries and QuickCorrect word lists will no longer be replaced during installation.

==========

Postscript:

The above represents the bug list for Word Perfect 3.5, as I purchased this product, these revelations coming directly from Corel's website. Considering all these problems, it is little wonder that Ziff Davis Publishers are now suggesting we have a SOFTWARE LEMON LAW to protect computer consumers from future issues of this sort of software larceny.

If the reader will examine the websites of PC Week, PC World, and a few other leading PC-platform computer magazines, he will discover that Corel's Word Perfect, Suite 8 (the latest offering from Corel) is likewise

full of bugs. Don't take my word for it--- check it out for yourself.

MORAL OF STORY::::

SAVE YOUR MONEY--- DO NOT BUY ANYTHING WITH ���COREL��� ON THE LABEL, WHETHER IT BE FOR IBM COMPATIBLES OR THE MACINTOSH !!!

1709. IRC #CQDX Chat Room

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-22 00:00:00 UTC
From: dab@DELETETHIShome.com
Message-ID: <35652f74.17154298@news>

I wanted to let you all know about the IRC DX chat room. The room name is #CQDX and it can be found on the Undernet IRC network. I have put up a web page at 'members.home.com/dab/dxchat.html' which describes how it can help DXers and how to get there.

The Undernet IRC #CQDX channel can be a great resource for DXers and can provide shared information such as:

- Who's on the band
- Help identify pileups
- Latest information from DXpeditions (from on air reports)
- DX spotting
- Track pileup listening frequencies
- Propagation reports
- Arrange and coordinate schedules
- Obtain QSL information
- Coordinated band opening checks

and most importantly...

- Make new friends all around the world and keep in touch

73 de Doug, N6RT

>Burt Fisher Teacher of video, broadcasting and electronics

Media is focusing too much on one violence.

As media broadcasts the violence, the situation becomes even worse
(you hear this and this is going on and so forth and some people think
it is normal to do such thing). Anyway... please don't focus too
much... you will make it even worse...

There was a research done regarding to the TV / movie etc. There was
a small community with no TV (ie. no freq to receive and no cables
either). After setting up the TV system (either freq or cable), the
crime rate raised suddenly by 2 times or more.

As for guns, I believe that the parents are responsible.
If the parents are responsible for their kids, the kids will be
responsible for themselves. It's natural. And amazing enough...
most kids (who get focused on medias) get guns from their family...

There are about 40,000 deaths do to DUI in the US each year. Obviously
cars are the problem. Should the government come to your house and
confiscate your car?

If the cars did not exist, 40,000 people who died last year would be
alive.

No, he might have left explosives (one of his "interests"), or thrown a
molatov cocktail, or mixed up a toxic gas from recipes on the 'net, or
driven a car into a crowd of students, or any number of other forms of mayhem.

If he had been thrown into jail when he was caught and arrested for
bringing a **stolen** gun to school the day before instead of having his
hands slapped and being sent home to his so-called parents, do you think
he would have been in that cafeteria?

Burt: unencumbered by the thought process.

That is the typical bull crap you hear. It's not guns that kill people it's
the stupid, screwed up people that let there children have access to them.
Where in the heck did the kid get the gun? Why wasn't it locked up?And it
all comes back to the parents not taking responsibility to make sure the gun
was properly secured.

The kid killed his parents and then stole a rifle from them to kill
the students.

I just heard that he had a history of killing animals ... if so, why
was he still in school in the first place?

I have 5 IRCs that are about to expire. Most foreign post offices
won't except them if they are more than a year old. They
expire 6/3/98. Please request them only if you have need for
them NOW. Thanks.

I will GIVE them to the first person who requests them.

Please don't ask for them after 5/22/98 because they are probably
already gone.

Please make your request directly to me! Don't request on the group.

Kevin

The neutron bomb, but Jimmy Carter vetoed it. Also, you wouldn't have to
worry about whether or not Oregon had a death penalty.

Just about explains why you don't take your anti-gun drivel over to
talk.politics.guns. Over there we would decimate all of your
misconceptions and false accusations. You are a coward and won't take
your political agenda to an appropriate news group. You are but a
troll. You have no balls to face the truth.

Those that can, do. Those that can't, teach.

What others tell me:

Hello Burt,
It is rather tragic to see the juvinile garbage coming from the USA in many area of Internet, including the amateur sections. Reading the comments from various so-called amateurs on the amateur newsnet leaves oh so much to be desired. The garbage is all and only from the US. I just picked out you by chance to reply. I would like to inform you and all your tunnel-vision US amateurs that a greater percentage of "hams" around the world work "barefoot" - 100 watts and quite often with not much more than a dipole and/or long wire.

...Calling CQ-DX is quite common on all international HF bands. It is quite possible because of all the drivel eminating on the "ham" bands in the US, you may rarely get to hear the rest of the international amateur fraternity. Perhaps - and I would be surprised if what I am to say were not true - too many American Amateurs treat the radio hobby as CBers treat and violate the CB bands....!

It is indeed unfortunate in that too many of your compatriots fail to grasp the fact that the whole world sees (Internet) and hears (amateur radio) so much drivel originating from the USA. While there are many good and highly skilled amateurs in the US, there would appear to be a majority who are nothing much better than the worst type of CB operator. During the Second World war there was a well known saying...."When the British were bombing the Germans ducked for cover. When the Americans bombed everyone but the Germans ducked." It would seem that saying still applies today. When US operators are on the Net the rest of the world turns off. And when you are on the Amateur Bands.....! Need I say more! You have my full permission to insert all my comments on the BBS Nets used by yourself and other US amateurs.

I have received a number of personal Email complaints about off topic posts. I must admit the posters had a point. No matter how important I think not owning a gun is, it may not belong in any of the above newsgroups. I will endeavor to post only messages with a ham radio theme and that theme will be related to the conference I am posting in. Thus I doubt you will see any more posts in any group but misc. Is that better? People have a right not to deal in weighty issues if they want to get away from it all. They could be called off topic but they were not SPAMS.

Comments?

Burt

Any Moron stupid enough to own a Mac , should get software that sucks , It
your own stupidity to even go out and buy such a machine most software
manufacturers are pulling away from Mac because they are a dying machine.
get a life and buy a real computer !!!

Just a note about problems with IBM machines . Corel does work on them !!!
there maybe bugs in it but I haven't found any yet and I use it every day
ver 5 , 6, 7, and 8.0

Before you shout FRAUD THINK ABOUT SLANDER SUITS THAT CAN ARRISE AGAINST YOU
!!!

Send a "which" request to the server. Messages have been flowing every day. It is possible your server rejected mail and you were disconnected from the list.

TO : listserv@ve7tcp.ampr.org
SUB :
TEXT : which

This will return a list of all lists on the VE7TCP server that you are listed on.

If it does not show DX you will have to resubscribe. Fortunately with the new hardware bought from the funding drive you can request, confirm and be added to the list in as soon as 5 minutes now.

It needs to be stamped on the left side with the postmark of the
issuing post office. I've never tried to have one stamped after the
purchase (guess I should try, I have two or three unstamped IRCs on
hand..) so I have no idea what the USPS's policy is on doing that.
Most postal workers don't really understand IRCs anyway..

I would take it back & see if you can get them to stamp it.

Genie

A man found a bottle and was dusting it off when a genie appeared. The genie said, "I will grant you only one wish, what will it be?" After thinking a moment the man said, "Well, I have plenty of money, a nice house and a wonderful family, but there is one thing I would like to have: a vacation. I know, I would like to go to Hawaii, but I don't like to fly, and boats make me sick. What I want you to do is to build a bridge from California to Hawaii so that any time I want to go there I can drive." The genie replied, "WOW, do you realize what a tremendous request that is? That is over a thousand miles and across probably the deepest part of the Pacific ocean. Can you comprehend how much steel and concrete that would take? That would be a tremendous undertaking. Are you sure there isn't something else you would like to wish?" The man thought for a minute and said, "Yes. Please explain hams to me. They are so boring, they repeat things, they never show any guts and they hide behind their mikes. How can anybody have a life like that? The genie replies
"Will that be 4 or 6 lanes."

I like that Burt. I think it is funny, however I have been a Ham for over 25 yrs and very much enjoy talking to people all over the world. I don't think you can explain Hams anymore that you can explain life. There are too many aspects of the hobby to narrow it down to one simple answer.
I do enjoy most of your responses to other folks (most don't realize that they are the one being had).

David - W4DSM

You've clearly stated the problem. However, you failed to state the
cause.

Burt won't go somewhere else, even with all the ridicule that's been
heaped on him. He, by some perverted reasoning, thinks that he's not
only right but that he can also post off topic at will.

Now for the cure: Filter Burts posts.

Kevin

Can we just drop all this crap. Guns are not responsible for deaths, it is the PERSON WHO PULLS THE TRIGGER. Just about all of the guns used to commit crime were stolen/untraceable, They are not legally owned. If you feel that this is not the case you are a total IDIOT. Read the facts of the cases not what the "news media" hypes. You will find the truth, not what they want you to see.

Curtis .. N5HDQ .. http://wf.quik.com/n5hdq
I can't think of anything witty to say here.
Oh well, no one is perfect.

What do you know about what is scheduled to happen
in November as regards the Brady Law?

Do you remember that back in 93 when it was being
debated it was presented as a 5 year Law that would
prevent handguns from falling into the hands of
Criminals and fade into the sunset in 98 ...???

Not so. It was in the original language that five
years after enactment that the word handgun be
replaced with firearm, and an instant background
check be conducted for the purchase of a FIREARM.

It seems that the law has been modified by various
agencies (is this legal in itself) to the point
that a National Firearm registration program will
be attempted. This does not pertain to new guns
alone as if you take in a gun for repair a background
check is supposed to be ran on you.

How do you feel about a law that was ruled, at least
in part, as un-constitutional being beefed up to suit
Clinton and his gun grabbing Corps..?

There is a bill (H.R. 2721) going around on Capitol
Hill now that would kill Brady cxompletely should it
become law. It needs help now as there are only four
signed on to it now.

If you want to help you could contact your people
in Washington urging them to sponsor H.R. 2721.

For more information and links to Your
Congressmen and Senators please visit:

For one an inanimate object can not be responsible for anything as it can
not do anything by itself. Second point: if you can not think of more
efficient ways of dispatching a large group of people, you are far less
intelligent than the average criminal that , on average , have IQ ratings
in the double digit category.

I have a vibroplex cw keyer. It has the red bug on the label. This keyer is really nice looking. No rust and has all knobs and springs.
The label is in perfect condition. The keyer is on an EBAY auction and is going pretty cheap. The item # for the auction is 14955765
The serial number on the key is 256822. Check it out on www.ebay.com

Neither do the first, third, fourth. . .amendments.

In the first amendment, the right of the "people" to peacabley assemble applies to individuals and limits the power of any level of government. If the "people" are a collective such as the state, no one can assemble unless they are members of the national guard or other state sanctioned function.

Also, in the fourth amendment, the right of the "people" to be secure from unreasonable searches and seizures is an assertion of individual rights and a limit of all levels of government. Same for the other amendments comprising the bill of rights.

In the second amendment, the right of the "people" to keep and bear arms are an exception???? a collective right??? Think!

A state cannot have a RIGHT. States only have AUTHORITY granted to them by consent of the PEOPLE who have RIGHTs.

Read the federalist papers. They explain it all.

I was talking to a couple running a booth at Dayton. They are
from Oregon and sell bags and other goods (like holsters) at
hamfests and gun shows. They were so used to west coast hams
that are very liberal and very anti gun.

They were very surprised that midwest hams are conservative and
usually carry guns. I would guess that the third of the folks
at Dayton had a weapon on them. My guess is that different types
of folks get into amateur radio depending on the area. Midwest
liberals just are not interested in technology.

Cars deaths are accidental. I don't remember hearing of a kid steering a car into a crowd of students. You have no point. Shooting someone with intent to kill is not an accident. Kids grow up with a fasination of guns. TV, the news, and gun lovin' parents are likely at fault. The NRA say's that education is the key. Gosh I think these kids already know how to shoot.

Enough said, our society has no real use for guns regardless what you say. They kill, thats what they were made to do and thats what they're being used for.

I'll second Kevin's idea. Even though I can't believe that this type of
tragedy would happen, I wouldn't wish it on anybody...not even Butt...I
mean Burt. My best friend was shot and killed in a drive-by shooting two
years ago. I will NEVER forget the moment when I was told what had
happened. Maybe this isn't the right place to talk about this, but maybe
Butt...I mean Burt, should get a life, and realize that this COULD actually
happen to him. What would he say then?? Would he still ridicule the
world??? I'm not saying I'd want it to happen to him, but maybe he needs
to clean the pre-mordial ooze out of his eyes and his one brain cell and
take a look @ the world.

Once again the media (and other foolish types) blame an object for a crime rather than the PERSON who committed it. If the courts in this country would lock up (permanently) or execute all violent criminals the FIRST time they commit a violent crime then maybe teenagers these days would see that crime doesn't pay. And maybe parents these days should expect some responsibility from their children at a younger age instead of letting them run around like wild animals. By the time I was 13 I knew darn well what was right and what was wrong and that my parents would hold me fully responsible for my actions. Today many kids have nothing expected from them until they meet the real world and by then it is too late.

Attention Fellow Computer Enthusiast:

***** C O M P U T E R S O F T W A R E F R A U D A L E R T *****

%%%%%%%%%% C O R E L S O F T W A R E E X P O S E D %%%%%%%%%%

HERE'S A TIP TO HELP YOU AVOID SOME FUTURE GRIEF (AND SAVE SOME OF YOUR HARD EARNED MONEY)

PC World Magazine, in their February issue made reference to a particular software title as

'THE SOFTWARE FROM HELL'.

I've never used the product they were referring to, so I can't comment about it.

Nevertheless, if PC World had been talking about software from

COREL CORPORATION (Word Perfect, etc), it would have been MOST APPROPRIATE.

COREL SOFTWARE PRODUCTS, IN ALL THEIR FORMS, TRULY DESERVE THE TITLE

****** S O F T W A R E F R O M H E L L ******

because they are buggy (and dysfunctional) beyond belief. Corel products make Microsoft look like the knight in shinning armor, even including Windoze 95.

YOU CAN'T READ INFO LIKE THIS IN THE COMPUTER MAGAZINES BECAUSE COREL SPENDS FAR TOO MUCH MONEY VIA ADVERTISING REVENUE WITH ALL THE COMPUTER PUBLICATIONS, AND THEY DON'T DARE EXPOSE ONE OF THEIR BIGGEST ADVERTISERS, FOR REASONS WHICH SHOULD BE OBVIOUS. THEREFORE, WE CAN ONLY HOPE TO PASS THE WORD VIA NEWS GROUPS AND SIMILAR OUTLETS.

Corel Corporation, a Canadian firm, based in Ottawa, Ontario, has zero regard and zero respect for their customers, and is probably the best example of why Ziff Davis (publishers of dozens of computer magazines, both on the PC and Mac platforms), are now calling for a mandatory (and legally binding) 30, 60 or 90 day software money back guarantee.

Using data from Corel's own website, the following is more than sufficient proof to demonstrate the dysfunctional character of Corel's Word Perfect product:

THE FOLLOWING BUG LIST IS TAKEN FROM COREL'S WORLD WIDE WEBSITE:
==========

ftp://ftp.corel.com/pub/WordPerfect/wpmac/-WPMac ftp Index.html

(scroll way down, almost to the bottom)

What follows is the list of bug fixes initiated by Corel in an attempt to repair their cockroach infested product known as Word Perfect, version 3.5, which can easily be construed as a clear admission of bugs which existed with version 3.5 as shipped to customers on CD ROM. What makes this issue all the more criminal is the fact that Corel refused to inform customers who sent in their warranty registration cards that bug fixes had been released for this product. Corel Corporation refused to send warranty/registered customers the patches on floppy disk, and if this was too expensive, Corel Corporation even refused to send registered customers a postcard informing their customers where they could find the patches on the Internet. Customers were simply left to struggle with a totally dysfunctional product. And customers like myself who finally figured out Corel Word Perfect could NOT be made to function properly, and who first requested assistance, were ignored, and who later requested a refund, were also ignored.

TO THIS DAY, 17 MONTHS AFTER THE PURCHASE OF THE DYSFUNCTION AND COCKROACH INFESTED COREL WORD PERFECT PROGRAM, THIS COMPANY CONTINUES TO IGNORE ALL INTERNET E-MAIL MESSGES AND ALL UNITED STATES AND CANADIAN POSTAL SERVICES LETTERS.

==========

Corel Document ID: 10339

The information in this document applies to:
WordPerfect 3.5 for Macintosh

This Updater works with all versions of Corel WordPerfect 3.5. Including: Novell WordPerfect 3.5, Corel WordPerfect 3.5.1, Corel WordPerfect 3.5.2 and Corel WordPerfect in the CorelDraw Suite.

The Corel WordPerfect 3.5.3 patch replaces all previous patches for WordPerfect 3.5, including the Corel WordPerfect 3.5.2 patch shipped in October of 1996.

Fixes in 3.5.3 patch
==========

- Conversions should now function normally under System 7.6.
- A bug was fixed that repairs some display problems.
- Sporadic warnings that the common library could not be found will no longer occur.

Fixes in 3.5.2 patch
==========

- Text Selection now works properly.

- The Print Envelope feature will print addresses in the correct position on the LaserWriter 8.4 printer driver.

- Deleting to the right at the beginning of a line will no longer cause the cursor to reposition incorrectly in the text above.

- Deleting just before a Style no longer causes the cursor to reposition incorrectly and delete text within the Style.

- Editing a document in ?Show Codes? no longer causes the cursor to reposition incorrectly.

- Headers/Footers with text attributes (bold, underline...) are no longer affected by text attributes that cross a page break.

- Deleting addresses in the Print Envelope delivery or return address window now functions properly.

- The German Dictionary no longer stops and marks incorrect every word that contains a ? (esset).

- The French Dictionary on a Power Macintosh no longer stops and marks incorrect words that contain a ? (acute).

- Delivery Point of a bar code is no longer automatically calculated.

- Import of tables from various document types has been improved.

- The title of the ?WP6.x Export? now reads ?WP6.x,7.x Export? in both the patched and resale CD product from Corel.

- HTML export now saves Corel WordPerfect graphics or .wpg formatted images as JPEG?s.

Fixes in 3.5.1 patch
====================

- Editing some long blocks of Japanese characters will not crash the computer.

- Screen display is faster after scrolling through large documents or tables, or making editing changes.

- Captions can now be positioned above a graphic or text box.

- Return and delivery addresses in Print Envelope will now allow 255 characters (including line breaks).

- Dictionaries are now listed under the Dictionary menu instead of the Check menu.

- Ruler Bar display problems with PCI Power Macintosh computers have been fixed.

- WP 6.x and WP 7.x conversions can now be canceled.

- While working in subdocuments?such as headers or footnotes on black and white screens, Corel WordPerfect does not quit unexpectedly when clicking in the ruler area of the subdocument.

- Zip codes beginning with zero which did not have extended zip code digits now function properly in the Print Envelope feature.

- Font menus in Preferences and Print Envelopes now work properly on small monitors.

- Cleared tabs will no longer unexpectedly reappear on the ruler.

- Hyperlink copy and paste are now working.

- Cell Protection now disables the deletion of the contents of a cell.

- The bottom border of a table which crosses a page break is now visible.

- Patterns in a cell will no longer disappear when performing a Split or Join.

- Joining with the first cell of a table now functions properly.

- Row selection of tables in a text box is now available.

- Scroll bar does not stick when scrolling.

- Corel WordPerfect will use the Language Resource file designed for your system if present, or default to English (USA).

- Page Setup is now enabled in the Print Envelope feature (this allows the selection of paper sizes and envelope trays).

- Changing QuickCorrect preferences with no documents open will no longer crash the computer.

- Tables and Page Borders now work together.

- The PowerTalk Mailer can exceed 4096 characters.

- In the new Corel WordPerfect 3.5 CD-ROM, Norton Utilities will no longer report an error in the WordPerfect Installer Read Me. This fix is not available in the patch, but if you use Norton Utilities, we suggest you delete the WordPerfect Installer Read Me since it is not required for proper operation of the software.

- Corel WordPerfect Dictionaries and QuickCorrect word lists will no longer be replaced during installation.

==========

Postscript:

The above represents the bug list for Word Perfect 3.5, as I purchased this product, these revelations coming directly from Corel's website. Considering all these problems, it is little wonder that Ziff Davis Publishers are now suggesting we have a SOFTWARE LEMON LAW to protect computer consumers from future issues of this sort of software larceny.

If the reader will examine the websites of PC Week, PC World, and a few other leading PC-platform computer magazines, he will discover that Corel's Word Perfect, Suite 8 (the latest offering from Corel) is likewise

full of bugs. Don't take my word for it--- check it out for yourself.

MORAL OF STORY::::

SAVE YOUR MONEY--- DO NOT BUY ANYTHING WITH ���COREL��� ON THE LABEL, WHETHER IT BE FOR IBM COMPATIBLES OR THE MACINTOSH !!!

1783. special thanks

Dear OM Paolo,
I took participation in Your contest 1997 with intention to win certificate like I usually do.I won 2nd place,world, in single operator-SSB category.Accordingly I should get diploma for that.But I won a floppy disk for your contest instead.If that's the price for 2nd place you should send me the computer as well.1998 I didn't run in your contest because I didn't get certificate for 1997, and I will never run again for the same reason.Knowing that you don't like HAM-RADIOS from YU I don't really expect that you will send me certificate at all. For example let me remained you:In 1995 you disqualificated the station YT1BB, 1996 from station 4N1SM you took 600,000 points, last year you took me 200,000 points.Please tell me how can YU station win your contest???It's absolutely impossible.I gave a copy of your disk to all HAMS in YU1 who were interested just like you asked in your letter which you wrote me on 10.apr.1998.I left the original disk to my friend YT1DZ until you send me the computer.I hope you are satisfied whit me.
I am not satisfied whit YOU.

1788. F/G0GRC QSL problem

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-26 00:00:00 UTC
From: George <sp2brz@pit.gda.pl>
Message-ID: <356AD90D.4D7B@pit.gda.pl>
Source record: 28765

Hi there,
Over one year has passed from my QSO with F/G0GRC - still my not confirmed IOTA EU039. A QSL manager was G0RCI and I sent my card + SASE direct on September 1, 1997. I asked many times on the DX-Cluster if anyone has received a card from him. Nobody has answered - yes!
Can any G-man contact G0RCI and asked him if I have a chance to receive QSL?
Best 73s de George, SP2BRZ.

P.S. Two other not confirmed QSOs with EU039:
F6KFV/P - February '94
F/ON4LCW - July '97

1789. Re: Dxpeditions and SSB

Newsgroup: rec.radio.amateur.dx

Message-ID: <356ae6d1.14625230@news.hoflink.com>
Source record: 28766

>>
>>>From the responses I got I still don't see any reasoning to why 3B7
>>>shut down SSB and left CW running. I got the number 70/30 SSB/CW from
>>>a Dx magazine. Even if its 50/50 this no excuse.
Okay,try these:

1) cw gear smaller,easier to "grab and run",at the last
minute.....
2) They just like cw more than SSB

Either way it's still their call........
Get over it

>A state cannot have a RIGHT. States only have AUTHORITY granted to them by
>consent of the PEOPLE who have RIGHTs.
>
>Read the federalist papers. They explain it all.

Our "RIGHTS" come from God and given by him to "The People" in the USA
who in turn "loan" to our government what is needed to manage our
nation. In European and Socialist countries they believe that the
"rights" (power) comes from God and go to the King (or government) who
then loans those rights to the people (their subjects). This concept
is what makes the USA so unique.

1791. Wanted: Heil EQ300 wiring info

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-26 00:00:00 UTC
From: NE7X <NE7X@amsat.org>
Message-ID: <356B1467.431A@amsat.org>
Source record: 28768

I purchased a used Heil EQ300 external microphone equalizer/amplifier in the flea market at the Dayton HamVention. Currently its hard wired for Kenwood and I want to rewire the internal connectors for Icom. I have contacted Bob at Heil via eMAIL several times for this information, with no response from him.

If you have the wiring information it would be gratefully appreciated. You can either eMAIL it to me or send it to my callbook mailing address.

Thanks, Tom NE7X...

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Ya know, what amazes me most about this is that there are 103 messages in this thread and I don't think ANY of them have to do with rec.amateur.whatever in the least. Why not take this whole discussion over to another news group so they can be bombarded by this drivel. This thread is just like every one that talks about code vs no-code. Everybody has opinions but, at least they are related to the group topic.

GIVE IT A REST!!!

That or someone please write a small program so that my server doesn't have to waste time sorting thru items like this. While you're at it, how about being able to filter out certain users that start threads like this... They know who they are and I am NOT pointing this at the originator of this particular part of the thread... I've just had ENOUGH!!

If we spent this much effort in writing to senators and congressmen, maybe we wouldn't be losing the 440mhz frequencies to outside interests...

There, that's all I have to say about this subject. Sorry to take up your time...

This broad gun-discussion seems to let everyone know what is really important for some americans. Being a german, I understand the historical implications of that struggle, but I thank God that at least in my country the craziness for guns was driven out by the (hopefully) last war.

I prefer DX in this ng. Work them now, worry later.

DX is,
Michael, DL2EBX

What a silly rant, buttressed by the PC (politically correct) Ziff-Davis marketing machine.

If you are going to use a Mac, why not make asute choices regarding what applications function well on it? Many do the WP job emminently on a Mac.

I've been using WPWIN 6.0 & 6.1 for a long time in pers & biz, done all manner of DTP with it, selling several millions in R/E with its ease of producing excellent flyers & brochures beyond the far more costly R/E software. It is a powerhouse product that has more OPERABLE features than anyone can learn in four years (or needs). Support has always been shitty - and it is everywhere unless it's at $24.99 per call - and Micro$loth is surely no better; even their website knowledge base is inferior to their old BBS.

The only beef I've had with WP it it's gargantuan size and resource-hogging - but look at MS Word, a big dog if there ever was one, woth far less to offer (I run it as well - as little as possible).

You'd think someone into the hands-on & tech know-how to mess with BA's would be away from the dumbed-down Mac & Windoze OS's, and into unix, with which you actually control your own box (and have to know something).

Boy, this submitter REALLY helped me fix boatanchors, yes?

Hi, Peter,
Great that we'll have a new ham on the air. I am also a new ham, and got my amateur radio license in 1996. Right, 2m is mainly used for local contacts via repeater or sometimes directly, but you can also chase DX via the satellites on both 2m and 70cm. And 2m can sometimes be used for "DX" directly, we used to contact Taiwan Is. which is more than 300km away from my qth with a repeater on a top of a moutain. But I have to emphazise that there lies mainly water between my location and Taiwan Is. I am not uesd to operate on 6m, but it is reported that we can get in touch with Japan and Australia with very strong singals when the propagation is open. The skip is thounds of kms. But
it doesn't happen frequently. :-(
Well, Peter, these are my points on v/u bands. For DX, it is better to get a license on hf bands. :-) Anyway, hope you enjoy your ham life. Let me know when you get your call.

There is no doubt that he would have killed them any way this NICE
LITTLE BOY was found to have at least 3 bombs that were made out of
common household items that are in almost every house. But we can
eliminate this problem by banning or at least registering and having a
waiting period on these every day items or maybe ban ar register the
knowledge. What do you think? Ban or register every chemistry book and

teacher in this country and make sure we include an import ban on all common household material that could be combined in some manner to create a bomb. How does this sound?

SB DX ARL ARLD021
ARLD021 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, AB4XK, The 599Rpt, The Daily DX, DXNS and Contest Corral from QST. Thanks to all.

CYPRUS, 5B. Marios, 5B4WN, and Ivo, 5B4ADA, will be QRV in the CQ WW WPX CW Contest on all bands as C4W and C46A respectfully. Look for 5B4LP to be QRV on 40 meters as H24LP. QSL C46A via 9A2AJ. QSL C4W and H24LP to home calls.

UGANDA, 5X. Laurence, GM4DMA, will be active as 5X1LH throughout July while on a work assignment. Look for activity on 80 to 2 meters. QSL to home call.

EASTERN MALAYSIA, 9M6. UA9CI, UA9CLB, UA9CDV and UA9CDV will be QRV from the Hillview Gardens Resort on all bands and modes as either 9M6AAT or 9M6AAC. Look for them as a Multi/Single entry in CQ WW WPX CW Contest. They will be here until June 4. QSL via operator's instructions.

BAHAMAS, C6. DL7VOG will be QRV as C6AKA from the Bimini, Crooked and New Providence Islands from May 30 until June 17. Activity is expected on 80 to 6 meters using all modes. He does prefer CW and RTTY. He will be active in the CQ WW WPX CW Contest as well. QSL to home call.

URUGUAY, CX. Jorge, CX6VM, will be active in the CQ WW WPX CW Contest as CX5X. QSL via W3HNK.

NEW CALEDONIA, FK. Frank, FK8HC, will be QRV in the CQ WPX CW Contest as TX8A. QSL to home call.

SCOTLAND, GM. Chris, G4FAM, will QRV in the CQ WW WPX CW Contest as GS2MP from the North of Scotland Contest Group Club station. QSL

via GM2MP.

SAUDI ARABIA, HZ. Mike, K3UOC, will go QRT on June 13. He will however, participate in the CQ WW WPX CW Contest as 7Z5OO. QSL via N2AU.

ARGENTINA, LU. El Radio Club Ushuaia will activate IOTA SA-008 and participate in the CQ WW WPX CW Contest on the 40 meter band as LU8XW. QSL via Box 58, 9410 Ushuaia, Tierra del Fuego, Argentina.

ALAND ISLANDS, OH0. Look for OH2TA, OH2BCI, OH2KW and OH5BQ to be QRV as OH0W in the CQ WW WPX CW Contest as a Multi/Single entry. QSL via OH2TW.

EGYPT, SU. Zoli, HA5PP, will operate the SU0ERA club station in the CQ WW WPX CW Contest. QSL via HA5YPP

HONG KONG, VR2. Serge, F6BNK, will sign VR2/F6BHK for the next two years while on a work assignment. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ WorldWide WPX CW Contest will certainly keep contesters busy. Please see March QST, page 101 for details.

this turn is mine,

i thank the gates of earth, for the fine and coherent work done by MICROSOFT Corporation, its employees, and subsidiaries.

i prefer to have one big monopolistic behemoth of a company dishing out the usual stuff, cause then we know who to complain to.

every time someone, some government, some other whining competitor, some greedy lawyer or anybody tries to screw up a well run company like MICROSOFT, just remember that in 90 percent of the cases, we the consumer have paid MORE after they did it and got LESS in return.

Corel, well, thats just another company that just "aint got it all together!"

they will eventually fail and disappear, hopefully, unless some whining buerocrat with stock or a PAC donation in his pocket tries to "save" the consumers interests !!! ha ah ha!

now i feel better. bye!

> Michael, DL2EBX

I agree, this is a DX newsgroup and this gun talk
should be on talk.politics.guns, not here. But as long
as we are it, here goes. The problem with all this gun
control b.s. is that the criminals will not give a damn
about gun control. The law abiding gun owner is the one
being penalized. The person that goes to the trap/skeet
/sporting clays range is the one being penalized. The gun
owner who shoots competitively (handgun, shotgun and rifle)
is the one being penalized. The person who hunts (rifle/shotgun
and handgun) is the one being penalized. Plus it is more
than gun control because the gun control folks want all
firearms confiscated and if they tell you anything else, they
are bold faced liars. We have a press that that is so biased
and un-informed about types of firearms that it just about
makes me puke. You would think that if they were interested in
both sides of the story, they would get out of their office and
visit a trap range, etc. but I've never heard of that happening.
It is truly disgusting.
If they did, they would see WWII vets shooting a round of trap.
They would also see 15 year olds shooting a round of trap too.
It is something that men AND women do.
So there is really more to it than you see on the surface.

By the way - good dx'ing.
Gary

Does Svetlana even make a 3CX800A? Maybe this amps uses a 4CX800.

Tony, I can't answer the question about 3CX vs. 4CX, but here's a
little snip from Eric Barbours excellent FAQ:

"3CPX800A7--air-cooled power triode, special pulse-rated version of
3CX800A7. Still made by Eimac, with Svetlana shortly to introduce a
version."

You can read the whole FAQ at:

http://www.vacuumtube.com/FAQ.html

Eimac makes the 4CX800A7 Expensive
Svetlana makes the 3CX800A about 1/2 or less.

That is your opinion. Nothing I said was untrue. My power is here.

"Congress shall make no law respecting an establishment of
religion, or prohibiting the free exercise
thereof; or abridging the freedom of speech, or of the press; or
the right of the people peaceably to
assemble, and to petition the government for a redress of
grievances."

We don't have a king here. Do you ?

Burt

Well, I thought I might have judged Burt wrong with my quick reply. I thought to myself "Well, just read what he has to say. Maybe I might have been wrong. Maybe he actually has something productive to say about amateur radio. Maybe he actually might be a decent guy. " NAAAAAA! Again stated...WHO CARES?!

Matt...(and Burt for that matter)...I frankly get tired of Burts cross-posted trolling BS (might I remind you about the recent hams and guns cross-posted "series" that had absolutely nothing to do with the NG's that it was posted on.) Yea, you can say I'm having my fun...browsing these great newsgroups(don't you enjoy it?). I enjoy reading ham related postings and articles. I don't like being subjected to spam, stupidity, and Burt's trollings. Don't get me wrong, Burt has the absolute right to say anything he wants. BUT, I also have the same right to say what I feel also. Matt, it's not the power...it's the "right"...a God-given right and guaranteed by the Bill of Rights. I assume the UK has something simular. There is an old saying..."your right to double up your fist ends at the tip of my nose". I know I am not the only person that has been offended by Burt's crap. As a ham...if you enjoy being slammed by Burt...more power to ya. Me...I'm going to speak out when I get slammed.

1837. Re: BAD K4YE

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-30 00:00:00 UTC
From: Gary Danaher <gdanaher@flash.net>
Message-ID: <3570A5ED.D9CFBAB7@flash.net>
Source record: 28964

It seems that Jim has had a number of bad days lately. A station identifying as W4CW, an unused call, and sounding remarkably like Jim was on, talking to otherwise unheard of dx stations for about an hour. After that, on the internet packet cluster, K4YE spotted the W4CW station and remarked about the good signal. He preaches about following the rules with regard to the 'last two', but if it was Jim, and it sounded like Jim, seems like he should have the guts to use his own call and not bootleg, and thus follow the same rules he is pushing so hard. I have had conversations about this with folks at the Atlanta field office.

1840. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-05-31 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6kqq23$i6n@news.Hawaii.Edu>
Source record: 28827
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman (KH2PZ / KH6)

For one thing...we have no clue who the hell you are since you are
posting from a hotmail address. So please feel free to feel ignored!
I hope someone with more money and more time finds you and sues your
sorry existence. Or even better pays you a visit with Vinnie and Tony.

So in the meantime...take notice that most software companies web
sites list known bugs BECAUSE THEY RESPECT THEIR CUSTOMERS and they
want to keep the support lines open.
All alive humans breathe, and all software has bugs. Period.

You are out of order posting a mental barf like this.
Maybe you are frustrated. maybe you are mental. maybe you are a barf
and nothing else.

Go away and don't waste my time.

Say Hi to Vinnie. (if you see him coming)

If you interpreted the First Amendment like you do the Second then,
you don't have any such right. It would only be government employees
that have those rights.

Of course you're not. You have to bob and weave all over the
internet so that no one can figure out where to respond to. I knew
that you wouldn't hang around TPG for very long. You ain't got the
nads for a real debate. Infact you aint got the nads for a debate on
any subject.

Source record: 28973

Wow! I hope this DX post doesn't get overlooked with all the
non-DX stuff in this newsgroup.....

I am QSL manager for 8P6JG and have recently gotten QSLs from
stations that have worked 8P9JG on CW in February 1998.

Since 8P6JG and 8P9JG are not the same station, I cannot QSL
these contacts. In Barbados, 8P6 prefixes are residents while
8P9 prefixes are visitors.

Who was/is 8P9JG?

Tnx, gud dx, es 73

1853. Right Range / Right Radio?

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-01 00:00:00 UTC
From: joe@jkraus.com
Message-ID: <6kssg8aud1@nnrp1.dejanews.com>
Source record: 28830

I recently bought two Kenwood FRS radios. They are very cool, and I like them a lot. One of the biggest advantages is the size and weight of FRS radios,and they work pretty well for close car to car or people on foot in close proximity. However, I must admit I am a little disappointed in the distance of these devices. While OK in some circumstance, I guess I washoping for just a little bit better...like 1.5-2 mile in congested areas and a bit further in the open.
If I were to try to get this range, what is the right radio. GMRS? 2-Meter Ham, 70cm Ham? Will the FRS get a little better in the near future? I would not like to sacrifice the size or weight (next priority would be batterylife, but not quite as important). Any recommendations out there, or am I just living in a dream world?

Is it possible to purchase filters or other devices that will block local stations on certain frequencies or those that "wander" onto frequencies close to its broadcasting frequency? I live in CT, and I am trying to get WBAL 1090 during the night, but our WTIC 1080 clear channel wanders onto 1090. is there a way to block that out? i am currently using just a regular AV receiver and have been considering purchasing a good communications receiver? will that solve the problem?

please email at CaptKluski@aol.com if you have an answer

thanx in advance

ps. i am trying to pick up stations out of Maryland/DC. what antennas would be the best to use?

do you watch COPS? How about getting the bad guys off the streets
forever? Teach the kids right from wrong, so we won't have to lock up so
many of the next crop of kids. Let the schools teach morals.
Wht is the HOLY BIBLE banned from public school, and playboys are not ??
A weapon is A weapon only if it used as a weapon. A firearm is not a
```

weapon unless it is used that way. I shot about 100 rounds yesterday from several firearms not one was used as a weapon. Try shooting as a sport, you might find it to be fun , like ham radio.

I'm new to the HF bands, I passed the 5 WPM back in December 1997
to become a Tech Plus and later passed the 13 WPM for General back
in April 1998. (... And maybe an Advanced coming soon ...)

While I'm sure every HF band has its good points, I sure enjoy the
Hot / Cold nature of 10 meters. Either it REALLY good (hot) or it's
REALLY dead (cold). A few weeks back I was talking to KR4EO and
he was coming in almost an S9 on my meter, a very good signal. Yet
in a matter of minutes he went from almost S9 down to S0. While we
lost each other in the noise, I was sure surprised that band conditions
could change SO fast! (Pity, he was a really nice guy to talk to.)
Still, before we lost contact, he left me with these words, "As we move
into the solar cycle, it's only going to get better and better."

I don't think that will happen; after all doesn't the FCC allow the use
of CW on all the Ham Bands. I guess they'll allow the use of CW across
all the Ham User Groups. <smile>

Basically IMHO it's an example of Burt Fisher's bigotry/hypocrisy and
shows how eccentric he is.

If one were to make racist/inflammatory statements about Jews like he
does about Germans or hams he'd be up in arms screaming racism/bigotry
etc. He makes racist/inflamatory statements like you've posted here
and then wonders ??? why he was removed as a VE ?? It's very
humorous to see his rantings to the FCC/ARRL and see his attempt to
accuse them of removing him as VE because he's a member of a minority
(as if that has *anything* to do with his removal.)

Some good meds and psycho-therapy would probably do wonders for him
but his type *always* denies any need for it.

Regards

HONK!

I agree, Bob, 10m is a lot of fun to play around on. I haven't yet got my dipole up in the back yard this year (I recently moved and it's going to be a lot of fun to try to figure out where to put it). But last summer was definitely a blast. There were days when I'd sit for hours outside and listen for anything intelligible to come out of the speaker, and then there were days when I missed dinner (and don't you know my wife was happy about that) because I was working some SA station that I just had to put in the log book. Good luck on the Advanced test. I still haven't gotten past the 13 wpm code test, but I'm hoping to have time for that later on in the summer.

Bob wrote:

And he was right! Last year was really just too much fun and the band was considered dead through most of it. I still had a lot of fun. South America on 10w and a dipole! Yes! It can be and has been done on less. That's the other thing I love about 10m, is that building antennas for it is very cheap and relatively easy. I've got a dipole I'm going to string between a tree and a storage shed until I can get a mast up on the side of the house.

Have fun and I hope to hear you on 10!

SB DX @ WW $OPDX.359
Ohio/Penn DX Bulletin No. 359

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 359
BID: $OPDX.359
June 1, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1DG, N2AU, WB2RAJ/WB2YQH & The 59(9) DXReport, W4ZYT, WD8MGQ, N9WDQ, ER1AA, F6AJA & LNDX, G3SWH, G4BUE & DX News Sheet, GM3WOJ, IK1QBT, RV1CC, SQ5HAR, US1I, UT5RP, VK4AAR, XE1L and ZL1BMW following DX information.

A6, UNITED ARAB EMIRATES. Don, N1DG (ex-WB2DND), reports he will be active again June 1-7th. He is mainly in A6-land on business and as time permits he will fill in the off hours from A61AD. He will be in Dubai for 6 days with a heavy work schedule. He plans to be active on RTTY (his primary hangout will be 14.090 +/- QRM). He will also be on 30/17/12 meters and RS12. He also mentions that he is planning to meet with A61AQ and get the logs from him for the first time EVER. So, all you guys waiting for QSLs, please be a little bit more patient. QSL via home call.

CHECK YOUR LOG BOOKS. Jean Michel, F6AJA, from the French LNDX Bulletin, reports that ALL contacts made by Gerard, F2JD, from Cayos Cochinos during May 16th to 19th, as HR3/F2JD is from IOTA NA-160 "NOT" NA-057. By mistake Gerard started his activity as HR6/F2JD an gave NA-057 as IOTA reference. All the contacts were made from Cayos Cochinos. Gerard says, "I am very sorry for my mistake but I haven't my IOTA list with me".

EI2, IRELAND. Don, W4ZYT, will be here June 13-25th as EI2IM. He will be operating 40-10 meters, mostly CW. He is planning a short stay on Inishmore, Aran Island (EU-006) about midway through his trip. He will probably use the callsign EJ2IM. QSL via W4ZYT.

ER3, MOLDOVA. The IARU Region 1 Field Day HF Contest will take place between June 5-7th. Look for ER3R/p to be active from here. QSL via ER1DA: P.O.Box 9537, Kishinev MD-2071, MOLDOVA.

GB5, SCOTLAND. Advance notice has been given that GB5HQ will be active in the IARU HF Championships July 11-12th. This will be the first time

from Scotland that the R.S.G.B. Headquarters station, GB5HQ, will be activated by the North of Scotland Contest Group (GM2MP/GM7V/GM8V) as a Multi/Multi station during the IARU HF Championships from the QTH of GM3WOJ near Tain in the Highlands of Scotland.

H75A DXPEDITION FINAL WRAP UP. Mike, AD5A, reports, "The H75A operation concluded at 1515z on Sunday, May 24th, after 63 hours of operation and 6,914 QSOs from Isla De Venado, Nicaragua (IOTA NA-209). The team had planned to stay on the air until 1200z on May 25th, however, monsoonal rains forced the early departure from the island. The expedition team made the decision to use paper logs and so the logs will need to be entered in a logging program over the next couple of weeks. Once entered, the logs will be posted on the IOTA Web page at: http://islandchaser.com QSL via N5FTR: William Loeschman, 717 Milton, Angelton, TX 77515"

HZ, SAUDI ARABIA. Mike, K3UOC, has gone QRT after last weekend's CQ WPX CW Contest as 7Z5OO and will be returning to the USA. He has made over 110,000 QSOs from 7Z5OO. He was the most active station from here, and the only other active CW stations left are HZ1HZ (mainly a contests station) and HZ1AB (which has been very quiet lately). QSL via N2AU. Do not QSL via W1AF.

IOTA NEWS.....
EU-083. Operators Tony/IK1QBT, Nino/IK1ZOZ, Alex/IK1OXF and Franco/I1FX plan to be active from one of the rare islands in the Ligurian group. The Italian team will activate Gallinara Island between June 6th-7th and 13th-14th. Operators will sign IA1/homecall and activity will be on all HF bands SSB/CW (WARC included) around the standard IOTA frequencies. There will also be activity on 6 meters, VHF/UHF on SSB. The reference number for the Italian Island Award (IIA) is SV-01. Gallinara is a private island, and the daylight visit is very restricted to only Island Archeologic and Biologic presence. EU-083 is the most wanted IOTA in North America because of the difficultly to stay and operate during the night. QSL via their respectives home calls, bureau or direct.

EU-133. Members of St.Petersburg and Region Association of Radiocommunication (RV1AC, RU1AS, RV1CC, RZ1AZ, UA1ANA and RA1ACJ) are going to be active from Bolshoj Berezovyj Island, June 5-7th. Their activity will include the IARU Field Day Contest, as RK1B/p in a Multi/Single category. Before the contest look for them to sign homecall/p. Activity will be on all bands using a IC706 and TS940S with amp, GP for 40-10 meters and an Inverted L for 160-80 meters. QSL via homecall, but RK1B/p via RV1AC.

NA-079. The Florida West Coast DX Ring will be going to Dry Tortugas Island for the IOTA contest in July 1998. The operators will travel about 70 nautical miles in a 54 ft. vessel with 8 operators and a non-ham Captain. The trip will take around 24 hours to get there. The list of operators/team: AA4XR/Bruce, AI4K/Alice, KC2KU/Marv, KJ9N/Al, KR4GN/Austin, WK9Z/Bud, WT4T/Bruce, XE1L/Luis and Captain Bill. This island is famous for the largest masonry structure in the western

world, now a National Park with Fort Jefferson. One of its famous inmates was Dr. Samuel Mudd, who was the one that healed John Wilkes Booth's leg in his escape through the stage of Ford's Theater after shooting and killing President Abraham Lincoln April 15, 1865. Well known DXer Luis, XE1L, points out another feature about this island is the fact that the famous Pirate-Buccaneer; Jean Laffite might have left a large treasure chest on its beach. Luis states, "If we find it while we erect our antennas; we will dedicate 10% of its value for future Dxpeditions."

SA-037. To celebrate the 1998 Venezuelan Navy Day, the Association of Radioamateurs of Venezuela (ARV) and the Grupo DX Caracas have organized a DXpedition to La Blanquilla Island (IOTA SA-037). The station YW5LB will operate July 16-19th. Operations will be on SSB, CW, VHF, RTTY, Satellite and Packet, with activity on 160-10 meters, 6 and 2 meters. QSL route (mail drop) via W4SO.

NEW ORLEANS DX CONVENTION. The 7th Annual New Orleans International DX Convention will be held on Friday and Saturday, August 14th and 15th, at the Royal Sonesta Hotel on Bourbon Street in the French Quarter of New Orleans, Louisiana, USA. The agenda will included DXpedition presentations, technical presentations, reports on ARRL DX Desk and DX Advisory Committee news by Bill Kennamer, K5FUV, Director of ARRL Membership services, and QSL checking. The activities culminate with a gala dinner banquet on Saturday evening. OPDX InterNet Subscribers will receive an additional bulletin containing the NOIDXC's press release. For updates on the New Orleans International DX Convention, check the Delta DX Association Web site at: http://www.gnofn.org/~w5ru

QSL INFO AND NEWS.....
GS2MP, a rare prefix, was active in CQ WPX CW Contest this past weekend by Cris, G4FAM, one of the members of 5V7A 'Voodoo' Contest Team. Chris's activity took place at the North of Scotland Contest Group's club station GM2MP. QSL via the bureau to GM2MP.

SPECIAL EVENT. The Amateur Radio Scout Club "Spider" (SP5ZDH) will be active June 13-14th from the ruins of the castle of Czersk in central Poland. The callsign will be SP5ZDH/5 or SP5ZDH/P (they are not sure). Operations will be on 80/40/20/15 meters with dipoles for 80 meters and GP antenna for the rest of the bands. For those who are interested, they will be good for one point to the "Polish Castles" diploma. QSL via the bureau to SP5ZDH or direct to: HKL "Pajak", ul. Poniatowskiego 10, 05-400 Otwock, Poland.

SPECIAL EVENT. Look for the Ukrainian special event station EO50FBD, operated by UR7FV, to be activity from June 1-10th. Activities will include RTTY. Working this station will net you BIG POINTS towards the "Old Fortress Award". This award was launched in commemoration of the 2500th year anniversary of Belgorod-Dnestrovsk (TIRA, AKKERMAN, CETATEA ALBA - are former names) an ancient town located near the Black Sea close to Odessa, Ukraine. To earn the award, one must collect a total of 2500 QSO points or SWL reports from the following stations:

1000 points - EO2500FBD memorial special event station
250 points - UR4FXF, UR5FJF, UR5FCA, UX7FC, UR5FJK, UR5FCB
UX7FD, UR5FGO, UR5FCG, UR7FV, UR5FFR and UR5FFO
100 points - QSO or SWL with any station from Odessa and Regions
(UR5F,UT5R,UX5F,UT0,1,2,3,4,7F)
Repeated QSOs (SWLs) on different bands are allowed. The award price is: EU HAMs 6 IRC and for any other continents 7 IRC. The address for the QSL cards and applications is as follows: Slava V. Bratinov, P.O. Box 85, B-Dnestrovsk, 272300, Ukraine

SV8, MYKONOS ISLAND (Greece). Phil, G3SWH, will be returning for the fourth year running to this Greek island (IOTA EU-067) between June 10th and 17th. He will sign SV8/G3SWH and will be active on CW only on all bands (3.5 to 28 MHz). This is a holiday operation and activity will be limited to a couple of hours in the mornings and a couple of hours in the late afternoons. QSLs will be available either direct or via the RSGB bureau.
US4, UKRAINE. Igor, US1I, reports his good friend Ed, US4IXQ, he is very active on 80 meters CW and SSB (no specific times were given). He also asked OPDX to publish Ed's address: Ed Repienko, P.O. Box 418, Makeevka-41, Donetsk Region, Ukraine, 339041. Ed has reportedly worked a big quantity of USA-stations on 80 meters this past winter and spring.

USI ALERTS. Dennis, N9WDQ, provided OPDX with the following upcoming "United States Islands Award" (USI) operations:

From now until June 6th, Bill, K8CJQ, will be working from S. Manitou Island (MI038). Bill says that there have been other operators from here but none for USI. He will be able to be active on 40/20/15/10 meters. Starting time will be 1900z. He also says that the operation will be on both SSB and CW.

From now until June 5th, Dean, K3GGN, is celebrating the end of the school year by going out and working some new islands. Look for him from Washington Island (WI001L) and Rock Island (WI014T) at and about 1400z on 20 meters. Stay tuned for more updates from Dean as he progresses.

On June 13th or possibly the 20th, Corey, N1WON, will be operating from Howell Key, FL about 1400z. This is a new USI, also IOTA NA-062. Corey will be with Dean/W4WHN and Richard/KE4GWH. The WX will be the deciding factor as to which day they go out to the island.

From June 30th to July 5th, look for Ted, W8TTS, who has just recently upgraded to General - CONGRATS - to be on South Bass Island, OH (OH007). He plans to be able to be active on 40/20/15/10 meters. His activity will vary due to family doings. Also, Ted says that he will try and get some of the other islands on in the area.

LAST but NOT LEAST..... On June 15th, Dennis, N9WDQ, plans on being in Kansas to activate the first KS island. More info to follow.

V63, CHUUK ISLAND (Micronesia). Alan, VK4AAR, reports that his good friend Peter, V63PD, will be getting his station setup again and currently waiting for an antenna to arrive on the island. Alan believes Chuuk Island is IOTA OC-011. We are sure that Alan will keep OPDX informed about Peter's

process, meanwhile, he has announced that he will be his QSL Manager. So for V63PD QSL via VK4AAR direct only to the call book address: Alan Roocroft, VK4AAR, c/o Post Office, Dalveen QLD 4374, Australia.

VR2, HONG KONG. The 59(9) DXReport states that Serge, F6BNK, will be signing VR2/F6BHK for the next 2 years while on a work assignment.

XU, KAMPUCHEA. The "DX News Sheet" reports that Ichinose, JA6BND, is active until the middle of June as XU6BND. He can usually be found around 0000z and 1200z on 15 meters SSB. QSL via home call.

ZM1, NEW ZEALAND. The recent formation of the Auckland Contest Club by founding members Jacky/ZL3CW, Ron/ZL1AMO and Mark/ZL1BMW has resulted in the issue of the special callsign ZM1A for the duration of one month beginning with the CQWW WPX CW Contest last weekend. Listen for ZM1A after the contest with an emphasis on 40 meters.

HAM RADIO OPERATORS LOSE A LONG TIME FRIEND. Sen. Barry Goldwater, K7UGA, became a Silent-Key (SK) on May 29th, at the age of 89. He was former US Senator, onetime presidential candidate, and a noted radio amateur. Barry Goldwater had suffered a stroke in 1986 and had been in failing health ever since. The former Senator did a lot for the amateurs in the U.S. and other countries. He will be dearly missed. Our deepest sympathy goes out to the family. OPDX InterNet Subscribers will receive an additional bulletin containing ARRL Bulletin ARLB039, which has more details about Sen. Barry Goldwater's life.

1883. DX!

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-02 00:00:00 UTC
From: w9sz@prairienet.org
Message-ID: <6kvu8c$65j$1@wildfire.prairienet.org>
Source record: 28860

Since only one out of every 10 postings here seems to have to do with DX,
I thought I'd throw one in.

There's been no shortage of Cyprus stations lately! 5B4AGC is 60 dB over
9 right now on 14024. He owes me a new S-meter. I worked 4 different Cyprus
stations in WPX this weekend plus lots of other goodies (9M6AAT was also
very loud here as well as most of JA.)

As I tune across 20 CW now I hear FR5DD, handfuls of UA9's and UA0's and
lots of EU.

So we're finally getting the ionosphere back and I expect all of you to
spend more time on the air and less on these newsgroups!

See you on the bands.

73, Zack W9SZ

Pffft. I never even heard 9M6 last weekend. If there was a killer opening
to JA-land from here I missed it.

But yeah, the Cyprus gang was LOUD. In this particular contest the
place to be is *just* outside of Europe so it's natural they'd be on.

Last night I heard a 4X1 on 20 meters and someone asked him to QSY to
17 meters. I followed them up there and worked the 4X1 no problem 57-55
with 100 watts on 18.145. About 0300-0400Z. Hardly anyone on 17 meters
but the Isreal station was coming in fine.

Well, CB, if you 'code' like you type, I don't expect I will be
'coding' with you on the radio any time soon......

Besides, if you could 'code' at 82 wpm, you'd still be a geek.
So please post your code baloney over in policy where the other
geeks appreciate it.

And try not to fall off your bicycle and break your HT.

I get real excited when the bands pick up.. I watch the Solar Flux and the A index.. As soon as I thing we are on the rise, the S.F. takes a dump and were back in the duledrums. I guess one of these times it will rise and stay there. Got spoiled real quick when it approached 140 not long ago. I suspect it will be a while until we see that again. Guess it's time to go check the projections again. Probably not 100% but I can get excited if there is even a chance of something over 120.

Keep the faith. I'm sure cycle 23 isn't over yet...

Hi fellow hams..I'm looking to Sell or trade this amp for equal value gear...

Subject:
Crown Amplifier
Date:
Fri, 20 Feb 1998 10:47:20 -0500
From:
CARL DOMANICO <cmd-dell@worldnet.att.net>

For Sale: Crown International PSA-2X Professional Self-Analyzing Stereo/Mono Power Amplifier....

If your looking for a Super-Powerfull,Highly Reliable, Amplifier you came to the right place.....It's a Cream Puff, Mint Condition, I'm the Original Owner. It's very Powerful, Rated at: 275 Watts RMS Per Channel into 8 Ohms...460 Watts RMS Per Channel into 4 Ohms...700 Watts RMS Per Channel into 2 Ohms. These are very conservative Ratings...more like 335 at 8 Ohms.... 640 at 4 ohms 840 at 2 Ohms...Per Channelï¿½.
It Weighs 57lbs/W Rack Handles. Dimensions: Height 7" Width 19" Depth 17 1/2"..*..I also have the Optional Balanced Input Module Installed, So in the event you want to feed the Amplifier with a Balanced Input Signal, from a Preamp or Mixer you can. Or your can just feed it with a Standard Un-Balanced Signal Bypassing the Module...It also has a Built in Cooling Fan, complete with Filter to keep Dust out...But it runs Cool Even at Power Levels that would fill an Auditorium....If your familiar with Crown International, Their Name has been Synonymous with High Quality, and High Reliability, for the Past 50 Years....I really would rather keep it than sell it...but since I've moved back into a smaller apartment...I have no room...I've already sold all my other Stereo Gear.
The Amplifier is Ideal for a Super Home System, Commercial Sound System, such as a School or Church, Perfect for those who Perform Disc Jockey workï¿½
*Balanced Input Module has complete Adjustments for Compression , High and Low Filters, AGC Automatic Gain Control Threshold Adjustment, Test Tone Signal Generator 50Hz to 20KHz. Extremely useful for System Troubleshooting..
I paid $2300 New...I'm asking $1200 Firm, in Original Box, You Pay Shipping

I believe I read a little while ago that a Woman had just had an argument with her spouse and took off in the car. While driving she was so angry that she rammed her car into a group of people, killing some and wounding many. The question is, was the Car responsible for the killing and wounding of the bystanders? Don

Hi! all.
I've worked DX for a number of years on 10, 15 and 20.
I'd like to give 40 a try (I'm in the city so full sized 4 elements
monobanders are out of the question.

I currently run a KLM KT34XA @ 72ft and I'd like to place a vertical (1/4
wave) on top of it attempting to mimmic ground plane w/ the triband.
This is where you come in.

I'm looking for a 1/4 wave vertical for 40 (will have to be able to mount
it tower-top) sturdy enough to stand "some wind".

I'm located in Toronto.
e-mail:emontana@interlog.com
ed, VE3YZR.
Thanks and 73's from up here :-))

Hey Jim, I noticed that you posted via dejanews. FYI: dejanews won't allow
you to edit out inappropriate cross-postings from the "TO" block. So if some
moron initiates a cross post... the rest of youse guys gots to eat it.

Hows the yellow rice and beans?

Are you preparing your boonie pepper/kikoman chicken marinade for field day?
Mmmmmmm.

Brian/N0iMD

Well, I just edited out about six newsgroups, and I am posting
this via Deja Vu, so we'll see what happens. Just clicked POST
REPLAY and then in the GROUP box, deleted the ones I didn't
like..... Deja Vu ain't exactly a hi tek posting mechanizm, but
it's not that dumb....

> Hows the yellow rice and beans?

You must have me mixed up with XE2D. We have RED rice
in Guam. No beans. Field day this year is just rice and
beer.....

1907. 1st Straw Poll: rec.radio.amateur.* reorg

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-04 00:00:00 UTC
From: Jeremy Billones <voting@clark.net>
Message-ID: <6l6jb4$8p0$1@clarknet.clark.net>
Source record: 28884
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx

(Repost. Crossposted to fewer groups, multiple times.)

FIRST CALL FOR VOTES (of 2)

Votes must be received by 23:59:59 UTC, 22 Jun 1998.

This vote is being conducted by a neutral third party. Questions
about the straw poll should be directed to the rec.radio.amateur.*
Working Group at <rra-wg@theporch.com>

Votetaker: Jeremy Billones <billones@primenet.com>

STRAW POLL Q & A

Q: Who is doing this?
Q: How may I join the rra-wg?
Q: Why are we doing this?
Q: What are we doing?
Q: More to the point, why are we "kicking over this hornet's nest?"
Q: Why do you want to change the newsgroups again?
Q: Who are you to tell us what to do with "our" newsgroup?
Q: How long ago were each of the rec.radio.amateur.* newsgroups created?
Q: Why are the non-rec.radio.amateur.* newsgroups rec.radio.info and
rec.radio.swap included in this opinion poll?
Q: Where can I obtain a copy of the original newsgroup charters?
Q: Where can I find out more information about the Usenet RFD/CFV
process?
Q: I don't want any of the newsgroups to change. What should I do?
Q: I want to go back to one single newsgroup for amateur radio on
Usenet, like we had back in the 1980's. What should I do?
Q: I support some of the newsgroups for amateur radio, but not others.
What should I do?
Q: I support the existence of a newsgroup, but disagree with its
charter. How should I vote?
Q: I would like new newsgroups to be created, what should I do?
Q: I have no opinion, what should I do?

Q: Who is doing this?

The rec.radio.amateur.* Working Group (rra-wg@theporch.com, which
initiated the last major reorganization in 1993) is the point-of-contact
for questions about this opinion poll. Principal members are Paul
W. Schleck, K3FU, and Jeffrey Herman, KH2PZ. Though not an rra-wg
member, Gary Coffman, KE4ZV, also endorses this opinion poll. this
opinion poll will be conducted by an unbiased third party from the
Usenet Volunteer Votetakers (UVV), Jeremy Billones

(billones@primenet.com).

Q: How may I join the rra-wg?

Anyone who volunteers may join the rra-wg. The rra-wg has always solicited volunteers from when it was created in 1993 (originally named rra-reorg) to draft an RFD to reorganize the rec.radio.amateur.* newsgroups (and continues to serve as an advisory group for FAQ maintainers and new newsgroup proponents). You may join the rra-wg by subscribing to its mailing list.

The automated list manager address is

listproc@theporch.com

Use this for subscribing, unsubscribing, getting archived info, getting the FAQ message, changing your address, etc.

To subscribe, send a message to this address with "subscribe rra-wg <your name>" Similarly, to unsubscribe, replace "subscribe" with "unsubscribe"

The list owner address is

listown@jackatak.theporch.com

Use this address only when there is a problem which really truly can't be resolved otherwise.

Q: Why are we doing this?

Discussion on the rec.radio.amateur.* newsgroups shows that there is a difference of opinion about the current newsgroups and their charters. Assertions on one side of the argument that the charters were voted upon by the readers have been countered with assertions on the other side that the votes took place years ago, by a very small minority of the current readership. There is also the strongly-held opinion among some that we have "too many newsgroups." The following is a sample posting from the discussion thread on rec.radio.amateur.misc that led to this opinion poll (the entire thread may be viewed at DejaNews, http://www.dejanews.com/):

Q: What are we doing?

As a preliminary (and perhaps even diverting) step to an RFD (which would be very laborious and time-consuming, and perhaps unnecessary), we will conduct a Straw Poll, or "Vote of Confidence" (similar to the vote of confidence for a Prime Minister made by British Parliament, or a non-binding resolution of the U.S. Congress). We do it Usenet-vote style (utilizing a neutral vote-taker from the UVV). During the poll, a vote is taken where a "Vote of Confidence" yeah or nay for each newsgroup, as currently constituted and chartered, is given by each voter (YES/NO/CANCEL/ABSTAIN votes are valid).

What votes mean:

YES: I support the existence of this newsgroup and its charter

NO: I disagree with this newsgroup's charter or I believe that this newsgroup's existence should be reconsidered in a future RFD/CFV

CANCEL: Delete any previous votes I made concerning this newsgroup

ABSTAIN: I have no opinion concerning this newsgroup

Each newsgroup that does not pass a vote of confidence by Usenet voting standards (2/3 and 100 vote majority of YES versus NO votes) may be referred to the Usenet newsgroup creation process where their deletion or modification (based on a rough consensus of the preceding 30 days of discussion and how much they lost in the vote of confidence) is proposed. Each newsgroup that does pass a vote of confidence will have its charter, and justification for existence, reinforced to the

readership (as the current readership voted on it).

Q: More to the point, why are we "kicking over this hornet's nest?"

Sometimes hornet's nests can get big enough that they wind up falling down anyway. As shown in the thread above, there are significant undercurrents of disagreement over the current newsgroups, their charters, and even the suggested guidelines and rules of net-etiquette that many on the newsgroups advocate. If this opinion poll shows strong agreement with current practices, then that would help reduce (though not eliminate) newsgroup arguments on the subject. If, however, this opinion poll shows strong disagreement, then it's probably better that we know that right away, and take steps to fix the current situation before it degrades any further.

Q: Why do you want to change the newsgroups again?

Only some of the proponents of this opinion poll wish to change the newsgroups. Some wish to simply have the current newsgroups and their charters reinforced. All of the proponents agree that an up-to-date opinion poll of the readership is desirable at this time. Whatever future actions will be taken will be determined by the results of this opinion poll.

Q: Who are you to tell us what to do with "our" newsgroup?

One answer is that on Usenet, no one "owns" an unmoderated newsgroup. Newsgroups are voted into existence by a democratic process to determine consensus (and lack of significant objection) for using shared network resources to support them. All of the existing rec.radio.amateur.* newsgroups passed such a vote at some time in the past, and should pass such a vote again if there is strong support for their continued existence.

Another answer is that this is just a non-binding opinion poll of the readership to determine a consensus, if any, for making changes. It would still be necessary to undertake a formal RFD/CFV process to change any Usenet newsgroup (and that was always possible, anyway).

It should also be emphasized here that no individual rec.radio.amateur.* newsgroup is being singled out. Rather, a consensus of the readership concerning ALL rec.radio.amateur.* newsgroups is being sought.

Q: How long ago were each of the rec.radio.amateur.* newsgroups created?

1972 (or possibly earlier, this date is when UCSD joined the ARPANet):

Info-Hams (original ARPANet mailing list at Simtel-20, continues today at UCSD as a gateway of rec.radio.amateur.misc)

1979:

Creation of Usenet News at Duke and UNC

early 1980's:

fa.info-hams (fa = "From ARPANet") *
net.ham-radio (pre-Kent Paul Dolan "Great Renaming") *

mid 1980's-1991:

rec.ham-radio *
rec.ham-radio.packet *
rec.ham-radio.swap *

1991 Reorganization:

rec.radio.amateur.misc
rec.radio.amateur.packet *
rec.radio.amateur.policy
rec.radio.cb
rec.radio.swap

1992/3 Addition:

rec.radio.info

1993 Reorganization:

rec.radio.amateur.antenna
rec.radio.amateur.digital.misc
rec.radio.amateur.equipment
rec.radio.amateur.homebrew
rec.radio.amateur.misc
rec.radio.amateur.policy
rec.radio.amateur.space

1996 Additions:

rec.radio.amateur.dx
rec.radio.amateur.boatanchors

* = obsolete

Current newsgroups covered by this opinion poll, and the years
in which they were created:

rec.radio.amateur.antenna (1993)
rec.radio.amateur.boatanchors (1996)
rec.radio.amateur.digital.misc (1993)
rec.radio.amateur.dx (1996)
rec.radio.amateur.equipment (1993)
rec.radio.amateur.homebrew (1993)
rec.radio.amateur.misc (1991)
rec.radio.amateur.policy (1991)
rec.radio.amateur.space (1993)
rec.radio.info (1992/3)
rec.radio.swap (1991)

Q: Why are the non-rec.radio.amateur.* newsgroups rec.radio.info and
rec.radio.swap included in this opinion poll?

Though one level up in the rec.* hierarchy, these newsgroups are
principally used by readers of rec.radio.amateur.*, and their fates
would substantially be decided by any significant reorganization of the
rec.radio.amateur.* newsgroups. Though created by a rec.radio.amateur.*
reorganization, rec.radio.cb is not included in this opinion poll.

This announcement has been cross-posted to all rec.radio.* newsgroups
(except for rec.radio.broadcasting and rec.radio.info, which are
moderated). In addition, the following individuals were consulted prior
to this announcement (note that consultation does not necessarily
imply endorsement):

Richard Eckman, KO4MR, Proponent of rec.radio.amateur.dx
Brian Kantor, WB6CYT, Administrator of Info-Hams/Ham-* mailing list
gateways of rec.radio.amateur.* newsgroups at UCSD
Ian Kluft, KO6YQ, Proponent of 1993 rec.radio.amateur.* reorganization,
former rec.radio.amateur.* FAQ Maintainer
Jay Maynard, K5ZC, Proponent of 1991 rec.radio.amateur.* reorganization
Brian Short, K7ON, Moderator of rec.radio.info
Rick Stealey, K2XT, Proponent of rec.radio.amateur.boatanchors

Q: Where can I obtain a copy of the original newsgroup charters?

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

Q: Where can I find out more information about the Usenet RFD/CFV
process?

ftp://rtfm.mit.edu/pub/usenet/news.announce.newgroups/How_to_Create_a_New_Usenet_Newsgroup
ftp://rtfm.mit.edu/pub/usenet/news.announce.newgroups/How_to_Format_and_Submit_a_New_Group
_Proposal
ftp://rtfm.mit.edu/pub/usenet/news.groups/Guidelines_on_Usenet_Newsgroup_Names

Q: I don't want any of the newsgroups to change. What should I do?

Vote "YES" for all of the existing rec.radio.amateur.* newsgroups.

Q: I want to go back to one single newsgroup for amateur radio on
Usenet, like we had back in the 1980's. What should I do?

Vote "NO" for all (or all but one) of the newsgroups.

Q: I support some of the newsgroups for amateur radio, but not others.
What should I do?

Vote "YES" for any newsgroups that you wish to remain unchanged, and
vote "NO" for any newsgroup you wish to have reconsidered in a future
RFD/CFV.

Q: I support the existence of a newsgroup, but disagree with its
charter. How should I vote?

Since this opinion poll is for both the existence of given newsgroups
AND their current charters, you should vote "NO" for that newsgroup.
Again, this is a non-binding opinion poll simply to determine if current
newsgroups should be considered for modification or deletion, not a vote
to actually modify or delete these newsgroups.

Q: I would like new newsgroups to be created, what should I do?

Creation of new newsgroups is not being considered by opinion poll. A
future RFD/CFV would have to be initiated to do this. You are, of
course, welcome to express your opinions concerning new newsgroups by
posting them to rec.radio.amateur.misc (*NOT* by E-mail to the
vote-taker).

Q: I have no opinion, what should I do?

You may wish to read the preceding 30 days of public discussion on
rec.radio.amateur.misc about this opinion poll to develop your own
opinions (go to http://www.dejanews.com/ and search for "STRAW POLL").
If, after reading the public discussion, you still remain undecided, you
may abstain from this opinion poll. You may do so informally by not
participating in it at all, or formally by explicitly voting "ABSTAIN"
for all of the newsgroups.

IMPORTANT VOTING PROCEDURE NOTES:

Standard Guidelines for voting apply. One vote per person, one account
per voter. Votes must be mailed directly from the voter to the votetaker.
Anonymous, forwarded or proxy votes are not valid. Votes mailed by
WWW/HTML/CGI forms are considered to be anonymous votes.

Vote counting is automated. Failure to follow these directions may
mean that your vote does not get counted. If you do not receive an
acknowledgment of your vote within three days contact the votetaker
about the problem. It's your responsibility to make sure your vote
is registered correctly. Duplicate votes are resolved in favor of
the most recent valid vote. Addresses and votes of all voters will
be published in the final voting results post.

HOW TO VOTE:

Extract the ballot from the CFV by deleting everything before and after
the "BEGINNING OF BALLOT" and "END OF BALLOT" lines. Don't worry about
the spacing of the columns or any quote characters (">") that your
reply inserts. Please, DO NOT send the entire CFV back to me!

Fill in the ballot as shown below. Please provide your REAL NAME and
indicate your desired vote in the appropriate locations inside the ballot.

When finished, MAIL the ballot to: < voting@clark.net >
Just "replying" to this message should work, but check the "To:" line.

Examples of how to properly indicate your vote:

```
[ YES ] example.yes.vote
[ NO ] example.no.vote
[ ABSTAIN ] example.abstention
[ CANCEL ] example.cancellation

DO NOT modify, alter or delete any information in this ballot!
If you do, the voting software will probably reject your ballot.

If these instructions are unclear, please consult the Introduction to
Usenet Voting or the Usenet Voting FAQ at http://www.iki.fi/~jpatokal/uvv.

======== BEGINNING OF BALLOT: Delete everything before this line =======
.-------------------------------------------------------------------
| 1ST STRAW POLL: rec.radio.amateur.* reorg
| Official Usenet Voting Ballot <RRSP-0001> (Do not remove this line!)
|-------------------------------------------------------------------
| Please provide your real name, or your vote may be rejected. Place
| ONLY your name (ie. do NOT include your e-mail address or any other
| information; ONLY your name) after the colon on the following line:

Voter name:

| Insert YES, NO, ABSTAIN, or CANCEL inside the brackets for each
| newsgroup listed below (do not delete the newsgroup name):

Your Vote Newsgroup
--------- ------------------------------------------------------------
[ ] rec.radio.amateur.antenna

I am posting this for a friend, who is looking for a volt meter that "talks" to him... giving him in an audible voice what is being displayed on the readout screen. Radio Shack made them several years ago, but does not have them now. If anyone has one laying around they are not using, or knows of any distributor/manufacturer that has them, please respond direct to him. His email address is:
k7uc@juno.com
Thanks, Kay, N7KH

QST de W1AW
DX Bulletin 22 ARLD022
From ARRL Headquarters
Newington CT June 4, 1998
To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, DXNS, The Daily DX and Contest Corral from QST. Thanks to all.

UNITED ARAB EMIRATES, A6. Don, N1DG, will guest operate A61AD until June 7. He is here on business and will be active as time permits. Look for him using RTTY around 14090 khz. He plans to also be on 30, 17 and 12 meters and RS-12. QSL via N1DG.

PAKISTAN, AP. Amir, AP2AGJ, is a newly licensed amateur and is QRV from Karachi. He has been active on 17 meters SSB. Look for him near 18150 khz at 1500 and 1800z. QSL to Amir Gulistan Janjua, Governor House, Peshawar, Pakistan.

MOLDOVA, ER. The IARU Region 1 Field Day HF Contest will take place between June 5 to 7. Look for ER3R/p to be QRV for this contest. QSL to ER1DA, PO Box 9537, Kishinev MD-2071, Moldova.

FRENCH POLYNESIA, FO. Pierre, F5GSK, is active as FO5QE from Tahiti until January 1999. QSL to Pierre Boutheon, SP 91628, 00200 Armees, Postes Aux Armees, Paris, France.

THAILAND, HS. Tham, E21CJN, has been QRV on 21024 khz around 1430z. QSL via W3PP.

MINAMI TORISHIMA, JD1. Ryo, JL1KFR/JD1, has been very active on 17 meters. QSL to home call.

NETHERLANDS, PA. Special Event Station PA6EVA will be QRV until June 20 on all bands to celebrate the 20th Anniversary of EVA, the Radio VERON Club Alkmaar. QSL via the bureau.

UKRAINE, UR. Special callsign EO2500FBD is QRV until June 10 using RTTY to celebrate the 2500th Anniversary of Belgorod-Dnestrovsk.

QSL to S. Bratinov, PO Box 85, B-Dnestrovsk 272300, Ukraine.

BERMUDA, VP9. Fred, K1EFI, is active until June 8 from Southampton Parish as K1EFI/VP9. QSL to home call.

HONG KONG, VR2. Serge, F6BNK, will be signing VR2/F6BHK for the next two years while on a work assignment. QSL via operator's instructions.

CAMBODIA, XU. Ichinose, JA6BND, is active until the middle of June as XU6BND. He can usually be found on 15 meters around 0000z and 1200z using SSB. QSL to home call.

MACAU, XX9. Motoi, XX9TSS, has been active on 17 meters SSB. Look for him around 2300 and 0200z, and also around 1300 to 1400z. QSL via JK2PNY.

THIS WEEKEND ON THE RADIO. The QRP TACtical Contest is scheduled for this weekend. Please see June QST, page 87 for details.

Analyzer2000 ist an indispensable tool for every radio amateur and other people, working with signals in the audio frequency range.
It's running on Windows95/NT and needs no additional hardware, only a sound card!

download at
http://members.aol.com/btf1

features/benefits:
+superfast spectrum analyzer with full control over span, dynamic range and resolution bandwidth
-> switch your radio to SSB and you will have a professional IF-panorama for free!
+time analysis with oscilloscope and envelope display
-> use Analyzer2000 as a digital scope with trigger, grid, single shot and more!
+superhighspeed waterfall display with several coloring schemes
-> use this sonagram to see time/frequency agile signals with a resolution of less than 50us!
+several tools like level riding markers with delta function, averaging, peakhold...
-> measure fsk-shift, harmonic distortion or intermodulation with only a few mouse clicks!
+fft-based morse decoder
-> decode several CW signals within one band simultaneously with automatic speed and threshold control!
+realtime processing thanks to the multithreading architecture
-> do not lose any sample even on slow machines
+20 seconds post trigger memory
-> analyze the signal several times with different settings
+Snapshot and recording feature
-> save your signal to a wave file (last 20 seconds or all new)
+Analyzing of standard wavefiles
-> analyze signals from former sessions or other stations

Available or coming options:
+Low IF input on 11.025 kHz +/- 5 kHz for real IF analyzing capability
+TCP/IP server for remote controlled operation (via LAN/WAN) with multi client capability
+Baseband analysis with constellation diagram, phase diagram, frequency diagram for signal classification
+Demodulation of FSK/PSK signals with bit analysis

Hi All!

Just thinking about the new rule changes.

Is every one happy with not getting and extra 100 points for having
a VHF station?
I am not.

How about the ARRL giving out a list of componets or parts kit to
build an antenna, like say insulators 1000' feet or #12 wire or equivlent
rope, feed line or your own desire, man made antenna suports can
not be used (like towers, push up masts).
This rule is not in the new rules for 1998 ARRL Field Day.
This will deffently level the playing field.
I am for it. How about you?

Does any one else have any more idea?

What the hell is the ARRL trying to do? Why do it half ass!

Source record: 28900

My Drake TR-7 amateur transceiver had no trouble picking up WBAL 1090 with a 33 ft wire strung out the window to a nearby tree last night around 11 AM (57 degrees in Baltimore). If I remember correctly, WTIC 1080's tower is line of sight to Newington.

If you have to ask, getting a good receiver makes a lot more sense than getting filters, though a skilled engineer with enough monetary incentive ought to be able to make you what you want.

I'm not an AM DXer, so I just use the best available amateur radio antenna I currently have set up for listening to AM broadcast stations. You might check the rec.radio.shortwave newsgroup for advice.--Zack W1VT

Germany has very strict rules about preserving heritage and the look
of the community (sort of like some folks in this country are trying). The
younger set is running as fast as they can from the past, sometimes ridding
themselves of the good as well as the junk.

From: Karlan@juno.com
Message-ID: <6lch9vejs1@nnrp1.dejanews.com>
Source record: 28903

Collector Premium Quality Grid-Dip Meter made by James Millen Mfg. Co. Inc., Malden, MA., U.S.A. Model Number 90651.

Photo at:

http://www.geocities.com/Athens/Forum/3417/GRID-DIP.JPG

This unit is like new and is in amazing condition! See Photo. It even has the original box, packing and manual with it. One lucky person apparently sold a unit for $325 in this super condition and I have seen them for $65 as well in decent condition.

Candidly, this meter is priced for either a collector or someone who wishes to pay a premium to have one in new extraodrinary cond. in the original box and not the operator who just could use a meter. Again, similar models in lesser condition can be had for well under $100 if simple utilitly alone is the objective.

Will take $160. Due to the amazing condition of this unit cannot consider offers less than $160. This is a rare find. Will also consider some type of swap for a Hickok Navy or Air Force military 118 cardmatic tube tester or TV-2C.

Thank you.

1927. Hammarlunds For Sale

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-06 00:00:00 UTC
From: Karlan@juno.com
Message-ID: <6lchc2era1@nnrp1.dejanews.com>
Source record: 28904

TWO NICE HAMMARLUNDS FOR SALE:

HQ-140-X (no speaker)

HQ-170 with matching Hammarlund Speaker (original owner).

Both units are in extremely nice shape for units this old. Of course there's some minor scratches and the like, but these would be considered extremely well kept for units that old. Plus both units were owned by people who were not smokers, thus the meters and dials are pure white and not yellowed as one usually would expect with old boatanchors.

Photos:

HQ-140-x:

http://www.geocities.com/Athens/Forum/3417/HQ-140-1.JPG

Purchased off the gentleman directly who owned it.
He is retiring and wishes to reduce his collection. He stated that the unit was recently gone over and is in super operating condition. $195 or b/o plus shipping costs. Will consider a good condition & complete Hickok USN or USAF AN/118B cardmatic or TV2-C for a swap for the 140-X.

HQ-170 & Matching Hammarlund Speaker:

Have taken all sides so you can see the condition.

http://www.geocities.com/Athens/Forum/3417/HQ-170-1.JPG
http://www.geocities.com/Athens/Forum/3417/HQ-170-2.JPG
http://www.geocities.com/Athens/Forum/3417/HQ-170-3.JPG

Purchased off the son of the gentleman who bought it brand new. The unit was represented to me by this gentleman's son as being in good cond., because that's the way his father was. The son said it was operating fine before he removed it from his father's home. Said he and his brother were listening to the Dodger's game. I am not an expert at this type of radios, but know well what they are. The only things I can see is that one of the light bulbs that illuminated one of the dials needs to be replaced and the fine vernier adjustment will need a dial string (a.k.a. some folks use dental floss). Since neither this gentleman's son, nor I are experts at the use of these radios that is all I can say and you can see the condition yourself. From the photos you can see there's some scratches etc., but the unit would be considered in excellent physical cond. for its age.

HQ-170 & Matching speaker $325 or b/o plus shipping.

Thanks.

1928. Johnson Viking Challenger $95 or B.O.

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-06 00:00:00 UTC
From: Karlan@juno.com
Message-ID: <6lchdv$f1j$1@nnrp1.dejanews.com>
Source record: 28905

E.F. Johnson Viking Challenger Transmitter and Morse code key
with Johnson manual. Price reduction--$95 or best reasonable
offer plus shipping.

Some nice folks advised me that this unit does not have the
original Johnson stock meter setup, but was upgraded by the owner
at one time from examining the meters in the photo.

Photo at:

http://www.geocities.com/Athens/Forum/3417/VIKING.JPG

The unit's power cords, etc. need replacing due to the old rubber
insulation cracking. Could not be plugged in for this reason.

Purchased off the son of the gentleman who bought it brand new.
This unit was represented to me by this gentleman's son as
probably being in good cond, but he did not remember his father
using it for quite a while. His point was that it probably ran
the last time his father used it many years ago.

Will consider $95 or best reasonable offer plus shipping.

Thanks.

1929. Heathkit VFO For Sale $95 or B.O.

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-06 00:00:00 UTC
From: Karlan@juno.com
Message-ID: <6lchgo$f38$1@nnrp1.dejanews.com>
Source record: 28906

Heathkit VFO HG-10 with manual in good cond. for it's approximately 40 years of use. The band switch will require lubrication as it is stiff from lack of use. The other two controls are fine. The octal plug you will will need to supply.

May be viewed at:

http://www.geocities.com/Athens/Forum/3417/VFO.JPG

There's some minor scratches on the top of the unit. If you look closely, you can see the paint is worn at the upper right and left corners of the cabinet. This is where the sheet metal was formed at the bends to make the cabinet. A nice feature of this model is that there's an inserted letter with manual from Heath indicating that there was a capacitor change during if manufacturing run to minimize chance of drift. The letter is reproduced with the photo above.

$95 or best offer plus shipping costs.

For a full description with pictures and specifications for the HG-10 see at the following web URL: cyberventure.com/heathkit/ham/hg-10.html

SB DX @ WW $OPDX.360
Ohio/Penn DX Bulletin No. 360

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 360
BID: $OPDX.360
June 8, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WA4FFW, KH6BZF, N6ED, WA6AXE, K7BV, K8RF, K8YSE, K9VX, 9A4SP, 9A4NA, BA4TB, CT1ELP, CT1EEB, DL1CW, DL4VBP, DL7UFR, G4BUE & DX News Sheet, OK1KAG/OH9MM, PY2YP, SV1IW, F-10255 <SWL>, VK2ICV, ZL1RS and ZS6PHD following DX information.

NODXA MEMBERS TO ACTIVATE AUSTRAL AND THE MARQUESAS ISLANDS ON RTTY. Northern Ohio DX Association members Bill/W8JGU and John/K8YSE will operate from Rurutu (OC-050, Austral Islands) and Nuku Hiva (OC-027, Marquesas Islands) with the main focus on RTTY. Their tentative schedule is to operate from Rurutu Island from June 8-12th and Nuku Hiva Island from June 14-18th. There may be some operating from Tahiti as well. John and Bill will sign FO0PAP and FO0MAC, respectively. These may count for BRAND NEW RTTY entities once voted and approved by the DXAC. Look for them on RTTY on 40, 30, 20, 17, 15, 12 and 10 meters on the usual frequencies. At times there will be 2 stations on the air with one on RTTY and the other on CW or SSB. They will try to give attention to Europe as openings permit. Operations on 80 and 160 meters is reported unlikely. All QSL requests go to K8OU. ADDED NOTE. Since John is the caretaker of the OPDX Web page the site will not be updated for the next two weeks.

3D2, ROTUMA (and Fiji Islands). Roberto, EA4DX, who you may remember from last September as 8Q7XX, will be active from Rotuma Island August 29th to September 19th (3 weeks), and from Fiji (Viti Levu) September 20-24th. He will sign from Rotuma as 3D2DX and from Fiji as 3D2DX/P. Activity will be on all bands 160-10 meters including the WARC bands on the usual DX frequencies. Operations will be on SSB and RTTY. Most of his activity from Fiji will be on the low bands and RTTY. His equipment includes a Yagi for 10/12/15/17/20 meters and a vertical for 40/80/160 meters, plus a 1 kw linear. QSL via EA4DX's callbook address or E-mail QSLs to: 3d2dx@earthling.net. There is a Web page for this operation, and it can be found at the URL address: http://www.qsl.net/ea4dx/index.html

8P, BARBADOS. Dennis, K7BV, and his wife Lieska will travel here and be active from 8P9Z's QTH July 7-14th. A 8P callsign will not be assigned until their arrival on the island. Dennis will operate CW extensively on all HF bands and RS12 prior to the IARU HF Contest July 11-12th (He is expected to enter the contest as a Single Op/All Band High Power CW category). As is always the case when Dennis operates from the Caribbean, he will make special effort to catch as many Asian band openings as possible. Whenever possible, he will respond to 9BDXCC QSY requests. QSL via K7BV CBA.

9K2HN/P OPERATION DELAYED. Hamad, 9K2HN, reports that he had to delay his operation to Kubar Island (AS-118) due to a conflict. His friends (not hams) who were going to join him on this trip to the island are taking final exams now!!

AP, PAKISTAN. The "DX News Sheet" reports that Amir, AP2AGJ, is a newly licensed ham in Karachi. He has been heard on 17 meters (18150 kHz) SSB. Look for him between 1500 and 1800z. QSL direct to: Amir Gulistan Janjua, Governor House, Peshawar, Pakistan.

BI4, PING ISLAND (New IOTA!). A group from Jiangsu Province of China are planning to be active as BI4Q from Ping Island either June 13-14th or June 20-21st. Ping Island is in the Huanghai Sea, 62 miles east of the cosat. This will be the first time anyone has activated this island, so no IOTA number has been issued. They will on 80-6 meters (including the WARC bands) on CW and SSB, using a 1KW AMP, A3S, R7000 and dipoles. The team consists of Jin/BA4TA, Deal/BA4TB, David/BD4RF, Ken/BD4RD, Chen/ BD4SE and possibly others.

CY9RF CQ WPX CONTEST OPERATION CANCELLED. Dan, K8RF, reports that the reason no one heard CY9RF from St. Paul during last weekend's contest is that the operation was unfortunately cancelled due to various factors, mainly last minute conflicts with one of operator's schedule. They did not have enough manpower to properly mount the operation, so Dan felt it was best to cancel rather than do a poor job. However, Dan may help out with Mike's (VE9AA) upcoming operation this summer.

GM, SCOTLAND. Look for F5VCR and G3OCA to be active from July 10-17th from various Scottish islands (NH07, NH13, NH26).

IOTA NEWS.....
EU-032. Patrick, DL4VBP, reports that he will activate EU-032 during his holiday from June 6-20th. He will operate from two French Atlantic coast islands: "Ile de Re" and "Ile d'Oleron" (both EU-032). Besides operating SSB, he will also be active on CW and RTTY.

EU-090. The Radio Club Split, 9A2A (9A1AKL) is planning to activate Palagruza Island during IOTA contest. The callsign will be 9A8P, same as the previous expedition. QSL via 9A1AKL, bureau or CBA.

KH6BZF PROPAGATION REPORTS. OPDX InterNet Subscribers will receive Part 1 of Lee's forecast for the month of June as an additional bulletin.

MU, GUERNSEY. Tom/DL4SZ and Arno/DL1CW will be active from here June 10-13th, signing MU/DL4SZ/p and MU/DL1CW/p, respectively. Arno will be active on CW only, but Tom will be active both SSB and CW.

QSL INFO AND NEWS......
Peter, ZS6PHD, reports that South Africa has rejoined the UPU and IRCs can now be used within South Africa. The current cost for IRCs is SAR 5-00, which is worth slightly under 1 USD. The airmail rate for postal items up to 10 gram is R 1-90 to anywhere in the world, so one IRC is more than enough for ZS-land.

Steve, K9VX, reports that the turn-around time for his EP2MKO QSLs from UA6HCW is about 4 months. He just received his card for a late January contact, via regular air mail.

The 3W6KA logs are now available on the WEB. Check the URL address at: http://njdxa.org/3w6log-check.html

Jose, CT1EEB, reports that the 1997 Kure Island DXpedition (K7K) Web page is up and running. The site contains inoformation and photos. Check out the URL address: http://www.qsl.net/ct1eeb/index.htm

QSLs for CT98ELP, as well as CQ7ELP (used in WPX SSB Contest), are via CT1ELP. The address is: Pedro Pedroso, P.O.Box 116, 2806 Almada Codex, PORTUGAL

DX Log Search for Andy, 9X0A, can now be found on the Web. Logs for his 9X/RW3AH, 9X0A, and 9U/9X0A operations can be found at: http://www.qsl.net/n6ed/9x0a.html

Kingman Reef, Johnston and Howland Island QSL cards. Mac, WA4FFW, reports that all QSL cards for the February-March operations from N4DAZ/KH3 Johnston Island and for N4BQW/KH5K, Kingman Reef have been mailed. If you sent a QSL for one of these station's contacts along with a card for the Howland, WA4FFW/NH1, in the same envelope, you will have to wait until the Howland cards go out. Gene/WJ4T, Joe/N4DAZ and Mac are beginning to process the Howland at the present time and expect to have them completed in the next few weeks. Harold, K4AU, reported to Mac that he is current with all QSL cards received to date for the Howland SSB operations K4AU/WH1. Mac also reports that all cards for the previous operations of Chuck, N4BQW, from Palmyra, Tern, Kure and Midway have been caught up and have been mailed. They appreciate everyone's patience as post DXpedition requirements have consummed more time than expected.

SV, GREECE (Now on 6 meters). Manos G. Darkadakis, SV1IW, R.A.A.G. General Secretary, informs OPDX that Greece is now using the 6 meters band on a secondary basis (primary use reserved for the Greek army), therefore the Greek ministry does not issue licences for visitors (either reciprocal or CEPT) for that band. Any operation from Greece, Crete or Rhodes from amateurs other than Greek citizens is illegal.

SV9, CRETE. Juha, OK1KAG/OH9MM, reports to OPDX that he will be celebrating his graduation in Crete, June 9-15th. He did not provided us with his Crete

callsign, so he may be signing /SV9. Juha did say his planned activity will be on 40-10 meters CW/SSB/RTTY. QSL via OH3LQK (prefer via bureau).

TF, ICELAND (Update to OPDX.358). Sigi, DL7DF, and his crew (Tom/DL7BO and his YL, Ben/DL7BY, Frank/DL7UFR and Wolfgang/DL2NWK) will be active from June 15th to June 21th. They have now reported that they will be active on 6 meters besides the other announced bands. They will use an IC-706 and a 5 element yagi for 6 meters. QSL via DL7DF.

WWSA CONTEST HAS BEEN CANCELLED/DISCONTINUED. Gilberto Affonso Penna, PY1AFA, the organizer of the WW South American CW Contest and former Chairman of the Antenna-Electronica magazine (contest sponsor), became a Silent Key (SK) as of September, 1997. With the passing of PY1AFA the magazine's new Board of Directors has decided to cancel the 1998 contest. The contest was to take place June 13-14th. Some Brazilian hams are trying to make arrangements to have the WWSA contest back next year, meanwhile the 1996 and 1997 results are avaiable on the WEB at:
http://www.qsl.net/cwsp/wwsae.htm

VK9, LORD HOWE ISLAND. Nick, VK2ICV, is currently looking for 3-4 contest operators willing to operate from VK9LX during the CQWW CW Contest in November. The VK8LX team will spend 10 days on the island. Nick states, "All equipment will be on Lord Howe prior to contest - just bring your laptop and tooth brush." If interested, contact Nick via E-mail at: watchman@tig.com.au -- To look at last year's operation, check the Web site: http://www.watch4you.com/vk9lx

ZK1, SOUTH COOK ISLANDS. Ed, K8VIR, who was signing ZK1EHH from Rarotonga Island (IOTA OC-013), is now active from Aitutaki Island (IOTA OC-083) until June 10th. Check 21300 and 14267 kHz between 0130 and 0800z. QSL via K8VIR (GreenValley, AZ. address).

ZL8, KERMADEC ISLAND. Bob, ZL1RS, will be on Raoul Island in the Kermadec Island Group (which is 1000 KM N.E of ZL-lans), from June 28th - July 17th. His work on the island has priority, so ham radio activity will be sporadic. Look for ZL8RS on all bands from 160-6 meters, mainly on SSB with some CW on 160 meters and 30 meters. There may also be some RTTY activity if Bob can borrow a laptop. QSL via ZL1RS only 97/98
CBA: R Sutton, 109 Wright Rd, RD2, Katikati, NEW ZEALAND

1944. What is the BEST "CALLBOOK" ????

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-08 00:00:00 UTC
From: m9bw990@ix.netcom.com
Message-ID: <357C31D5.3724@ix.netcom.com>

Hey, a DX related question:

What does everyone think is the best callsign lookup directory?

There are at least several to choose from: QRZ, Buckmaster, the Amateur Radio Callbook, and probably others.

Some possible criteria:
1. Usefullness for DX vs. domestic (U.S.)
2. CD ROM vs. paper.
3. Interface with logging programs.
4. Completeness of coverage.
5. How well it functions in general.
6. Cost.

I would be happy to tabaulate the results and post them.

10 meters is a SWEET, SWEET band. Wait till it really heats up. Last cycle I used to work PILEUPS of Europeans from my NJ QTH on 10 meter *FM* with 100 watts and a Butternut Butterfly beam. I worked ALL OVER THE WORLD on that band with much less trouble than 20 or even 15, including some really good cards, like my 3Y/B.

In article <35737564.3B22@pacbell.net>, cqbdiaz@pacbell.net says...
>
>I'm new to the HF bands, I passed the 5 WPM back in December 1997

Thought this might be of some interest to readers of this NG. It predicts the solar maximum will arrive between 24 and 14 months earlier than originally forecast. Bummer, and I still don't have my General ticket yet! I better get cracking on the code. .

In a recent notice by Dr. Dick Altrock of the USAF and in conjunction with the National Solar Observatory, the following notice regarding the current state of the solar cycle as it pertains to coronal Fe XIV emissions was released.

It is of interest because of its prediction for the timing of this solar maximum, which according to current estimates of Fe XIV data, might occur much earlier than other predictions indicate. The most popular and previously accurate methods have estimated that the solar maximum in sunspot activity will occur sometime in the year 2000.

We have quoted Dr. Altrocks statements verbatim as follows:

"RUSH TO THE POLES" HAS BEGUN

The first reliable precursor to the maximum of solar activity that will occur near the turn of the century has been identified. A study of the long-term variation of emission features in Fe XIV has shown that, prior to Solar Maximum, emission features appear near 55 degrees latitude in both hemispheres and begin to move towards the poles at a rate of 9 to 12 degrees of latitude per year. This motion is maintained for a period of 3 or 4 years, at which time the emission features disappear at the poles. This phenomenon, which represents the fastest global motion of any kind on the sun that is sustained for such an interval, has been referred to as the "Rush to the Poles". The maximum of solar activity, as represented by the number of sunspots on the sun, occurs approximately 14 months before the features reach the poles.

In early 1997, emission features appeared near 55 degrees latitude, and subsequent observations have shown that these features are moving towards the poles. This then is the Rush to the Poles that heralds the next Solar Maximum. Based on previous observations, these features will reach the poles sometime between March 2000 and January 2001,

which results in a prediction for Solar Maximum of between January and November 1999, substantially earlier than some other predictions.

I'm getting confused. Went to Svetlana's URL at www.svetlana.com and
could not find the 3CX800A or the 3CX800A7 listed in their list of
"All Svetlana Tubes". Did however find the 4CX800A. I guess it's
possible that their URL is not up-to-date.
I'd like to know if they make a tube which is a direct substitute for
the 3CX800A7?

1959. near deaf ge master 2 vhf repeater

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-09 00:00:00 UTC
From: kc5swi@flash.net
Message-ID: <357cc933.269082867@news.flash.net>
Source record: 28786
Body handling: HTML body converted to readable text

I have a ge master 2 vhf 110 watt radio converted into a repeater on 145.230/144.630.

The radio is set to output 35 watts into the wacom duplexor, up the 80' of 9913 coax, to a 5.5 db verticle cushcraft antenna. Transmit is fantastic, nearly 30 miles . However, recieve is poor at only about 10 miles using a 50 watt mobile with a high gain antenna. I can still recieve the repeater full scale when it cant hear me!

The radio was professionally tuned up on frequency and the icoms trimmed out. The nhrc internal repeater card works great.

My master 2 does not have an internal or external preamp. Should I add one?? How well does the ge internal preamp work?

I recently purchased an additional 100" of tower, a db-224 commercial style antenna, and 200" of 7/8 helix to try to resolve the poor hearing ability of the repeater. I fear it will transmit 40 miles after the improvements, but still only hear 10 miles.

I realize there is loss through the duplexor. I am running a pl tone of 110.9.

Any suggestions??

Thanks in advance for any help, please e-mail responses if possible to kc5swi@flash.net.

Indeed. In 1989, I worked the 10 meter contest from a parking lot in
Tallahassee, FL with my 100 watt rig hooked to a $20 CB whip antenna
mounted on the trunk. Made several hundred QSOs, most of them DX;
all over Europe, lots of Japan, everything basically.

In 1989 Old Sol was very cooperative. Here's hoping he gets his
act for this cycle together soon.

> andreas christiansen

Obsolutely doesn't matter. It's whatever feels best for you. I borrow a
keyer from a friend when I was first learning and it had been wired
backwards (dits on forefinger, dahs on thumb) and I am right handed. I
send just fine..well...maybe not really fine but I can be understood. If
I use someone else's keyer that is wired differently, I just flip it
around.

Have fun

The convention arose in the days of the bug where you
had to manually make dahs. That was easier to do with
the index finger. With an electronic keyer, it really doesn't
matter which way you hook it up. But if you learn opposite
the normal convention, you'll find it almost impossible to
use a setup configured the regular way, no matter which
hand you use to send.

I'd suggest you use the standard right handed convention.
That gives two benefits. First, you can use other people's
stations who use the standard convention. And second,
you probably should learn to send right handed anyway
so that your left hand is free to write. This will actually
give you an edge over right handed operators.

I am also left-handed, which is why I made sure I learned
to learn to use the paddle right-handed. This way I could
write and otherwise operate the radio with left hand while
sending with right hand. No picking up and putting down the
pencil, etc.

I'm left-handed, but actually never even thought to use my
left hand to operate the paddles, I just started using my
right, I suppose because I was holding the pencil in my left
already. Of course Andreas, only we will know when you send
that you have wired your paddles "backwards"! hi hi hi.

It would only be a problem for you if you later used someone
else's station and didn't bring along your own paddles (and
they had them wired "right-handed"). That might be something
you need to consider.

I read these with interest. I'm right-handed, and use a right-handed
paddle.

I wish when I was learning to use a keyer someone had recommended
learning to send with my left hand and write with the other; it makes
a lot of sense Lacking an elmer, I did the next best thing: I learned
how to use a paddle without putting down the pencil....

Do note that many keyers have a "reverse" function that allows you to
swap the dah and dit contacts. That would be a good way of getting
around the problem if you visit someone else's station..

1970. JACK FILES TEST RULES

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-10 00:00:00 UTC
From: Peter VK4VW <vk4vw@st.net.au>
Message-ID: <357E387C.32BEEBE8@st.net.au>
Source record: 28797

Hi,
Sorry for the intrusion

The 1998 JACK FILES rules published in AR mag are incorrect.
It seems they are just a copy of last years rules with the dates changed to suit.
The new rules for 98 were received by AR magazine in april.

Not to worry here are the correct rules. They are also available from my web site http://www.st.net.au/~vk4vw/vk4vw/ If you know of anyone interested in contesting could you please tell them.

1998 Jack Files Memorial Contest

Rules

CW - Sat 4 July 1998 0800 - 1400 UTC

PHONE - Sat 11 July 1998 0800 - 1400 UTC

This contest sponsored by the Wireless Institute Of Australia Queensland Division
honours the late Jack Files a long serving VK4 WIA Councillor. The object is for amateurs
throughout VK/ZL/P2 to work as many VK4 Cities, Towns and Shires as possible, to
encourage portable/mobile activity from the less populated VK4 Towns and Shires, and to
serve as a warm up for the Remembrance Day Contest.

SECTIONS
(a) Single operator home
(b) Club fixed
(c) Single operator mobile/portable
(d) Club mobile/portable
(e) Stations outside VK
(f) Short wave listeners

OPERATE
on 160, 80, and 40m.
The Contest is in six one hour periods for the purpose of duplicate contacts, ie 0800 - 0859,
0900 - 0959, 1000 - 1059 etc, you may rework a station at any time provided they are not
consecutive QSO's and the station has not already been worked during that one hour
period.

Contacts with stations in other contests are valid as are contacts with DX stations, and
those with VK6 are encouraged.
Contacts on the 80m DX window are not permitted. Cross band contacts are not permitted.

SWL entrants are to include the calls and serial numbers of both stations received, SWL
entrants cannot log more than five consecutive contacts from any one station in each one
hour period.

EXCHANGE
Exchange RS(T) followed by a three digit serial number incremented by one for each QSO,
continuing when changing bands. Multi Transmitter stations should use a seperate set of
serial numbers for each band. VK4 entrants send their two letter Shire code after their
serial number.

SCORE
Score one point per QSO for all non VK6 stations and two points for VK6 stations. Each
VK4 Shire/Town code per band counts as a multiplier, also each prefix per band. To
stimulate portable/mobile activity, portable/mobile stations can also claim one multiplier
per band for each VK4 Shire/Town they operate from. The final score equals total points
multiplied by total multipliers.
In this contest only, single operators are permitted to have a log keeper. Club stations can
use multiple transmitters, providing there is only one station on each band at any one time.

LOGS
Attach a summary sheet showing the name, postal address and callsign of the entrant,
station location and equipment used, section entered, points claimed, and a declaration that
the rules and spirit of the contest were observed. Send logs to : Contest Manager, GPO
Box 638, BRISBANE, QLD 4001. For this years contest only Logs can be sent by email
using plain text only to vk4vw@st.net.au Logs must be received by Tuesday 1 September
1998 to be eligible.
Trophies will be awarded to the highest scorer in each section provided there are at least
five entrants in that section. Certificates will be awarded to all place

getters, and a
certificate of participation will be sent to all other entrants.

CITY/TOWN/SHIRE CODES
I will publish the most recent list of City/Shire/Town codes i can here
in the first week of
June.

Peter Dawson VK4VW
Contest Manager WIAQ
April 5 1998

Thanks for the advices. I forgot to mention in my first post
that even if I am left-handed, I use my right hand for writing.
(The result of an oldfasioned schoolteacher in rural Western
Norway in the late 50's : Use your 'correct' hand when you
write. Luckily, this teacher never taught us CW !!)
So my plan has always been to operate the key-paddle with my
left hand, and take notes with my right.
I just wondered if there were a reason for having dots on the
thumb and dashes on the index-finger. Is the thumb more 'fine
tuned' for sending dots, or something like that.
Anyhow, you have given me good advice, and I will probably
leave the paddles as they are. That way I may use other
stations, and others may use my station.
And, btw, my key-paddle does not have any reverse paddle
switch.

Tnx and 73' de

You may be surprised to hear that the UK lacks the sort of written constitution that you're used to. It was probably one contributing factor that impelled certain people to emigrate, declare independence, and write one ;-)

I have used them all and think for mailing addresses the Radio Amateurs Callbook still is the most comprehensive for world wide listings. A call like DH2BRR is in the RAC but not the others. All the others you can get on the internet anyway and to their credit, they do have many email addresses which is often useful. But as noted above, they seem to lag with some foreign listings that the RAC has. I remember not long ago callbooks were really books ;')

I find the RAC to be best for worldwide calls, but I also very much
like SAM for just domestic use. SAM by RT Systems has a great browse
by both name and also call, even under DOS, and it is fully HD
installable which is great for sub-notebooks without a CD.

Excellent technical sollution, Gary. But not very
practical. Gary forgot to tell you that if you ever
get to the point where you CAN send with your right
hand and write with your left one at the same
time, you should contact the people who do the Dayton
Hamfest, so they can put you on display.....

Send CW with whatever hand feels good. Copy CW with your
head, not with a pencil. And use a computer for logging.

As I mentioned, the convention is a holdover from the old
mechancial bug days. That made dots with a vibrating weight
when you pressed it one way, but you had to make dashes
manually by pressing it the other way. The finer motor control
of the index finger allowed you to do that rapidly and accurately.
Today it doesn't matter because the keyer makes both dots
and dashes automatically for you.

I guess I heard about "DX Windows" from my elmer,
at which time I recall him saying that the bottom
10 KHz of 40 meters was "reserved" for DX calling
in to the U.S. Wasn't into DX at the time, so I
didn't really pay much attention to that.

Now, after looking at an ARRL Band Plan, dated
20-5-98, I think that I don't understand what
and where DX windows are.

Are there indeed areas in the HF CW bands that
are, by convention, set aside for DX calling into
the U.S.? Listening now and then on 40 meters,
for instance, I find lots of DX stations in the
lower end, but also lots of U.S. stations calling
out as well.

What does this (from the ARRL B.P.) refer to:
3.790-3.800 DX window

What is this entry? I though 7.040 was the QRP calling
frequency?
7.040 RTTY DX

1988. 3W6AR

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-11 00:00:00 UTC
From: terrybu@newman.ens.tek.com
Message-ID: <6lotfi$ilb@newman.ens.tek.com>
Source record: 28815

Just worked 3W6AR from Hochimin City (sp-Saigon) in Viet Nam on 14.251 around 7AM local PDT. Think that makes it 1600Z. Was a 57 signal. Op is obviously new at the game and English was so-so but he managed. Will make alot of the needy happy. POB 732, TTSG, Hochimin City, Viet Nam, SE Asia was given as the qsl info.

QST de W1AW
DX Bulletin 23 ARLD023
From ARRL Headquarters
Newington CT June 11, 1998
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, DXNS, The 599Rpt and Contest Corral from QST. Thanks to all.

GHANA, 9G. John, 9G1BJ, and his xyl Marcia, 9G1TM, are QRV on 6 meters from Tamale. QSL via G4XTA.

NEPAL, 9N. Vlad, 9N1FP, has been QRV on 12 meters around 1300 to 1415z. QSL via RU6FP.

CHINA, BY. Jin, BA4TA, Deal, BA4TB, David, BD4RF, Ken, BD4RD, and Chen, BD4SE, will be QRV either June 13 to 14 or June 20 to 21 as BI4Q from Ping Island. Activity is expected on 80 to 6 meters, including the newer bands, using CW and SSB. QSL via operator's instructions.

BELARUS, EU. EU6DA, EU6GB, EW6BN, EW6CF, EW6CM, EW6DI and possibly others will be QRV during the weekends as homecall/p from islands in the West Dvina river. QSL via EW6BN.

FRENCH POLYNESIA, FO. John, K8YSE, and Bill, W8JGU, are QRV from the Austral Islands until June 12 as FO0PAP and FO0MAC, respectively, using mainly RTTY on 40 to 10 meters. There is some CW and SSB activity expected as well. QSL both calls via K8OU.

FRENCH POLYNESIA, FO. After their Austral Islands operation, John, K8YSE, and Bill, W8JGU, will be QRV from Marquesas Islands June 14 to 18 as FO0PAP and FO0MAC, respectively. As with the Austral Islands operation, they will use mainly RTTY on 40 to 10 meters, with some CW and SSB. QSL both calls via K8OU.

GUERNSEY, GU. Tom, DL4SZ, and Arno, DL1CW, will be QRV until June 13 signing MU/DL4SZ/p and MU/DL1CW/p, respectively. Arno will be

active on CW only, but Tom will be active using both CW and SSB. QSL to home calls.

SAUDI ARABIA, HZ. Paul, G7SLP, and KD5CRJ will be QRV through the summer from the QTH of HZ1AB while working in Dhahran. Activity will include 17 and 6 meters. QSL via K8PYD.

WESTERN SAHARA, S0. Mark, ON4WW, will be QRV June 15 to 20 as S07WW. QSL via ON5NT. Meanwhile, Hamdy, S01HA, is newly licensed and has been QRV on 20 meters. QSL via operator's instructions.

DODECANESE, SV5. Vito, I3BQC, will be QRV as SV5/I3BQC from Astypalea Island from June 16 to July 12. QSL to home call.

TURKS AND CAICOS ISLANDS, VP5. Bill, K5YG, will be QRV from Providenciales, IOTA NA-002, as VP5/K5YG from June 14 to 20. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL June VHF QSO Party and the TOEC WW Grid Contest are all on tap for this weekend. Please see June QST, page 87 for details.

I think it was about 2 months ago that 10 meters REALLY opened up for
a few days. I was hearing people from all over talking. The signals
were really strong and in many cases, I could hear both sides of the
QSO.

Right now, 10 shows a hint of what is to come. I think it will be
next year when it's going to get really exciting.

73,
Bob

1994. Split operation for DX and IF fliters

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-12 00:00:00 UTC
From: labs@ma.ultranet.com
Message-ID: <35808489.920611@news.ma.ultranet.com>
Source record: 28820

Hello all -

I own a Kenwood TS-570d, which is about the best radio I've ever had. I often work dx in split/pileup situations. I have noticed a problem that the agc action caused by a strong signal a few khz away from the dx station will quiet the whole receiver. I can get a tighter IF filter for this radio - 500hz and even 250hz. Will this help keep the agc action from signals outside this band from quieting signals within the bandwidth of the filter? Considering split operation, will this help or hinder working a dx station?

One school of thought is to keep the filtering as wide as possible, so that the dx station and any station he is answering are easily located bouncing back and forth between vfos. Is there any experience that would confirm or refute this?

Thanks for your replies

Mark Sheffield N1BZR

1999. DX Club for VE hams Nr. Ottawa, Canada.

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-12 00:00:00 UTC
From: al434@FreeNet.Carleton.CA
Message-ID: <6lrvsp$o7@freenet-news.carleton.ca>
Source record: 28825

A CAPITAL REGION DX CLUB?

The NCR is blessed with many active ham radio clubs but one thing that is missing is a club, or group, that is keenly interested in HF DXing. We believe from our own contacts, and the knowledge that there are about 800 licensed hams in the area, that there must be at least 50 active DXers, perhaps more, who might be interested in a club. Its to these hams, and to those who would like to know more about DXing, that this message is particularly addressed, do you agree that we should explore together the possibility of setting up a club with a strong emphasis on DXing?

We think there would be real advantages to this group getting to know each other and having presentations at meetings and perhaps competing, in a friendly manner, in various contests and challenges designed to add some local zip to DXing. Thought could also be given to activating desirable DX.

We have no pre-conceived ideas of how and where we would meet, or how often. This would be for the group as a whole to decide. We intend to approach other DX clubs in Canada and abroad to get ideas on what works and what doesn't for such a club.

We have to start somewhere so we suggest that any hams who find this idea attractive should get in touch with one of the authors of this message so we can build up a list of potential members and start the ball rolling.

In closing we should stress that we are not trying to "steal" members from any of the NCR's existing clubs. We feel the DX club would be filling a gap in NCR's club activities and hence should not be seen as a threat to other clubs' memberships.

Interested hams should get in touch with one of the authors of this message, David George VE3UOL or Paul Cooper VE3JLP. We encourage you to respond by e-mail and ask those doing so to please use "Capital Region DX Club" as their message "Subject".

Here is how you can contact us:

David George, VE3UOL
125 Dunhaven Dr. RR#2
Box 8040 Dunrobin.

>Hamfest, so they can put you on display.....

Gee, Jim, even I can do it. It is no harder than using a mouse
right handed. Most lefties can do that. I'll admit that using a
straight key with the off hand is harder, but paddles are a
piece of cake.

>Send CW with whatever hand feels good. Copy CW with your
>head, not with a pencil. And use a computer for logging.

As my Morse instructor used to say, "It isn't copy until it is on the paper."
Years of traffic handling reinforce that idea. If you don't copy it down, you
haven't copied it at all.

I suppose that if you have a computer, you could copy on that, but I find
that I can't type that slow. Typing requires both hands anyway. (But you
could use the keyboard for sending too, and that would moot the issue
of handedness.)

just another clichee: Brits are always fair and polite. :-)

Brits always tell you: "Oh, your english is exceptionally good!" If you hear that, you might be sure, that they hardly understand anything at all.

What would your text read, if you had to write it in chinese or russian? Hey, let's behave like radio amateurs. We are one family.

Walt: In german "radio" is called "Funk". That has, of course, nothing to do with the kind of music. Yes, you're right: amateur radio sounds like music.

Note that there are two different types (really more, but two that happen with any frequency) on 10 meters.

Right now, we're experiencing sporadic-E openings, also known as "short skip". This phenomonon peaks right about now, and is good for about 800-2000km (500-1200 miles) in most openings. Sometimes, two or more openings link to allow greater distances. Openings peak in late morning & early evening. Sporadic-E openings happen *every* year with no obvious link to sunspot numbers.

We're also experiencing occasional F layer openings, though I think they were better in mid-spring. F layer openings cover greater distances, and do have a definite link to sunspot numbers.

Either way, 10m is a blast!

What about the Petition of Right in 1628 and the Bill of Rights in
1689? After reading these two documents, I am convinced that the
American Revolutionists used their phrasology and influence when
writing our own Constitution and Bill of Rights. These two English
documents make very interesting reading if you like history, as I do.

Oh, yea...how much for the Magna Carta?? :)

The Twin Cities Club would like to announce the first Annual Minnesota QSO Quest, which will be held 06-07 February 1999. This is a 12 hour HF/VHF contest, 160m-10m & 6m, CW/SSB. The MN QSO Quest includes 4 MN operating classes (including a Novice/Tech class), 3 operating classes for the rest of the US & Canada, & even 2 DX classes, which is a little bit different from most QSO parties- hopefully this will make the MN QSO Quest an international event.

All MN counties are multipliers in this contest. MN stations can work MN counties, & the other 49 states & 12 Canadian provinces for multipliers, the rest of the world works Minnesota counties for multipliers.

Plaques & amateur radio related prizes will be awarded to all first place finishers in all classes.

A complete set of rules & the multiplier list with the two letter abrreviations for MN counties can be found at the MN QSO Quest website:

http://www.rossiya.net/mnqso.htm

If you've found the official mascot of the MN QSO Quest, Lars the soon-to-be lutefisk, you have reached the right place on the Internet.

You may also contact either the TCFMC or myself via email from the website. Hope to see you on the air in February 1999 when Minnesota 'works the world!'

Date: 1998-06-14 00:00:00 UTC
From: jeraa2t@ma.ultranet.com
Message-ID: <3583f3ad.609646@news.ma.ultranet.com>
Source record: 28695

I had a quck contact with these folks on 20 last nite but see no reference to them in the normal DX info. They claim to be on small island near Sau Miguel (I believe, tough copy with bad NE weather last nite). They claim they will have special QSL's through the bureau.

CU3T was aware of them being active.

Any info ?

2019. Ohio/Penn DX Bulletin #361

SB DX @ WW $OPDX.361
Ohio/Penn DX Bulletin No. 361

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 361
BID: $OPDX.361
June 15, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1HRW, WB2RAJ/WB2YQH & The 59(9) DXReport, K4VUD, W4OX, N4GN, K5YG, KH6BZF, K8ME, K8CX, K8YSE, KF9YL, N9WDQ, W0YG, AP2TJ, BA4TB, DK4UN, DL1XX, EA1ATL, G3VMW, G3XTT, G4BUE & DX News Sheet, GW0ANA, ON5NT, OZ1FJB, VE3EXY, VK4AAR, YS1FEA and Hillar/Elsie Raamat following DX information.

JUST A REMINDER THAT NODXA MEMBERS WILL ACTIVATE THE MARQUESAS ISLANDS ON RTTY. Northern Ohio DX Association members Bill/W8JGU and John/K8YSE will operate Nuku Hiva (OC-027, Marquesas Islands) from June 14-18th. Their main focus will be on RTTY. Look for John and Bill to sign FO0PAP and FO0MAC, respectively. Again, this island may count for BRAND NEW RTTY entities once voted and approved by the DXAC. Activity will be on 40, 30, 20, 17, 15, 12 and 10 meters on the usual frequencies. All QSL requests go to K8OU. ADDED NOTE. Since John is the caretaker of the OPDX Web page the site will not be updated until his return.

9N, NEPAL (Update). Charles, K4VUD, reports that beginning July 10th, he will be operating 9N1UD and will be looking especially for stateside contacts. He will stay in the Kathmandu area until about December 5th. He suggests looking for him during Nepal's sunrise and sunset times daily (he can not predict which days). He will first try 14195, then 14023 kHz; and then 21295 and 21023 kHz. He has a daily sked with Southeast Asians on 14215 at 0100z, via either his 9N callsign or 9N1AA, or if they get it, 9N1MM. He plans to try the lower bands this time (also 10 and 6 meters). Charles intends to E-mail the DX-Reflector's Mail List on any specific skeds when and if he can make things specific.

AFRICAN ACTIVITY. Charlie, W0YG, will once again head to Africa in July and August. He currently holds V5/ZS6YG, A22/W0YG and Z21/W0YG licenses. Operations will be limited to CW and possibly RTTY only. Most operating will be done 40-10 meters with specific attention to the WARC bands. He will be advising OPDX of the exact dates when they are firm. QSL all contacts via W0YG. DO NOT send cards via the ZS bureau. They will not

be answered.

BI4, PING ISLAND, PRC (Update). The Jiangsu DX Club (JSDXC) plans to be active as BI4Q from Ping Island (new IOTA) between June 19-21st. The team will consist of Jin/BA4TA, Deal/BA4TB, David/BD4RF, Ken/BD4RD and possibly others. Two stations will be active on CW/SSB. They will be active on the following frequencies:
CW - 3504, 7004, 10104, 14040, 18074, 21040, 24894, 28040 and 50110
SSB - 7050, 14260, 18135, 21260, 24945, 28460 and 50110 kHz.
QSL via 9A2AJ (Tom Polak,P.P.,34551,LIPIK,CROATIA) only! For more infomation, contact Deal/BA4TB via E-mail at: ba4tb@qsl.net

DAYTON 98 PHOTO GALLERY IS NOW UP AND RUNNING! Tom, K8CW, reports to OPDX that there are 105 new pictures this year on his home page. Most of them were taken at the Crowne Plaza Hotel (where a lot of famous DXers meet). Some were taken at Hara Arena. Also, Tom mentions that he has added a new "Buy, Sale, Trade" page (Hamfest Gallery) were you can post your ham equipment in 15 different categories. "This is a free service. Feel free to use it as often as you like," states Tom. The "K8CX Ham Gallery" can be found at: http://paradox2010.com/ham/

ET3, ETHIOPIA. Steve/G3VMW, Alan/G3XAQ and Andy/G4ZVJ, will be operational from Addis Ababa, as ET3AA, between September 18th and 27th. Activity from ET3AA, the club station of the Ethiopian Amateur Radio Society, will be on all bands from 160-10m but with emphasis on the LF and the WARC bands. The operation will be mainly CW with some SSB and RTTY if there is sufficient demand. Operating frequencies will be as follows: 1829, 3508, 7008, 10108, 14026, 18076, 21026, 24896 and 28026 kHz. Always split frequency, listening up between 1 kHz and 5 kHz. QSLs via Steve Wilson G3VMW, 3 Crag Gardens, Bramham, Wetherby, West Yorkshire, LS23 6RP, England. More details of the ET3AA DXpedition are available on G3VMW's Web page at: http://www.bramham.demon.co.uk
There will be an on-line log search utility immediately after the operation. During the visit to Addis Ababa, it is hoped to obtain personal callsigns from the Ethiopian government in readiness for a sustained two-week DXpedition during 1999.

FP, MIQUELON ISLAND. The Prairie DX Group (N9PD) is pleased to announce their DXpediiton to Miquelon Island (NA-032) from August 26th to September 1st. Their callsign will be FP/N9PD, and they will be operating mutli-band 10-80 meters (also maybe 6 meters), multi-mode (SSB, CW & RTTY) continuously during the DXpedition. QSL info is direct (SASEs or IRC appreciated) or via the bureau. Further information can be obtained at their Web page at the URL address: http://www.prairiedx.com
Or you can send your comments via E-mail to Fred (KF9YL) at: efl@interaccess.com

H40AA POST-OPERATION UPDATE (June 14, 1998, An excerpt from Jarmo, OH2BN, press release, provide by Tim, N4GN.) [OPDX InterNet Subscribers will receive the full releaseas an additional bulletin.] "The validation of the database as well as the merging of a variety of data files has been successfully completed for the 67,129 H40AA QSOs, and the full-color,

folded QSL cards have been received from the printers. QSLing will commence on 29 June and the QSLing team, led by OH2BN, will get the cards out as quickly as possible. The DXCC status of the Temotu Islands should be determined during July, and QSLs should be accepted by the DXCC desk in October."

IOTA DXPEDITIONS PLANNED. Operators Matthias/DK4WD and Ron/DK4UN plan to travel in June and July to the northern Scandinavia area to activate some IOTA Groups there. Matthias will operate mainly on CW, and Ron will conduct the SSB operations. They will operate under the CEPT Rules as LA/, SM/ and OH/homecall. The following schedule is planned:

June 27 - EU-135, if possible
June 27-29 - EU-139, Seskaroen
July 1-3 - EU-126, not sure, maybe Hailuoto
July 3-5 - EU-141, Vardoe
July 7-10 - EU-044, maybe Soroya
July 10-12 - EU-046, maybe Senja
July 13-17 - EU-033 and EU-076
July 18-19 - EU-062
July 21-22 - EU-079, Hareidlandet

This schedule is subjected to some changes depending on weather, how-to-reach some islands and other activities. Their first priority is to give as many OMs a new IOTA-Group. QSLs are 100% via bureau. For direct QSLs: DK4WD via callbook address and DK4UN via Ronny Triemer, P.O.Box 47, D-09023 Chemnitz, Germany. All information and the "Latest NEWS" about this activity are available at the following Web page: http://www.qsl.net/dk4un

KG4, GUANTANAMO BAY. A team of the Florida Contest Club (FCC) will be in GTMO for the IARU HF World Championship July 11-12th. Team members are: Rusty/KG4AU (host, WV3N), Bill/KG4GC (W4WX), Vic/KG4TO (N4TO), and Doug/KG4OX (W4OX). KG4OX will be the contest callsign. Members will arrive Wednesday, July 8th, and remain for one week. Members will be active on all bands and modes before and after the contest including 6 meters (band conditions permitting). QSL contest QSOs go to Doug McDuff, KG4OX/W4OX, 10380 S.W. 112th Street, Miami, FL 33176. Please include a SASE. Bureau cards are welcomed. QSL KG4AU via W4WX, and all others via their home calls. Any comments or questions may be sent to W4OX <dmcduff@gate.net>.

KH6BZF PROPAGATION REPORTS. OPDX InterNet Subscribers will receive Part 2 of Lee's forecast (Band-by-Band Propagation Expectations) for the month of June as an additional bulletin.

QSL INFO AND NEWS.....
Dwaine, K8ME (ex-WA8MEM), would like to notify the DX community that he is NO longer the QSL Manager for OD5ZZ or OD5RAK. QSLs that arrive will be returned. Dwaine states he has NOT heard from Walid or his group in 4 years.

H75A LOGS. Chris, N1HRW, just wanted to let OPDX know that the logs from the H75A IOTA NA-209 DXpedition has now been placed online for searching. The log is on the Islands on the Web website at:
http://islandchaser.com
in the "Logs Online" section of the site.

Log search for YS1X (OH-activity and VP8CTR [OP Roman EM1KA]) is now available on the Web. Check out the URL address:
http://www.qsl.net/gdxf

ED1SCR was on the air to celebrate the 125th aniversary of the Spanish Red Cross in Salamanca, Spain. QSL info: EA1EAU (OK via bureau).

The Barry Amateur Radio Society activated GC4BRS/MM during last weekend from on board the "PS Waverley" cruising in the Bristol Channel off the coast of Wales GW. This ship is the last ocean going Paddleship in the world. QSL Manager is GW0ANA (direct or via Bureau).

9M0C QSLs Update. Phil, G3SWH, reports that, to date, he has received 5735 items of mail and is dealing with them strictly in their order of arrival. So far, he has opened 4115 of them and is working on mail which arrived on April 6th, i.e exactly two months ago. There has also been 176 E-mail requests for cards to be sent via the bureau, but so far no cards have been received via the bureau (too early at this stage). There has been 9037 QSOs confirmed, along with dealing with dozens of queries of various sorts, all of which are time consuming. It should also be noted that many replies to Australia, New Zealand and the Far East have been sent by surface mail due to insufficient return postage (while an IRC covers basic rate postage to all destinations, from the UK this is only for items up to 10g. The double-side card, along with inserts which we are obliged to include on behalf of various sponsors, takes the weight over this, especially where the return envelope is heavy of itself). Please do not send second requests at this stage, as they will merely go into the pile for the date on which they are received and not be dealt with any faster. They will announce when they are up to date with direct requests. Right now, Phil is taking a well-deserved break in SV-land but will take up the QSL task again shortly. (via G3XTT)

Alan, VK4AAR, is getting requests for VK9WM and VK9WY cards. He is NOT the QSL Manager for those stations. Perhaps people are thinking that Alan has taken over for VK4FW...this IS NOT TRUE. Only VK8AN has transferred QSL chores over to him. Alan is the QSL Manager only for the following list of the stations: V63PD, VI0ANARE, VK8AN, VK8MI, YJ8AA, ZK2JJ and ZK2PJ. QSL via: Alan Roocroft, VK4AAR, c/o Post Office, Dalveen QLD 4374, Australia

AP2AGJ CORRECTION. Tariq, AP2TJ, reports to OPDX that Amir, AP2AGJ, has been licensed since 1991. His QTH is Rawalpindi not Karachi. The correct QSL info is direct to: Amir Gulistan Janjua, House No. 56, Chaklala 1, Rawalpindi, Pakistan.

SPECIAL EVENT. By the time you read this, two special callsigns, OZ2GBE and OZ2GBW, from Denmark, will be active until the end of the year. This is in celebration of the June 14th opening of the world's second longest hanging bridge (Great Belt East Bridge). Contacts count towards "The Great Belt Award". Operations will be on all bands and modes.

S0, WESTERN SAHARA. The "DX News Sheet" reports that Hamdy, S01HA, is newly licensed and was active June 6th between 2000-2200z and June 7th between 1700-1900z on 14210 kHz.

S0, WESTERN SAHARA. Look for Mark, ON4WW (ex-9X4WW), to be active as S07WW starting June 15th for 4 to 6 days. His equipment is a TS-440 to wire antennas; no linear. He is preparing an inverted L for 160 meters. His CW frequencies will be: 160m - 1827.5 +/-; lower bands +/- 10 kHz from the bottom edge; higher bands - 022-024 kHz and the WARC bands wherever he finds a spot. Mark mentions this is a working trip, so activity will be mostly (local) evening and night times. Operations also depend on availability of electrical power. He may have to operate from the car, which could mean SSB only. QSL via ON5NT.

SV5, DODECANESE. Look for Vito, I3BQC, to be active this week beginning June 16th as SV5/I3BQC from Astypalea Island. His stay will be until July 12th. Also, he will possibly activate other Greek islands. QSL via home callsign.

SV5, DODECANESE (and YU-land). Nenad, VE3EXY, reports that he will have a low profile vacation operation from Rhodes Island (EU-001) between June 17-24th. The operation is intended for first-timers with focus on DX stations. He will sign SV5/VE3EXY/P and operate mainly on CW. Operations will be on 40/30/20/17 meters and 15/12/10 meters if conditions are good. Look for him 10 kHz off the band edge, listening 2-5 up (+- QRM). His operating schedule: 1300-1700z, 1900-2100z and 0200-0600z. This may change to take advantage of band conditions. Following a small vacation in Greece, Nenad may go to Yugoslavia between June 29th and July 6th and be active as 4N7ZR from Sr. Mitrovica. Activity again will be mainly CW, but there may be some RTTY and SSB. Bands of activity will be 80/30/17 meters and possibly the others if conditions are right. His operating schedule: 1700-2100z and 0300-0600z. QSLs via VE3EXY via bureau are OK or direct to: N.Stevanovic, PO BOX 65046, Nepean, ON, K2G 5Y3, Canada.

TF, ICELAND. If you missed Sigi, DL7DF, and his gang from here, OPDX was advised that TF3IRA will be operational again July 12-13th during the IARU contest as the TF-land's HQ Station. TF3IRA has again been granted full power license and the "BIG OLGA" antenna will be used on lower frequencies. The Club's C3 antenna will by used for 20 meters and above QSOs. QSL via TF3GB.

USI ALERT. Greg, NS8O, will be active from June 14-20th on Long Beach and Yaupon Beach Island. These are in North Carolina and appear to be new ones for the "United States Island Award". Greg also says that there are some other islands that are close by, and he might hop over to them. Look for him about 2000z on 20 and 40 meters. As Greg says, "Activity will probably be during the afternoon/evening as FISHING will be the

morning priority. Hey, I can't do anything until I have dinner caught and in the marinating sauce!".

VP5, TURKS & CAICOS ISLANDS. Bill, K5YG, will be active as VP5/K5YG from Providenciales (IOTA NA-002), from June 14-20th. Bill will operate mainly CW when he and his wife Susan are not SCUBA diving. Most operations will begin after 2000z. He has a daily schedule with ZS6YQ on 21235 at 1500z. QSL via K5YG. All QSLs received for his 1996 and 1997 VP5 operations have been answered.

XR, CHILE. "The 59(9) DXReport" states that the World Scout Jamboree will be held in Hacienda Picarquia, December 27, 1998-January 8, 1999, and Special Event Station XR3J will be active on 20 and 15 meters.

YS NET MOVED! There stations of El Salvador, who have been operating a DX Net on 40 meters, have moved to 20 meters due to the new winter season in their country (they report a lot of static noise on 40 meters). They will operate on 14165 kHz between 0200 and 0330 every day. Look for stations YS1FEA/Federico, YS1SH/Oscar and YS1CQ/Robesrto to be there every day. They report, at the present time, there are no more 10 HF stations on the air in their country. QSLs for the three go to: P.O. BOX 517, City San Salvador, El Salvador, Central America

ZD8, ASCENSION ISLAND. Paul, KF4OOX, is back from his stateside vacation and hopes to be back on the air again soon as ZD8V.

Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

LATE MINUTE UPDATE!

S0, WESTERN SAHARA. Ghris, ON5NT, informed OPDX just after we released
OPDX.361 that Mark's (ON4WW, ex-9X4WW) activity as S07WW may be delayed
by 5 days. His operation may start around June 21th. Ghris (QSL Manager
for Mark) states this date could be changed again (forwards or backwards).
There is no way Mark can provide an early warning. It is suggested to
"Keep Your Ears Open and Listen". The only thing certain is that Mark
does have a license to be active from S0-land. Activity is depending
on his work schedule.

I think Walt was referring to an American song popular in the disco era
of the late 70's - "Play that funky music, white boy ... play that funky
music right ..." It just seemed to lend itself well to the
reference, whether or not you knew that "Funk" is German for "radio".

Or maybe Walt and I just have the same sense of humor!

2022. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-15 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6m26g2$p7k@news.Hawaii.Edu>
Source record: 28699
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH2PZ, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec-radio-info@stat.com. Inquires and other administrivia should be directed to rec-radio-info-request@stat.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to:
majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see
http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while

still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

For your information about Germany:

1. One valid IRC is good for one envelope, upto 20g.
2. One envelope, upto 20g, inside of Europe, costs 1.10 DM
3. One envelope, upto 20g, outside of Europe, costs 3.00 DM
4. One IRC costs: 3.00 DM

2026. 2nd Straw Poll: rec.radio.amateur.* reorg

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-15 00:00:00 UTC
From: Jeremy Billones <billones@primenet.com>
Message-ID: <6m30bvefn1@clarknet.clark.net>
Source record: 28703
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx

(Repost. Crossposted to fewer groups, multiple times.)

LAST CALL FOR VOTES (of 2)

Votes must be received by 23:59:59 UTC, 22 Jun 1998.

This vote is being conducted by a neutral third party. Questions
about the straw poll should be directed to the rec.radio.amateur.*
Working Group at <rra-wg@theporch.com>

Votetaker: Jeremy Billones <billones@primenet.com>

STRAW POLL Q & A

Q: Who is doing this?
Q: How may I join the rra-wg?
Q: Why are we doing this?
Q: What are we doing?
Q: More to the point, why are we "kicking over this hornet's nest?"
Q: Why do you want to change the newsgroups again?
Q: Who are you to tell us what to do with "our" newsgroup?
Q: How long ago were each of the rec.radio.amateur.* newsgroups created?
Q: Why are the non-rec.radio.amateur.* newsgroups rec.radio.info and
rec.radio.swap included in this opinion poll?
Q: Where can I obtain a copy of the original newsgroup charters?
Q: Where can I find out more information about the Usenet RFD/CFV
process?
Q: I don't want any of the newsgroups to change. What should I do?
Q: I want to go back to one single newsgroup for amateur radio on
Usenet, like we had back in the 1980's. What should I do?
Q: I support some of the newsgroups for amateur radio, but not others.
What should I do?
Q: I support the existence of a newsgroup, but disagree with its
charter. How should I vote?
Q: I would like new newsgroups to be created, what should I do?
Q: I have no opinion, what should I do?

Q: Who is doing this?

The rec.radio.amateur.* Working Group (rra-wg@theporch.com, which
initiated the last major reorganization in 1993) is the point-of-contact
for questions about this opinion poll. Principal members are Paul
W. Schleck, K3FU, and Jeffrey Herman, KH2PZ. Though not an rra-wg
member, Gary Coffman, KE4ZV, also endorses this opinion poll. this
opinion poll will be conducted by an unbiased third party from the
Usenet Volunteer Votetakers (UVV), Jeremy Billones

(billones@primenet.com).

Q: How may I join the rra-wg?

Anyone who volunteers may join the rra-wg. The rra-wg has always solicited volunteers from when it was created in 1993 (originally named rra-reorg) to draft an RFD to reorganize the rec.radio.amateur.* newsgroups (and continues to serve as an advisory group for FAQ maintainers and new newsgroup proponents). You may join the rra-wg by subscribing to its mailing list.

The automated list manager address is

listproc@theporch.com

Use this for subscribing, unsubscribing, getting archived info, getting the FAQ message, changing your address, etc.

To subscribe, send a message to this address with "subscribe rra-wg <your name>" Similarly, to unsubscribe, replace "subscribe" with "unsubscribe"

The list owner address is

listown@jackatak.theporch.com

Use this address only when there is a problem which really truly can't be resolved otherwise.

Q: Why are we doing this?

Discussion on the rec.radio.amateur.* newsgroups shows that there is a difference of opinion about the current newsgroups and their charters. Assertions on one side of the argument that the charters were voted upon by the readers have been countered with assertions on the other side that the votes took place years ago, by a very small minority of the current readership. There is also the strongly-held opinion among some that we have "too many newsgroups." The following is a sample posting from the discussion thread on rec.radio.amateur.misc that led to this opinion poll (the entire thread may be viewed at DejaNews, http://www.dejanews.com/):

Q: What are we doing?

As a preliminary (and perhaps even diverting) step to an RFD (which would be very laborious and time-consuming, and perhaps unnecessary), we will conduct a Straw Poll, or "Vote of Confidence" (similar to the vote of confidence for a Prime Minister made by British Parliament, or a non-binding resolution of the U.S. Congress). We do it Usenet-vote style (utilizing a neutral vote-taker from the UVV). During the poll, a vote is taken where a "Vote of Confidence" yeah or nay for each newsgroup, as currently constituted and chartered, is given by each voter (YES/NO/CANCEL/ABSTAIN votes are valid).

What votes mean:

YES: I support the existence of this newsgroup and its charter

NO: I disagree with this newsgroup's charter or I believe that this newsgroup's existence should be reconsidered in a future RFD/CFV

CANCEL: Delete any previous votes I made concerning this newsgroup

ABSTAIN: I have no opinion concerning this newsgroup

Each newsgroup that does not pass a vote of confidence by Usenet voting standards (2/3 and 100 vote majority of YES versus NO votes) may be referred to the Usenet newsgroup creation process where their deletion or modification (based on a rough consensus of the preceding 30 days of discussion and how much they lost in the vote of confidence) is proposed. Each newsgroup that does pass a vote of confidence will have its charter, and justification for existence, reinforced to the

readership (as the current readership voted on it).

Q: More to the point, why are we "kicking over this hornet's nest?"

Sometimes hornet's nests can get big enough that they wind up falling down anyway. As shown in the thread above, there are significant undercurrents of disagreement over the current newsgroups, their charters, and even the suggested guidelines and rules of net-etiquette that many on the newsgroups advocate. If this opinion poll shows strong agreement with current practices, then that would help reduce (though not eliminate) newsgroup arguments on the subject. If, however, this opinion poll shows strong disagreement, then it's probably better that we know that right away, and take steps to fix the current situation before it degrades any further.

Q: Why do you want to change the newsgroups again?

Only some of the proponents of this opinion poll wish to change the newsgroups. Some wish to simply have the current newsgroups and their charters reinforced. All of the proponents agree that an up-to-date opinion poll of the readership is desirable at this time. Whatever future actions will be taken will be determined by the results of this opinion poll.

Q: Who are you to tell us what to do with "our" newsgroup?

One answer is that on Usenet, no one "owns" an unmoderated newsgroup. Newsgroups are voted into existence by a democratic process to determine consensus (and lack of significant objection) for using shared network resources to support them. All of the existing rec.radio.amateur.* newsgroups passed such a vote at some time in the past, and should pass such a vote again if there is strong support for their continued existence.

Another answer is that this is just a non-binding opinion poll of the readership to determine a consensus, if any, for making changes. It would still be necessary to undertake a formal RFD/CFV process to change any Usenet newsgroup (and that was always possible, anyway).

It should also be emphasized here that no individual rec.radio.amateur.* newsgroup is being singled out. Rather, a consensus of the readership concerning ALL rec.radio.amateur.* newsgroups is being sought.

Q: How long ago were each of the rec.radio.amateur.* newsgroups created?

1972 (or possibly earlier, this date is when UCSD joined the ARPANet):

Info-Hams (original ARPANet mailing list at Simtel-20, continues today at UCSD as a gateway of rec.radio.amateur.misc)

1979:

Creation of Usenet News at Duke and UNC

early 1980's:

fa.info-hams (fa = "From ARPANet") *
net.ham-radio (pre-Kent Paul Dolan "Great Renaming") *

mid 1980's-1991:

rec.ham-radio *
rec.ham-radio.packet *
rec.ham-radio.swap *

1991 Reorganization:

rec.radio.amateur.misc
rec.radio.amateur.packet *
rec.radio.amateur.policy
rec.radio.cb
rec.radio.swap

1992/3 Addition:

rec.radio.info

1993 Reorganization:

rec.radio.amateur.antenna
rec.radio.amateur.digital.misc
rec.radio.amateur.equipment
rec.radio.amateur.homebrew
rec.radio.amateur.misc
rec.radio.amateur.policy
rec.radio.amateur.space

1996 Additions:

rec.radio.amateur.dx
rec.radio.amateur.boatanchors

* = obsolete

Current newsgroups covered by this opinion poll, and the years
in which they were created:

rec.radio.amateur.antenna (1993)
rec.radio.amateur.boatanchors (1996)
rec.radio.amateur.digital.misc (1993)
rec.radio.amateur.dx (1996)
rec.radio.amateur.equipment (1993)
rec.radio.amateur.homebrew (1993)
rec.radio.amateur.misc (1991)
rec.radio.amateur.policy (1991)
rec.radio.amateur.space (1993)
rec.radio.info (1992/3)
rec.radio.swap (1991)

Q: Why are the non-rec.radio.amateur.* newsgroups rec.radio.info and
rec.radio.swap included in this opinion poll?

Though one level up in the rec.* hierarchy, these newsgroups are
principally used by readers of rec.radio.amateur.*, and their fates
would substantially be decided by any significant reorganization of the
rec.radio.amateur.* newsgroups. Though created by a rec.radio.amateur.*
reorganization, rec.radio.cb is not included in this opinion poll.

This announcement has been cross-posted to all rec.radio.* newsgroups
(except for rec.radio.broadcasting and rec.radio.info, which are
moderated). In addition, the following individuals were consulted prior
to this announcement (note that consultation does not necessarily
imply endorsement):

Richard Eckman, KO4MR, Proponent of rec.radio.amateur.dx
Brian Kantor, WB6CYT, Administrator of Info-Hams/Ham-* mailing list
gateways of rec.radio.amateur.* newsgroups at UCSD
Ian Kluft, KO6YQ, Proponent of 1993 rec.radio.amateur.* reorganization,
former rec.radio.amateur.* FAQ Maintainer
Jay Maynard, K5ZC, Proponent of 1991 rec.radio.amateur.* reorganization
Brian Short, K7ON, Moderator of rec.radio.info
Rick Stealey, K2XT, Proponent of rec.radio.amateur.boatanchors

Q: Where can I obtain a copy of the original newsgroup charters?

ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.info
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur-reorg
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.dx
ftp://ftp.uu.net/usenet/news.announce.newgroups/rec/rec.radio.amateur.boatanchors

Q: Where can I find out more information about the Usenet RFD/CFV
process?

ftp://rtfm.mit.edu/pub/usenet/news.announce.newgroups/How_to_Create_a_New_Usenet_Newsgroup
ftp://rtfm.mit.edu/pub/usenet/news.announce.newgroups/How_to_Format_and_Submit_a_New_Group
_Proposal
ftp://rtfm.mit.edu/pub/usenet/news.groups/Guidelines_on_Usenet_Newsgroup_Names

Q: I don't want any of the newsgroups to change. What should I do?

Vote "YES" for all of the existing rec.radio.amateur.* newsgroups.

Q: I want to go back to one single newsgroup for amateur radio on
Usenet, like we had back in the 1980's. What should I do?

Vote "NO" for all (or all but one) of the newsgroups.

Q: I support some of the newsgroups for amateur radio, but not others.
What should I do?

Vote "YES" for any newsgroups that you wish to remain unchanged, and
vote "NO" for any newsgroup you wish to have reconsidered in a future
RFD/CFV.

Q: I support the existence of a newsgroup, but disagree with its
charter. How should I vote?

Since this opinion poll is for both the existence of given newsgroups
AND their current charters, you should vote "NO" for that newsgroup.
Again, this is a non-binding opinion poll simply to determine if current
newsgroups should be considered for modification or deletion, not a vote
to actually modify or delete these newsgroups.

Q: I would like new newsgroups to be created, what should I do?

Creation of new newsgroups is not being considered by opinion poll. A
future RFD/CFV would have to be initiated to do this. You are, of
course, welcome to express your opinions concerning new newsgroups by
posting them to rec.radio.amateur.misc (*NOT* by E-mail to the
vote-taker).

Q: I have no opinion, what should I do?

You may wish to read the preceding 30 days of public discussion on
rec.radio.amateur.misc about this opinion poll to develop your own
opinions (go to http://www.dejanews.com/ and search for "STRAW POLL").
If, after reading the public discussion, you still remain undecided, you
may abstain from this opinion poll. You may do so informally by not
participating in it at all, or formally by explicitly voting "ABSTAIN"
for all of the newsgroups.

IMPORTANT VOTING PROCEDURE NOTES:

Standard Guidelines for voting apply. One vote per person, one account
per voter. Votes must be mailed directly from the voter to the votetaker.
Anonymous, forwarded or proxy votes are not valid. Votes mailed by
WWW/HTML/CGI forms are considered to be anonymous votes.

Vote counting is automated. Failure to follow these directions may
mean that your vote does not get counted. If you do not receive an
acknowledgment of your vote within three days contact the votetaker
about the problem. It's your responsibility to make sure your vote
is registered correctly. Duplicate votes are resolved in favor of
the most recent valid vote. Addresses and votes of all voters will
be published in the final voting results post.

HOW TO VOTE:

Extract the ballot from the CFV by deleting everything before and after
the "BEGINNING OF BALLOT" and "END OF BALLOT" lines. Don't worry about
the spacing of the columns or any quote characters (">") that your
reply inserts. Please, DO NOT send the entire CFV back to me!

Fill in the ballot as shown below. Please provide your REAL NAME and
indicate your desired vote in the appropriate locations inside the ballot.

When finished, MAIL the ballot to: < voting@clark.net >
Just "replying" to this message should work, but check the "To:" line.

Examples of how to properly indicate your vote:

```
[ YES ] example.yes.vote
[ NO ] example.no.vote
[ ABSTAIN ] example.abstention
[ CANCEL ] example.cancellation

DO NOT modify, alter or delete any information in this ballot!
If you do, the voting software will probably reject your ballot.

If these instructions are unclear, please consult the Introduction to
Usenet Voting or the Usenet Voting FAQ at http://www.iki.fi/~jpatokal/uvv.

======== BEGINNING OF BALLOT: Delete everything before this line =======
.-------------------------------------------------------------------
| 1ST STRAW POLL: rec.radio.amateur.* reorg
| Official Usenet Voting Ballot <RRSP-0002> (Do not remove this line!)
|-------------------------------------------------------------------
| Please provide your real name, or your vote may be rejected. Place
| ONLY your name (ie. do NOT include your e-mail address or any other
| information; ONLY your name) after the colon on the following line:

Voter name:

| Insert YES, NO, ABSTAIN, or CANCEL inside the brackets for each
| newsgroup listed below (do not delete the newsgroup name):

Your Vote Newsgroup
--------- ------------------------------------------------------------
[ ] rec.radio.amateur.antenna
[ ] rec.radio.amateur.boatanchors
[ ] rec.radio.amateur.digital.misc
[ ] rec.radio.amateur.dx

Hi Tom -- well not exactly since certain publishers have a lock on
foreign Ham data bases -- however many DX stations and many DXpeditions
have QSL Managers. Some hams in other countries have managed to put
rather complete data bases on line as well. These are spread out over
many web sites. However I have endeavored to collect all known ones as
links in one place as best I could -- see URL:

Hello,

a friend of mine is looking for a list of RNARS stations, I think it is for some sort of award.

Is such a list available on file (TXT, database or other formats) and/or downloadable from any internet site?

Thank you in advance.

I've noticed WWVH into the midwest just about every night, covering WWV on 10 and 15 MHz. WWV has been booming in on 20 MHz just before midnight, but not during the day, which is way counterintuitive to what I was taught about HF propagation!

I think Cutie Boy is just lacking in some male attributes. I hear that they can give male hormones to help combat his problem.

To the fellow with the Tech-Plus ticket, enjoy the ham bands and ignore the likes of Cutie Boy as he is just a pimple faced little college student that doesn't know his ass from a hole in the ground. Your earned the privilege to be on ham radio.

COP

Ten Meters works when the sun is up. When it goes down so does Ten.

Cutie boy,
The young man has a TECH PLUS! He has passed the 5 wpm and is welcome to operate phone on 10 meters. Legally!! What is your problem with those of us who have taken the time to learn the code and operate HF? You have been given a welfare liscense to operate above 50 mhz. So operate.
Are you gay? That name "cutie Boy" is not something a man would tolerate, I don't care one way or the other about your sexuality, it's just that I've seen some of the arguments by the Lambda groups and they are defenseless in what ever cause the "little girlish bitching" types are putting forth. No code was high on their list. They wanted to increase their ranks so they figured that a no code general ticket would do that.

Butch Magee, KF5DE

In general, yes -- but nothing is absolute especially where
ten meters is concerned. Sporadic E in particular commonly
happens after sunset and can be VERY intense then.

Congratulatons!

Now tht 10 meters has whetted your appetite, just think what you can do on 15/20 .. the latter every day, and into the evening!

KF6RLQ is a relatively new call, so you seem to be on a fast upgrade path. Keep it up!

73...Phil

Rudi,

Congratulations on getting your Tech Plus license !!!

We are coming out of the low end of the solar cycle, so 10 meters
will be getting better and better. Look for several years of
excitment on 10. Right now 10 will have its "ups" and "downs",
so some days it will be real hot and other days, nothing.

Remember 10 can go from hot to cold in a mater of minutes.
I was talking with a guy across the country, his signal went
from S9 on my meter to S0 in about a minute. Oh well, it
happens. Think of it as part of the fun of 10; you never know
what is going to happen.

You may want to keep working on upgrading. I know that 13 WPM
may seem like a lot, but if you work at it, you can do it.
Once you pass the 13 WPM and General test, you get a slice of
ALL the HF bands. From there, it's just the written test to
reach Advanced. With Advanced you get a bigger slice of HF
AND if you want, a 2n2 callsign.

73,
Bob

I was KF6JHG, I'm now KQ6WQ

I've got several items for sale.

I'm located in Houston, near the summit, but
I will deliver anywhere around town.

Wilson 1000 10 meter/CB antenna with trunk lip mount - $40.00

Motorola 60 watt 2 meter amp - $50.00

Mag-mount CB antenna - $5.00

Mag-mount 2m/440 antenna $10.00

Email me if you want any or all of the above.

One of So.Cal top contesters, N6KI - Dennis, will be in the Bay Area for a family reunion over Field Day and would like to be a guest op. Prefers less than an hour drive from San Jose.

Dennis is a cracker jack CW op but will spit into a mic if needed.

Please don't E-Mail me (AC6V) but rather:

E-Mail Dennis --- N6KI@amsat.org

Volume 2 Number 115
June 19, 1998
Edited by Bernie McClenny, W3UR

----------------------------------------------------------------------

DX News

----------------------------------------------------------------------

Shigeaki, JG3KIV, will leave Jamaica and return to Japan on 23 July.
His past operations included 6Y6A, 6Y5XX and WH6X/6Y5. QSL cards go
to JG3KIV, Shigeaki Furukawa, 949-1, Handa, Kawanishi-cho, Shiki-gun,
Nara 636-0206, JAPAN.

Dr. Rich, NE8Z, will be active from Ecuador from 5 to 26 July. While
there he will operate from the following locations on 12, 17 and 30
meters CW, SSB plus 20 meters RTTY.

Call QTH
-------
HC1MD Amaguanna
HC1MD/HC4 Atacames (maybe SA-056)
HC1MD/HC5 Cuenca
HC1MD/HC6 Cottopaxi Volcano
HC1MD/HC7 Amazon Jungle

QSL all of these calls via K8LJG.

Radio Budapest continues to be heard on 14010 between 00:00 and
01:00Z. This has been going on for about 20 days and is the result
of an intermodulation product from their transmissions on 9810 and
11910 kHz.

Steve, N4JQQ, plans to be active as C6AFP from Treasure Cay, Abaco
(NA-080), Bahamas from 10 July to 1 August. He will be active on HF
and 6 meters. A beacon will be running on 50062 when ever he is not
on the 6 meter band. He will be concentrating on 6, 12, 17 and 30
meters. QSL via N4JQQ.

Larry, AH8LG (ex KS6DV), will be off American Samoa from 20 June to
31 July. He has been very active on RTTY and will answer the QSL
requests upon his return.

----------------------------------------------------------------------
```

QSN

3B8CF - MAURITIUS - Jacky made a rare appearance on SSB yesterday at 03:30Z on 14240. He was working West Coast US and Europeans. QSL via CBA.

4K9W - AZERBAIJAN - Vlad has been showing up on 17 meters CW around 03:00Z.

A71BY - QATAR - Between 19:00 and 20:00Z yesterday Jabor was on 14194.

EP2SMH - IRAN - Mohsen was working on a net at 22:30 on 14247.

FO0 - MARQUESAS ISLANDS - FO0MAC and FO0PAP will go QRT today around 22:00Z.

FT5XN - KERGUELEN ISLAND - West Coast US stations found Helios on 17 meters CW (18083) and SSB (18140) between 05:45 and 07:00Z. QSL via F6PEN.

ST2SA - SUDAN - Dr. Sid has been showing up often just before 15:00Z on 18150 to work JA's.

IOTA

The following IOTA stations were active yesterday.

IOTA	Call	Freq.	GMT	IOTA	Call	Freq.	GMT

Ennio, IK3LYP, plans to be on Lampedusa Island (AF-0190 as IG9/IK3LYP from 11 to 25 July. QSL via IK3LYP, Ennio Pistillo, P.O. Box 300, 36100 Vicenza, ITALY.

Mal, VK6LC, is planning an IOTA DXpedition to Rowley Shoals for sometime between June and September of 1999. This would be an all time new one. For those wondering check your RSGB IOTA Directory under VK9 small letter j. The shoals consist of three atolls Mermaid Reef, Clerke Reef and Imperieuse Reef. Due to the cost of transportation ($2,000 per day) Mal is looking for financial help. Landing permission from the Government and authorization to transmit

have been granted. A VK9 DXpedition call sign has also been approved.

Bob, N2OO, and John, N2LD plan to operate the RSGB IOTA Contest from Long Beach Island (NA-111) as N2OO. QSL via N2OO, Bob, P.O. Box 345, Tuckerton, NJ 08087-0345.

To celebrate the 100th anniversary of the Gulf Ferry Service between Newfoundland and Nova Scotia special event station CZ1SSB will be active from 24 June to 24 July. The station will be located in Port aux Basques, Newfoundland (NA-027).

Toshi, JM1PXG, will operate the RSGB IOTA Contest on 25 and 26 July as JM1PXG/1 from Hachijo Island (AS-043). He will put an emphasis on working Europe and North America. QSL to JM1PXG via the bureau or direct to Toshiyuki Saito, 12-2-402, Okusawa 2, Setagaya, Tokyo 158-0083 JAPAN.

Starting 11 July MM0BCR/P (YL) will be active from several of the Orkney Islands Look for this station to be on the air through 18 July. QSL via MM0BCR.

Back in 1989 I had an HTX-100 in the car and often took late night road trips. Back then 10 was very often open all night; I had many enjoyable QSO's at 2 AM! I'm looking forward to that again. 25 watts sure went a long way.

73, Zack W9SZ

2057. 80m vertical ground plane

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-21 00:00:00 UTC
From: Johan Humblet <Johan.Humblet@village.uunet.be>
Message-ID: <358D759C.6D7CA34@village.uunet.be>
Source record: 28635

Hello ,

Situation here is as follows : 90 ft self supporting tower + on the top
a 4 element quad plus a few rotary dipoles... My plan is to put up a
ground plane antenna for 80 meters (quarter wave up, with a couple of
elevated radials), connected about 3 feet away from the tower. Since the
impedance of this antenna should be close to 50 ohm , i'll try to feed
it direct with 50 ohms.Anyone tried this before ? Comments please ?

Thanks,

Johan.

P.S. Please e-mail direct if possible to :
johan.humblet@village.uunet.be

Ohio/Penn DX Bulletin No. 362

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 362
BID: $OPDX.362
June 22, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1QWT, WB2RAJ/WB2YQH & The 59(9) DXReport, KC2CJB, KH2D, N2OO, W2DEC, N4GN, W4WX, WQ4L, KG6AR, N6ED, N6JV, K8MN, KB8PZQ, K0IR, AH0W/OH2LVG, BA4TB, EA4ECF, F6AJA & LNDX, G4BUE & DX News Sheet, GM4FDM, HA5PP, HK0TU, ZS6IR and 3C5I for the following DX information.

5H, TANZANIA. Dave, K8MN (currently signing OH2/K8MN), reports to OPDX that he will be leaving Helsinki on July 9th and will be in the U.S. until near the end of August. After his short stay in the U.S., Dave will be in Tanzania for three years. As in the past, his activity (with no particular schedule) will be on 160-6 meters including all WARC bands. Operations on CW and SSB will be the predominate modes with RTTY thrown in from time to time. QSLs go to WA8JOC.

7O, YEMEN. Zoli, HA5PP, sent out a new release early Sunday morning (June 21st) stating he has been communicating with the Deputy Minister (of Telecommunications) in Sana'a Yemen. He reports that the they really want to "start/establish hamradio in Yemen..." (which Zoli states "that was the first big surprise to me there... Before I calculated a big contention/fighting about hamradio there.) Zoli has been given an application and has supplied an offer to the Deputy Minister. In it, Zoli has offered to build 4 complete stations in Sana'a, Taiz and Aden. He has also offered to conduct education class of hamradio (QSO, rules, etc) for the Yemenis between September 1st and December 1st. Zolis also mentioned that he made a promise to the Secretary of IARU to help Yemen to join the IARU. He has requested 7O8DX and 7O8CW callsigns for the two stations in Sana'a to operate during the education period (for Aden he requested 7O1A). Zoli reports his second big surprise happend when he found out that the Deputy Minister knew/spoke (a little...) Hungarian stating, "Mr. Zoli I like your application...you will be the first (one of the million, Hi) foreigner operator in Yemen. The first op will be a Yemeni op...foreigner only after Yemeni ops"... Zoli was told that

there are a lot of applications from other hams who would like to operate from 7O-land. Zoli requested them to not lose those applicants and that he promised to collect all the hams of the world who want to help (and to operate from) Yemen. So, Zoli states if you want to help, please, contact him by E-mail at: navus@mail.matav.hu He would like to go back to Sana'a as soon as possible and wants to thank K4TKM and the NCDXF who made the 7O-trip possible!

A5, BHUTAN. Plans for an A5 operation continue. Specific dates are not set yet, but they are hoping to conduct an operation sometime next year, perhaps in February or March. The principal organizer is Zoro, JH1AJT, with other U.S., European, Japanese, and Oceanic operators included. According to Zorro, JH1AJT, permission for the operation has been granted. Frank, AH0W/OH2LVG, who received a message from Zorro Friday morning, states that it appears Zorro will prepared an announcement with the full details of the operation sometime in July.

CARIBBEAN ACTIVITY PLANNED. Look for the "Uruguay DX Group" and the "Centro Radioaficionados Montevideo" in another joint-venture to activate some Caribbean islands this coming July and August. They will start their activity as XF3/CX3AN from Cozumel Island (IOTA NA-045) July 9-13th. They will then continue on as VP5/CX3AN and VP5/CX4CR from Providenciales (IOTA NA-002) Caicos Island July 18-27th (2 operators active). The final leg planned will be on the air as VP2ECR (operator CX4CR) from Anguilla, August 3-10th. Activity will be on all band including WARC bands with special emphasis on 40 and 80 meters in the usual DX-windows. QSL Manager will be Gustavo Sanchez, CX3CE, Box 244, Montevideo Uruguay. (Do Not use the 1998 Callbook).

CE0, EASTER ISLAND. Ed, K8VIR, currently active as FO0HAR, will be going here around June 24th or 25th. His callsign has not been mentioned, but keep a look out. QSL via home callsign.

EI, IRELAND. Jose, EA4ECF, reports to OPDX that he will be in Ireland from July 2th to August 8th. During his stay, he will be on the air as EI/EA4ECF, on CW, SSB AND RTTY, on all the bands. QSL via EA4ECF. Meanwhile, "The 59(9) DXReport" states Tom, W0GLG and XYL Glenys will be active as EI4VVF and EI4VVF/P from Inishmann Island (EU-006) in July while on holiday. Activity will be on 80-10 meters SSB.

HK0, MALPELO. The Malpelo 1998 DXpedition Committee (HK0TU) announced the following in a press release: "Please be informed that the official 1999 Malpelo DX pedition is now well underway. Operation has been planned between September and November of 1999. This expedition is totally backed by the LCRA (Liga Colombiana de Radioaficionados). Complete details will be given on a later date. This is the 1st offcial statement regarding this DXpedition, and we will continue to give statements regarding this matter by these same means."

IOTA NEWS.....
NA-111. Bob/N2OO and John/N2LD plan to operate as N2OO portable from Long Beach Island (USI NJ001S) during the IOTA contest July 25-26th.

QSL via N2OO, PO Box 345, Tuckerton, NJ 08087-0345.

Didier/F6ELE and Bertrand/F6HKA will be in Canada (VE2/) from July 9-23rd. During the month of July, they will be active from the following IOTA islands: Sept Iles (NA-125) July 9-11th, Mingan (NA-176) July 12-14th (while here, they will also try to be active from Anticosti NA-077), Harrington (NA-084) July 17-18th, and Bonaventure (NA-177) July 21-23rd. They will have 2 stations with them with a beam and dipoles. QSL to their home call direct or bureau.

Jack, F6BUM, will be active from Sardinina as IS0/F6BUM (IOTA EU-024) from July 27th to August 13th. He will also try to be in San Pietro (EU-165) from August 7-8th.

Serge, F6AUS, will be active from Corsica's coastal islanda as TK/F6AUS from July 2-29th. He will be active from Lavezzi (EU-164) and Cerbicales (EU-100) during this period. He will try to be active during the IOTA contest from an island from EU-164.

NA-187. Norm, N6JV, will try to be active as N6JV/p from White Rock on July 3 or 4th. The tide, surf and fog conditions will determine days/time of operation. He suggests that about 1800z will probably be a good target time. Operation will be on battery power with an IC-706 Mk2 and a vertical antenna. Watch 14260, 14040, 7260, and 7040 on SSB and CW. QSL via home address.

OTHER GUAM DXER LEAVES. Gary, K9AW/KH2 (aka NH2G, KH2L, NY6M/KH2) will be leaving Guam in few weeks and retiring to the Philippines. Gary was by far THE most active HF operator on Guam, having worked hundreds of thousands of stations on HF from Guam. Jim, KH2D, reports "Ham Radio" in KH2 (and KH0-land) is at an all time low, mainly speaking HF operators (the rest carry their shack on their belt). Jim suggests the downfall has to do with the military downsizing which started a few years ago. This cost Guam most of their Dxers and contesters. He states that they have lost five HF operators in the past six months, including K9AW. Currently in Guam, there are two active HF operators (N2NL/KH2 and KH2D) and in Saipan, one active HF operator (WH0AAV). In the fall of last year, the remaining few HF operators have decided to form a club called Mariana Islands DX Association that would unite the hams in Guam and Saipan, and would attempt to promote HF operating to the "new" hams. For more details on MIDXA, visit their Web page at: http://www.guam.net/pub/midxa

OD, LEBANON. Jim, OD5PN, has been found to be active over the last week on 15 and 20 meters SSB. Check 14223, 21205 and 21245 kHz between 1330 and 1430z, and again around 2000z. QSL via LX1NO. Meanwhile, "The 59(9) DXReport" states Jean-Pierre, F6FLV, is active as OD5RAK until June 30th.

QSL INFO AND NEWS.....
H40AA/H44DX QSL release at Friedrichshafen. H40AA and H44DX QSL cards will be released to the public for the first time at the Friedrichshafen ham convention by OH2BE, OH2BH and OH2TA as follows:

DARC DX DEPARTMENT, QSL CORNER GERMAN DX FOUNDATION - GDXF
Friday, 26 June, 1 P.M. thru 6 P.M. Saturday, 27 June, 2 P.M.
Saturday, 27 June, 10 A.M. thru 2 P.M. thru 4 P.M.

Finally, cards will be issued following the 4 P.M. H40AA presentation by OH2BH & OH2TA at the DX Meeting. You are welcome to pick up your QSL cards and meet these H40AA team members during one of the above sessions.

UPDATE. The logs for 3W6KA, 3W6LK, and 3W6WE are available for online checking. The URL is: http://njdxa.org/log-check.shtml

Correction! Alan, 3C5I, reported that OPDX.345 (Feb.28th) had an incorrect QSL address listed for him. The correct address is: Alan Isaachsen, c/o Mobil Equatorial Guinea, P. O. Box 139082, Dallas, TX 75313. (ed. The PO Box needed one more digit!)

QSL CHANGE. QSL BI4Q from Ping Island via BY4RSA, not to 9A2AJ. BI4Q has a Web site at: http://www.qsl.net/jsdxc/index.html

MORE LOG SEARCHES via the WEB. A new log search containing Mike's (K3UOC) entire logs for 7Z5OO and also operations from PJ5AA have been add to the following Web site:
http://www.qsl.net/n6ed/7z5oo.html
7Z5OO was active from November 11, 1994, through May 31, 1998. He is now QRT. PJ5AA was active during April, 1996, January, 1997, and January, 1998.

SPECIAL EVENT. Ed, ZS6Y, reports that he will be active until July 31st as ZS80NRM. This special callsign has been issued to celebrate the 80th birthday of President Nelson Mandella. Activity will be on 10, 15 and 20 meters with operations on CW/SSB/SSTV. QSL via ZS6Y: Etienne Swart, P.O. Box 12, Strubens Valley, 1735, South Africa. Ed states, "Please SASE w/green stamps, cannot use IRCs, SRI!"

SPECIAL EVENT. The Noble County ARC will activate KB8YWE (call subject to change) from 1300z to 1900z on September 26th and 27th. SSB operations will take place on the following alternating frequencies: 28450, 21350, 14290, 7275 and 3900 kHz. The station is commemorating the first oil well drilled in North America in 1814 and still in existence. This well is located in Noble Co., Ohio. Please send a 9" X 12" SASE for certificate to Noble Co. Amateur Radio Club, c/o Paul Wallace, 816 Main St., Caldwell, Ohio 43724.

SPECIAL EVENT. The USS Salem Radio Club is sponsoring a "Museum Ship Special Event". There will be about 15 or 20 museum ships from around the world coming on the air on July 18 and 19th. If you contact two or more of these ships, send your log info to Robert Callahan (W1QWT), 56 Acorn St. Scituate, Ma. 02066, and you will be sent a certificate. Please provide a SASE suitable for a 8 by 12 certificate. Check out the WEB page http://www.ziplink.net/~rcal/salem/ or http://www.uss-salem.org for more info.

S0, WESTERN SAHARA (S07WW update!). Ghis, ON5NT, reports that Mark, ON5WW, is leaving for S0 early Sunday morning (June 21st), and he expects to be active the same evening. So, by the time you read this Mark should be on the air. He will leave S0 either this coming Thursday or Friday.

U.S. COUNTIES NEEDED. Uli, ZS6IR, requested OPDX to publish that he will be active from July 5-28th, looking for US counties once again. Any specific informations or suggestions for frequencies and times would be very much appreciated and can be sent to: VonAswegen@aol.com

V2, ANTIGUA & BARBUDA. Tom, GM4FDM, states that he and a Scottish crew will activate V26VG during the IOTA Contest, July 25/26th. QSL to GM3UTQ direct or bureau. After the contest the crew will be active using their own callsigns /V2. QSL for these contacts go to their home calls. Their priority will be given to WARC bands after the contest.

VP5, TURKS & CAICOS ISLANDS. The "DX News Sheet" reports that George, N2GA, and Diane, K2DO, will be active July 8-14th as VP5/N2GA and VP5/K2DO from Providenciales Island. Activity will be on CW/SSB and an entry during the IARU HF World Championship as VP5GA. QSL via home calls.

VP5/K5YG TRIP CANCELLED. Bill, K5YG, and his XYL Susan were supposed to make a trip to the Turks and Caicos Islands from where he was going to be active as VP5/K5YG during June 14-20th. This operations is now cancelled due to the sudden passing of Bill's daughter (35 years old). OPDX will like to send out our deepest condolences to Bill and his family.

WP2, VIRGIN ISLANDS. A newly formed DX club in Northeast Florida called the "Florida DXPedition Group", is planning to go to St. Croix and be active in this year's CQWW SSB Contest as WP2Z. Some of the members of this group are the same operators who were active as C6AJT from the Bahamas in the 1997 CQWW SSB Contest. By the way, this group states that their goal is be active from a different place each year. For more info on this group, send an E-mail to: dxpg@ac4et.ampr.org (addressed Attn: Secretary)

YO8, ROMANIA. A Romania and Moldova team are planning an expedition to Toaca Rock (QTH-KN36AX) June 27th to July 7th. Operators included YO8CT, YO8CGH, ER1AN, ER1BF and ER1AU. Activity is planned for all HF bands and 50/144/430/1296 MHz with the special callsign YO8KVS/p. QSL via Romania QSL bureau. To get more information (pictures and map) on this Expedition, check out the Web page: http://members.xoom.com/kc2cjb/yo&er.html
Or contact via E-mail to: YO8CT - cristiyo@mail.rtns.ro
ER1AN - er1an@acad.moldnet.md

ZF2, CAYMAN ISLANDS. John, ZF2JI, reports that a group of VE amateurs expressed an interest to be active from here as a Single OP/Mulit-Band effort in this year's CQWW SSB Contest. Operations will take place from Andrew's (ZF2EJ) QTH. QSL via KG6AR, Chris Williams, 1117 S. Del Mar Ave., San Gabriel, CA 91776-3034.

DX News

----------------------------------------------------------------------

Shigeaki, JG3KIV, will leave Jamaica and return to Japan on 23 July.
His past operations included 6Y6A, 6Y5XX and WH6X/6Y5. QSL cards go
to JG3KIV, Shigeaki Furukawa, 949-1, Handa, Kawanishi-cho, Shiki-gun,
Nara 636-0206, JAPAN.

Dr. Rich, NE8Z, will be active from Ecuador from 5 to 26 July. While
there he will operate from the following locations on 12, 17 and 30
meters CW, SSB plus 20 meters RTTY.

Call QTH
-------
HC1MD Amaguanna
HC1MD/HC4 Atacames (maybe SA-056)
HC1MD/HC5 Cuenca
HC1MD/HC6 Cottopaxi Volcano
HC1MD/HC7 Amazon Jungle

QSL all of these calls via K8LJG.

Radio Budapest continues to be heard on 14010 between 00:00 and
01:00Z. This has been going on for about 20 days and is the result
of an intermodulation product from their transmissions on 9810 and
11910 kHz.

Steve, N4JQQ, plans to be active as C6AFP from Treasure Cay, Abaco
(NA-080), Bahamas from 10 July to 1 August. He will be active on HF
and 6 meters. A beacon will be running on 50062 when ever he is not
on the 6 meter band. He will be concentrating on 6, 12, 17 and 30
meters. QSL via N4JQQ.

Larry, AH8LG (ex KS6DV), will be off American Samoa from 20 June to
31 July. He has been very active on RTTY and will answer the QSL
requests upon his return.

----------------------------------------------------------------------
```

QSN

3B8CF - MAURITIUS - Jacky made a rare appearance on SSB yesterday at 03:30Z on 14240. He was working West Coast US and Europeans. QSL via CBA.

4K9W - AZERBAIJAN - Vlad has been showing up on 17 meters CW around 03:00Z.

A71BY - QATAR - Between 19:00 and 20:00Z yesterday Jabor was on 14194.

EP2SMH - IRAN - Mohsen was working on a net at 22:30 on 14247.

FO0 - MARQUESAS ISLANDS - FO0MAC and FO0PAP will go QRT today around 22:00Z.

FT5XN - KERGUELEN ISLAND - West Coast US stations found Helios on 17 meters CW (18083) and SSB (18140) between 05:45 and 07:00Z. QSL via F6PEN.

ST2SA - SUDAN - Dr. Sid has been showing up often just before 15:00Z on 18150 to work JA's.

Ennio, IK3LYP, plans to be on Lampedusa Island (AF-0190 as IG9/IK3LYP from 11 to 25 July. QSL via IK3LYP, Ennio Pistillo, P.O. Box 300, 36100 Vicenza, ITALY.

Mal, VK6LC, is planning an IOTA DXpedition to Rowley Shoals for sometime between June and September of 1999. This would be an all time new one. For those wondering check your RSGB IOTA Directory under VK9 small letter j. The shoals consist of three atolls Mermaid Reef, Clerke Reef and Imperieuse Reef. Due to the cost of transportation ($2,000 per day) Mal is looking for financial help. Landing permission from the Government and authorization to transmit

have been granted. A VK9 DXpedition call sign has also been approved.

Bob, N2OO, and John, N2LD plan to operate the RSGB IOTA Contest from Long Beach Island (NA-111) as N2OO. QSL via N2OO, Bob, P.O. Box 345, Tuckerton, NJ 08087-0345.

To celebrate the 100th anniversary of the Gulf Ferry Service between Newfoundland and Nova Scotia special event station CZ1SSB will be active from 24 June to 24 July. The station will be located in Port aux Basques, Newfoundland (NA-027).

Toshi, JM1PXG, will operate the RSGB IOTA Contest on 25 and 26 July as JM1PXG/1 from Hachijo Island (AS-043). He will put an emphasis on working Europe and North America. QSL to JM1PXG via the bureau or direct to Toshiyuki Saito, 12-2-402, Okusawa 2, Setagaya, Tokyo 158-0083 JAPAN.

Starting 11 July MM0BCR/P (YL) will be active from several of the Orkney Islands Look for this station to be on the air through 18 July. QSL via MM0BCR.

2061. Where are the DX windows?

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-22 00:00:00 UTC
From: Casey Bahr <casey.bahr@intel.com>
Message-ID: <358EA082.5144@intel.com>
Source record: 28639

Hi again,

I asked essentially this same question about 2 weeks
ago and got zip response. So, try, try again...

Obviously, I'm pretty new to the DX part of the hobby
(only about 25 countries under my belt). I've heard
and read conflicting things about "DX Windows", but
can't seem to find a definitive reference to the concept.

Can someone summarize the purpose and use of HF DX
windows and where they are? Thanks,

Hi Casey -- well I'll take a shot at it -- that will draw the critics out of the woodwork hi hi. The concept of DX Windows is a gentlepersons agreement to use portions of the bands or frequencies for a specific use. Thus we have DX windows where supposedly one can make DX contacts without two locals ragchewing on top of the DX station. Many hams are unaware of this -- so the concept has met with varying success. Another specific is QRP calling frequencies where little guns can make contact without a kilowatt tromping on them. Not all bands have recommendations for DX windows. For recommended DX Windows -- see the ARRL page ""The Considerate Operator's Frequency Guide" at URL:
http://www.afn.org/~gars/bandplan.html

There are several more at URL:
http://www.ac6v.com/pagev.html#HF

And QRP Calling Frequencies can be found at URL:
http://www.ac6v.com/pageaj.html#CALL

A lot of time a band appears to be dead but may not be -- such as 6M -- so calling frequencies have been recommended for CW, SSb, AM etc as the place to call CQ or listen for activity.
These can be found at the first URL:

In addition, many rare DX stations like to call at the 95's or 025's such as 14.195, 21.295, but 28.500 -- 14.025, 21.025 etc. DXpeditions

will publish (on the Internet) their intended frequencies of operation
-- similar to above.

Hope that helps.

Good DX
Rod in San Diego
CQ DX CQ DX -- No QSL's -- Just QSO's -- (I guarantee it!!)

Hi Casey,

The purpose of a DX window is to give a DX station
a place to operate where he can be heard, and not lost
under a ton of 'domestic' QSO's.

The only one I can think of off the top of my head
is on 75 meters, 3.790.0 to 3.800.0, with the calling
frequency being 3.795.0 usually.

On 20 meters, there is a frequency where you will
find a lot of DX stations, 14.195.0 but I don't know if
anyone regards that as a 'window'.

There is a DX calling freq on 160 also, but I don't
remember what it is.

On six meters, it's 50.110.0 for the DX calling
frequency.

>is there any save way to receive qsl cards from cuba ?

That's a tough one. I've worked plenty of Cubans over the last couple of years, and sent QSLs via the bureau, but have only received one QSL from the country since 1978. (CO8RCB, op Juan CO8TW, worked on 21MHz SSB in February 1997)

The economic situation isn't very good, and because of the U.S. economic embargo I doubt "green stamps" will do much good. I would suggest you look for the next European DX-pedition to Cuba & work them, it's probably your best chance.

Stefan,

Just for grins, I looked in my log for Cuba QSOs. Made 36 QSOs and have 2 QSLs in the box. One was direct with an IRC to CM3JR and the other was through a stateside manager (CO2CA). I've worked Cuba on 80, 40, 30, 20, and 15 meters--only have 40 phone and CW in the box. Guess I'll not be using Cuba for 5BDXCC!

Oregon Coast has a Very good local coverage Repeater.
This Is a Open system and all are welcome to use .
Also this Repeater in linked to the internet and will
allow you to talk DX. 440.925 + NO PL TONE PLEASE .
Repeater is not setup for pl tone filtering and if you
try to talk into repeater with it on it will garble
your signal .Thanks and 73 KJ7VW Astoria Or .

2077. POLAR BEAR DX-PEDITION 98

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-24 00:00:00 UTC
From: VE3INB - George <oppy@inforamp.net>
Message-ID: <6mrhv0$3pt@news.inforamp.net>
Source record: 28655
Cross-posted to: rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,alt.ham-radio.hf

CHECK OUT THE POLAR BEAR 98 WEB SITE FOR ALL THE LATEST
INFORMATION.
http://webhome.idirect.com/~galati

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there..
Two from our group will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory. The Moose Factory station will be operated
by Bob-VE3LLE and Lyle-VA3DXE as the main operators with
help from the rest of us.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of either VE8C or VE8I. The call hasn't been
determined yet.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM from the
M.V. Polar Princess out of Moosonee.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. We'll probably be
doing limited operating on Saturday night so that we can get
some sleep. The Northlander will leave Cochrane for Toronto
at 7:00 AM and we will be operating XM3PBX on the southbound
trip until about 4:00PM at which time the Polar Bear

DXpedition will cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 15M, 6M and 2M. We haven't determined
the final frequencies, but we should have that information
by the middle of July.
Here is a list of the participants.

Aldo Galati-VE3IMR/VA3AG

John Harden-VE3VGI

Paul Lantz-VE3KBL

Garry Hammond-VE3XN

Bob Elston-VE3LLE

Don May-VE3UNA

Doug Baker-VE3BKR

Craig Jenning-VE3CIJ

Lyle Sibbald-VA3DXE

George Burns-VE3INB

>

HI3JH is usually pretty good about QSL'ing the stations he manages. I've received several from him.

Looking through my box, I have about 5 cards from Cuba but the only bands are 80 and 40 meters. My first QSL from Cuba was from a ham there who must've really wanted me to have a card. I received one from him before I sent him one. I sent one in return, but have no idea if it actually arrived there.

Shipped to ARRL QSL Service to DX stations. Due to costs US stations must send SASE to receive card. AS soon as I get it scanned you can see what you are missing.
QSL route K4AVQ. Too many to send in USA without postage. All stations that send postage and SASE should have them by now if you do not send e-mail and date worked and time will re-check.
Card has Aruba beach and two lovely Dutch girls I met down there on the front. Card will be on QRZ DX site and Solder-it competition in a week or two.

Greetings,

As a novice to this area, the many models of equipment
can make for a difficult selection without some tips.

I wanted to purchase a new 'power' portable shortwave
capable of receiving good AM reception. I know there is some
nuance about the AM antenna being an internal one..?

Anyway, I tried a Yahtboy (grundig) without much better
reception than a large boom-box portable I have. I herad
of the Sangean ats909 and the Bearcat 3000xlt, but unsure
how all this stuff works with regard to antennas etc.
My limit is around $300. give ot take a few. Any advice
appreciated at my e-mail address and or posted. Thanks
Steve.

ARLD025 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The Daily DX, DXNS and Contest Corral from QST. Thanks to all.

NIGERIA, 5N. 5N0/OK1AUT has been QRV on 40, 20, 17 and 15 meters, using CW. QSL to home call.

UGANDA, 5X. Don, KD4UDU, is QRV as 5X1DK from Kampala until the middle of August. QSL to home call.

TAIWAN, BV. Jurgen, DJ3KR, is QRV as BV3/DJ3KR until August 12. QSL to home call.

FRENCH POLYNESIA. FO. Jose is QRV as FO5QG from Marquesas Islands, and is often on 14122 khz between 0400 and 0800z. QSL via XE1L.

THAILAND, HS. Ray, G3NOM, is active as HS0/G3NOM from Lamphun. He will also be QRV from Bangkok. QSL to home call.

PAPUA NEW GUINEA, P2. Chip, P29CC, is QRV using SSB. His length of stay is unknown.

SWEDEN, SM. Hans, SM3TLG, is active from Orust Island, IOTA EU-043 as SM3TLG/6 until June 27.

BRUNEI, V8. Gary, VK8GW, is QRV as V8GTW, most days on SEANET at 1200z on 14320 khz and then on 15 meters. QSL to home call.

CANADA, VE. To celebrate the 100th anniversary of the Gulf Ferry Service between Newfoundland and Nova Scotia, Special Event Station CZ1SSB will be QRV until July 24. The station will be located in Port aux Basques, Newfoundland. QSL via operator's instructions.

WILLIS ISLAND, VK9W. Graeme, VK5GW, is QRV as VK9WG. He will be here for six months. QSL to home call.

CAMBODIA, XU. Harv, XUF2B, will be QRT at the end of July. QSL via N4JR.

VANUATU, YJ. Crystal, YJ8PU, is often active on 15 meters around 0300 to 0500z. QSL via KF4VPU.

KERMADEC ISLANDS, ZL8. Bob, ZL1RS, will be QRV from Raoul Island from about June 29 to July 15. When time is available he will get on the air as ZL8RS. He will be on all bands 160 to 6 meters, using mostly SSB, with some CW on 30 and 160 meters. QSL to home call.

SOUTH AFRICA, ZS. Special Event Station ZS80NRM is active until July 30 to celebrate the 80th birthday of President Nelson Mandella. QSL via ZS6Y.

THIS WEEKEND ON THE RADIO. Field Day is scheduled for this weekend. Please see May QST, page 108 for complete details.

Howdy. They're starting to pile up, and wanted to know where to find
some plastic sheets that will hold Qsl cards.

I want to put the sheets into a binder for a nice display.

I have seen large plastic "wall hanging" sheets in CQ magazine, but
I'm more interested in smaller "binder"-sized version.

thanks!

---------- Hello Thomas:

Hope you enjoy your stay in the USA.

There are some areas where repeaters will work without a subaudable tone (PL tone). The standard off set is 600 up or down from the repeater output frequency.

In most major cities there is a need for a PL tone to activate the repeater so that stray signals do not trigger the repeater. The most frequently used PL tone is 107.2 and is built into the radios here or can be added to a radio so that whenever you transmitt to a repeater the PL tone is also transmitted along with the voice signal.

Hope this gives you some help.

73,

Marc Schneider, Psy.D.

Hi Wis -- since the first letter is in question -- here is a quote from
the FCC specs:

Single-sideband, reduced or variable level carrier = R

Single-sideband suppressed carrier = J

Thus ham SSB is J3E.

BTW the 3 is:
(4) A single channel containing analogue information = 3

And the E is:

(6) Telephony (including sound broadcasting) = E

This applies to USB and LSB as far as I know.

See following URL for a comprehensive listing of the
letter/number/letters.

Hi Steve,

I don't know if you're interested in building radios at all, but TenTec (available on the net, but located in Seiverville, TN), has an excellent little rig out now that's oriented towards SWL'ers, not just hams.

It's just under $200, and covers anything you could want to listen to in the MF-HF region. TT's manuals are well written, and if you can solder and follow instuctions, you'll have a neat little rig.

Good Luck and I hope this helps. 73 de K4YZ, Steve

June 29, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K8YSE, KF8TM, NE8Z, WB8YJF, W8CNL, DL2HEB, EA5GRC, EA5KY, F5PHW, G4BUE & DX News Sheet, GM4SUC, LU1DZ, LY1DR, LY3BA, ON7ZV, P43P, PA3DMH, VE2CY, ZL1RS and ZS6Y for the following DX information.

1A0, SOV. MIL. ORDER OF MALTA. Activity by a station signing 1A0KM on 20/15 meters, June 13th, was a pirate. This has now been comfirmed Francesco, IK0FVC. Generally there are announcements in advance if a 1A0KM operation would take place.

ECUADOR DXPEDITION. Rick, NE8Z, will once again be returning to Ecuador for a 3 week visit from July 5-26th. He will be traveling to different areas in Ecudor using the following callsigns:

HC1MD - QTH: Amaguana
HC1MD/HC4 - QTH: Atacames/Pacific beach area
HC1MD/HC4 - QTH: IOTA SA056, "La Isla" in the Esmeraldas Province Group
HC1MD/HC5 - QTH: Cuenca
HC1MD/HC6 - QTH: Cotopaxi Volcano
HC1MD/HC7 - QTH: Amazon Jungle/see the QTH & family rental resort at: http://wwwpub4.ecua.net.ec/sierrazul/

He will be using a Kenwood TS-50/AT-50, Heath SB-200 AMP, Cushcraft R-7 Vertical and AEA PK-232MBX for RTTY. His activity and operations will be mostly on the WARC bands CW and 20 meters RTTY. From "La Isla", IOTA SA-056, he will operate as HC1MD/HC4 for 8 hours on either July 22, 23 or 24th from 1500-2300z only on 21260 or 14260 kHz SSB. John, WD8MGQ, will have full information as to which day he will activate SA-056. He can be reached daily on 14260 kHz or via E-mail at: wd8mgq@tir.com The IOTA trip will be planned according to the weather and malaria conditions in the area. All of Rick's CW/RTTY operating as HC1MD/HC4 will be from Atacames on the mainland between July 19-25. Thanks to

Bill, W8HVX, who has helped Rick set up for his first ever RTTY transmissions from Ecuador. It is suggested to watch 20 meters mainly for RTTY. Bill will have regular contact with Rick and can be reached via E-mail at: w8hvx@ismi.net -- All QSLs should go via: K8LJG, John Kroll, 3528 Craig Drive, Flint, MI 48506 USA (John E-mail address is: k8ljg@tir.com). A short story and photographs will be posted after the trip on the new Web page for the Southeast Michigan DX Association (SEMDXA) at: http://www.semdxa.org/

IOTA NEWS....
AF-010. Elmo, EA5BYP/3C1BC, and Vic/EA5YN/3C1PN, will be on Bioko Island from June 30th to July 7th using the callsign 3C5DX. They plan to be active to 80-10 meters CW/SSB. The QSL via EA5BYP.
ADDED NOTE: The new color QSL for 3C1GS is back from the printer. All the cards received will be answered once Elmo returns back from Malabo.

EU-032. Phil, F5PHW, will be on holiday from Re Island and will be active as much as possible during all of August. Re Island also has a reference number of DIFM AT-022 (French Islands Awards). He reports that he will be active almost on CW (90 per cent) and sometimes on SSB or RTTY. If asked, he will QSY to SSB or RTTY when possible at any moment. He states EU-032 is not very rare, but has made around 5000 QSOs since 1991. Activity will be 80-10 meters using the callsign F5PHW/P. Phil may also be active in the IOTA Contest (if his boss lets him!) as a Mono Op 12 or 24 hour CW entry. QSL via F5PHW, bureau or direct to the address: Berger Phil, 19 Rue de L'Embellie, 56100 Lorient, France (Only to this address. Address in CBA not available).

EU-039. The Belgian DX Pedition Committee will head to this rarely activated French Island called Chausey Islands to take part in the next IOTA Contest on July 25-26th. The Chausey Islands also has a reference number DIFM MA-004. The Belgian team will be composed of ON1KSZ/Stef, ON1MCT/Phil, ON4LAM/Mike, ON4LCW/Maxime, ON5PV/Phil, ON5OO/Jack, ON6QR/Fred, ON7LX/Carine, ON7PC/Pierre, ON7RN/Eric, ON7TK/Claude. They will be using the callsign TM5T. Because of the special regulation of this Island and the prohibition of any tent or camping, they had to receive permission to use an official building and the use of poles and beams. Two stations will be set up, one running and one multiplier station both connected to beams, verticals and dipoles during the 24 hours of the contest. They will be operating both CW and SSB on the 5 bands during the contest. The QSL Manager is ON4GO/Mike. Before and after the contest, listen near the IOTA frequencies and on the WARC bands. Also, look for F/ON4LCW during July. He will activate a lot of little islands from the Chausey archipelago counting for the French islands award DIFM. For more information, contact Fred, ON6QR, via E-mail at: on6qr@ping.be
Or check out the Belgian DX Pedition Committee's Web page at: http://www.ping.be/on6qr

EU-123. The Ayr Amateur Radio Group is going to be active from the Lighthouse on Ailsa Craig in the Firth of Clyde (IOSA CL-5). Activity will be from 0900z until 1830z on Saturday, July 18th, with the callsign GS0AYR/P. Activity will be on all bands with three stations. QSL via GM0JHF.

NA-062. Dave, KF8TM, will be active from Florida Keys (Cudjoe Key) July 20-30th. He will be active on 40-10 meters CW as KF8TM/4. Dave will also participate in the IOTA Contest as a 24 hour CW entry. He will be using a TS-450, AL811 and R-7000.

NA-067. Jon, WB8YJF, will be active from Ocracoke Island, N.C., from July 25th to August 1st. Activity will included the IOTA contest. This island also has a reference number of USI NC-001S (United States Islands Award). Operations will be on CW, RTTY, and some SSB. QSL via his home call: Jon Severt/WB8YJF, 5586 Babbitt Rd., New Albany, OH 43054. His E-mail address is: wb8yjf@juno.com

NA-128. Joe, VE2CY, will be active from Ile Aux Coudres from July 13 to 23rd, during his vacation. People can set up a schedule by E-mailing his home address: willis@writeme.com

KH4, MIDWAY ISLAND. The "DX News Sheet" reports that Ted, NH6YK, will be active again about August 1-15th, as KH4/NH6YK while visiting his XYL who is stationed here. Activity will be on HF and 6 meters. More information is to follow. QSL via home call.

LA, NORWAY. Ulli, DL2HEB, reports that he will be active between July 19th and August 3rd from Norway and some Norwegian islands with his QRP-Rig using the callsign LA/DL2HEB/p. Operations will be only CW and possibly some Amtor/Pactor. He will also take part in the IOTA Contest, probably from Gurskoy or Hareidland islands (both in EU-079, that is the Soroyane Group).

NOT ZS8, PRINCE EDWARD & MARION ISLANDS! Ed, ZS6Y, informs OPDX a lot of individuals are getting the impression that ZS80NRM is operating from ZS8-land. He is NOT. Ed is operating from the Republic of South Africa.

OOOPPPSS! Last week we mentioned Mark as ON5WW, this was wrong. Mark, who was active as S07WW this week is ON4WW, not ON5WW.

P4, ARUBA. The Aruba IARU Member HQ Station (SA, ITU Zone 11, IOTA SA-036), will be active during the 1998 IARU HF Contest weekend July 11-12th. The callsign P43R will be active on all bands SSB/CW, and a special QSL card will be printed for the 1998 IARU HF Contest. QSL via P43ARC or Bureau.

POLAR BEAR DX-PEDITION 98. Operators Aldo/VE3IMR/VA3AG, John/VE3VGI, Paul/VE3KBL, Garry/VE3XN, Bob/VE3LLE, Don/VE3UNA, Doug/VE3BKR, Craig/VE3CIJ, Lyle/VA3DXE and George/VE3INB will start a DXpedition on Sunday, August 18th, 2230z, at Toronto Union Station. They will be operating from the Ontario Northland Railway's " Northlander" under the callsign XM3PBX. They will operate until they arrive in Cochrane, Ontario. They will then transfer XM3PBX to the ONR's Polar Bear Express

to Moosonee. Once they arrive in Moosonee, they will setup XM3PBX at the ONR's Moosonee train station and operate from there. Two from the group will move their gear to the Moose Factory Museum and operate a station from there under the callsign CH3HBC/325 to celebrate the 325th anniversary of Moose Factory. The Moose Factory station will be operated by Bob/VE3LLE and Lyle/VA3DXE as the main operators with some help from the rest of the group. John/VE3VGI and Aldo/VE3IMR/VA3AG will be flying up to Charlton Island to operate an IOTA island under the callsign of either VE8C or VE8I. The call hasn't been determined yet. There is also a fourth station, CI3XXV, that will operate from various freshwater islands (weather permiting) under the callsign CI3XXV/25 and maritime mobile CI3XXV/MM from the M.V. Polar Princess out of Moosonee. This will continue until Saturday, August 22nd, when all stations except XM3PBX and CH3HBC/325 will cease operation. CH3HBC/325 will continue to be active until the end of August, being run by local hams, Paul/VE3KBL and Craig/VE3CIJ. On Saturday, August 22nd, they will leave Moosonee on the Polar Bear Express operating XM3PBX as they travel southbound until they reach the final destination at which time the Polar Bear DXpedition will cease all operations. They intend to operate on 40, 20, 15, 6 and 2 meters. For updates, check out the Polar Bear 98 Web site at: http://webhome.idirect.com/~galati

QSL INFO AND NEWS....
K8OU ADDRESS. Those looking for the QSL address for the FO0MAC and FO0PAP, here it is: EIDX Network (Trustee K8YSE), 4910 Royalton Rd., North Royalton, OH 44133-4049

Argentina postage rates UP. Alberto, LU1DZ, reports that effective June 13, 1998, International Postage Rates have been raised in Argentina. Now it requires 1 U.S. green stamp to send mail to the boundary countries, 1.25 U.S. green stamps to other American destinations and 1.50 U.S. green stamps to other parts in the world. So, one green stamp is no longer enough. Please note the change...!!! Alberto also states that the the LU1ZC QSLs are coming soon...!!!

KH0/AF4FL QSL ROUTE. Ray, W8CNL, reports he is receiving cards for KH0/AF4FL. He is not the QSL manager for KH0/AF4FL. QSL via home callsign.

SPECIAL EVENT. Commemorating the 2nd National Olympic Games, the Worlds Lithuanian Sports Games and National Folk Festival from June 22nd to July 6th, a number of LY stations will be using the special prefix LY98. Some stations already active are: LY98BA, LY98DR, LY98DT, LY98FW, LY98TX and LY98TZ. QSL LY98DR via LY1DR, Saulius Zalnerauskas, Box 922, Kaunas, 3005, Lithuania. QSL LY98TZ via LY2TZ. QSL LY98BA via LY3BA: Gediminas Lucinskas, P.O.Box 34, LT-5280 Birzai, Lithuania.

T8, BELAU. Hide, JM1LJS, will be active as T88LJ between July 26th and August 2nd. Activity will be mainly on: CW 7008 and 10104 kHz and SSB 3840 kHz. QSL via home call.

TL5, CENTRAL AFRICAN REPUBLIC. Alex, PA3DZN, recently became active from Bangui as TL5A. He will be active on 160-6 meters, CW, SSB & RTTY. QSL via PA3DMH: Alex van Hengel, Schoener 85, 2991JK Barendrecht, The Netherlands. Also, QSL is OK via bureau. Log Search is available at: http://www.igr.nl/users/pa3dmh/logs/log_search.html and will be updated on a regular basis.

VK9, WILLIS ISLANDS. Look for Graeme, VK5GW, to be active as VK9WG for the next six months beginning July. QSL via home call.

ZA, ALBANIA. Luis, EA5KY, will be traveling to Lac, 50 km north of Tirana, July 3-18th, and will be active as ZA/EA5KY. He is setting up an amateur radio station for the Franciscans missioners. He mentions this isn't a Dxpedition. Geni, ZA1B, states he will not have problems working as ZA/EA5KY. Luis will try to be active on all bands 80-10 meters on his free time. His equipment is a TS-50 and dipoles. Suggested frequencies are:
SSB - 14190, 18145, 21195, 24960 and 28490
CW - 14020, 18075, 21055, 24895 and 28020
RTTY - 10105 kHz
There may be 80 meters activity if conditions are good. QSL via EA4URE, bureau or direct. They will be answered at the end of his activity.

ZL8, KERMADEC ISLANDS. Bob, ZL1RS, reported earlier in the week that "Everything is going to plan, and later this week I am departing for Raoul Island (Kermadec group)." By the time you read this, Bob should be operating between his work commitments from Raoul until July 15th. He states, "I'll TRY to get on as much as I can ... especially nearer the end of the trip when my work will be finished." Watch out for ZL8RS mainly on SSB, with a little (slow) CW on 160 and 30 meters. Lee, ZL2AL, has kindly loaned Bob a laptop computer so there will be some RTTY. Also, Bob finished building a compact 8877 amplifier to take along. He states, "Please note that the generator power supply is SUPPOSED to be off from 1100z to 1900z. There is nothing I can do about that. Any operation between these hours will be battery powered and "QRP". Bob provides the following POSSIBLE operating frequencies and times (all subject to change due to his work schedule):

160 meters - CW on 1828 (RX up 2 khz and higher for JA). Listen for his CQ at 0505z (ZL8 sunset) and 1845z (ZL8 sunrise at 1850z) for 10 minutes. There will be an announcement of moves to 160m from the higher bands to call CQ for 5 to 10 minutes periodically between 0700z and 1100z.

80-10 meters - SSB on or near the usual DX frequencies, around 0700z to 1100z initially, other times as work allows, particularly at the end of the trip and on any "days off" that he manages to have.

30 meters - CW on 10120 kHz. Remember SLOW CW. (Patience/tolerance!!)

10-6 meters - 29495 and 50110 kHz. He will leave the radio running
in the background WHEN he is working inside during the
day. A CW CQ beacon on 50110 kHz is likely, break in on
SSB or CW.

Did anyone work the special event station VY4CCA from Charlottetown, PEI which was supposed to be on from June 24th thru June 28th? Never heard them on myself and I did a fair amount of searching. I have never confirmed PEI and would really like to confirm Charlottetown. Would be interested to know if the event was rescheduled.

73,
Robert, N2JTX

Message-ID: <6n8cltacu1@nnrp1.dejanews.com>
Source record: 28482

Hi all ...

Later this week I am travelling to Raoul Island (Kermadec group) on business. I will be operating from about 28 June - 15 July. The intended topband antenna is an inverted L with elevated radials. I've just finished making a compact amplifier (17" x 13" x 8", including psu!) to take along, and managed to get 1100W out on 160M. Of course I will only be using it at our countries legal limit of 400W. ;-)

I'll TRY to get on topband at my sunset (and sunrise, if the generator is running), as well as other suitable times, for 10 minutes or so on as many days as I can ... especially near the end of the trip when the work commitments will be over. Watch out for ZL8RS with lousy and slow CW! Lets see how it goes!!

73 ... Bob, ZL1RS

The club station of the Bangor & District Amateur Radio Society (GN3XRQ/p) will be active from Groomsport Harbour as part of the town's Eagle Wing Festival on Saturday 4th July 1998.

This is in memory of one of the first emigrant ships to leave these shores back in 1836. Any calls, especially from USA, will be welcome. We will be mainly on 10-15-20m with a talkin station on 2m.

73 es gud dx De Keith GI0SSA.

2106. Rathlin Island (EU-122) GB2MRI

Newsgroup: rec.radio.amateur.dx
Date: 1998-06-29 00:00:00 UTC
From: keith@somewhere.com
Message-ID: <3597f731.574241@news.btinternet.com>
Source record: 28485
Cross-posted to: rec.radio.amateur.misc,uk.radio.amateur,rec.radio.amateur.dx

As usual the Ballymena and Queen's Universtity Belfast radio clubs (GI3FFF & GI3LLQ) will be running a special event station from Rathlin Island to celebrate the anniversary ofthe Marconi Station being set up on the island. This year will be the 100th anniverary and possibly the last time that the call GB2MRI (Marconi Rathlin Island) will be used.

As the anniversary is on the 6th July it was decided to combine the special event station with VHF Field Day (4,5 July). This means that you will have the opportunity to work the RSGB president (who will be there for the week 2-9th) on 4m,2m,70cms or 23cms during the contest!!

As well as the above the Island counts as EU-122 for IOTA and covers three Worked All Britain (WAB) squares.

Something for everyone I'm sure you'll agree!!

Hope to work lots of you during the week - especially during the contest!!!

73 De Keith GI0SSA.

US 2 m band is 144-148 and a lot of repeaters operate in the upper 2
MHz.
70 cm FM is 440-450 Mhz.

>something about some subaudio tones.

Some use tones on others you just use PTT.

>and then you can speak. The shift at here is -600Hz.

Some repeaters use -600 others +600.

If you mail me with the States you'll be visiting I can send you a
list of repeaters you can work. Otherwise, try to get your hands on
the ARRL repeater directory or the US repeater MapBook
(http://home.earthlink.net/~artsci)

I have the latter for my trip to KL7 an W3 in a few weeks...

BTW, I trust you already have your reciprocal licence from the FCC? It
seems that the US has not yet joined CEPT.

Anyway, enjoy your trip.

bye Maurice

i am interested in hearing some anecdotes concerning emergency communications in which cw was the only viable, available communication mode. please limit the evidence to the past 10 years and to the usa. evidence such as this is the proof in the pudding. the more the better.

the problem is that most people who would love to do HF have no
interest in CW <at least the no coders I know around here>
btw check me in the callbook in a couple of weeks.....not
now as I just show tech +
I HATE code, I will NEVER do it again, and I LIKE saying that. I
decided that I wanted to do some hf, so I went ahead and took the
plunge. Actually I wanted to put a 10 meter split site repeater up
with 2 meter or 430 link frequencies so ALL who want can use it.
I am not a snotty you gotta doit cuz I did kinda guy.
I am a member of the NCI <no code international>
I did code because I had to, not because I want to. I think it sucks,
it is at best moderatly efficient <MANUAL CODE THAT IS> and
it is VERY unappetizing to the new ham. Lets face it, if we don't do
something with these bands, they are going to be taken away.

hf, vhf, uhf, shf and light bands need to be utilized for retention.

look at what the code barrier created on 3853, 3894, 3850, 3950,
14.313----and by the way just WHERE IS RAINCOAT CHARLIE??
don't forget to mention the casual redneck who got this here radio
at the hamfest......no call at all

GIMME A BREAK!

let people face their ham radio tenure on thier own. IF they want it,
support them, if they don't support them, don't alienate them

piss me off, and I will flip a bugger on your windshield!

If one were to look at the Northridge Quake, you'd see that the real emergency communications took place on FM voice. However, a lot of critical messages were passed via packet. If you really want to look at real world emergency communications, check out the back issues of QST for their reports of Hams helping out at ...

All modes of radio COULD be used in an emergency; however that's not the real justification for CW. The real reason is that for many, it's fun. OK, I know it's not everyone's "cup of tea", but when the bands have a bad noise problem, CW does a lot better than SSB.

2119. 40 m antenna

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-02 00:00:00 UTC
From: ed <emontana@interlog.com>
Message-ID: <01bda56c$b40c5500$d2cb22cf@emontana.interlog.com>
Source record: 28498

Hi!, all.
Recently (after getting tired of DX on 10, 15 and 20) I've been researching for a good DX antenna for 40.
And after all it is said and done it still is true: "the bigger the better".
I was looking for material for a quad (on a 40 ft. boom) but I think it may not be worth the effort. I live in the city (40ft wide lot) and although the neigbours are exellent would like not to get in their property (at least when the beast is "parked").
That was a nice reason to attempt a quad.
But up here in Canada fiberglass suitable for canadian wheather does not come in easily nor cheap.
In the ARRL antenna book I found a "shortened" version a 40 m (on a 36 ft boom) that uses capacitance hats and a couple of coils.
It streaches a beautifull 38 ft. or so.
My question is the following:
Does anybody know where up here in Canada I can get alluminum tubbing (not pipe, I got the boom already)?
Does anybody have 1 3/8OD, 1 1/4OD, 1 1/8OD I can get my hands on cheap?
I need the following:
Good quality T6 series:
18 ft 1-3/8OD (3x6 ft).
30 ft 1-1/4OD (6x5 ft).
34 ft 1-1/8OD (6x5.66 ft).

OR
If you have fiberglass poles and spreaders (big and strong) enough for a three element quad on 40 give me a shout!!!!.

I have a nice TS820S (with some toys) I'd like to swap or we can talk price.
I am located in Toronto, Canada.
You can e-mail me at: emontana@interlog.com
Txs,

I've been "lurking" in these newsgroups, reading all the trash about "know code" vs "no code" emotions.

It's real simple.......put yourself into your favorite natural or man-made disaster REGION WIDE scenario, and the start pulling the plug on your computer, your phone lines, your TV, cable service, your cell phone, and of course the rest of your power, water, sewage, garbage pickup.........then soon the police, fire, and ambulance services become overwhelmed.

Now that you're sitting there in the dark, with injured and scared family or friends, WHO YOU GONNA CALL??? YEAH, RIGHT, 911, HAH!!!!

How can you make DAMNED sure you can get a message about you, your family or friends OUT OF THE EFFECTED AREA?

The local VHF/UHF repeater towers are pretzels. The CB bands are full of looters waiting to hear would-be victims calling for help. With all the power line failures, the airwaves have some SERIOUS QRM, so voice communications is all but impossible.

The bottom line is simple physics.......CW is the MOST ROBUST means of long distance communications when all else fails. I don't need fancy computers and software. I don't need repeaters. I don't need TNCs. I need only a simple power source, like a car battery, a radio, a dipole, and a key.

I maintain that THIS is why Ham Radio has a well-deserved reputation for providing disaster communication worldwide. It's because of trained and self-disciplined operators who commit themselves to be prepared to offer their valuable assistance to their affected community. Hell, isn't that a big part of what Field Day is all about?

So, for my money, I say to those who want "instant gratifaction" by dropping code to gain HF privileges.....get proficient in code NOT because the FCC says you need to, but rather because it's smart! Let's not lower another chin-bar so more people can "fall backwards" over it. Instead, let's do our part to help raise more enthusiasts to gain a valuable skill.

Gee, its too bad that you limit this to the last 10 years or I could list:

WW1
WW2
Russian Revolution
Nazi Domination of Europe
Chinese Cultural Revolution
Rape of Nanking
The many nations subjugated by the Japanese before WW2
Natural Disaters of great scale, earthquake, volcanoes, you know, the really
big ones that only come along every few centuries
I won't even get into the happenings in Africa

But since these aren't acceptable disasters, I won't mention them. Just
what type of disasters can we expect in the next 10 years? BTW, I can go
out to my garage and fabricate a CW key in 5 seconds. How long to fabricate
an electret mike in your garage? I can build a simple CW transmitter and
transmitter from the parts I find in a cast-off radio. Could you make a SSB
xcvr out of the same? How did Adm. Stockdale communicate with his fellow
prisoners during his 7(?) year vacation at the Hanoi Hilton? It wasn't SSB
on 11 meters.

When I was 13 years (in 1966) old Sister Charlotte, K6VFE taught me the code
in 6 hours over 3 evenings.

My very fondest regards

Every mode has its uses. I have been mostly a CW op for over 30 years
and I love the mode. But that doesn't stop me from using other modes
that have been available to me.

There has been a question lingering in my mind for a while, though.
People sing the praises of various digital modes which come across
error-free through any noise or SNR. How much does this equipment cost?
I suppose the minimum you'd need to operate on a mode that prints out on
a screen is a dumb terminal and some sort of TU/TNC. Dumb terminals can
be had for free these days. What about the TU? I paid $125 for a PK232,

and that was one of the older ones that just does RTTY, AMTOR and VHF packet (no pactor/GTOR/etc.) Can you get on any of these exotic modes for under, say, $25? How would that be done? As has been mentioned, you can make a straight key for CW for practically nothing, and a decent one for maybe $5.

>

Yes! So why am I sitting here within 10 feet of transverters that will put me on 50, 144, 222, 432, 903, 1296, 2304, 3456, 5760 and 10368 MHz with no one within 150 miles to work on most of those bands? I'm ready to go but no one else seems to be. I've been trying to get some activity going on these bands around here with no luck. At least there's the rovers from Chicago to work a couple times a year during VHF contests!

Maybe it's for the same reason that some (not all) people want to give up on CW - some don't want to take the time to learn it. It takes time and WORK to build and get the bugs out of all those transverters and antennas! Definitely NOT instant gratification!

Since I'm on the subject of VHF/UHF, most of us who are into DXing (weak-signal work) on these bands know that a QSO is often attempted on SSB, and if that fails, the ops automatically switch over to CW to try it. CW is still the predominant mode for EME and intense AU and other modes of propagation which distort SSB too severely to be intelligible.

Also, I'm often at one end of a QSO on a UHF band from a hilltop I hiked to or tried to drive my little Toyota to. There's only so much I'm going to take in a backpack. I'm not going to cram a computer in there if I'm already packed with equipment and antennas for 4 or 5 VHF/UHF bands. The car doesn't hold that much, either. So it's a mic and a straight key at most. Sometimes just the straight key.

I really have nothing against dropping the CW requirement for licensing. I'm just pointing out that it DOES have its uses, and there will still be people who realize this and learn it. Anyone who does VHF/UHF/microwave DXing knows this. And if you've never done it, then you don't know its importance there.

>the
>proof in the pudding. the more the better.

For the past 90 years all shipboard emergencies on the high seas have
taken place utilizing CW. 500 kHz (just below the AM broadcast band)
for night-time comms, and 8, 12, 16, and 22 MHz for daylight comms.
Not a day would go by without us hearing a TTT, XXX, SOS, or MEDICO
at NMO. Your library will be filled with 90 years of daily anecdotes,
if you really care. But that fact really doesn't play any roll in
amateur radio. We need to continue code testing for HF ham licenses
due to CW being the only common mode among the world's HF-licensed
hams. No other mode enjoys this bond. And as a communicator (assuming
you are licensed, Fran) you surely realize the need for everyone world-
wide on HF to have a mode in common, yes?

Jeff KH2PZ / KH6 (former CW op at Coast Guard Radio Honolulu)

Mr. Idiot, what if CW fails ?? Don't include EVERYTHING except CW
for "all communications fail." Include CW also.

>I maintain that THIS is why Ham Radio has a well-deserved reputation for
>providing disaster communication worldwide.

ask your neighbour and they don't know about it. show your CW keyer
and punch CW keyers and call CQ. I am sure your neighbour will be
impressed !! (grin)

>wiedemann@home.com

and the massive crossposting is the way to illustrate how pro-CWers
are stupid.

Yours aren't the examples. Give us the example where ALL VOICE and
DIGITAL communications fail ad CW is only the way to transmit your
signal. WW I and WWII aren't the example. You were just banned to
use HF spectrum in any matter. Get a life. Think of nuclear war and
say know code = know ham = know radio = know emergency. Think of
UFOs and say have guns = have bombs = have protections = have safety.

Me too.

My thought: Let's really put some substance into the need-for-CW requlations, by requiring yearly recertification of CW skills, at some modest speed of say 10WPM.

OK all you PHONE only inDUHviduals have fun with this idea. But don't expect me to dignifiy your response(s) with an answer. Esp. you [LOSER} Cutie Boy.

I managed to work 3 VE*RAC stations during the Canada Day contest. For VE5 and VE6 I was able to get QSL routing but I forgot to get it for VY1RAC. Now that RAC is offering a new award for working RAC stations, getting QSL's will be interesting.

My question, did anyone manage to get the route for VY1RAC?

No problem here. I sat down last week just for the fun of it and copied
35 wpm solid on paper from W1AW, QRM, QSB and all.

Bugger or booger. Flipping a bugger would quite a feat. Most of them dudes are heavy! Boogers on the others hand are light and easy to flip. I do it daily.

yep. I support 50 WPM. go for it. destroy ham radio now. great
job. good job. 100 WPM ? of course. CW will kick the all idiots
out from ham radio eh... do it. Leave the freq unusued and "we"
will take YOUR freq. MAKE MORE STRICT CW REQUIREMENT

Better yet, imagine yourself in a National Park or Forest when the disaster occurs, with neither Bic nor matches (both ruined by the disaster). The only way to save yourself and family is to start a fire quickly using flint and steel. It follows that this archaic skill could save your life - therefore everyone who wants to venture into any National Park or Forest should, by law, be required to demonstrate his/her ability to find an appropriate flint and start a fire with flint and steel within one minute. Otherwise, you have no business venturing out of town ... right??

i appreciated the response. unfortunately there was not one within the guidelines. the incidents that were mentioned were either too old, or out of the geographic constraint, or both. Although the lack of data does not conclusively prove anything, it does hint at the fact that we have entered a technological era in which we never (or very rarely) utilize the final "most robust" communication mode, cw, in times of emergency. Don't get me wrong. I think code is fun (still learning though). However, I believe the era of code as a likely final straw has ended. Sure, the occurance of a cw only method emergency communication for the us ham is possible, however it is microscopically probable. Someone has sited the longstanding naval use of cw... well, you neglected to mention that its use in that context has ended. There is absolutely no doubt that cw deserves a special place in the annals of human communication history. However, the rationale that i hear for continued cw requirements are pretty weak. in the end, most of these debate down to an emotional basis. a few of the rationale for pro-code that i have heard are:

1)last resort common mode
2)limits hf licensees
3)essense of a ham
4)makes a better ham
5)keeps out "lids"
6)other

responses:

1. technically, the robustness and simplicity of cw can not be denied. the commonality is also a powerful argument. however, the fundamental flaw is in the "last resort" qualification. The likelyhood of ever needing the absolutely "last resort" mode for a us ham is pretty darn low. the us govt. has come to the same conclusion as they have dropped cw as the naval last resort.
for the sake of argument, lets say we are forced to use cw as our last resort. do i really nead to send 20 wpm? or would the necessary data get through at 5wpm. i submit that any scenario that needs 20wpm for rescue response time arguments is invalid because cw would undoubtedly not be the last viable resort in those cases. now, lets say we have the nuclear, asteroid, or aliens, scenario and cw is all we have... i think even 1 wpm would cut it then. so what is with the 20wpm requirement? i submit it is not about necessity, but something that is a little darker in human nature.

2. it would seem that the code requirements do in fact limit the number of hf licenses. however, i submit that many that do take the plunge, learn the code for the test only. given that factoid, i believe the time could be better spent learning more theory, regulations, or operations. perhaps a ham related community service requirement, or so many hours working with an hf licensee or something. bottom line: hf license numbers could be restricted in a number of other, more

pertinent ways.

3. i have only heard this one a few times, but i believe there are more out there that believe this than one would suspect. my only reponse is, i solute you. i tend to believe that this was the way it used to be and contrary to current popular disimformation, the change in thinking is not a result of a need for "instant gratification". sure, for some nc's this may be true. however, i believe that most of them would rather spend the code study time on heavier theory, operations, or regulation test preparation.... something that they believe more pertinent to the modern communication era.

4. let's face it this is bunk. i hear and see a lot of bitter, self-righteous talk from hf licensed hams. the code apparently did not work for them.

5. wrong. these people are on every band and can hold any class of license. how many ham club ex-officers cause trouble on uhf/vhf repeaters?... these people are typically hf licensed... in my experience (thus far).

6. there are bound to be arguments i missed. let's hear them.

i should say, if i haven't already... i am a nc tech. i am currently learning code to upgrade my license. i think cw is fun. although i didn't necessarily feel that way when i started. i also feel that hf phone and cw certification should be separated, as they have little to do with each other.

2147. LOOKING HF antenna in advance to go to the Ocean

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-02 00:00:00 UTC
From: Paolo <casadio@mbox.queen.it>
Message-ID: <359BB9E4.2A5B5CBC@mbox.queen.it>
Source record: 28526

Dear Friends,

I am a sailor and I have a big problem to receive the HF radio in my
language from my country when I am far.
I have a receiver that work from 300 khz to 3000 khz AM and ssb.
I am looking for a best marine antenna to build myself or to buy easly.

My better antenna must be:
Directive, active, small size, marine water resistent and with minimum
noise, easy to build or to find just builded and usefull during the day.

Is It TOO?

Thank you very much.

Paolo

There are always people who want the privileges with paying their dues. They want exceptions and special considerations. It is because they are either too lazy or too stupid to do what everyone else does. Give them VHF access without the code, and soon enough they want H.F. access. I not saying there are no idiots or lids out there -- tune up 7.258 sometime. Want to know what the HF bands will be like with no-coders? Tune up 27.035. Next thing they will want access to your station -- because theirs doesn't work as well. And while they are there -- how about a beer. Hey, and what's for dinner?

Some people just con't understand NO!

Cutie Boy doesn't need H.F. access. Give him a 11 meter linear instead.

What is so hard about learning the code? If you have half a brain.....

TR

On December 31, 1997, just hours before the British government ended Morse code monitoring of 500 KHz at shore stations, a freighter in the North Atlantic, the Bahamian M/V Oak, a 13,000 ton freighter carrying a cargo of wood sent an "SOS" using Morse code.

"SOS SOS This is Oak. Position 53 16N 24 50W Stop Engine. We need assistance." The ship was heavy in seas, and the cargo had shifted. She also lost power, and was sinking. The call was answered by a British shore station, and a Royal Air Force "Nimrod" was soon orbiting overhead. The crew abandoned the ship shortly thereafter, and was rescued.

Source: Worldradio Magazine, May 1988. Page 22.

I've read numerous accounts of Morse in action however, this reference was handy.

Hi all,

Not going to touch the monthly CW debate with a 10'
gin pole, hi! Just keep working DX!

Anyway, I was looking at the near-realtime MUF map on
the web and noticed how the greyline in the evening
passes from NZ through OR (my qth) and on into W.
Europe and W. Africa. MUF was not high enough to use
my 15/10 meter quad, but a thought occurred to me...

Provided the MUF is favorable for those bands, which
is the optimal way to point the quad? Along the greyline
or along a great circle route (e.g. for W. Africa from
OR)??

tnx es 73,

The flaw in your logic (or lack of it) is the purpose of a national park is NOT to provide emergency communications in the event of a disaster. That IS the purpose and focus of amateur radio. Ever heard of field day? What do you think its' purpose is? If you must be ready to provide emergency communications, then why not be able to do that in as many ways possible?

I don't use 11m either. Why use radiowaves for making DXs CQs and
QSLs. What a hell. I love to use phonepatches by using 2m repeaters
though. It is practical. Everyone says it is cool to have free phone
calls too and they show some interests afterwards (say know code =
know ham and you will get these people away).

>What is so hard about learning the code? If you have half a
>brain.....................

I have code. Sorry. I am, therefore, a good ham as coders suggest.

Why are some of the commercial interests pushing "No code" so hard ?

Is it that they are waiting for the code requirement to be dropped so that

they can rush in and say "the amateurs dont do code anymore, therefore they dont

need the code portion of the spectrum , give (sell) it to us ??

Think about it !

de Bob

I think that the real problem is that people get bashed for not
wanting to do code, then when they try they get bashed for not
doing it fast enough, then when they get faster, they got where
they <if they did really want it, they got there> wanted to go, quit
doing it and got bashed again

this happened to me, I started code practice <listening> about
a year ago, dropped it because of some of the local hams attitudes
and mannerisms heard on the hf bands, then decided to get it on
my own with no help from the geezer squad.
the guys in question were running a code class on a local repeater
and were real butheads about it.
I got my first dx today, yeah it was great, BUT I like vhf/uhf dx...
as well and that is where a lot of no coders are. Most of the people
that I talk to on the local repeaters are the guys who run them.
<there are only 3 that I frequent> and only 1 of those is nocode.
He works on the side fixing radios for EXTRA class hams.
as well as putting up thier towers and antennas <GRATIS
because that is what ham radio is all about, helping each other
out to defray costs and promote the hobby>

the biggest problem that I see for most new hams is that no one really
wants to help guide them in the direction that they want to go in.
After all it is the ham in question who should tell what his destiny
in the hobby is.
I know several VUCC and WAS award holders that are nocoders....
I also know one DXCC no coder!

CHECK OUT THE POLAR BEAR 98 WEB SITE FOR ALL THE LATEST
INFORMATION.
http://webhome.idirect.com/~galati

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there..
Two from our group will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory. The Moose Factory station will be operated
by Bob-VE3LLE and Lyle-VA3DXE as the main operators with
help from the rest of us.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of either VE8C or VE8I. The call hasn't been
determined yet.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM from the
M.V. Polar Princess out of Moosonee.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. We'll probably be
doing limited operating on Saturday night so that we can get
some sleep. The Northlander will leave Cochrane for Toronto
at 7:00 AM and we will be operating XM3PBX on the southbound
trip until about 4:00PM at which time the Polar Bear

DXpedition will cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 15M, 6M and 2M. We haven't determined
the final frequencies, but we should have that information
by the middle of July.
Here is a list of the participants.

Aldo Galati-VE3IMR/VA3AG

John Harden-VE3VGI

Paul Lantz-VE3KBL

Garry Hammond-VE3XN

Bob Elston-VE3LLE

Don May-VE3UNA

Doug Baker-VE3BKR

Craig Jenning-VE3CIJ

Lyle Sibbald-VA3DXE

yep. increase code requirement speed to 50 WPM or something. I am
glad to support it.

Ah, so that's it! Commerical interests want 50.0 to 50.1 MHz and 144.0 to 144.1 MHz (the only Morse exclusive spectrum in amateur radio), so they're trying to eliminate Morse speed testing for HF access. Makes perfect sense. NOT!

AFAIK, the only "commercial interests" pushing for amateur licensing reform are those who wish to sell more HF radios to radio amateurs. They are not trying to end amateur radio, they're trying to help it survive and grow so that they'll still have a market 10 or 20 years down the road. Japanese companies tend to look at things further down the road than the next quarterly report, something too many Americans have forgotten. And when you look down that road, there's a demographic crisis looming for HF amateur radio. The average age of General class licensees is 63, and there aren't enough younger people becoming Generals to replace them. In 20 years, most current licensees will be dead, then who will buy a new radio?

This demographic crisis is real. HF amateur radio is in trouble over the longer term. It may not seem so tuning across the bands today, but we have to look further ahead than today. Unless we can attract enough younger people to fill the vacancies which *will be coming* when present licensees reach the age of mortality, HF amateur radio will die. VHF+ amateur radio is no longer in danger of that since the average age of VHF+ licensed amateurs has declined since 1991 thanks to the infusion of new and younger amateurs due to the code test free Tech license. The crisis that is looming is at HF. The "I've got mine" generation currently on HF may not care about the future, but some of us do (and not just for commercial reasons).

The anachronistic Morse speed tests are a millstone around the neck of amateur radio. They create an image for amateur radio as something from the horse and buggy days. People who have grown up in the modern communications era can't believe such an anachronism is still a reasonable requirement for access to HF spectrum. And they're right.

I didn't really want to get involved in this, but like everyone else, I just had to toss my opinon out there.

We must face it, code doesn't make a better amateur! I'm not even going to touch the to-code or not-to-code discussion. Rather I will try to point out the fact that just because an amateur knows code, that doesn't make them better then a no-code amateur. Sure there are a lot of no-code idiots out there, but there are also as many idiots out there with code!

I won't argue code out here, what I will say is, if you want to improve the quality of people entering the amateur service, then you should work on the writtem exams! That's where all the knowedge is people. Think about it! I mean, knowing code is like knowing French, English, or any language. Knowing another language doesn't make someone a better amateur, but knowing how a radio works does!

It's sad to hear new amateurs on the air asking how to program their ht's! Obviously something is wrong here, and it's not because of code. It's because our written exams aren't tough enough! I mean what's 55 question multi choice exam supposed to prove. Think about it, the guy already has the answers to the questions, what kind of exam is that? It's this multi choice thing that is killing us. What happened to the old days when you actually had to know something about radios and electronics to get your license? When you actually had to study for the exam!

I suggest we all stop arguing about code, and perhaps start to work on improving the quality of our written exams. 55 questions is just not good enough! And it shouldn't be a 100% multi choice exam, why not toss a few essay questions in there too? And for god sakes, stop releasing the answers!

Keep the code, loose the code, ether way we must address the lack of quality in our written exams.

Okay, now that I've said my peace, I'll get off of my soap-box. I just thought this was a point that needed to be addressed.

Hamtronics has a 2 watt exciter, kit or assembled. It is intended for FM,
but you can key it for CW.

>(Eventually, one of the local VE7's called the motel and made the
>reservation for me ... so what the hell!)

FCC and IC told us that we can use phonepatch for ordering the pizza as well as making reservations for hotels or getting taxi from the airport. It is their business for making the profit. We don't make even a cent from ordering the pizza. It's a pizzaman's business.

>In the United Kingdom and other European countries, of course, any
>phone-patch and other third party traffic is strictly forbidden.

then I will probably write the letter to UK when I live there. If you wanna change in something, you gotta do something !! Once someone finds out that making a phone call is free, they will get the license right away and good way to keep ham spectrum.

There may be a more direct methoid, but I know that you can get a UK reciprocal license on account of your VU license and then operate in Belgium under CEPT. If you go that route, you must apply for the 12 month UK license which comes with a UK call sign and not a temporary one. They cost the same (15 pounds is about $25 US) but only the 12 months license (which we spell licence) carries CEPT privilages.

>understandably, they wonder why we don't do the same thing.
>
>So the number of amateurs on the air will decrease. So what?
>
>There's always the Internet .... that's where the youngsters are to be
>found who would have become radio amateurs twenty years ago. What's
>the problem? They are keeping abreast of present-day technology -
>unlike some of the old timers on the amateur bands.
>

There will always be a certain number of people in the population who thrive on doing things a different way. There will always be people who thrive on doing things a more difficult way. If 99% of the population would prefer to take a helicopter to the top of a mountain, there will be a few who want to get there by CLIMBING it. If 99% of the population wants to chat with people halfway across the world by Internet, there will be a few who would try it via radio, where the path isn't so predictable. I was once asked, "Why work a DXpedition on all those bands? You already have one good QSO in the log." I guess that fits in here. It's more of a challenge to work an FT5 from Illinois on 160 than it is on 20 meters - even though BOTH could be tough! But some people will always want real challenges and will want to best those challenges.

Ham radio is in part a HOBBY. It's done for challenges and enjoyment. I know that's why Walt does it and why I do it.

When it stops being challenging or enjoyable, maybe I'll have time in my life to take up mountain climbing.

Unfortunately, this argument is ultimately useless and self-defeating. Amateur radio will be gone in a few years because those who crave spectrum and can pay billions for it adore the fact that amateurs cannot unite.

Oh well, it was fun while it lasted.

2188. HELP! How do I WRITE at 25+ wpm?

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-05 00:00:00 UTC
From: jason_hsu@bigfoot.com
Message-ID: <6nmtr8$6rk$1@nnrp1.dejanews.com>
Source record: 28617
Cross-posted to: alt.ham-radio.morse,rec.radio.amateur.dx,rec.radio.amateur.equipment

Well, I'm finally starting it. My 4-point plan for passing the 20 wpm Morse Code exam:

1. Listening to Code Quick tapes.
2. Using the SuperMorse CW training software I downloaded.
3. Practicing on SuperMorse at 25 wpm.
4. Starting with only 2 characters and adding characters as I progress.

Yes, I will bypass the 10 wpm barrier that seems to have stopped most other hams in their tracks.

And I will NOT bother memorizing dots, dashes, shorts, longs, dits, dahs, or anything else.

The problem:

How do I write characters at 25 wpm? I'm lucky to type at 25 wpm. Writing at 25 wpm seems harder, because your fingers have to make the strokes. At least when you type, all you have to do is press the key; the CPU transforms the keystroke into a character.

Yes, Code Quick offers the suggested pencil-strokes. But I'm still lucky to write half as quickly as I am supposed to. Has anyone found a way past this barrier? Nobody seems to have discussed this.

Hello Jason,

You have an excellent program there. You might consider listening to W1AW
code practice, to get on-the-air experience. But now to your question.

>

What I did was to learn how to blockprint fast. I can blockprint legibly at
30+ wpm, and 20 is a snap. The trick is to make the letters with the least
amount of motion. For example, most people print the letter "E" by making a
vertical line, then three horizontal lines. But it's faster to make a
horizontal line from right to left at the top, the vertical line, and the
horizontal line at the bottom from right to left as a single motion (this
gives a squared off letter "C"), then add the middle horizontal line. If you
can dig up a copy of the old ARRL publication "Learning the Radiotelegraph
Code", faster ways to print all of the letters and numbers are shown. By the

way, my handwriting is still awful!

A sharp #2 pencil works better than any pen for this. Lined papaer helps some people. You need a good solid table and chair at the right height, with decent lighting. Try practicing printing alone by printing the words of a familiar song as fast as you can.

Good luck! Email for more ideas if needed.

Several people have suggested that I learn to copy in my head instead of on paper.

The Koch method (starting with 2 characters and a 25 wpm speed and adding characters as I progress) doesn't lend itself well to copying in my head. Until I learn all the characters, I will be copying on paper random-length groups of random characters. It's hard to remember random-length groups of random characters.

I would like to hear from more people who have used SuperMorse and the Koch method.

Would you please use your correct name or at least use your call sign.
I'm sure that I am not the only one offended by your fagget "handle".

SB DX @ WW $OPDX.364
Ohio/Penn DX Bulletin No. 364

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 364
BID: $OPDX.364
July 6, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB2E, WB2RAJ/WB2TQH & The 59(9) DXReport, WA4FFW, KH6BZF, W7WK, K8YSE, BA1DU, DL2GG, F6AJA & LNDX, G4BUE & DX News Sheet, GM4SUC, JA1ELY & The 59 Magazine, OH2KI, OH1MDR, OK2PAA, ON4BDS, ON5NT, PA3DMH, PA3ERC, VE2SEI, VE3BW, VK3EW and ZP5AZL for the following DX information.

5B4, CYPRUS. The "DX News Sheet" reports that a Russian group consisting of Val/RZ3TX, Andy/UA3DPX, RA9JX, RZ9UA, UA9NN and UA9ND will be active now until July 15th as 5B4/homecall and as P3A in the IARU HF Championship. QSL via W3HNK.
ALso, "The 59(9) DXReport" states Steve/G3VMW and Bob/G3ZEM will sign 5B4/homecall between July 21st through August 5th from Paphos. QSL via homecalls.

AFRICAN DXPEDITION TOUR. Charlie, W0YG, leaves Wednesday for South Africa where he will spend a week before going on to Botswana and Zimbabwe. He will probably start his A2 activity on July 18th. Charlie expects to start his Z2 activity on July 22nd. He will then head back to A2 on August 7th and stay until August 22nd. Charlie currently holds V5/ZS6YG, A22/W0YG and Z21/W0YG licenses. Look for him to be active mainly on 40-10 meters CW with special attention on the WARC bands. There may be some RTTY activity. QSL via W0YG only (REPEAT, ONLY W0YG, not the ZS bureau).

CARIBBEAN TOUR. Rob/PA3ERC and Ronald/PA3EWP have announced they will be active from Montego Bay, Jamaica (6Y) between August 27th and September 8th, using the callsigns 6Y5/PA3ERC and 6Y5/PA3EWP. They will also be active from Leeward, Cayman Islands (ZF) September 8-20th, using the callsigns ZF2RC and ZF2WP. They plan to have two stations on the air operational on 160-10 meters. Operations are planned to be active on the modes CW, SSB and RTTY. Also, 6 meters will be activated when propagation permits. They will focus mainly on the WARC bands and the low bands for Europe during their grayline. Both locations will have an

excellent takeoff to the US and Europe. A Web Page has been set up containing actual information, digital photo's and daily uploaded logs. Check out the URL address: http://www.igr.nl/users/pa3dmh/tour98.html Rob, PA3ERC, will be the QSL manager. QSLs can be sent via the bureau or direct to: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands

EI, IRELAND. Look for Graham, M0AEP, in the coming weeks (July 18th-August 1st) to be active as EI/M0AEP from Kenmare River in County Kerry. His activity will be on CW and SSB.

FG, GUADELOUPE. Baldur, DJ6SI, is currently active as FG/DJ6SI. The length of his operation is unknown at this time. His activity is usually CW. His activity seems to be on all bands including the WARC bands. QSL via his homecall.

FO0, AUSTRAL ISLANDS. Joel, F5JJW, will once again sign as FO0SUC between October 7-17th. He will be on Tubuai Island (IOTA OC-152). His activity will be mostly on 14, 21, 28 MHz.

GU0, GUERNSEY ISLAND (A change in plans). A group calling themselves "Golden Spur Section KTK - Kortrijk" of the UBA, who were planning to activate the Minquiers Reef IOTA EU-099 in the forthcoming IOTA Contest at the end of July, have changed their plans due to a conflict by another team that was going to EU-099. The reef is too small for two operations to take place. The Belgium team will now activate Guernsey Island, IOTA EU-114, before, during and after the IOTA contest this year. The team will commence activities on Thursday, July 23rd, or Friday, July 24t, terminating on Monday 27th or Tuesday 28th. There will be a team comprised of ON5SY/Harvey (leader), a cook-SWL Ronny, ON4AVA/Wilfried, ON4CHS/Lieven, ON4ON/Danny, ON6HH/Roland, ON7PQ/Pat and ON9CGB/Bill. They expect to use the callsign GU0MEU during the contest and possibly GB0ON, GU/personal, or call/p outside the contest period. They will operate on all contest bands in the contest and will concentrate on the WARC bands outside the contest using SSB and CW. QSL via ON bureau via ON4ON for all the callsigns from GU.

HR6, HONDURAS. Joe, VE3BW, will be returning to Roatan Island (NA-057) as VE3BW/HR6 for two weeks in October. He will arrive on the island on October 18th, and be active until November 1st. He plans to be active in the CQWW SSB Contest and will be active on CW and 6 meters before and after the contest. QSL via VE3BW, Joe Adams, 5 Romko Court, ST. Catharines, ON, Canada L2N-7A1.

IOTA NEWS....
NEW IOTA'S! Alan Kung, BA1DU, IOTA Program Manager of the Beijing DX Club, reports that the Beijing DX Club plans to be active as BI4C from Changxing Island (AS-???) on July 13-14th, and as BI5Z from Zhoushan Island (AS-???) on July 16-17th. Changxing Island is located in 121.7E, 31.4N. Zhoushan Island is located in 122.2E, 30.1N. They will be on 20, 15, 10, 6 and 2 meters, using a FT-990, IC-706MK2, 1KW HF linear amplifier, 2 meters linear amplifier, A3S, 6 meters and 2 meters beams.

The team consists of Tong/BA1AA, Alan/BA1DU, Jerry/BA1FB, Ban/BA1MK, Fan/BD1RB, Jin/BA4TA, Qian/BD4DC, Shen/BD4DI and Shu/BD4DQ. QSL via Mac/W3HC. For more information, please send E-mail to Alan at: ba1du@amsat.org

AN-017. F6ICA and F5GLS will be on from Adelie Land in the Antarctica from December, 1998, for one year and they will be active on all bands.

EU-048. Jean, F8CIO, will be active from Houat Island from August 1-8th. He will be active on 20 and 40 meters on SSB.

EU-096. 1996 IOTA Contest winners OH1MDR, OH1NOA and OH1MM will again activate Sandstrom Reef for the 1998 IOTA Contest, July 25-26th. The callsign will be OH0MDR/1. Special attention will be given to the IOTA hunters in NA and JA. The target is to make even more than last year's 2700+ QSOs. QSL via OH1MDR. More info is available at: http://www.stip.net/~oh1mdr/iota98.html

EU-105 and EU-157. David, ON4BDS, reports that activity from Batz (EU-105) will take place and he hopes to be on the island Monday evening, July 20th. He will stay on the island until the July 23th, where he will leave for Cezembre (EU-157) around noon. Activity from Cezembre will last a couple of days, including the IOTA contest, where he will return from the island on Monday, July 27th.

EU-107 and EU-156. Due to some unforseen problems obtaining landing permissions, David, ON4BDS, will not be able to activate EU-107. Permission for EU-156 Tombelaine is still pending, and he is trying to obtain permission to land on Tombelaine. David states, "Obtaining permission for Les Sept Iles EU-107 seems to be virtually impossible."

EU-167. Samuel, CT1EEN, reports everything is a "GO" for this rare IOTA called Pessegueiro. Details have been worked out with the "Wildlife People". The operation should start at 0000z on Friday, July 24th, with the team of operators using their own callsigns/ portable. The call CQ2P will only be used during the IOTA Contest. For more details, see OPDX.357 or the Pessegueiro Island Web homepage: http://www.terravista.pt/meco/1597

SA-037. Ray, DL2GG, reports that from July 10-14th he and others will be active from La Blanquilla Island in the Caribbean Sea. Their callsign will be YW5LB, and they will work CW and SSB on all bands.

KH6, HAWAII. Marco, IK0PHY, will travel here to be active as KH6/IK0PHY between July 13-23rd. QSL via homecall.

OJ0, MARKET REEF. Seppo/OH1VR and Jorma/OH2KI, will activate OJ0VR from July 9-12th. Their activity will be on CW, SSB, and maybe some RTTY. QSL via OH1VR: Seppo Sisatto, Lansirinteenk 23, 33400 Tampere, Finland

OPDX INTERNET SUBSCRIBERS will receive additional bulletins containing Lee's (KH6BZF) July's Propagation Forecast (Part 1) and details on the VK1 Award.

PACIFIC HOLIDAY AND ACTIVITY. Five members of FEDXP (Far East DX-Ploiters), which included JA1BRK, JA1HGY, JR1MLU, JA4DND and 7N3AWE, will activate the Belau Republic (T88) and Guam Island (KH2) as their summer DX Vacation. Their activity from T88 land will be between July 16-18th, using the callsigns T88AD (JR1MLU), T88AJ (7N3AWE), T88HG (JA1HGY), T88ND (JA4DND), and T88RK (JA1BRK). The KH2 Guam Island activity will be between July 19-21st, using the callsigns homecall/KH2. Activities will be on 160-10 meters plus 6 meters, SSB, CW and RTTY from two separated stations. They will concentrate on the WARC bands. QSL via their home callsigns.

QSL INFO AND NEWS....
Joe, VE3BW, reports he keeps receiving QSLs for 8P9CW where he was the operator of this station in 1987 (ONLY). This callsign has been reissued at least six times to various operators. Please be advised to "PLEASE CHECK THE DATES OF THE OPERATION" before QSLing.

W7A QSL ROUTE CORRECTION/CHANGE. W7A special event callsign from Great Falls, Montana, was published a few weeks back with the QSL Manager as KQ7K, but his address is incorrect in the RAC callbooks. The manager for this event will now be W7WK either via bureau or direct with SASE. For more details, check the W7A Web site: http://www.qsl.net/w7a/

SV9/OH9MM/P QSLS. Juha, OH1KAG/OH9MM/OH0KAG, states that he will have a special 4 color QSL printed for his recent operation. He made 2000 QSOs, most of them on 40/30/20 meters CW (with a coulpe hundred Q's on RTTY). He reported having some TVI/RFI problems. By the way, we mentioned Juha's callsign in OPDX.360 as OK1KAG which was incorrect (Sorry, Juha!).

CHANGE IN ADDRESS. Nishi, V63AO, has reported to David, VK3EW, that he has moved from Pohnapei Island to Kosrae Island within the V63 Group. He requests to please no longer send QSL cards to his old address as this PO BOX IS CLOSED. All QSLs now for V63AO should be sent to: Mr Nishi Nishimura, PO BOX 607, Kosrae, Micronesia 96944, U.S.A.

KH1 QSLs and others. Mac, WA4FFW/NH1, reports that all the QSLs for the "Eric Edberg W6DU Memorial Dxpedition" have been mailed July 3rd. This included all QSL cards for K4AU/WH1, WA4FFW/NH1, N4DAZ/KH3 and N4BQW/KH5K. Mac also reports that with the great effort of Joe/N4DAZ and Gene/WJ4T, all the cards for N4BQW/KH5, KH6 (Tern Is.) KH7K and KH4 are also caught up and were mailed July 3rd. This includes all Bureau cards received to date. Mac reminds everyone that Ron, AC7DX, is the route for KA4IST/KH5. Thanks to all for their patience.

LOG SEARCH for all callsigns from the OKDXF DX Expedition in the Pacific 98 is on Web site: http://www.sica.cz/ok2paa/okdxf/search.html

TF, ICELAND. We have been asked to remind everyone that TF3IRA will be operational on July 12-13th during the IARU Contest from the TF HQ Station. TF3IRA has again been granted full power license and the "BIG OLGA" antenna will be used on lower frequencies. The Clubs C3 antenna will provide the 20 meters and above QSOs. QSL via TF3GB.

TL5, CENTRAL AFRICAN REPUBLIC (Update). Alex, PA3DZN, now signing as, TL5A will be on 3504 or 1833 kHz between 2100-2300z and at his sunrise, 0400-0440z. It was mentioned that his amplifier went dead during last weekend's RTTY run, so all he has now is a 100 watts until new tubes are received. He was heard on 14025 khz around 0515z this past weekend.

V2, ANTIGUA & BARBUDA. Darrell, AB2E (V26B team), reports to OPDX that he will be here operating as usual from the V26B superstation site. He will be active using the callsign V26E between August 6-11th. His activity will be operating on the WARC and low bands. Darrell will also be a Single Op in the WAE CW DX Contest which is on August 8-9th. Later in the year, he will return (November 26th to December 1st) to be active in the CQWW CW Contest as a Single OP. He will once again use V26E and be active on the WARC and low bands before and after the contest. QSL for all V26E operations are via his home call AB2E.

XO1, FOGO ISLAND (Canada). Members of the West Island Amateur Radio Club of Montreal are preparing for their 8th annual summer DXpedition. This year they will activate Fogo Island, Newfoundland, 54.2 deg. W. Long., 49.7 deg. N. Lat. Fogo Island is IOTA NA-198, Canada Islands NF-05, CQ Zone 5, and Maidenhead grid square GN-39. The group will be entering the annual IOTA (Islands on the Air) contest, operating as a Multi-Op island station from 1200z Saturday, July 25th, to 1200z Sunday, July 26th. A special callsign, XO1CWI, will be used. It was issued in honor of the Brimstone Head Folk Festival to be held on Brimstone Head, Fogo Island from August 7-10th. Suggested frequencies to be used: 3505, 3790, 7025, 7070, 7200, 14005, 14195, 21005, 21310, 28005, 28485, and 50130 kHz. Operations should begin on July 22nd and continue through July 27th. QSL route is: West Island ARC, P.O. Box 884, Dorval, Quebec, Canada, H9R4Z6. For further information or comments send an E-mail to: archibal@pubnix.net (before July 19th).

ZP0, PARAGUAY. Tom, ZP5AZL, reports that he will use the special callsign ZP0Z in the upcoming IARU Contest (July 11-12th). Activity will be on all bands (if propagation is good). QSL "ONLY" to W3HNK and not direct to Tom's P.O. Box.

Butch, FYI...
"Cutie Boy" is Masataka Noda, a young Japanese student in Canada.
He raises hell under several different monikers, my favorite being
"Code Sucker". He can be found on several other NG's. And, yes, Masa
is a licenced amateur radio operator, if you are wondering. He's
actually not as bad as he seems...just opinionated. But then, aren't
we all?? :)

Peace,
DUCK

FARFest '98, the *last* Gaithersburg Hamfest, will be held
on Sunday, September 13, 1998 at the Montgomery County
Fairgrounds in Gaithersburg, Maryland.

Gates open at 6:00 am.

Take I-270 to exit 11 northwest of Washington, DC. Follow
the signs to the Fairgrounds (Montgomery County Agricultural
Center).

Talk-in on 146.955(-) MHz.

Special event station W3PRL-AM (Rock XV) on 3885 and 7290 kHz.

Admission $5. Tailgating $15. For more info, contact:

Al Brown at 301-490-3188, or
Mary Morris at 703-971-3905, or
e-mail at Amateur_Radio@hotmail.com

In 1999, FARFest is moving to Bowie, Maryland.

2197. 4U1UN? Still in operation?

Have not heard the UN NY HQ station, 4U1UN, in operation in nearly 2 years. Does anyone have any idea as to the status of this station? I have not had any luck finding out whether it is still in operation. I even tried sending both an e-mail and snail mail message to UN HQ, UN Development Program (under which 4U1UN ops were overseen), but no reply as of yet (and its been a few weeks since the query). 73.

Actually, typing at 25 WPM will allow you to copy your code at a decent clip ... and your typing speed will increase too ...

I was a code operator for a lot of years in the USN, and we learned on and used typewriters ... the faster the code speed, the faster the typing ... And, it was possible to copy code on a TTY keyboard ... while the tape maching cut the tape ... and with the originals, it was possible to type the code in faster than the tape machine could cut ... up 120 wpm ... Typing does make it easier ... Just put your key next to your keyboard ...

The problem is not Masa, he's fairly easy to filter out. The problem is all the idiots responding to him. I never see his posts firsthand, but I have to wade through dozens of idiots quoting him (complete with his stupid sig file) every damn day.

Be advised, I'm going to start killfiling anybody who flames Masa pretty soon. That should clean up the newsgroups quite a bit.

Johan,

You might wish to check out DX4WIN, as that will do exactly everything that you wish (and lots more). This program is becoming very popular in Europe (and, incidentally, was written by a Dutchman - KK4HD). The author as a web site (www.erols.com/pvander), where a demo version is available for free download. He currently has two versions: 1.2 is a 16-bit version for Win 3.1 and above, and version 3.02, which is a 32-bit version for Windows95/NT - take your choice. BTW, the technical support via email is outstanding!

You will probably receive plenty of suggestions to your post. I would recommend that you check out all of the options and select whichever you feel is the best product.

Regards,

Darrell
NR3Y/W6.

I was *amazed* when I took my 20 wpm test last year. I was skeptical that I would pass, but practiced endlessly right up to test time. When the test started, my heart just sank as I thought to myself 'I have no clue what is being sent'. I continued to copy, however (pencil and paper). When I was done, I looked down at the page, and - my God! I could read the entire QSO!! My body had taken over and had handled the entire thing! It was the spookiest feeling. It wasn't pretty copy, and had lots of errors, but I knew then that I would pass the written test questions, at least.

Passing the test is a far cry from being a competent CW op. The FCC says I am an Extra, but my working CW speed is much less than 20 wpm. Only real QSO's will get me up to where I should be. I am still very key-shy, and have to force myself to make CW contacts to get my 'real' (i.e. functional) cw speed up.

Good luck with your practice!

Back when I passed my Extra exam (1971) it was at the Chicago FCC field office. I had been practicing in almost all my spare time until I could copy solid through QRM and QRN at 25 wpm, figuring the additional stress of sitting under the scrutiny of the FCC examiners would reduce my copying speed a bit.

I think I managed to copy over 3 minutes of solid CW on the test, messed up a bit, and got another solid minute out of 5 (easily enough to pass the test).

A bit of humor: As I recall, I took the CW test, then the Advanced written exam first (I was a General class licensee at the time). I passed both, and the examiner gave me the Extra written exam and said "Here's another one for you to pass" (with a half grin). This was the most humor I'd ever seen displayed by the usually serious examiners there.

Does anyone else remember the code machine they used at the FCC office, with the paper tape generated CW and the oil bottle on the top of the machine? (I never did figure out what the oil bottle was for.)

Well,

I'm really quite amazed that none of the replies (that I could see)
suggested the obvious: learn to head copy. For the test, you
should do what one poster said, just write down the main words,
you don't need perfect 1 minute copy anymore.

However, if you intend to QSO above 20 wpm you will be well
served to learn how to head copy, the sooner the better. CW
went from being a chore to a real pleasure once I put down
the pen (yes, pens do write faster than pencils, btw) and
started really listening, relaxing, and engaging in a
conversation. The absence of having to write everything down
left my mind more time for listening to what is being said, also.

There is, of course, a place for a bit of writing. I'm lousy at callsigns, so I write that down, but besides that maybe the name (if it's unusual), maybe the QTH, maybe a note or two while I'm listening on something to respond to.

Best of luck on the exams es 73,

Cross-posted to: rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,alt.ham-radio.hf

CHECK OUT THE POLAR BEAR 98 WEB SITE FOR ALL THE LATEST
INFORMATION.
http://webhome.idirect.com/~galati

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there..
Bob-VE3LLE and Lyle-VA3DXE will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of either VE8C or VE8I. The call hasn't been
determined yet.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM from the
M.V. Polar Princess, out of Moosonee.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate, being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. The Northlander
will leave Cochrane for Toronto at 7:00 AM Sunday August 23
and we will be operating XM3PBX on the southbound trip until
about 4:00PM at which time the Polar Bear DXpedition will
cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 15M, 6M and 2M. We haven't determined

the final frequencies, but we should have that information
by the middle of July.
Here is a list of the participants.

Aldo Galati-VE3IMR/VA3AG

John Harden-VE3VGI

Paul Lantz-VE3KBL

Garry Hammond-VE3XN

Bob Elston-VE3LLE

Don May-VE3UNA

Doug Baker-VE3BKR

Craig Jenning-VE3CIJ

Lyle Sibbald-VA3DXE

George Burns-VE3INB

Yep, and it works even better if you copy on a typewriter. Less strain,
faster, and more error free copy.

>Passing the test is a far cry from being a competent CW op. The FCC says
>I am an Extra, but my working CW speed is much less than 20 wpm. Only real

>to force myself to make CW contacts to get my 'real' (i.e. functional) cw
>speed up.

Yep, passing the test says very little about your competence as an operator
(of any sort). Being able to do solid record copy is part of being a good CW
operator, but only a part. There's lots more to learn. It is *very* easy to pick up
the bad habits of others on the air. You have to guard against that. One way to
gain valuable operating experience is to join a traffic net. You'll see (mostly)
good disciplined operation there. When you can pass books of traffic without
having to ask for too many fills, or being asked for too many fills, you've reached

good. You'll then have a chance of being useful if there is ever a need for your CW skills in an emergency situation. (Increasingly unlikely today, of course.)

>my own with no help from the geezer squad.

Thanks for mentioning the geezer club, er squad...If THEY had their way, we'd have to BUILD our own radios to THEIR specs, and ofcourse, BUY all the parts from THEM at an inflated price (unless they liked us and gave their friends special discounts)..

HAM is DYING people..I've got a wall full of lp's some of which will never re-released on CD's BUT I'm not screaming at the companies to either 1) Start pressing vinyl records again or 2) Make me a CD..Just like the LP spelled the death of the 78rpm and it the wire recording...

Code or NO code doesn't matter if the airwaves are controlled by stick-n-the-mud, fuddy-duddy, STUFFED SHIRTS that insist things stay static and never change..That now said, I agree CODE needs to be remembered and taught BUT does it have to be the same way it has been for the past 100 years?..

The Navy is dropping it for better or worse...If you continue, the manufactors of ham equipment will all go under for lack of new radio sales..I say, do what you can to ENCOURAGE not scold folks into learning code..

I think sometimes we code and no-code folks inflateth our true worth in
disastors, NOW that cell phone and digital redundancy handle most situations..

In fact, I have a buddy that flies for United that sees the ham radio folks
at our local "plane crash/disastor" drills as needing-a-life NERDS that are
worse than useless. They're IN the WAY of the professional rescuers using the
police/fire frequencies..What's needed in these scenarios is NOT a bunch of
hams running around with HT's thinking they're BIG SHOTS while tripping over
their own shoe laces..

I didn't take the test to "be a part of the action"..I did it because I like
talking to other people...BUT even that's been years..I TOO have been
turned-off by the attitude of ham radio in general..

The best hams are those that are HOME BASED/Stationary during disastor
situations...

When I learned it, we were told to write one character after the one being transmitted. That gave your brain time to process the data effectively and command your hand to write.
I guess that is what today is called " parallell processing " hi

CW is fun - once you get your speed up , which is best done on the air practising with experienced operators, I believe.

"A couple reasons for CW"

#1 CW is an art form that should never be lost.... For this reason alone CW should be a manditory requirement for a Ham license.

#2 There seems to be many experts on CW out there. Most have never been on HF other than a CB radio. The "Fact" is.... when all other modes fail, CW "Will" get through.

#3 In an emergency a battery and some wire will make a simple (Dirty) CW transmitter. The only requirement is you need Hams out there who can send & copy CW!

Ever hear of hurracane Andrew and Homestead AFB. Ask them about how their
cellphones worked...Not! The only communications available was Ham radio
with a few repeaters and simplex. No Police, no fire, no emergency repeaters.
They weren't using CW though to my knowledge. But they could have.

Was that the same on that came back up the Gulf and hit Louisiana..

Next day I spent 4 hours running a health/welfare net. No police
or cell phones involved .. Just me and my ham radio and other Hams.

2240. HELP! How do I WRITE at 25+ wpm? wpm in my head!

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-09 00:00:00 UTC
From: Rich Paleski </Richpal@worldnet.att.net>
Message-ID: <6o421d$3q1@bgtnsc03.worldnet.att.net>
Source record: 28569

I too have maxed out at printing 20 or so wpm. Yes I did say print. I can copy 18 wpm just fine. at 20, I find that the letter "E" is a killer. It takes so long to write, but it takes such a short time to send!

Just how do you learn to copy in your head? When I copy 20 wpm, the pencil just seems to move in my hand and make the propper scribble. (kinda spooky) Every time I try to head copy, it becomes a dissaster. I can't even copy 5 wpm in my head!

And while I'm at it. Sending isn't so easy! I have new found respect for veteran cw ops. I have to figure out what I want to say, spell it out and keep track of where I am in the sentance. Not an easy task for a new operator.

Any pointers would be appreciated.

Oh and by the way. I'm having a lot of fun, I'm learning a new skill, and meeting polite, interesting people.

Some day I may hunt down the microphone that came with the radio.

ZCZC AE27
QST de W1AW
DX Bulletin 27 ARLD027
From ARRL Headquarters
Newington CT July 9, 1998
To all radio amateurs

SB DX ARL ARLD027
ARLD027 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, K4VUD, W4OX, DXNS, The Daily DX, The599Rpt and Contest Corral from QST. Thanks to all.

CYPRUS, 5B. A group of Russian amateurs will be QRV until July 15 as 5B4/homecalls and as P3A in the IARU HF World Championship. QSL contest call via W3HNK. QSL all others via operator's instructions.

JAMAICA, 6Y. Mac, 6Y5MC, is now QRV using SSTV. QSL via WA4WTG.

NEPAL, 9N. Charles, K4VUD, will be QRV as 9N1UD until the end of November 1998. Activity is expected on 160 to 15 meters, with a possibility of 10 and 6 meters as well. QSL to home call.

LIBERIA, EL. EL2AB has been QRV on 15 meters around 1230z. QSL via IK0PHY.

GUADELOUPE, FG. Baldur, DJ6SI, is currently active as FG/DJ6SI. His length of stay is unknown. He will be QRV on all bands, including the newer bands, using CW. QSL to home call.

SARDINIA, IS0. IK2AEQ is QRV as IM0/IK2AEQ from San Pietro Island.

GUANTANAMO BAY, KG4. Members of the Florida DX Club will be QRV in the IARU HF World Championship as KG4OX. Members will be active on all bands and modes before and after the contest. Some 6 meter activity is expected conditions permitting. QSL via W4OX.

LITHUANIA, LY. The Lithuanian Amateur Radio Society is celebrating its 60th anniversary by activating the headquarters station LY60RMD using CW and SSB on all bands during the IARU HF World Championship. QSL via the bureau.

MARKET REEF, OJ0. Seppo, OH1VR, and Jorma, OH2KI, will be QRV from July 9 to 12 as OJ0VR, using CW and SSB and perhaps RTTY. An entry in the IARU HF World Championship is also expected. QSL via OH1VR.

ARUBA, P4. The Aruba IARU Member HQ Station P43R will be active on all bands using CW and SSB during the IARU HF World Championship. QSL via P43ARC.

ICELAND, TF. The Iceland IARU HQ Station TF3IRA will be QRV during the IARU HF World Championship. QSL via TF3GB.

MACAO, XX9. Chang, XX9AU, has been QRV on 20 meters around 1340z. QSL to home call.

PARAGUAY, ZP. Tom, ZP5AZL, will use the special callsign ZP0Z in the IARU HF World Championship. Activity is expected on all bands. QSL to W3HNK.

SOUTH AFRICA, ZS. ZS5BBO will be QRV in the IARU HF World Championship. He can be found on 80 to 10 meters. QSL to home call.

THIS WEEKEND ON THE RADIO. The IARU HF World Championship, QRP ARCI Summer Home-brew Sprint and the CQ WW VHF Contest will keep contesters busy this upcoming weekend. Please see July QST, page 98 for details.

I guess they just wanted us to be prepared for having to send CW in
emergencies such as nuclear disasters or alien attacks when nothing else
would get through! :-)

Ditto Barry's remarks, practice, practice, practice...try working a few of the CW contests and instead of picking up a pencil and writing down the call, log with the computer, and type the exchange into the PC log...try copying just the call and contest exchange first, then move on to copying CW ragchews....love CW, my favorite mode after 31 years of being licensed...73 de Mike K3FH (ex-KE3FH, KE2OV, WA8YCC, WN8YCC)

Went I went through radio college they taught exactly the same Rag,
then increase the letter behind to a word behind - after practice it
is possible. But handwriting for speeds above 40 wpm I find it easier
to write 'most' of the word down and fill in the missing bits later.

Regarding Traffic Nets Walt, there a few superb cw packages available
for free download that will increase your morse speed RUFZ is one, I
cannot remember the other one (Andy, G4ZVJ help me out here if you're
reading this). The latter actually has a hall of fame on the internet
for high scores.

OK - I'm honest, I used the keyboard for the hall of fame, Pencil's
ignite over 75 wpm <grin !!!!>

Steve

G4KIV and ZC4BS/ZC4BBS from next month (plug plug)

ps - whilst I'm plugging, I have a copy of RUFZ on my web page.

> Use script, not printing. You will be amazed at how much faster script is
> than printing. Remember back in 3rd grade? Now it is called "cursive."

Hello again,

In a previous post I recommended block printing, because that's what worked best for me. I can write script faster, but it tends to be less legible than printing. Plus cursive script demands that you know when a word ends

I've read all of the various posts on the subject and have a few more comments to add. First, CW operating involves many skills. Here's a short list:

- Copying in your head
- Writing down copy
- Typing copy
- Copying and doing something else at the same time
- Sending
- Copying without translation to letters (hearing it as a language)
- Copying under poor conditions

It's possible, even common, to be very good at some skills and poor at others. The ability to copy in your head does not necessarily translate to ability to write it down, etc. A really good CW op can do all of the above (yes, I'm still learning!)

Second, typing beats copy by hand any day. But you have to have a typewriter, and often headphones too.

Third, it helps to practice the skills individually as well as in combination. For example, practice writing/printing/typing the words to a familiar song, and see how fast and legibly you can do it.

Fourth and most important: There is no one method that works best for everybody. There are common pitfalls to be avoided, such as copying dots and dashes, but different people need different methods. Some people learn best by short (15-20 minutes) sessions 3-4 times a day. Others learn better if the same amount of time is spent all in one session. Still others learn best by "total immersion", such as working CW for an entire weekend during a contest. The same is true for most of the dimensions of learning code. Each of us is an experiment of one, to use George Sheehan's phrase, and we each have to find our own best way. Practically all of the advice given in the various posts is good, but there is no single, universal best way to learn.

Ah, yes, the Instructograph, I remember it well, but not fondly.
The paper tapes were oiled, but the oil would dry up after a few
plays, so you'd add a bit more or the tape would eat up the guides.
(Paper is horribly abrasive.) What I want to know is why the FCC
liked to crank the Instructograph up until its output was at least
50% distortion, and made sure to set it up in a room with severe
room echo. Just an extra bit of hazing I suppose.

Rich - As far as writing goes, write in lower case, or better yet, write in script. The characters take a lot less time to write that way.

As far as copying in your head, it just takes practice. Think of CW like another language. You don't write down what someone says as they speak to you, then read it from paper. Same thing! At the slower speeds you will hear individual letters in your head, then piece them together as words. As your proficiency and speed increases, you will hear syllables and small words (the, and, is, etc.) as single units.

Do a web search on RUFZ, and download the program. It's a lot of fun and will help with your speed. It's a program that will send you a callsign which you then type back into the computer. If you get it correct, the next callsign will come at you a little faster. If no, a little slower.
GL/Barry W2UP

(good for about 50 WPM on paper, and 92 WPM in RUFZ (so far)

I do not think that the morse code test should go, but be reduced to 5
WPM for the reason that HF operating is world wide and if the
floodgates are opened it could lead to a lot of overcrowding.
Also even if HF operators do not use the code, taking the test
proves they are serious about working HF, and reducing the code
to 5 WPM would be a good compromise.

CHECK OUT THE POLAR BEAR 98 WEB SITE FOR ALL THE LATEST
INFORMATION.
http://webhome.idirect.com/~galati

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there..
Bob-VE3LLE and Lyle-VA3DXE will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of either VE8C or VE8I. The call hasn't been
determined yet.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM from the
M.V. Polar Princess, out of Moosonee.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate, being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. The Northlander
will leave Cochrane for Toronto at 7:00 AM Sunday August 23
and we will be operating XM3PBX on the southbound trip until
about 4:00PM at which time the Polar Bear DXpedition will
cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 17M, 15M, 6M and 2M. We haven't determined

the final frequencies, but we should have that information
by the middle of July.
Here is a list of the participants.

Aldo Galati-VE3IMR/VA3AG

John Harden-VE3VGI

Paul Lantz-VE3KBL

Garry Hammond-VE3XN

Bob Elston-VE3LLE

Don May-VE3UNA

Doug Baker-VE3BKR

Agree!
BUT:
I manage to obtaine my licence and is hereby a full "ham" by knowing the morse-code.
I choosehowever to only use VHF/UHF and is very rear down to HF-region.
Morse code
is never used for me, only packet or OSCAR.

Nobody can do anything with this. After a few months i decide to spend some time at HF and
is soon QRP on 20-meter on SSB with some friends, or we try the 80-meter for chat with some
OZ'ers or SM's Still no morse for me.
I hear something in cw from time to time, but dont care about it.
My expensive program for decoding morse is quite good, i use it and by reprogramming an
terminal or TNC i am QRP with CW by a PC !

The ticket is clear, you have to know it to get a licence on HF, but you NEVER have to use it!
I think it sucks !!!
It also prevents many from getting this as a hobby because the morse is an obstacle !

> NEVER have to use it!

Nobody "has" to get a ham license, nobody "has" to operate cw when the do have a ham license, either. You don't know what you're talking about because you don't know anything about real cw beyond a code test. I've had hundreds of thousands of cw qsos over the years, as many as 1,000 cw qsos on a single contest weekend. Tune 7.000-7.050 some night if you think no ham uses or is not interested in cw.

It's your govrnment which requires the code tests and it's your government which has treaties with a couple hundred other countries in which it has agreed to require code tests for radio amateurs. Go complain to your Foreign Minister about how your lack of usable cw skills is a problem and get back to me when he "fixes" your big problem.

> I think it sucks !!!
> It also prevents many from getting this as a hobby because the morse is an

Which is good, otherwise the ham spectrum would be flooded with idiots and nobody could use it.

Did i say that we _HAD_ to have a license ???

How many percents og all hams use it regularly ??
And would pass a test given "at the door" suddenly ??

I think someday the WRC "fixes" this one for them self. To bad they have to spend
time and money just because of some amateurs.
Infact since only ham's uses cw, this is soon an obselete thing we could put
on a museum or somewhere....

Is this the reallity ??
Its to bad though, that many other operators concider them selve so perfect that i
almost pukes. But to prevent happiness i dont do it yet...

2266. Trip to KL

Newsgroup: rec.radio.amateur.dx

Message-ID: <35a88e9a.68180205@nntp.z03.glo.be>
Source record: 28445

Hi,

Not really DX but you never know who needs it.. :-)

I'll be touring KL7 from July 24th untill August 9th. The trip takes
us from Anchorage to Fairbanks, Valdez, Homer and Seward. Along the
way I'll be QRV on HF while driving and in the evenings from
campsites. I'll have a TS-50S and Outbacker while driving and whatever
wires will fit when parked.

Call: KL7/ON4BAM

Favorite frequencies are as high as propagation will allow... starting
on 20 and 17..

CU from KL7...

bye Maurice

Hamradio: ON4BAM

Hi,
Does anyone have any experience with the CMOS Super Keyer 3? I actually built both the first and second ones and they worked great. Is it worth it to get the third one? Are there any new "must-have" features? I'm trying to teach my friend the code and ideally it would be wonderful if this keyer had features that would send CW practice to you a la the AEA MM3 keyers or the Heathkit memory keyers of yesteryear (although I do suppose there are a lot of computer programs that do it anyway...).

2271. Redhat support for ham software

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-12 00:00:00 UTC
From: arm@helix.nih.gov
Message-ID: <6oavei$mpq1@icet.net.nih.gov>
Source record: 28450
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.space,rec.radio.amateur.dx,rec.radio.amateur.antenna

Redhat, the largest distributor of Linux (free unix for the PC), has hired an active ham to move ham radio software into the mainstream of the Linux platform. Jeff Johnson, N3NPQ, has asked the ham radio community to identify and test ham software for Linux. If you have email, you can help decide what ham-oriented software will become available on the Redhat distribution.

Jeff is compiling a list of the software that hams want included. This can be public domain or commercial softare. This can include software that already runs on Linux, or software that would need to be ported to Linux.

Jeff is also compiling a list of people who are running Linux and are willing to test some of the ham software. Please let him know what packages you would like to test.

Here is how to contribute:

Send an email to:
jbj@redhat.com

Begin the subject line with Jeff's call:
N3NPQ - <meaningful subject here>

Please don't do a "reply" to this email. The reply will come to me, which won't do any of us much good.

Note, if you want to see an example if what Linux can do, check out the Internet Web Radio Receiver in last February's QST, or try it on line at:
nihac.info.nih.gov/listener/listener.html

I built the II and was also wondering if it would be worthwhile to build
the III (or perhaps upgrade the II to III if possible).

SB DX @ WW $OPDX.365
Ohio/Penn DX Bulletin No. 365

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 365
BID: $OPDX.365
July 13, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1RV, WB2RAJ/WB2TQH & The 59(9) DXReport, W0YG, DK9IP, DL3KUD, EC1BXI, ER1DA, EU7SA, G4BUE & DX News Sheet, LY2IJ, ON4CEL, RA1QHJ, VE3ZZ and Larry Clark for the following DX information.

5H, TANZANIA. Ted, W0RA, will operate from the QTH of Dale, 5H3DD, from July 20th to the 25th. Check the following suggested times/frequencies: 1330z/14010 kHz (up 2 - Ted will check for long path to the U.S. west coast. If there are no openings he will beam short path.); 1700z/21010 (up 2) and 1830z/21295 (up 10); 1930z/28480 (up 10, if the band is open). For Pactor look before and after the CW times on 14072 and 21072 kHz. Ted will use an FT-747, SB200 amp and a tribander at 50 ft. He is also taking a small antenna tuner and will attempt some WARC band activity, especially on 17 meters. QSL via W0RA, direct or bureau. Please no QSLs via 5H3DD or the Tanzanian bureau.

9V8, SINGAPORE. "The 59(9) DXReport" states that Singapore stations can use the 9V8 prefix from July 18-November 15.

A SPECIAL CHALLENGE AND REQUEST (Attention U.S. Prefix Hunters and IOTA Chasers!). OPDX received a message containing a request for help by a Spanish student and Novice class operator named Jorge Fernandez, EC1BXI. Jorge reports he will be going to Arousa Island IOTA EU-080 to operate during the IOTA Contest using the callsign EC1BXI/P. This will be a single operator expedition. Jorge's NOVICE class license will make it a real challenge for him during the upcoming contest. He states, "For this reasons my station will be a "small gun" and my operation frequences limited. I need your help, because with my 50W and my small segment of frequencies authorized, I am not able to work too many USA stations." His equipement will be a vertical FRITZEL GPA-30 (10.15.20), a 40/80 dipole CAB-RADAR (Spanish made), an MFJ 949-E tuner, and a TS-140S. Spanish novices are only able to operate in certain segments of the 10/15/80 meters bands (if they want to use the SSB). These are:

10m 28.900 - 29.100 // 15m 21.150 - 21.200 // 80m 3.6 - 3.7
Jorge would like to give the possibility to many USA hams to work EU-080 (he states that he will probably be the only station in that reference) and also add the EC prefix for the WPX chasers. In Europe, EC is a very common prefix, but in the USA this is not the same because of the different band segments. For this reason, Jorge will try working SPLIT for "USA HAMS". Look for him during the contest:

* The TX frequencies will be around 21160-21170 kHz
RX 100 kHz UP for USA (Approx. 21260 [IOTA freq]) - 21270 kHz.

* On the 10 meters it will be more difficult because Spanish EC segment is 28900-29100 kHz. Jorge will try to TX in that segment and listen 400 kHz down (Approx. 28500-28700 kHz)

* ADDED NOTE: While Jorge is on 21170 Mhz (Split 100Khz up) +/- QRM, he will try to arrange a quick QSY to the 10m with any station that asks for it.

The QSL will be 100% via Callbook: Jorge Fernandez, EC1BXI, P.O. Box 54, 36980 O Grove, (Pontevedra) SPAIN, EUROPE. (He is a member of RSGB and his QSL Manager is G4RRA. Jorge reports having trouble with the bureau because he is not a member in Spain [EA]). By the way, Jorge was active early in the year as EF1IAT from Toxa Island. QSL via EC1BXI.

DX NET CHANGE. The Butterfly DX Net that is usually on 14226.5 kHz has moved to 14252 kHz as of July 5th.

EA6, ISLAND OF MALLORCA. Frank, ON4CEL, will be on holiday to visit his girlfriend on the Balearic Islands from July 17-23rd. His callsign was not mentioned, but he will probably sign /EA6 or EA6/. Activity will be mainly CW on 40-10 meters (main time 1200-1600z). QSL is OK via bureau or direct to: Beuselinck Franky, Oostmolenstraat 97, 9880 Aalter, Belgium (Frank has moved to another place, so the address in the callbook is incorrect).

EP, IRAN. Ali, EP2MKO, has been active on 15 meters between 1800 and 2000z CW (low end of the band). He was heard saying that he plans to visit some new IOTAs in August or September. No other details were given. QSL via UA6HCW.

FS, ST. MARTIN. Ken/K7ZUM and Craig/N7KG have firm plans to be active in this year's 1998 CQWW Phone Contest (October 24-25th). They will be operating all bands and signing as FS/K7ZUM. QSL via the bureau or direct to the CBA address of K7ZUM (ex-KA7ZUM). It was also mentioned that Craig, N7KG, will also be doing a Single Op 160 meters effort as FS/N7KG. Dates were not given. QSL via the bureau or direct to his CBA.

IOTA NEWS.....
NA-128. Gregg, VE3ZZ (ex-CN8AK, G4RTO, ON9CCQ), will be active from the Isle-Aux-Coudres (NA-128 and CISA PQ009) during the July 25-26th IOTA Contest as VE3ZZ/VE2. QSL via the VE3 Bureau or direct to P. O. Box 1345, Ottawa, Ontario K1P 5R4 CANADA. All direct requests for

QSLs from last April's operation on the island have now been answered.

EU-127. Felix, DL8OBC, will once again sign DL8OBC/p from Helgoland Island (DID N-014) from approx. July 24th to August 3rd. He will be active with an amplifier, a triband beam and wire antennas on all HF bands, and will enter the 24 hours CW (Single OP Island) category of the RSGB IOTA Contest as well as the 10-10 Fall Phone QSO Party. You can contact him by E-mail (dl8obc@qsl.net) while he is on the island to arrange skeds for those areas of the world where propagation is difficult. He will confirm all contacts with a full color QSL card showing a photo of the island. Please send your cards via bureau or direct to Felix J. Riess, P.O. Box 1253, D-30984 Gehrden, Germany. For further details and updates, please check the Helgoland section of Felix's WWW home page at:
http://www.afthd.tu-darmstadt.de/~dl8obc/

J6, ST. LUCIA (NA-108). The Southwest Ohio DX Association will once again be active between November 23rd and December 7th. They will sign J6DX during the CQWW CW Contest and ARRL 160 Meter Contests. They are currently in need of another operator to join them. If interested, contact Scott, N9AG, via the telephone at 937-548-6230 (please between 0000-0200z) or E-mail: scottal@erinet. com

MORE OPS NEEDED! Nick, VK2ICV, is looking for 2 more operators to join him at Lord Howe Island for the CQ WW CW Contest in November. The contest team already consists of NM7N, N0TT and Nick. If interested, contact Nick via E-mail at: watchman@tig.com.au

MUSEUM SHIPS WEEKEND. This upcoming weekend on July 18-19th, there will be 20 ships/submarines lined up to activate the radio rooms on board retired ships/subs around the world. This event is sponsored by the USS Salem Radio Club. The club station K1USN will be active during the event along with some of the following other ships/subs: USS Cod, USS Drum, USS, Batfish, USS Requin, USS Massachusetts, USS The O'Sullivans, USS Little Rock, USS Pampanitio, USS Lexington, USS Texas and HMCS Haida. Suggested frequencies are:
CW - 3545, 7045, 14045, 18095, 21045, 24900 and 28045 kHz
SSB - 3960, 7260, 14260, 18160, 24960, 28360 and +50160 kHz
AM - Activity using the Salem's originak equipment on 3885 kHz.

A special QSL for working K1USN is availabe via W1QWT W/SASE or via the bureau. A certificate is available to anyone working two or more ships/subs by sending log data and a 9 X 12 SASE (with two Postal Units) to W1QWT. More details are available in the July QST on pages 77 and 99 or check the Web site: http://www.uss-salem.org

PT8, BRAZIL. Claus, DJ8UG, who was active as CP4BT for the last 6 years, is now QRT from his QTH in Bolivia. His next location will be in PY8-land. Look for him (mostly in CW) using the call PT8ZCB starting about September. QSOs with CP4BT as well as PT8ZCB can be confirmed via his QSL Manager DL9OT, Hans Kriegl, Schubertstr. 38, D-76275 Ettlingen, Germany (Bureau is preferred).

QSL INFO AND NEWS....
ER7A active in this past weekend's IARU Contest was from the HQ station of ARM (Moldova). QSL via ER1DA - P.O.Box 9537, Kishinev MD-2071 MOLDOVA.

Alberto, LU1DZ, reports that the first 600 QSLs of the LU1ZC DXpedition to Deception Island during the last Antarctic summer are in the mail. He requests PLEASE do not send confirmation to LU2CN. This operation was coordinated by GACW, and they are in charge to confirm all QSOs. Send your SAE with 2/3 IRCs to: GACW, Box 9, 1875 - Wilde, Buenos Aires, ARGENTINA

LY60RMD. This station was from the Lithuanian Amateur Radio Society (Lietuvos Radijo Megeju Draugija) HQ and was active during this past weekend celebrating LRMD's 60th year aniversary. QSL via: LY QSL Bureau, (P. O. Box 1000, LT-2001 Vilnius, Lithuania) or E-mail QSL requests via: levikuto@omnitel.net

RARE IOTA TO BE ACTIVATED. RA1QQ, RW1ZZ and possibly SP6TPM will leave July 17th from Severomorsk by yacht to Kambalnitskie Koshki Islands (IOTA EU-160 located in the Barents Sea Coars Group, last operated in 1990). They will be active as RA1QQ/1, RW1ZZ/P and possibly as R1OTA. They planned to be active 3-7 days which includes activity during the IOTA Contest. QSL Manager RA1QQ (Nick A. Smerdov, P.O.Box 24, Cherepovets, 162627, Russia). All questions/comments can be directed to RA1QQ, by E-Mail: albert@metacom.ru

SV5, DODECANESE. The "DX News Sheet" reports Phil, G4OBK, hopes to be active July 23rd through August 4th as SV5/G4OBK. Activity will be mainly CW which includes the IOTA Contest. He will operate from Kalithea, near Rhodes with wire antennas while on holiday. QSL via home call.

TF7, VESTMANNAEYAR ISLANDS (Update). Matt, DL3KUD, will be active from Iceland July 20-29th. From Heimaey, this island has an IOTA of EU-071 (Grid-Loc HP93UK). Matt will use the callsign TF7/DL3KUD and plans to be operational on 160-6 meters using CW, RTTY and the Satellite RS12. Equipment includes a 16m-Vertical, Dipoles + 500Watts-PA (6m=100W). He plans to participate in the IOTA Contest. QSL 100% via bureau!

VK9C & VK9X, COCOS-KEELING AND CHRISTMAS ISLANDS. Charlie, W0YG, currently in South Africa (see OPDX.364), reported to OPDX just before leaving for ZS-land that George, W8UVZ, and himself will operate from Christmas and Cocos Islands from February 6, 1999, until February 20, 1999. They will spend a week at each location. Emphasis will be primarily on the low bands, WARC bands and RTTY. Some 6 meters activity will be attempted. However, the purpose of the DXpedition will be to give as many of the deserving low band contacts as possible. A Battle Creek Special and beverages will be used for 160/80 meters. They hope to expand on the excellent operation the German group gave us in 1995. Callsigns are not yet available. More details later!

VP8, SOUTH SANDWICH. Mixed reports on this one! Some reports indicate that Carl, G4VFU, is planning on being active from here January/February

1999, possibly for 2 weeks as VP8/G4VFU. Earlier reports stated that
Carl would go to South Georgia Island during this time, but reports now
state his plans do not include South Georgia. All we can say now is
"Stay Tuned". QSL via G0HXL.

ZD9IL NEWS. Edwin, ZS5BBO, reports that a beam antenna has been donated
to Ian on the island of Tristan Da Cunha. The antenna is a Crushcraft
A3S with 40m attachment. At this stage, Edwin is trying to work out the
shipping details from the USA to Cape Town. If anybody can help with
freight sponsorship, please contact Edwin, ZS5BBO, (via E-mail at:
musto@icon.co.za) as soon as possible as he would like the antenna to
arrive by end July for Ian to take back to the island in August.

2276. ABW++ w/Solar Reports & glossary

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-12 00:00:00 UTC
From: James Lee Tabor <ku5s@wtrt.net>
Message-ID: <35A983FF.50F89BA@wtrt.net>
Source record: 28455

Greetings All,

We recently released our new Active Beacon Wizard ++, and wish to
offer it here. We trust it will be welcomed by many, but do beg your
pardon
if this announcement is an intrusion.

Very briefly ABW ++ displays the currently active NCDXF beacon over a
topographic map, along with the solar terminator. Tools for setting the
system clock are also provided.

ABW ++ will download and display up to five selected Space Environment
Center (SEC) solar reports and forecasts. In addition, ABW++ provides
the comprehensive SEC glossary of solar terrestrial terms. This glossary

is in windows help format and may be of significant help when
interpreting the propagation reports and forecasts.

The ABW++ "Get Time" and "Get Latest Reports" functions make use
of an internet connection.

Look for the "Active Beacon Wizard ++" link at the URL below.

73 & Good DX,
Jim

oh well, hurry up, get the code down long enough to get 13wpm
then get your advanced. That is plenty of room, and the extra
class license while it may make you an elitist, it is not worth it.
75khz of voice space just isn't worth the hassle.

NOW DON'T READ ANYTHING INTO THIS
I just don't feel it is worth it, I am not whining about the
requirements to get it. IF I WANTED IT, I WOULD GET IT.

I like my hf privilidges, I think that I would be just as much a ham
without them, BUT if a person wants hf they should go thru what
it takes to get the license. If they do not want the code, don't whine
about it, don't do hf, or wait until the FCC finally removes the 13/20
wpm requirements.
<that will be a very long time>

Hi Tony --Did a sh/dx za on our San Diego Packet Cluster, it returned
ZA1MH 14.007 MHz - 6 July 2322Z
ZA1MH 21.016 MHz - 30 June 1409Z

So some but not a lot of activity.

Why is it that Hams develop these tools and when they are adapted by the CB'ers they try to piss down our throats. I guess it that well developed trate most of them seem to have.
I want to be just like you but I'm not willing to try so I'll just take it! CB is a waste of good talent.....(in some cases)

From: W2CE <W2CE@prodigy.net>
Message-ID: <35ABAFA9.574A@prodigy.net>
Source record: 28280

The following already posted to the DX Reflector is posted to the DX Newsgroup for additional information on the 4U1UN problems.

The following is the text of a message writen by myself. Archives of the thread are available at VE7TCP's web site.

OK,

Nothing like getting a call from the source to please get on and respond to the stories of 4U1UN. I've just spent over an hour talking to Dave Rosen, K2GM.

First, let me say that all of what I said previously was confirmed as accurate by Dave, who urged me to respond. Dave has an internet connect problem but will himself respond on this subject.

As to the 4U1UN operations of this past weekend. Requests had been made for entry permits. These were not denied, but procedures did not leave room to have them issued in time. A request was made to Dennis Sheridan to act as an escort, but he was planning to watch the World Cup on Saturday. Was there a match on Saturday ? Nor did he even know that an event with importance of 4U1UN participation was taking place.

Jerry, W6TER, was the first to point out the station being on the air for 3 hours on 10M, 15M, and 20M. No question, Dave told me it was W6TER operating. Suspecting the limited 3 bands and beacon absence as the only antenna working.

What needs to be presented to the public now is why amateur radio is not happening at 4U1UN. I have been holding private for a long time inside information as to what has happened. Only Steve, KU9C, has any of this prior info as I wrote him when he offered to become the 4U1UN QSL manager.

Sorry, Carmello, but Dave says to tell it.

Amateur Radio operations at the UN have been terminated because it has been deemed as an illegal activity. Providing emergency communications via amateur radio has been deemed illegal for 4U1UN as a "Staff Recreational Club" with copies of UN rules attached.

The person who wrote this letter had it signed by a supervisor at an official level. It received unfortunately wide spread distribution. Amateur Radio is now a phrase at the UN that brings up an illegal act not to be discussed further.

To hear the letter sent it is amazing that Dave, K2GM, didn't have matters in court long ago. The letter was signed by someone who didn't

check it. The person was not an amateur as the letter said but an ON amateur serving at the UN seeking higher status for his goal. The writer did not sign the letter himself.

After all the years Dave and others have put in at 4U1UN a new small group has managed to dismantle amateur radio HF operations. This is a wonderful leadership group (some of which aren't licensed amateurs) who have shut down 4U1UN

Why the Belgian gentleman (? maybe) chose to attack HF operations is not know, maybe just personal against Dave (?) but never the less, this person has destroyed for now any chance of HF operations from 4U1UN. They went as far as to pack away the beacon transmitter a while back. It took almost 2 weeks to argue the importance of it as the leadoff beacon in the sequence.

Dave will be here to present the facts and his document file later.

It has come to my attention that Stu Greene, WA2MOE has posted e-mail and otherwise made reference to me as "Hitler". I find his implication to be disgusting and absolutely disclaim any such racist views.

I had heard of this a few years ago from another Arizona amateur and I confronted Mr. Greene about it. At that time I insisted that he stop these unfounded references and left it at that. It was my understanding that he had stopped this practice.

I hope that no one takes his comments to be true and if anyone has been offended by what he implies to be my views, I apologize and would like the opportunity to further explain my status if felt necessary.

I have been an active amateur for 42 years and have enjoyed conversing with hams in virtually every country of the world. I have met hams of all ethnic and racial backgrounds and have never even considered race or religion to be a factor in any of my dealings, either amateur radio or professional.

As an attorney who specializes in criminal defense, I represent clients of all ethnic backgrounds. In doing so, my character MUST not be questioned. My clients deserve to be represented by an attorney that will be totally unbiased. To have my character cast otherwise is, at best, reprehensible.

I have sent an e-mail to Mr. Greene requesting an apology and that he explain himself to the person to whom he made the remark. I have heard nothing back and can only believe that he chooses not to correct his position.

I have known Mr. Greene for approximately 7 years and during this time I have spent hundreds of hours assisting him with computer problems as well as legal and other matters. To have him attack me in this manner is simply devastating. I can only speculate as to what would prompt him to attack me this way and trust that whatever pleasure he derives from this scurrilous lie is worth it.

Oh yes very relevant, i don't think. Why is it that the number of licensed hams continues to steadily fall? Most Hams are so hung up about 'my radio bigger than yours' that they've forgotten what radio is all about. It's about talking to others (not just a 5 second contest contact) perhaps learning about other cultures, and extending the hand of friendship around the world. Having sat on both sides of the fence, 11m operators are, on the whole, closer to this ideology than the morass of pompus windbags on the Ham bands IMHO.

Go on 2m and call out.....nothing, and when there is a contest...they all come out of the woodwork. They don't want to talk to you just contact more stations than Buzz up the road. Wonderful.

Flames to the usual address,

Jon.

Wow! I never thought that I would rate being
called an elitist! <G>

If you enjoy CW and have your code speed up, why
not go for the extra? The written test is nearly
as easy as the novice test, so that is not a
barrier to most people.

Truthfully, I wanted the 2x1 callsign for its
brevity on CW. Now that most, if not all, of the
2x1 callsigns have been issued, I'm not certain
that I would be bothered to go to the trouble
either. And it will be a cold summer day in
Georgia when I opt for a vanity call that has a
recurring renewal fee attached. A one time fee,
maybe. I haven't been keeping abreast of the rules
in this regard, so what I am suggesting may
already be fact.

Dale,
I tried that one and unfortunately drew a blank. AA3BG is not listed in the QRZ data base. On Buckmaster it starts with AA3BG, which has been converted to K3CN, which has been converted to NP3D, to whom I sent an E-mailand and he (Andrei) said he is not the QSL manager.

Thanks for the effort,
Shirl/KE6JTH

They aren't. At least, not in the US. However, I suspect that the
percentage of the population that are Hams (and CBers for that matter)
are both lower than they used to be.

I thought you would never ask. What's wrong with the bureau is
that it only functions as good as it weakest link. And after throwing
thousands of cards in the trash over the last ten years, I can
assure you it has plenty of weak links.

If you want a card from somebody, QSL direct.

If you don't know someones QSL info, ASK them when you work
them on the radio. The best information about the horse comes
directly from the horse's mouth.

Couldn't agree more Jim. In fact, I use the SASE method with
stamps from the op's own country for return postage. I get about
95% return rate (when I can find the address). Sometimes works
when sending to the buro as well, which it looks like I will have
to do in this case.

Good advice for the rarer ones I'm sure. However climbing the DX ladder
could run $400 or more. For the common ones (lots of hams live there) I
have always used the bureau and have had very satisfactory results, but
don't be in a hurry -- a years wait is not unusual. Sooner or later that
DL, GM, JA, SM, SV, 4X, F, HB, PY, LU etc will come via the buro. But
better send postage et. al. to A61, EP, ET, etc. And tip the QSl
managers generously has always been my policy.

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there.
XM3PBX will be operating SSB on the trains and CW and SSB at
the train station.
Bob-VE3LLE and Lyle-VA3DXE will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory. All CH3HBC will be SSB operation.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of VE8C. VE8C will be SSB, with possibly some RTTY and
CW operation.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM for one day
from the M.V. Polar Princess, out of Moosonee. The day is not
determined and will very likely be either Tuesday, Wednesday
or Thursday. All CI3XXV operation will be SSB.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate, being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. The Northlander
will leave Cochrane for Toronto at 6:00 AM Sunday August 23

and we will be operating XM3PBX on the southbound trip until
about 4:00PM at which time the Polar Bear DXpedition will
cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 17M, 15M, 6M on 2M.
We haven't determined the final frequencies, but we should have
that information by the middle of July.
Here is a list of the participants.
Aldo Galati-VE3IMR/VA3AG
John Harden-VE3VGI
Paul Lantz-VE3KBL

Yep, that goes via OH2BH, Martti Laine, to his CBA.

Hi Walt of Pipex -- I know several QSL managers personally and NONE of
them make a dime on QSL managing -- several pay out of their own pocket
to print the cards and pay postage for those (lots) that don't send it.
So thats why I tip generously.

Also to help pay for the DXpedition costs where applicable.

73 & hats off to the QSl Managers of the DX world

Rod in San Diego

PS I have several instances where I was NOT in the log -- and received
NO QSL card.

>

Fact 1 - We can not open our bands to everyone, because there is not enough bandwidth on HF. Listen on 40m in Europe, and you will come to the same conclusion.
- So we need the candidates to pass some kind of test before we give away tickets.

Fact 2 - We (especially here in Norway) have a problem recruiting younger people into our hobby. The average age of the Norwegian ham is very high !.

Question!
How can you find a test that do not discriminate younger people, and still be so difficult that you need to be serious to pass it.

Solution -

CW at a speed of 8wpm
(Today we need to pass 12wpm here in Norway for the "full license", and that's a little bit to hard)
+
A better knowledge of the rules concerning amateur radio and knowledge of etiquette on the bands.
(If you know what is right, maybe you do the right things)

Rod,

I think your estimate is a bit high, more like $200. Foreign stamps
average about $1.50 +/- plus .60 for my stamp to them, and I need
about a hundred. Subtract from that the number of wasted ones
going to a buro and it's not so bad. Plus, I don't have to keep working
countries that I know have already QSL'd (usually within 4-6 weeks),
cuz I know I got 'em. And the op on the other end usually gets
a real kick out of it.

But, hey, in the end it's only money. Ham radio is one of my much
cheaper hobbies. ;)

73,

Casey

No one with a licence has the right to moan about being restricted because they have not/cannot pass the morse test,THEY KNOW THE RULES BEFORE THEY JOIN THE CLUB.If they don't like the rules ,why are they in the club.

It sounds more sensible than the *kill all morse* brigade.What a lot of
people do not (or refuse) to recognise is,that there is still a place
for the morse code,it is still a vital part of communications that will
succeed when the lazy push button,or microphone only operators cannot
make a good communications link.It may be old but so is democracy,and
even then there are those who would like to get rid of that.For their
own selfish reasons of course,not for the good of the rest of us ..

SB DX ARL ARLD028
ARLD028 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, DXNS, The Daily DX, Mac, W3HC, and Contest Corral from QST. Thanks to all.

SAINT BRANDON ISLAND, 3B7. Taher, 3B8DB, is QRV until around July 23 as 3B8DB/3B7. QSL to home call.

TANZANIA, 5H. Ted, W0RA, will operate from the QTH of Dale, 5H3DD, from July 20 to 25. Activity is expected on 20, 15 and 10 meters. He may use Pactor on 20 and 15 meters. QSL via W0RA.

WESTERN SAMOA, 5W. 5W1SA is QRV for three years. QSL via JH7OHF/1.

CHINA, BY. Look for BI5Z to be QRV from Zhoushan Island for a few days beginning July 16. QSL via W3HC.

SAINT PAUL ISLAND, CY9. Don, VE1AOE, and Ken, VY2RU, will be QRV from July 18 to 20 as CY9AOE on 160 to 2 meters, including some RS-12 and AO-10 activity. They will be providing communications for 40 Boy Scouts, several leaders and two scientists. QSL via VE1AOE.

BALEARIC ISLAND, EA6. Frank, ON4CEL, will be QRV until July 23 as EA6/ON4CEL while on holiday. He will operate mostly CW on 40 meters around 1200 to 1600z. QSL to home call.

LIECHTENSTEIN, HB0. Petr, OK1CZ, is QRV as HB0/OK1CZ, using CW on 30 and 12 meters. His length of stay is unknown. QSL to home call.

THAILAND, HS. Kurt, HB9AMZ, will be QRV until August 11 as HS0ZBS. QSL to home call.

EASTERN KIRIBATI, T32. T32Z is QRV, although his length of stay is unknown. QSL via N7YL.

TURKEY, TA. TA3YJ and TA3J will be QRV on Alibey Island, IOTA AS-099, from July 18 and 19 as TA0/TA3YJ/P and TA0/TA3J/P, respectively. They will use SSB on 80 to 10 meters, including some activity on 2 meters and 70 cm. QSL both calls via TA3YJ.

BENIN, TY. Sigi, TY1IJ, has been QRV on 17 meters around 1600 and 1800z. QSL via DK8ZD.

NAMIBIA, V5. Ken, SM7DZZ, will be QRV as V5/SM7DZZ for one year. He plans to operate mostly CW on the low bands. QSL to home call.

PITCAIRN ISLAND, VP6. Tom, VP6TC, is QRV using his new call. He has been found on 15 meters around 0030z. QSL via K6RPF.

KERMADEC ISLANDS, ZL8. Bob, ZL1RS, is QRV as ZL8RS and has been active daily into Europe on 20 meters around 1800 to 1900z. QSL to home call.

THIS WEEKEND ON THE RADIO. The North American RTTY QSO Party and the SEANET CW Contest are all on tap for this weekend. Please see July QST, page 98 for details.

2333. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6olli5$ke8@news.Hawaii.Edu>
Source record: 28312
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH2PZ, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec-radio-info@stat.com. Inquires and other administrivia should be directed to rec-radio-info-request@stat.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to

dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to:
majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see
http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Hi

I live in Toronto, Canada and there is a weak FM radio station on 99.5 and a strong, local
station on 99.9 MHz. My car radio can receive the 'weak' station but I have difficulty at home to receive the weak station.

Can anybody suggest a consumer model radio and /or practical advice on how to
solve my problem.

Jean

I like to think of any "tip" as a contribution toward the QSL cost of the DX. We give them postage but when you think about it, there are printing costs which on a very active station can use cards pretty fast.
We tip 15-20% for lunch so what's a dollar in a hobby with thousands of dollars of gear sitting in front of us that gives hours upon end of entertainment and sport.

With a corresponding level of service? Since they will get paid the
same, it doesn't matter how they treat you. Can't recall
what the wait staff were like in the Isles last time I was there,
I was just thinking about the artery clogging food (really, just
a gentle joke). ;) ;) Love the ales, though!!

Are we off topic yet?

2338. A Typical QSL Manager

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-16 00:00:00 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <35AEBF23.6332@ix.netcom.com>
Source record: 28317

Well since a thread has started, I took the opportunity to phone KD6QK
who is the manager for the 6E2T contest station. Here is what Harv has
experienced.

After 4,000 QSL cards received in the mail and via the bureau:
He has $10.00 in the Kitty!

More than half came via the burro with no return postage.

The contest team paid for the printing costs out of their own pocket.

Not one dime went into the team's pocket or toward contest expenses.

The fine operators from Japan almost always QSL direct with sufficient
postage and a bit more (tip if you will).

USA stations typically provide an SASE but little else. And many don't
even send an SASE!!!!

Harv sez "If you aren't in the log -- no card" tip or not.

I maintain that a small tip above the cost of postage is in order to
help the managers defray the cost of printing and missing postage.

One manager in Northern California donates any surplus funds to the
Northern California DX Foundation. We are dealing with fine honorable
folks who perform this service for Amateur Radio. And their names are
Mary Ann, Joe and well I guess you know who they are..

I am amazed that any one would consider these small tips as a bribe or
that a station in rare xxx should send out 40,000 "free" cards as a
matter of "honor".

GD OMs, XYLs, YLs,

Imagine that you've just found that perfect slot on a CW band, probably in the lower 25 KHz. QRL? QRL?, you stretch your fingers once (pop, pop) and off you go, pounding out CQ DX CQ DX ... Back comes that rare one, or maybe it's only "down the street" in Europe or Asia, whatever. You have a nice QSO exchange, share a few pleasantries, and it's cul es 73. Before you can draw your next breath, however, there is a big pileup, *ON THE DX STATION*!

You take the following action:

1. Shrug your shoulders and slink away to some other hole in the band, if any.

2. See what's in the TV listings.

3. Decide this would be a good time to catch up on QSLing.

4. Immediately start calling CQ DX again, since you were there first.

73,

Art,
I took the easy way out and purchased the III already built. Figured by the time I spent $ at the local RatShack for hardware/cabinet etc I would have almost paid for a built one. Besides, I'm the kind of kit builder that never seems to pass the 'smoke test' and it takes me forever to figure out where i screwed up. :)

The keyer works like a champ, but is not for the faint-of-heart if you don't like to program using a key. All instructions to the keyer are via morse-code. The manual does have a good 'primer' but it still takes getting used to. This keyer walks circles around most other keyers and comes in a small enclosure and draws minimal battery juice.

I also own the AEA MM3 and if its code practice you want, I would go with it. The CMOS III is a keyer for the true cw enthuisiast/contester, but does not have the practice options that the AEA has.

Good luck with your decision.

The fee for a vanity call is a recurring regulatory fee and will
be charged each time you license is renewed. The fee will drop to
somewhere in the neighborhood of $13 around the middle of September 98.

On the 21 of september 1997 I did work the ZK1XXP on North Cook Island.
I did send my QSL together with some "greenstamps" to the QSL manager
WA4YBV.
So far I have NOT got my card, today is the 17th of july 1998 !.
I have send several E-mails and ask abt my card, but NOTHING has happend.
What kind of policy is this ?????????.
Can the QSL manager,WA4YBV, tell me if he have got my card, and if he have
can I get mine ?.
I do have a printout here from the ZK1XXP log on the Internet, that says
that I am in the log.
The URL of the loggpage was:

>Why not ?

>Please don't take this as a flame, I am just curious.

>73 de Vince, VE3VFN.

Because I don't think the DXpedition should pay the expenses
of answering bureau cards. If 10,000 cards are delivered to a
bureau somewhere, somebody is going to have to pay the
postage from the bureau to whomever is going to answer them,
and back again, plus whatever the bureau charges for outgoing
cards.

I think anybody who is working on an award (which is why most
people want QSL cards) should pay for that award themselves.

One concept I have never been able to figure out is that so
many people don't connect 'QSL manager' with 'direct'. To me,
via a QSL manager always means direct, not to any bureau.

Well, Paul, hard to say why you didn't get your card. But ask yourself
a few questions, and maybe you can figure out why.

Are you sure you sent the card to the right address ?

Did the card you sent actually arrive at WA4YBV ?

Did you send it registered mail, and get a return receipt,
so you are SURE that WA4YBV received it ?

If he sent you a card back, did the postman deliver it ?

Is it possible that WA4YBV is in the hospital, or worse, or that
he has pressing family problems that are more important than
QSL cards ?

Is there anything that happens to people in life that is more
important than QSL cards ?

Is ZK1XXP the ONLY station that will ever operate from ZK1 ?

Did you work ZK1DI in January and February of 1998 for QSL
insurance ? (They QSL'ed via the bureau).

Impossible to say why you didn't get your QSL card, Paul, I
guess we have to find the answer in the 'stuff happens'
catagory somewhere......

But there is a way that you can make sure that this NEVER happens again, Paul. Let's get together, and make the ARRL take electronic logs from DXpeditions and DX stations instead of making the whole world waste time and money mailing silly cards all over the place. ZK1XXP obviously has thier logs in a computer, since they posted them on a web page. I have my logs in a computer, and I'll be happy to send them to the ARRL.

Maybe it's the ARRL's fault you don't have ZK1 confirmed for your DXCC, and not thier QSL managers fault. After all, it is 1998.......

Dear Jean,

I assume your home audio system has an external antenna hook-up connector.

A resonant antenna for 99.9Mhz is two legs of cable, each 2.34 feet long.
Use a reasonable length of 75 ohn cable from your stereo to the antenna. Feed each leg of the antenna with one side of the cable. (ie: the center cable goes to one leg, the shield part to another. String the free ends up between two convienient high spots or in your attic. making sure the ends are isolated from the end that they are connected to.

This will provide some gain to your receive and help with unwanted signal suppression.

> <that will be a very long time>
And they can't do it until international treaty is changed. The
requirement for cw is dictated by treaty worldwide. But all said, code
is easy to anyone who really wants to learn it. And attitude is
everything. If you think you won't like it, and won't use it the chances
are you won't. When I learned cw , I was in the 8th grade. I viewed it
much as a game. And it didn't take me more than a week or two to learn
the alphabet and numbers. Within a year I was outcopying alot of friends
of mine that had tickets already. I still didn't at that time. All in
the mind,and the attitude. But I view it just as another necessary part
of getting a ticket. I hate certain parts of the written
test and think much of the questions on the extra class test are fairly
silly, but I don't advocate doing away with them just because I don't
care for them. It's all the parts that equal the whole. MK

So, I am an elitstis ..?

I always thought I was lazy. I sat on a General for 25 years, conducted
a class and when a coupl of my students got their Extra I got off my
ass and went in one night and did the 20 WPM, Advanced and Extra.

Does that make me elite ? I still sat iy makes me lazy. I could have
upgraded years before I did.

2350. Re: A Typical QSL Manager

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-17 00:00:00 UTC
From: r.s.eckman@larc.nasa.gov
Message-ID: <slrn6qudgd.2k9.r.s.eckman@eos1.larc.nasa.gov>
Source record: 28322

As long as this thread has been opened, let me throw in my 2 cents worth. I think that we're forgetting that this is a hobby. If folks want to go on DXpeditions, that's great. However, I find the solicitation of funds for such expeditions somewhat offensive. If you want to take a vacation and have some fun operating, then great! But, please don't ask me to fund your vacation. I don't really see any of the many "difficult" places that folks go as anything more than adventure vacations. Yes, I appreciate that they're doing me a favor by activating a rare country. But, again, recall that this is a hobby and they're having as much (and, quite likely, a lot more) fun than I am making the QSO, working the pileups, and taking a memorable experience back with them.

Some years ago, I recall an IARU (or was it a DXCC?) recommendation that QSL cards for DXpedition operations be available via the bureau and via a "reachable" DX manager for the cost of postage. I find it somewhat disturbing that many operations don't take bureau cards because of the relatively small expenses incurred returning the cards via the bureau. I've never "tipped" a station or manager for a QSL. I think that it's a matter of honor that folks are providing a service for the hobby by replying to QSL cards, particularly for high-profile DXpeditions.

I appreciate that managers are typically not making any money on QSLing and that for a big DXpedition it may be a major (albeit, generally, short-term) task to reply to the cards. And I have a lot of respect and admiration for the many high-profile managers who deal with a lot of stations, often helping us get cards from operators in postal-unfriendly parts of the world. An SASE with adequate return postage is certainly an essential requirement for a direct card. Managers or operators should not be paying your return postage or buying envelopes. But I don't see why the cost of cards or other managerial expenses (or, indeed, radio equipment and transportation) should be borne by us. If tips are expected, where will it end? When will we see DXpeditions requiring a SAE + postage + $2.00 or something similar for a QSL? I think that it's up to the DXCC to adopt some minimum requirements that ensure that operations that receive DXCC accreditation provide a reasonable means of obtaining QSL cards: by both bureau and direct means.

Rod,

I agree with your posting 100%!

Just a short question to you and the other subscribers to this newsgroup.

What are you thinking about a contest station manager who has no QSL-manager and is not QSL-ing. Of course not via bureau and also not via direct, although you have provided a SAE and one greenstamp, which is good for postage and printing costs?

BTW: I am thinking about one of the biggest contest stations in the States! ;-)

If I am sending for a QSL-request to the States, I am providing one greenstamp and _NOT_ an IRC, allways! Of course I don't worry about the 40 cents for printing costs, etc., etc., etc.!

Good luck in QSL-ing

Richard, I agree 100% with everything you said, except for the line above. I think it's totally unrealistic to expect an expedition like the VK0 guys just went on to send 80,000 bureau cards. For several reasons. I don't think they should answer bureau cards either.

One, if they did send out 80K bureau cards, about 50,000 of them would wind up undelivered in a box some place or in a dumpster. It's never safe to assume that a bureau card is going to be delivered, for a bunch of reasons. Some bureaus only deliver cards to 'members'. Some bureaus only deliver cards to other bureaus once a year, or less than once a year depending on the total amount of cards they have going to the other bureau. Lots of hams don't keep envelopes on file with their bureau, and cards sit for years until they are tossed.

I just got an envelope from the ON bureau to the Guam bureau - full of cards for KG6DX - he left here 3 or 4 years ago, and since the cards were from a bunch of different hams, it's not hard to figure out they sat in the ON bureau for 4 years before anybody decided to mail them - probably because they were waiting for more cards to go to Guam, which is what bureaus are supposed to do. So now hams in ON land didn't get thier KH2 card, I have no idea where KG6DX is so I can't forward them, and it's nuts to waste more money sending them back.... so in the dumpster they go.

Two, while I agree that the VK0 guys should pay for their own vacation, I don't agree that they should help finance 40,000 other peoples DXCC award.

I have been in Guam for 15 years, and have run the bureau here for probably 8 of the 15. An amazing amount of cards come here that should not come here: KP2 cards, KH0, KH3 cards, etc. And the club here doesn't have enuff membership or funding to mail them all back, so they get trashed. When the FCC decided to start issuing KG6 calls in the U.S., we got thousands of cards here that should have gone to the W6 bureau, and the sad part is we got most of them from the ARRL bureau in Newington. The bureau here has no outgoing service, so if the hams here want to answer bureau cards, they have to either mail them back direct, or package them up themselves and send them to the respective bureaus in other countries, neither of which is inexpensive.

With the vanity scam program currently being run in the U.S., 3/4 of the Guam extra class call signs are issued to people who don't live in Guam, have never lived in Guam, never will live in Guam, and who have made no arrangments with the bureau here to forward cards to them while they run around the world using KH2 callsigns. A few of the calls are issued to Japanese hams who actually do come here and contest - and they have told us to throw the bureau cards they get in the trash, they don't want them. When they get back home, they dump thier contest logs to labels, and dump all the cards on the JARL bureau, which in my mind is nothing but a cop out - I get a ton of cards back from all over the world that they sent out via the JARL marked NOT A MEMBER OF THE BUREAU or CARD UNCLAIMED, which is just a waste of some more money by other bureaus returning them.

Most people who are serious about DX'ing don't want to wait two or three years for a card anyway. Bureau cards, in my opinion, are sent by people who really don't expect to get one back, but they would rather hope than spend 2 bucks on stamps and envelopes. Almost like the cards I get direct with a note saying 'In my country, we can not get IRC's or stamps, but I really need your card so please QSL' - along with a card listing the guys equipment - FT1000D, Alpha amp, seven element monobander, Pentium computer - but sorry, no money left for stamps.....

I think ham radio would be better off if the bureaus all over the world closed, because if what I have seen here is any indication of the status of things world wide, bureaus are a terrible waste of effort and money.

I just got done answering a batch of cards tonite, even though I have a manager (well publicized) and even though you will never hear me on the radio for more than five minutes without giving out QSL info. In a contest, I'm glad to give QSL info if someone asks. Anybody who thinks that QSL managers or DX stations are making money by answering QSL cards is nuts. Most of the U.S. cards I get direct come with an SASE, which is all I want. Most of the foreign cards come with a self addressed envelope, and an IRC, which is fine because I can trade the post office the IRC for a stamp. Some of the cards come with a dollar bill instead of an IRC, and the .40 cents left over is used to answer the cards that come with nothing. But in the years I have answered my own cards, or in the years that I have answered cards that should have gone to my manager, I can guarantee that it has cost me money, and time, instead of being a profit making idea.....

One card I answered tonite came from a guy in the states, who used a 60 cent stamp to send his card when he only needed 32 cents, the SASE had another 60 cent stamp to go back to him, and enclosed with the card and the SASE were two brand new one dollar bills. I think it's NUTS that anybody should pay $3.20 for a QSL card from Guam, so I put the 2 bucks back in with my

card and sent it back to him. On the other hand, I think it's NUTS for me to pay for Guam cards for the thousands of stations I have worked from Guam, so I no longer answer bureau cards.....

I realize that 98.4% of the people on the radio don't call me to say hello, or because I'm a nice guy. They call because they want a QSL card. I'll pay for my radio, my antenna, my amp, my electric bill, my QSL cards, and I'll use my time to answer cards, and as long as the 98.4% of the people I talk to pay the postage, we'll all be happy.

Waldemar, one thing you have to remember is that if you sent
a card, maybe so did another 8,000 stations that worked the
guy in contests. You need to wait a while before you can assume
the station you worked does not answer cards. There is always
the possiblity of lost mail too.

I liked to answer cards, about 40,000 cards and many years ago.
But to be perfectly honest, it's not my favorite thing to do anymore.

Recently I have made a resolution to answer cards that I get as
soon as I can, and for the last six months I have been keeping
up pretty well, but before that I answered cards once a year, if
that often.

So maybe it's safe to say he is not QSL'ing very fast..... but hard
to say he is not QSLing at all.

Have you ever wanted to make a contact with a famous ham, but that
ham was a silent key? (You know, dead?) Well, your worries are over! Madame
Gozonga, a world famous medium, (some say she's an extra large, but that's
beside the point) will be operating special event station W1AW while in
touch with the departed spirit of Hiram Percy Maxim, on Labor Day,
September 7, 1998, 0000-2400z. Madame Gozonga's credentials are well
know to movie stars and other celebrities, as well as federal, state,
and local law enforcement offcials. She was carefully selected at
random from the many phychics who advertise in the classifieds of Weekly
World News, and other fine publications.
The ARRL has designed a special certificate to commemorate this historic
event. The logo on the certificate will be a silent key. Operating
frequencies will be 25 khz up from the bottom portion of the general phone
and cw segments of each band, simultaneously.

To make contact, tune into the frequency and repeat the following phrase,
followed by your callsign.

Oh-wah,
Tah-nah,
Sy-am.

Keep repeating the phrase, followed by your callsign, until you are
acknowledged. You will then receive a lovely 8 1/2" x 11" certificate,
suitable for framing, or kindling, or whatever else you want to do with it.
Please to not send any QSLs to W1AW. Your callsign will be acknowledged and
noted on the log, and you will get yours. Please allow 10 to 15 years for
delivery.

I have been hearing about a "supposed rulemaking" that is supposed
to come within 30-90 days. I could care less what they do with code,
like this gentleman said about certain written questions....I also
don't care about that elite coded segment where all the "great DX"
hangs out.......I have heard many stray into the advanced portion.
I still won't work 'em if I cannot talk to 'em. I will do an
occasional CW contact, but they will be FEW and FAR between

I've gotten a couple of blank cards from DX stations who send
QSLs/SASEs to me, as opposed to the other way around, along with
their filled-out card. Just another form of tipping I guess.

Or maybe their cards are sticky and they don't realize they sent two...

Actually, that's happened to me a couple of times.. It's going to be
pretty hard to continue on that channel anyway (especially if someone
spots the DX station on packet...) so I usually just tell the DX
station to take the channel & work it. 'Course, some of the DX
operators don't like pileups (maybe that's why they answered my CQ
instead of calling CQ themselves?) & ignore the pile...

I've also had it happen in the other direction, where I answered a DX
station's CQ & after signing, had a small pile up other Europeans
calling *me*. Just take 'em up the band to the next open spot...

Now if I can figure out how that DL station got the idea I was VU2BK's
QSL manager.....

CHECK OUT THE POLAR BEAR 98 WEB SITE FOR ALL THE LATEST
INFORMATION.
http://webhome.idirect.com/~galati

FOR THOSE WHO ONLY CAN GET TEXT FILES, READ THE TEXT THAT FOLLOWS:

The DXpedition is starts on Sunday August 18 at 6:30PM
(22:30UTC) at Toronto Union Station. We will be operating
from the Ontario Northland Railway's " Northlander" under
the call sign XM3PBX. We'll probably be operating all night
until we arrive in Cochrane Ontario about 5:00AM Monday
morning. We will then transfer XM3PBX to the ONR's Polar
Bear Express to Moosonee, which will be leaving Cochrane at
about 8:30AM. We'll continue to operate on it until we arrive in
Moosonee about 1:00PM. We will then be setting up XM3PBX at
the ONR's Moosonee train station and operating from there.
XM3PBX will be operating SSB on the trains and CW and SSB at
the train station.
Bob-VE3LLE and Lyle-VA3DXE will move their gear to the Moose
Factory Museum and operate a station from there under the
callsign CH3HBC/325 to celebrate the 325th anniversary of
Moose Factory. All CH3HBC will be SSB operation.
John-VE3VGI and Aldo-VE3IMR/VA3AG will be flying up to
Charlton Island to operate an IOTA island, under the call
sign of VE8C. VE8C will be SSB, with possibly some RTTY and
CW operation.
There is also a fourth station CI3XXV, that will operate
from various freshwater islands(weather permiting) under the
callsign CI3XXV/25 and maritime mobile CI3XXV/MM for one day
from the M.V. Polar Princess, out of Moosonee. The day is not
determined and will very likely be either Tuesday, Wednesday
or Thursday. All CI3XXV operation will be SSB.
This will continue until Saturday August 22, when all
stations except XM3PBX and CH3HBC/325 will cease
operation. CH3HBC/325 will continue to operate, being run
by local hams, Paul-VE3KBL and Craig-VE3CIJ until the end
of August.
On Saturday Aug 22, we will leave Moosonee on the Polar
Bear Express at 6:00pm operating XM3PBX as we travel south
bound. We are scheduled to arrive in Cochrane at 10:30PM.
XM3PBX will go off the air for a short time so that we can
transfer to our coach on the Northlander. The Northlander
will leave Cochrane for Toronto at 6:00 AM Sunday August 23

and we will be operating XM3PBX on the southbound trip until
about 4:00PM at which time the Polar Bear DXpedition will
cease all operations.
That's itinerary for the DXpedition. We intend to
operate on 40M, 20M, 17M, 15M, 6M on 2M.
We haven't determined the final frequencies, but we should have
that information by the middle of July.
Here is a list of the participants.

Source record: 28241

Walt,

The QSL system is archaic, but I still enjoy looking at cards from other places--the awards are secondary. I'm hoping that electronic QSLs will become accepted over time, but hope people are still creative about their cards.

I went all-out to have a custom card that reflects who I am, rather than another of the "cookie-cutter" QSL cards available at any of the major QSL printing services.

> Thanks in anticipation of help. John T.

Hi John -- lets see if I remember how to do this,

First off -- it is 26.0206 dBW that yields 400 Watts.

(That 0.0206 can make a big difference when dealing with some
logarithmic numbers) 26 dB yields 398.11 Watts. So lets use 26.0206
dBW

db = 10 log (base 10) of Pout/Pin (Pout = Power Out) (Pin = Power
In)

and 26.0206 dbW = 10 x log Pout/1 Watt

taking the 10 to the other side of the equation

26.0206/10 = log Pout/1 Watt so:

2.60206 = log Pout/1 Watt

The 2.60206 is the logarithm of Pout/1 Watt

Using an HP calculator

The antilog of 2.60206 is 400 -- thus Pout was 400 Watts

Or the hard way of ye olden days -- first define the parts of a
logarithm
the 2 is the characteristic and the 0.60206 is the mantissa. A log table
will yield the mantissa of 0.60206 as 4.0000. The characteristic is then
used and 2 = 100 -- thus
4.0000 x 100 = 400 Watts

Another way of looking at logs (common base 10 type) is to examine these
logs and corresponding numbers.

The log of 70 is 1.84510
The log of 700 is 2.84510
The log of 7000 is 3.84510
and so on. Note that you need a calculator or a log table to get the
0.84510 part (mantissa). The characteristic is obtained by moving the
decimal point to the left until it is one significant digit --
thus 3 for the number 7000.

An easy in the head approximation for dB is by remembering that power
roughly doubles for each 3 dB. So 27 dB could be visulized as:

So 1 Watt doubled = 2 Watts 3 dB
2 Watts doubled = 4 3
4 Watts doubled = 8 3
-------- ------ = 16 3
-------- ----- = 32 3
-------- ----- = 64 3
-------- ----- = 128 3
-------- ----- = 256 3
-------- ----- = 512 3
---
27 dB

Actually its 3.0103 dB for each power doubling so it really 27.09270 dB
But close enough if you don't have a calculator or log table.

Incidently -- adding logs is equivalent to multiplying numbers.

Did I get my math right guys or gals ????

BTW -- Many sources specify an S-Unit as 6 dB, thus you have to
quadruple the power at a transmitter to have an increase of one S-Unit
at a receiver (more or less)

Agreed. (again?! - hi Tom!)

I have a few thousand QSLs, seem to spend about $20/year on more
filing cabinets to hold them... But I'm still excited like a kid when
that bureau envelope shows up, and I carefully read each card.
(especially the ones with pictures of cute YLs on the front <g>..)

QSLing is a quaint & obsolete concept in this day & age with
computerized databases. So is CW. Still, there are plenty of us who
enjoy both, and I sure hope both are around for generations to come...

If you have to justify CW, don't do it. An extra license offers no advantage over a tech license above 50 mhz. There is no magic to the code. If you want to learn it, put in the time and you will.

In a previous article, J.Trout@exeter.ac.uk (John Trout) says:

>Can someone please show me the line-by-line calculation that translates the
>term 26dbW to the power figure of 400 watts ?
>
>

Power = antilog(dB/10)

dBW is referenced to Watts.

antilog (26/10) = antilog (2.6) = 398.107

So 26 dBW is 398.107 watts, if you want to be that exact.

We spent the last 15 years to assemble the world's largest collection of these "archaiv, wasteful" QSLs - to preserve what is left from the past.

> Is there really a need to have written "proof" in the form of QSL
- There never existed a reliable GDR callbook. It is now being compiled by checking all those old, useless QSL against official and private lists.
- In the 60's YA licences where dished out by a DL-OM; but most of the lists were lost or are incomplete. The news never made it to the editor of the call-book. Our QSL cards help to reconstruct a complete list.
- YLRL supposed there were "about 150-200" pre-WWII YL operators worldwide. Our documentation so far sports 450+ callsigns.
- We receive close to 100 requests for particular QSLs every year ("I used to be XXxXX at YYY, but all my cards are gone..." - "My uncle was XXxXX. Had to leave everything behind when he was deported. We would love to get hold of one of his QSL cards..."
-Suppose you'd like to write a magazine story about a rare one, say Clipperton. Wouldn't you like to add the QSLs of all the operations there to your stories?
Just four examples why collecting QSLs might be not so bad after all.

"THE REBUILDING OF 4U1UN" by Dave, K2GM. This article will be sent to all OPDX InterNet Subscribers as an additional bulletin.

8J, JAPAN. The 12th annual Japan Jamboree station 8J7BSJ will be active during August 3-7th, from Moriyoshi town in Akita prefecture. QSL via JARL Bureau.

8Q, MALDIVES. The "DX News Sheet" reports that Tony, G0EZU, will be active August 16-31st as 8Q7JD from Kuredu Island. Activity will be 80-10 meters including WARC bands, with a FT-767GX, dipole and vertical antennas. QSL via home call.

BV, TAIWAN. "The 59(9) DXReport" states to look for Jurgen, DJ3KR, to be active as BV/DJ3KR from July 24th to August 12th. QSL via homecall.

BV20, TAIWAN. The 20th annual Asian and Pacific Jamboree station BV20APJ will be active from August 2-9th. Operations will be from Pingtung (BV7). Activity will be on 80-10 meters on CW/SSB. The first 15 minutes of each hour will be mainly for QSOs for Scout persons only. QSL via BV QSL Bureau.

EUROPE TRIP (DL/HB0/LX). Jay, K4ZLE, reports that he will be in Europe on business from July 18th until August 3rd. He will be in Germany (DL) during the work week, in Liechtenstein (HB0) from July 24-26th and in Luxembourg (LX) from July 31st to August 2nd. Jay said he will most likely be using his UK callsign under CEPT provisions. So, look for DK/MU0BKA/p, HB0/MU0BKA/p and LX/MU0BKA/p. Activity will be on 15, 12 and 10 meters (as conditions permit) with activity mostly on CW and

RTTY. QSL via K4ZLE. During his nighttime hours, Jay will try 40 and maybe 80 meters if the noise isn't too bad.

FREQUENCY CHANGE. The Down Under County Hunters net have now moved to 14.336 MHz. The net will still start at the usual time of 0330z and continue until the band folds up. This announcement is directed at USA stations because they are who the "Down Under Gang" want to work in order to confirm their counties.

HH, HAITI. Phil, KC0ARG, is scheduled to visit HH2NH's QTH from July 24-30th and plans to be active as HH2/KC0ARG. Operations will be on SSB 20 and 10 meters. QSL via F6DJB.

HOW'S DX (New Editor). In the August issue of QST's "How's DX?" column, it was announced that Bernie McClenny, W3UR, editior/publisher of "The Daily DX", will be editing this column starting in September. If you have any questions or suggestions about "How's DX?", Please feel free to E-mail Bernie at: bernie.mcclenny@mail.wdn.com

IOTA NEWS (BIG WEEKEND COMING UP! The RSGB IOTA Contest is this weekend.)
RARE IOTA. According to the RSGB IOTA DIRECTORY and YEARBOOK 1998/ 1999, Little Diomede, IOTA NA-150, is the #1 most wanted IOTA in North America. Tom/W6IXP and Barry/K6ST, will activate Little Diomede Island as KL7/W6IXP from July 22-29th, starting approximately 2100z. Activity is subject to change depending a upon a number of factors including weather, which could potentially delay travel onto the island and the beginning of the operation by a factor of days. To arrive on the island, the DXpedition team takes a special helicopter 35 miles from the Alaska mainland to Little Diomede Island. Assuming the weather and travel plans cooperate, look for them on the bands or check out their Web site at: http://www.netcom.com/~barryb/na150.html
for live updates, including schedules, live spots, and on-line logs. The online Web log search, is being provided courtesy of "Islands on the Web" (IOTW - http://islandchaser.com). They will operate mostly SSB the first 5 days, then CW and RTTY additionally! Look for them on:
SSB - 14260 (listening up 5), 21260 (listening up 5), 7090 (KL7/W6IXP listening up 7180 +-).
CW - 14040, 21040 and 7040
RTTY - 14080, 21090 and 7038 kHz (along with possibly Packet, Pactor, and APRS - Time permitting!)
QSL via N6AWD: Fred K Stenger, 6000 Hesketh Dr., Bakersfield, CA 93309-1429 U.S.A. For current up to the minute information, visit the Web sites, or contact the DXpeditions's Pilot (Information Manager) John, WD8MGQ, via E-mail at: wd8mgq@tir.com

AS-066. The Vladivostok ARC and The Vladivostok Contest Club members Alex/RW0LBK, Aleksey/RW0LKA, John/RW0MM, Vlado/UA0LCZ, Meela/UA0LHT (YL military first class CW op) and 2 SWL (Pavel/R0L-3 and Valeriya/ R0L-6) plan to be active from Russkiy Island (43'02"N 131'53"E) as RZ0LWA from July 23-27th (IOTA Contest included). They will operate 80-10 meters on CW/SSB and 2m/70cm FM/SSB. They will also be celebrating

"The Day of Russian Navy". QSL via bureau or RW0MM: P.O.Box 73, Vladivostok 690090 Russia.

AS-090. Noh, DS1DBX, in Seoul, Korea, informs OPDX that the Hanyang University Wave Research Club (HL0C) have plans to operate from Tokjok Island August 1-5th. Activity will be on 40-15 meters (10m Optional).

EU-007. Mike/EI2IB and Anthony/EI2HY will activate the Irish Blasket Islands using the call EJ2IB. The EastCork Group will be active from the Irish Bere Island (IOTA not known by editor) using the call EJ7M.

EU-010. Gavin, GM0GAV, reports that he will be operational as GM0GAV/P from Isle of Lewis in the outer Hebrides in next week's IOTA contest. He will take part as a Single Op 24 hr CW section using verticals and an amplifier. QSL via bureau or direct (OK in callbooks since 1987).

EU-030. Mario, DL5ME, is on the way to Bornholm Island. He will sign as OZ/DL5ME and plans to participate in this week's IOTA Contest as a 12 hours-only SSB section. QSL information and log checking will be published after the contest on the WWW-Pages: http://wwwiti.cs.uni-magdeburg.de/~hoeding/hamradio/

EU-30. Karsten, OZ4FF, will be active in the CW part of the IOTA contest from Bornholm Island. QSL via Box 121, DK3700 Roenne, Bornholm Island Denmark.

EU-090. Radio club Split 9A2A (9A1AKL) will activate 9A8P from Palagruza Island from July 23rd to August 2nd. Operators will be 9A3NU, 9A3LO, 9A4NA (T98N), 9A4SP (T98P), 9A5IQ (F5PIQ) and 9A3A (5B4ADA) (pending travel arrangements). Activity will be on the HF bands, mostly using SSB and CW. QSL via 9A1AKL, bureau or direct to P.O. BOX 439, HR-21000 SPLIT, CROATIA.

EU-116. Members of the Bristol Contest Group will be operating from the Isle of Man during the 1998 IOTA Contest using either GT6YB/P or GD6YB/P. QSLs will be handled by G3SWH (Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom) or via the RSGB bureau.

NA-100. Remember to look for V26VG to be activated by GM4FDM and the Scottish Group during and after the IOTA Contest. QSL to GM3UTQ direct or via the bureau. After the contest, the operators will use V2/homecall. QSL for these operation to their home callsign.

NA-106. The Dalkey Island Contest Group will be active from the U.S. Virgin Islands in the Caribbean for next weekend's IOTA Contest. They will be active from July 22-29th using their own calls with the KP2/ prefix and will use the callsign WP2Z during the contest. Operators are Paul/EI2CA, Peter/EI7CC, Aiden/EI8CE, Tony/EI6EW, Sean/EI7CD, Keith/EI4FBB and Gareth/EI5FYB. Look for them on their Web page at: http://jump.to/EJ1D -or- E-mail them at: EJ1D@islands.vi

EU-128. The planned IOTA Contest activity by DL6MHW/P is still not confirmed due to some transportation problems (The old VW of DL3ABL depicted on the 1997-Fehmarn-QSL, has some motor-problems). If possible, Michael will operate again from Fehmarn Island signing DL6MHW/p with Butternut HF6 and 600 watts. Please note the new QSL address of DL6MHW and DL3ABL: Michael Hoeding, Ginsterweg 51, 39326 Wolmirstedt

NA-112. Philip/K4EP and Craig/KF4NLM will be active as K4EP from Bogue's Bank for the IOTA contest. They plan to have two stations active for the contest. They will be on 20 through 10 meters and hope to have some activity on 80 and 40 meters. QSL via K4EP.

NA-154. The Truro Amateur Radio Club will be active during the upcoming IOTA contest from Pictou Island. The callsign will be VE1AO and QSLs are via VE1VOX.

KH6BZF REPORTS (Part 2 - BAND-BY-BAND PROPAGATION EXPECTATIONS). This will be sent to all OPDX InterNet Subscribers as an additional bulletin.

KL7, ALASKA. Maurice, ON4BAM, reports that he will be touring KL7-land from July 24th until August 9th. His trip takes him from Anchorage to Fairbanks, Valdez, Homer and Seward. Along the way, he will be active on HF while driving and in the evenings from his campsites. Maurice will be using a TS-50S and Outbacker antenna while driving and whatever wires will fit when parked. Look for KL7/ON4BAM on 20 and 17 meters or the higher frequencies as propagation will allow.

QSL INFO AND NEWS.....
AT0PAI and VU2PAI/50 QSLs. Pai, VU2PAI, reports to OPDX that he would like to inform all Dxers that he apologizes for the delay in replying to the QSL requests for these cards. Pai states that he has been out of the country and was very busy with the work, but QSLs are beginning to go out and the back logs should be cleared up pretty soon. He would also like to inform everyone that the QSL info given in the 1998 call book is incorrect, but the QSL info in the 1996 and 1997 call books are "OK". Correct address is: Ananth G. Pai, P-BOX 730, Bharath Beedi Works LTD, Kadri Road, Mangalore ZIP 575 003, INDIA. His E-MAIL: VU2PAI@bkk.win-net.org

Harris, N2ERN, reports that he is NOT the QSL Manager for RV6AB or for any EP station. He states that he does not have knowledge of any operations or the logs, nor the QSLs. Any cards received by N2ERN for these operations will be returned in the SASEs, or if no SASE is enclosed, will be discarded. Contributions will be returned PROVIDED A SASE IS ENCLOSED. He does not know if RV6AB is the QSL Manager for anyone, but RV6AB's address is: Victor Babenko, Box 33, Armavir 352900, Russia

T2, TUVALU. Yoshi, JA2ECL, will be here July 26th and will stay until August 6th. He will be active as T20YK. He will be taking an ICOM IC-706 (100w) and two antennas (2 element beam for 15m and a dipole for 40m). He hopes to operate RTTY as well as SSB. QSL via JA2ECL

TX8, BELEP ISLAND (New Caledonia). Eric/FK8GM, Franck/FK8HC and one other will try to be active from Belep Island (IOTA OC-079) from August 28th to September 2nd. They will use FT1000D, FT1000MP, TH5X, 203BA, R7. They hope to obtain the TX8B call sign. QSL via FK8HC (unfortunatly, no bureau and remember one U.S. green stamp is not enough to cover the postage).

WH2, GUAM. Naoki, JE7RJZ, will be active from Guam as WH2M from July 24-28th. He will concentrate his activity on the AO-10 satellite and 6 meters, but he will also be active on HF bands. QSL via JA7FWR.

XV7SW NOW QRT FROM VIETNAM. Rolf, SM5MX, has now returned to Sweden after reactivating his callsign XV7SW during an extended vacation tour. When finally pulling the big switch in Hanoi, his accumulated total was 25,616 QSOs on CW and 59 on SSB. QSL cards can be sent via bureau or directly either to his home call SM5MX or to his manager SM3CXS. Rolf will move to the Swedish Embassy in Tokyo in September. He is contemplating leaving it to others to provide Japan for DXCC.

YO, ROMANIA. Jean, F6AJA, from the LNDX, will once again be active as YO/F6AJA from YO8FZ's QTH from July 22-26th. He will only operate during his free time.

YO-DX HF CONTEST. Ciprian, YO3FWC, reports to OPDX that the YO-DX HF Contest is scheduled on August 2nd, 0000-2000z. Rules can be found on the Romanian Amateur Radio Web page "FRR" at:
http://www.qsl.net/yo3kaa/contests.htm
This site is designed and maintained by YO3FWC. The E-mail address is:

2378. Re: DX this for only $6

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-19 00:00:00 UTC
From: godzilla@panix.com
Message-ID: <6otsu4$la1@panix3.panix.com>
Source record: 28257

Yeah, right. More junk, more spam. If you believe this, I have got a
bridge to sell you.....

L Neen Yo (lneenyo@aol.com) wrote:
: THIS REALLY CAN MAKE YOU EASY MONEY!! IT WORKS!!!
: A little while back I was browsing through newsgroups, just like you are
: now, and came across an article similar to this that said you could make
: thousands of dollars within weeks with only an initial investment of
: $6.00! So I thought, "Yeah, right, this must be a scam", but like most
: of us, I was curious, so I kept reading. Anyway, it said that you send
: $1.00 to each of the 6 names and address stated in the article. You then
: place your own name and address in the bottom of the list at #6, and
: post the article in at least 200 newsgroups (there are thousands). No
: catch, that was it. The first thing I thought of was that this is a
: common old 'pyramid' scheme (through the mail that I have always thought
: was BS and throw in the trash). However, after studying this, I began to
: see that this was quite different (reach 100's of thousands, with very
: little effort, very little invested, and totally legal). So after
: thinking it over, and talking to a few people first, I thought about
: trying it. I figured what have I got to lose except 6 stamps and $6.00,
: right? Like most of us I was a little skeptical and a little worried
: about the legal aspects of it all, so I checked it out with the U.S.
: Post Office (1-800-725-2161) and they confirmed that it is indeed legal!
: Then I invested the measly $6.00. Well GUESS WHAT!!...within 7 days, I
: started getting money in the mail! I was shocked! I figured it would end
: soon, but the money just kept coming in. In my first week, I made about
: $25.00. By the end of the second week I had made a total of over
: $1,000.00! In the third week I had over $10,000.00 and it's still
: growing. This is now my fourth week and I have made a total of just over
: $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00,
: and 6 stamps, I have spent more than that on the lottery!! Let me tell
: you how this works and most importantly, why it works.... also, make sure you
: print a copy of this article NOW, so you can get the information off of it, as
: you need it.

: STEP 1:
: Get 6 separate pieces of paper and write the following on each Piece of paper
: "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE
: inside EACH of the 6 pieces of paper so the bill will not be seen through the
: envelope to prevent thievery. Next, place one paper in each of the 6 envelopes
: and seal them. You should now have 6 sealed envelopes, each with a piece of
: paper stating the above phrase, your name and address, and a $1.00 bill. What
: you are doing is creating a service by this. THIS IS ABSOLUTELY LEGAL! Mail the
: 6 envelopes to the following addresses:

: #1.)Jeff Sheriff
: 40 Dodson St.
: Hamilton, Ontario, Canada
: L9A3K6

: #2.) Mark Baker
: P.O Box 78805
: Atlanta, GA 30357-0805

: #3.) Stephanie Phipps
: 2 Blue Brook Lane
: Westford, MA 01886

: #4.) Meredith Dean
: 2007 Rolling Hills Ave SE
: Renton, WA 98055

: #5.) Rita Bennett
: 6164 92nd Ave SE
: Mercer Island, WA 98040

: #6.) Chris Williams
: 5214 S. Youngfield Ct.
: Littleton, CO 80127

: STEP 2:
: Now take the #1 name off the list that you see above, move the other names up
: (6 becomes 5, 5 becomes 4, etc..) and add YOUR Name as number 6 on the list.

: STEP 3:
: Change anything you need to, but try to keep this article as close to
: original as possible. Now, post your amended article to at least 200
: newsgroups. (I think there is close to 24,000 groups) All you need is 200, but
: remember, the more you post, the more money you make!

: ---DIRECTIONS ----- HOW TO POST TO NEWSGROUPS-----
: Step 1)
: You do not need to re-type this Entire letter to do your own posting.
: Simply put your cursor at the beginning of this letter and drag your
: cursor to the bottom of this document, and select 'copy' from the edit
: menu. This will copy the entire letter into the computer memory.

: Step 2)
: Open a blank 'notepad' file and place your cursor at the top of the
: blank page. From the 'edit' menu select 'paste'. This will paste a copy
: of the letter into notepad so that you can add your name to the list.

: Step 3)
: Save your new notepad file as a .txt file. If you want to do your
: postings in different sittings, you'll always have this file to go back
: to.

: Step 4)
: Use Netscape or Internet explorer and try searching for various
: newsgroups (on-line forums, message boards, chat sites, discussions.)

: Step 5)
: Visit these message boards and post this article as a new message by
: highlighting the text of this letter and selecting paste from the edit
: menu. Fill in the Subject, this will be the header that everyone sees as
: they scroll through the list of postings in a particular group, click
: the post message button. You're done with your first one!
: Congratulations...THAT'S IT! All you have to do is jump to different
: newsgroups and post away, after you get the hang of it, and it will take
: about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU
: POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM
: OF 200** That's it! You will begin receiving money from around the world
: within days! You may eventually want to rent a P.O.Box due to the large
: amount of mail you will receive. If you wish to stay anonymous, you can
: invent a name to use, as long as the postman will deliver it. **JUST
: MAKE SURE ALL THE ADDRESSES ARE CORRECT.**
: Now the WHY part: Out of 200 postings, say I receive only 5 replies (a
: very low example). So then I made $5.00 with my name at #6 on the
: letter. Now, each of the 5 persons who just sent me $1.00 make the
: MINIMUM 200 postings, each with my name at #5 and only 5 persons respond
: to each of the original 5, that is another $25.00 for me, now those 25
: each make 200 MINIMUM posts with my name at #4 and only 5 replies each,
: I will bring in an additional $125.00! Now, those 125 persons turn
: around and post the MINIMUM 200 with my name at #3 and only receive 5
: replies each, I will make an additional $626.00! OK, now here is the fun
: part, each of those 625 persons post a MINIMUM 200 letters with my name
: at #2 and they each only receive 5 replies, that just made me $3,125.
: 00!!! Those 3,125 persons will all deliver this message to 200
: newsgroups with my name at #1 and if still 5 persons per 200 newsgroups
: react I will receive $15,625,00! With an original investment of only
: $6.00! AMAZING! When your name is no longer on the list, you just take
: the latest posting in the Newsgroups, and send out another $6.00 to
: names on the list, putting your name at number 6 again. And start
: posting again. The thing to remember is, do you realize that thousands
: of people all over the world are joining the internet and reading these
: articles everyday, JUST LIKE YOU are now!! So can you afford
: $6.00 and see if it really works?? I think so... People have
: said, "what if the plan is played out and no one sends you the
: money? So what! What are the chances of that happening when
: there are tons of new honest users and new honest people who
: are joining the Internet and newsgroups everyday and are willing
: to give it a try? Estimates are at 20,000 to 50,000 new users, every
: day, with thousands of those joining the actual Internet. Remember, play
: FAIRLY and HONESTLY and this will work. And just think...for every $6
: investment you make, you can bring in all this money!

Even if you found one, you would still have to drink American beer (an oxymoron for sure) chilled down below freezing point and the waiter would ask you to enjoy your after dinner cigarette outside. Oh well....

Of course, the best of both worlds is when you call CQ DX, work
the DX, and the ensuing pileup is on YOU. :) Only had that happen
a time or two.

Hey Walt,

If you come to my town (Hillsboro, OR) I'll treat you to a
great (East) Indian meal in Beaverton called Swagat's. Not
much on atmosphere, but great food! I guess there are a
couple other good ones in the Portland area, but a lot more
bad ones.

OK, now for you Peter, when you visit I'll take you on a tour
of Portlands microbreweries, some of the finest ales you'll find,
even in merry ol' England. As far as the smokes, the air is
really nice outside, you'll enjoy it. ;) ;)

After 30+ yrs, I read these posts, and I smirk.
The problem isn't with QSL managers, GBT.

It's with DX'ers

Buy your QSL,
or just be old enough.
Get on that DX net, just ask your buddy
Send 48 IRC's, that makes up for the bad conditions
Get that 4CW25,000 working on 20 Meters

It all works, and it makes that certificate so
worthwhile!. We're so proud of you!

I gave up, and I'm ashamed of the fraternity.

Ted

I'm sure the FCC wouldn't want us to make an "Ass" of ourselves by trying
to contect all thos SKs with expired licenses !!! <smile>

2387. Re: cmos super keyer 3

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-21 00:00:00 UTC
From: artky1k@northlandlink.com
Message-ID: <35b49cbb.1863174@news.tds.net>
Source record: 28266
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.dx

Please beware of the super keyer III.

It is truly a high performance unit, and nothing compares to it. But, it is not without problems......

For a stand alone keyer with an AC power supply, nothing touches it--

But, the vendor is (IMHO) a fly by night publisher (check out the listing for Idiom Press in Books in Print).

No support is available, we are not even given a phone number and the owner of Idiom Press does not identify himself!

Would you pay 60 dollars for a semi kit knowing that the unit is a throw away device if it ever becomes defective? Remember, there is NO WARRANTY and there is no support or promise to make bug fixes!

Additionally, the CLAIM that it uses 'ultra low power for battery operation' is HIGHLY questionable.....

First of all, there is no provision for a logic output for the monitor-only AC drive is available for a speaker. This means that ultra small piezo buzzer cannot be used-so, the unit draws 40+ ma due to the power sucking (and boat anchor physical size) of the 8 ohm speaker!

If we are willing to settle for a fixed 3k monitor tone, we can use an ultra small piezo buzzer, which will be VERY LOUD and the entire unit draws 10 ma when the monitor is active. I used a 3.3 khz piezo buzzer in my super keyer I and the lack of a 750 hz monitor tone has NEVER hindered or annoyed me! I DID NOT build the super keyer II because it had the same bug (lack of support for a piezo buzzer).

Also, there is no dead man watchdog! If I turn off the monitor and leave the keyer on the bench, it is possible to have the keyer send cw if the paddles get bumped or closed by accident. With the paddle switch closed, the keyer stays in the high power use mode (4+ ma) forever, and this is unknown to the op! If the user wants to use small batteries in the interest of having a self contained compact/portable unit, the batteries will die in a matter of a few hours or days at the most.

There are no provisions to warn the operator that the keyer is active....and there are no provisions to force the keyer into the 10 microamp sleep mode after a given period of time either!

So, the combination of these 2 problems forces the user to select physically large batteries and limits the size of the enclosure very seriously!

If the support for the piezo buzzer was present in the software and the dead mans watchdog was added to the software, then I could use ultra small 1.5 volt mercury cells (because the keyer would only draw 10 ma when active). Instead, I have to use AA cells, and the size of my battery bank is roughly the same as the keyer cabinet is--so the big batts actually DOUBLES the physical size of the keyer!

Yes, a power switch can be used-but WTF??? We build this and similar devices without a power switch because they draw so little power in standby! I don't really want a power switch, and I don't think the average operator does either!

Anyone considering the purchase of a super keyer III should be aware that the 'super low power consumption' claim is BOGUS and that it fails MISERABLY in the portability/compactness department as well.

I made Idiom Press aware of these oversights, with he hope that they would supply modified firmware in later versions, but I was told by one of the firmware authors that Idiom Press is not interested in improving the product and that requests to them to make improvements would fall upon deaf ears.

Idiom press DID respond to my written letter, but they indicated that no improvements would be made in the firmware.

Buyer Beware.

GL...

Art...

PS I'd like to see the unit made in a SMT version--both chips are available in smt versions. This would make the entire PCB less than 1/3 of its present size. If piezo buzzer and the memory pushbuttons could be pcb mounted, the unit would be totally SELF CONTAINED and would still be less than 1/2 the size of the current pcb! The reduced size would allow us to do GREAT things with it!

If the unit had proper support for reduced battery size (power consumption), the ENTIRE keyer electronics, monitor, memory swiches and batteries could be built into the base of a bencher paddle! That would be a HOT setup!

Based on Idioms NEGATIVE attitude relative to bug fixes, I have not suggested this to Idiom.

Anyone have any pull at Idiom?

Source record: 28268

Greetings,

Our new Active Beacon Wizard ++, is available for download. Please feel free to try oit ABW ++. It is a full version, no time limit and in no way crippled.

Very briefly ABW ++ displays the currently active NCDXF beacon over a topographic map, along with the solar terminator. Tools for setting the system clock are also provided.

ABW ++ will download and display up to five selected Space Environment Center (SEC) solar reports and forecasts.

ABW++ provides the comprehensive SEC glossary of solar terrestrial terms. This glossary is in windows help format and may be of significant help when interpreting the propagation reports and forecasts.

The ABW++ "Get Time" and "Get Latest Reports" functions make use of an internet connection.

Look for the "Active Beacon Wizard ++" link at the URL below.

73 & Good DX,

I must say I spent a long while fiddling with this on the II as the
speaker was not loud enough. In the end I used a small audio output
transformer of the type used in cheap transistor radios.

This does not bother me as I constructed the keyer as a portable device
with self-contained AA cells. When not in use, the key and output leads
are un-plugged before it is packed away.

>Anyone considering the purchase of a super keyer III should be aware
>that the 'super low power consumption' claim is BOGUS and that it

I'm quite happy with the battery like of the II on AA cells. Of course
if you can design an improved version, I would be interested in buying
it.

I did think it a but strange that it is only possible to contact them by phone and they only accept cheque payment. This makes it difficult to purchase if you are outside the USA. I had to send an AmEx travellers cheque to purchase the II kit.

These are all good ideas.

2399. ARRL Proposes Simplified Amateur License Structure

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-22 00:00:00 UTC
From: Bob <bdiaz@pacbell.net>
Message-ID: <35B6B8F8.CB@pacbell.net>
Source record: 28328
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.policy,misc,rec.radio.amateur.equipment

ARRL Proposes Simplified Amateur License Structure

In case any of you have missed it, the ARRL board has come up with
a Proposed Simplified Amateur License Structure. Please see the
following link for more information and / or to comment:

http://www.arrl.org/news/restructuring/

Some will like this, some will not like it, but the bottom line is
that IF the FCC OKs this, one could be a Class "C" (General Class)
with a code requirement of 5 WPM. Class "A" (Extra Class) and
Class "B" Advanced Class will have a code requirement of 12 WPM.

Here's a little of what's found on the ARRL's page:

The ARRL Board has agreed to propose a simplified Amateur Radio licensing
structure with four classes. Lengthy discussion and debate during the Board's
meeting July 16-18 led to majority support for a plan for four written
examination elements to establish amateurs' operational and technical
qualifications instead of the present five, and two Morse code examination
elements instead of the present three.

Under the plan adopted by the Board, the entry level to Amateur Radio would be
known as Class D and would convey the privileges of the present Technician
license. The written examination would be at the same level of difficulty as
that of the present Technician examination, but consistent with the privileges
of the license. All amateurs now licensed as Technicians would become Class D.

The next step would be known as Class C and would convey the privileges of the
present General license, but with phone subbands expanded by 50 kHz on 75 and
15 meters and by 25 kHz on 40 meters. Class C would be the entry level to high
frequency (HF) operating privileges. To upgrade from Class D to Class C, an
amateur would pass a written examination on the operational and technical
qualifications required for HF operation and a 5 word per minute Morse code
examination. All amateurs now licensed as General, Technician Plus, and Novice
would become Class C. The expansion of the telephony sub-bands would result
from "refarming" of the Novice CW bands that are no longer required for their
original purpose.

The third step would be known as Class B and would convey the privileges of
the present Advanced license, but with phone subands expanded by 50 kHz on
75 and 15 meters and by 25 kHz on 40 meters. To upgrade from Class C to
Class B, an amateur would pass a more advanced written examination similar
in difficulty to the present Element 4A and a 12 word per minute Morse code
examination. All amateurs now licensed as Advanced would become Class B.

The final step would be known as Class A and would convey the full privileges of the present Amateur Extra Class, with telephony sub-bands expanded by 50 kHz on 75 and 15 meters and by 25 kHz on 40 meters. To upgrade from Class B to Class A, an amateur would be required to pass the most difficult written examination in the sequence. Consistent with the practice in many other countries, no additional Morse code examination would be required beyond 12 words per minute. All amateurs presently licensed as Amateur Extra Class would become Class A.

In their discussions, Board members emphasized that the objective is to rationalize and simplify the amateur licensing structure without reducing the requirements for any class of license. Where reductions in Morse code requirements are proposed, there would be a corresponding increase in written examination standards. On the other hand, Board members were adamant that simplifying the structure should not come at the expense of privileges already earned by amateurs. Therefore, present Novice and Technician Plus licensees, having earned entry-level HF operating privileges, would be granted the new entry-level HF license.

Adoption of the simplification plan marks the culmination of 30 months of work by the Board, during which time the input of literally thousands of ARRL members and other amateurs and prospective amateurs was considered. The Board debated a wide variety of options including both smaller and larger numbers of license classes, higher and lower qualification levels, and different privileges. Nine of the 15 Directors voted in favor of the plan, with six opposed. Following the meeting ARRL President Rod Stafford, W6ROD, observed, "The debate was at times contentious and the result was not unanimous. Some Board members preferred greater simplification; others were uncomfortable with some of the changes being proposed. However, every Board member, without exception, left the meeting knowing that each of his or her colleagues did what they believe is best for the future of Amateur Radio."

2401. REBUILDING 4U1UN.

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-23 00:00:00 UTC
From: AA2FN@smart-ras.smartweb.NET
Message-ID: <199807231247.IAA10400@chmls05.mediaone.net>
Source record: 28330

THE REBUILDING OF 4U1UN

Recently there has been a fair amount of comment appearing on the
subject of the status of operations at 4U1UN.
As I was the Station Manager of 4U1UN for many years, I thought
it could be useful to provide you with some information concerning
the problems that arose at this station, and perhaps what can be
done to improve the situation.

As many of you already know, for several years, 4U1UN in addition
to its normal operating activities had been engaged in
disaster related operations following the occurrence of natural
disasters where as radio amateurs our responsibility was to render
assistance when the normal channels of telecom were either destroyed
or disrupted.

This was not a new idea, and has been part of the amateur radio
tradition from the beginning. In 1986, in order to make the emergency
operations more effective, and following the earthquake in San Salvador
in October 1986, both Raymond, KB2BKO who had been a UN staff
member (now retired) and myself thought we should form a special
volunteer group at UN Hqs and we came up with the name,
"UN Amateur Radio Readiness Group".

In 1988, after Raymond became the President of the Amateur Radio Club,
we began to recruit both UN staff and non-UN volunteers for the group.
Shortly afterwards, as many of you know we then became quite active
on the air from 4U1UN in promoting the "Radio Readiness Group"
and many amateurs stations were recruited to join in the effort.
A training and coordination net was established and a call in
and working frequency was set up on 14.268.

We tried to keep track of any meaningful disasters that had taken
place and responded accordingly. And in this way, the Readiness Group
operating from 4U1UN joined other already existing radio emergency
nets that have done such good work in helping out after disasters.

Truly, what made the Readiness Group effective was the excellent
cooperation that we received from any and all amateur radio
stations that checked in on 14.268. If one reason can be cited
for the success, as it was, of the Readiness net, it was the special
spirit of radio amateurs who with their operator expertise can
and have made a difference in so many crisis situations. Maybe
4U1UN added some coordination, but its really the already existing
amateur radio community that got the job done. It reminds me of
a comment that Om Keith, NP2CM made during the Hurricane Hugo

operation when we were talking about procedures that might be set up, he said, "Its not necessary to spend to much time on procedures, hams know what to do".

Unfortunately, at the same time as we sought to further develop the "Readiness Group", there was a small group of individuals at the UN, who for their own reasons sought to inhibit and impede the operations of the group.
There were some rather serious overt efforts on the part of these people to close down 4U1UN's emergency ops which took many forms, including incidents where these individuals brought UN Security to the station to interrupt an emergency operation in progress -- very serious indeed and most unpleasant.

But many of us were oldtimers, used to working through the pileups, who don't give up so quickly. We were convinced that we were both legally and morally correct in conducting these type of emergency operations, and especially at the UN, and so we continued, but it wasn't easy.
I, along with other principal operators of the Readiness Group HQs station, for example, Om Gunn, N2ATF; Carmelo, AA2FN; Bill, K2TT; Ken, WZ1A and others were not UN staff -- we were so called "outsiders" and therefore in effect became "moving targets" to be picked off one by one. There had been several excellent operators on the UN staff who had been at the station in previous years but they had retired. One person who we may cite as being very supportive throughout was the VP of the Radio Club, Om Vinny, K2FC.

Matters became more serious when in November of 1996, a UN Staff member, who at the time was not in the Radio Club himself, was responsible for the writing of a Memorandum which was disseminated to many persons within the UN Hqs which stated that the Readiness Group operations were prohibited because (in his opinion) they were not in keeping with a UN Staff Recreation Council regulation.
His view was that since the radio club fell under the umbrella of a club organization at Hqs -- the aforementioned "Staff Recreation Council", that by carrying out emergency operations at the amateur radio station, we were in violation of a Recreation Council regulation which says that, "Clubs act in such a way as to be consistent with the primary purpose of recreation and avoid participation in activities which imply any official commitment or approval by the UN".

To my view, his interpretation totally disregarded the essential point where the authority for the amateur radio station -- 4U1UN - does not come from the Staff Recreation Council at all. The authority to create and operate an amateur station at the UN comes from the Secretary General to his designated Officer, where the UN undertakes to comply with the undertakings it has entered into at the various telecom conventions, all of which prioritize

and support the involvement of amateur radio stations in
disaster communications. Therefore, to say that the stations
operations should be subservient to the Staff Recreation Council
was a specious argument and in my opinion without merit-- the
ITU agreed. The Staff Recreation Council, is an amorphous body
which has no competency in telecommunications.
In point of fact, the licence to create and operate 4U1UN was
not given by the Recreation Council but by an Assistant Secretary
General.

In the same November 1996 Memorandum, the writer cited measures
that should be be taken, "in order to avoid the continuance of
such illegal activities and the presence of outsiders on UN
premises" (this was a strange comment, I thought the UN belonged
to all of us and was not some kind of secret society!!).
The writer ended his Memorandum by stating that, "In addition,
I believe that the presence of Mr Rosen (thats me!) on UN premises
should be permanently prevented".

Before continuing, I should mention that the writer of this
Memorandum was not in the Staff Recreation Council and in fact
most of the persons in the Recreation Council have praised the
disaster, humanitarian operations of 4U1UN and the Radio Club!
Nevertheless, the November 96 Memorandum was circulated to many
within the UN who knew very little about amateur radio and took the
statements quite literally, especially since the writer had not
signed the document himself but had his superior (a higher level
person) sign the Memorandum.

In my opinion, this campaign, in large part, was responsible
for me and other non-UN radio amateurs in not having our ground
passes renewed -- passes we had for ten years.
And even staff members who had heard about our problems suddenly
became afraid to associate with us!

Through all of this we did the best we were able to do in continuing
to operate the station for both disaster and normal amateur
communications objectives, and we tried to enlist and train
UN staff--this was very difficult as the station was located
in a very small area, not even a room, which even then wasn't
available at most times during the day, and many evenings.

Besides the disaster operations, we tried to enter every contest we
could--we felt an obligation to do so because of the privileged status
of 4U1UN. And by the way, in my opinion, dxers and contestors make
some of the best emergency operators that can be found. Isn't that
what makes the amateur service so important and special -- a service
made up uniquely of highly skilled communicators (which includes CW
skills, I can't tell you how many times CW has been used in passing
important messages out of distressed areas).

Our situation at the station became more and more difficult and finally on the morning of the 27th of January 1997, when I went to the station to complete installation of an R5B vertical, so the 4U1UN beacon could operate on all bands, even though I had been working with certain staff members of the Club earlier in the week, I found all locks had been changed and the beacon taken off the air and locked away in a cabinet! It was only after I wrote several Memorandums, which was supported by a Memorandum to the UN from Om Jack, W6ISQ that the beacon was restored to operation--two weeks later.

To bring matters up to the present, we have asked to meet with senior level officials at the UN in an attempt to regularize this situation--in our view, 4U1UN should not be relegated to being a station to be used for "recreational purposes" where disaster communications are considered to be illegal!!

Since January of 1997, the station has largely been off the air, although we note that some outside operators have been brought in from time to time, a total of a few hours operation over the last year.
All of the yagis that we had installed over the years have been taken down and the only hf antenna that remains is the beacon vertical, the R5B.

But if we are successful in our discussions, antennas that have been taken down can be re-installed, thats not the problem. What is important is to have the backing of the UN administration, where they will take a direct hand in ensuring that the station can function correctly and appropriately.

We would greatly appreciate any opinion you may have on all of this, and we can be reached at: k2gm@contesting.com, or the landline is 212 987 4550 and fax 212 369 3427.
In addition, if you wish to express your opinions to the UN you might consider sending either a letter or fax (sri no email available) to the Secretary General of the United Nations, Mr. Kofi Annan, UN Headquarters, Secretariat Building, Room 3800. New York, NY 10017 or by fax at 212 963 4879.

I will keep you informed as to developements.
And in the meantime, next time there is a disaster, the extended Radio Readiness net still exists (made up of amateur stations worlwide). Please look for a Radio Readiness controller on 14.268 and you are most welcome to join in any efforts underway.

If we are not able to resolve the UN issue, we will establish a new principal net control station for the Readiness group. Of course this will be from another location and another call sign.
There have been several offers to accomodate the group elsewhere.

Finally, I wish to thank the many stations who have sought to help in this situation and who have posted comments on the DX

reflector and elsewhere.

Vy 73 de Dave, K2GM

On behalf of the stations of the Radio Readiness Group.

SB DX ARL ARLD029
ARLD029 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 599 Report, The Daily DX, DXNS and Contest Corral from QST. Thanks to all.

SOV. MIL. ORDER OF MALTA. IK0FVC, I0JBL, I0CUT, IK0PRG, IK0MBB, I0HCJ, IK0HBN will be QRV from July 25 to August 3 as 1A0KM, on 160 through 2 meters. QSL via IK0FVC.

WESTERN SAMOA, 5W. Sakuma, JI3WLT, is QRV as 5W1SA using CW, SSB and RTTY on 30 through 10 meters. QSL via JH7OHF.

CHAGOS ISLANDS, VQ9. VQ9VK is QRV from Diego Garcia Island, on CW on 17 and 12 meters. QSL via N1TO.

CHAD, TT. Jim, WA4KKY/TT8JWM, is operating 20, 17 and 15 meters on SSB and RTTY until August 7 or 8. QSL via N4RXL.

MIDWAY ISLAND, KH4. Ted, NH6YK, will be active from July 30 to August 12. He prefers 20, 17, 15, 10 and 6 meter SSB.

TUVALU, T2. Yoshi, JA2ECL, will be active from July 26 until August 6 as T20YK, using RTTY and SSB. QSL to home call.

GUAM, KH2. Naoki, JE7RJZ, will be active from Guam as WH2M from July 24 to 28. He will concentrate on the AO-10 satellite and 6 meters, but will also be active on the HF bands. QSL via JA7FWR.

CORSICA, TK. Robert, S53R will be QRV July 26 to August 17 as TK/S53R using CW and SSB on all bands including RS-12/13. He will QSL all QSOs automatically via the bureau.

IVORY COAST, TU. Ken, K4ZW, will be active from July 25 to August 9 as TU/K4ZW. QSL to home call.

HAITI, HH. Phil, KC0ARG, will be visiting HH2NH's QTH from July 24 to 30 and plans to be active as HH2/KC0ARG. Operations will be on SSB on 20 and 10 meters. QSL via F6DJB.

ALASKA, KL7. Maurice, ON4BAM, will be touring KL7-land from July 24 to August 9. He will be active on HF while driving and in the evenings from his campsites as KL7/ON4BAM on 20 and 17 meters or the higher frequencies as propagation will allow.

TAIWAN, BV. The 20th annual Asian and Pacific Jamboree station BV20APJ will be active from August 2 through 9. Activity will be on 80 through 10 meters, CW and SSB. The first 15 minutes of each hour will be mainly for QSOs for Scout persons only. QSL via bureau.

THIS WEEKEND ON THE RADIO. The RSGB Islands On The Air Contest is on tap for this weekend. Please see July QST, page 98 for details.

I agree about the bad manners of repetitive posting, but a little devil asked me: "Imagine if someone suggested to Walt that the DXCC was the sole arbiter of what is and isn't "DX", what would the response be?"

To someone, somewhere, Ontario must be DX

The term "DX" is so undefined and so abused that it's pretty meaningless. I stopped worrying about the award culture years ago, I'll settle for an interesting QSO anyday.

I couldn't resist!

Sorry!

I agree. The term is meaningless today. It's a 1920s concept where the spanning of successively longer distances with one's amateur station was the supreme demonstration of amateur achievement. The concept of 'DX' has probably passed its use by date and is fast becoming an anachronism.

A two-way QRP to QRP contact of 2000km on 80m within one's own country is not generally considered DX, but a 15 000 contact on 20m (black boxes, beams and kilowatt linears both ends) is. But I know which of these contacts could be considered the most meritorious when all factors are taken into account, and it's not necessarily the longest distance QSO.

Hi !

I am having with sending yapp files bigger than abt.8500 bytes using my
WinPack
packet program here (ver.6.40)
After sending abt 8500 bytes, I get a messag back from the FBB program (on
the BBS) saying something abt that the transfer was interupted by a BREAK
from the user.
But I did not do anything !
Receiving works OK for bigger files.
Have anyone had the same problem, and is it in the FBB program or in the
WinPack ?.

Source record: 28345

Hi all. Hey, I worked Mike LA1VFA on July 9. I sent off the typical qsl package w/ a couple IRCs and a SAE. I got a qsl from him today (July 24), in what I thought was record time and got a note with his card.

Here's his note: "Please put this info on packet cluster. My qsl is only via CBA IRC or 1$ for return postage."

I'll be first to admit to having stone for brains, so what exactly did he mean? Did I send him the wrong thing? What is a CBA IRC? I get mixed up by all the different stuff w/rt IRCs and my 2nd Op is old (can you still get these gizmos?)! If I did send the wrong stuff, I'd sure feel silly. Also, can someone put Mike's note on the packet cluster? I don't have access to the one here (darn where'd I put that application for WWDXCC!)...

Thanks much for any light you might be able to shed on this for me!

>via CBA IRC or 1$ for return postage."

He says "My QSL is only via CALL BOOK ADDRESS, with an IRC or $1 for
return postage". In other words, he doesn't want bureau cards. A lot of
DX cluster nodes have a GO list QSL database, he wants you to add his
QSL info to that, so he everybody sees it....

>I'll be first to admit to having stone for brains, so what exactly did he
>mean? Did I send him the wrong thing? What is a CBA IRC? I get mixed up by
>all the different stuff w/rt IRCs and my 2nd Op is old (can you still get
>these gizmos?)! If I did send the wrong stuff, I'd sure feel silly. Also,
>can someone put Mike's note on the packet cluster? I don't have access to
>the one here (darn where'd I put that application for WWDXCC!)...

Nope, you did it right, he just wants you to spread the word.....

Reply to Sender and Group is frequently valuable in that the reply to the
sender is often of interest to the group. That's what makes this a good
NewsGroup

It is your choice if you want all the SPAM that comes your way when you use these newsgroups. I do not have the time to weed out all the junk, although my system is getting better at doing it for me.

Personal replies are nice, but I think we all learn more from group posts anyway.

CBA= CallBook Address. (it has nothing to do with IRC - there
probably should have been a carraige return/linefeed between the
two<g>)

They changed IRCs a few years ago. You should now only need one IRC
to return a QSL from any country on earth. (in theory. In practice
there are two or three countries that require more than one, but
Norway isn't one of them)

Still, a small number of DX amateurs have been asking for more than
one. My guess is LA1VFA feared he'd been lumped in with those who
some feel are trying to make a buck off QSLing, and wanted to be sure
W amateurs knew he wasn't.

I have stopped replying personally to morons who think they're avoiding spam with that nonsense. I mean, do they really believe that spamming software doesn't know how to automatically remove that stuff anyway?

I believe that practically anyone can learn CW. It really is easy. I struggled with it when I got my ticket at 10 yrs. and 13 wpm was hard for me too, but one day I decided that I was going to spend at least 15 min per night using it. In two weeks I was copying over 20wpm in my head. Iv done nothing but CW for the past 8 years.

It may not be everyone's favorite, but it isn't too difficult to become an obstacle for any half intelligent person.

Oh, please! As you can imagine, with the volume of posting
I do, I get plenty of spam. But it only takes 15 to 30 seconds
a day of pushing the delete key to get rid of it (you don't actually
read that crap do you?). If you don't have that much time, what
are you doing posting to net news?

What *really* peeves me is people who munge their reply
addresses when they send me *email*. (I get 30-40 a day.)
There's no possible way that a valid address sent in private
email can generate spam. I will *not* try to unmunge your
address. If a reply bounces, it bounces, and you won't
get the benefit of an answer to your query.

In the newsgroups, I generally reply to a post with a
follow-up post. So I don't care if the poster's email
address is munged. But if you send me private email
and expect a reply, you'd better have a valid reply
address in the header.

And while on the subject of pet peeves, will you people
please quit posting messages containing HTML junk
in them. They are virtually unreadable, and I will not
take the time to try to ferret out the text amongst all
that crap. Remember, newsgroup postings should
contain *only* plain monospaced ASCII text. Reserve
that HTML crap for your webpage.

There are occasions where a person jumps in a newsgroup for the very first time, and asks a question. And they ask us to please email the reply, because they aren't going to be around...

I find that practice acceptable for honest questions. Not everyone has the time to subscribe to all newsgroups of interest.

But when that same person uses an alias or a "no-spam" alteration of their email address, I tend to move one ot the next post.

I have been online for over twenty years. I have never used an alias. I have never logged on with another acocunt. I have never initiated an anti-spam filter on my end. And life's OK...

Scott,

You are quite right! My son at 12 years old learned CW in 30 days. The number one obsticle to learning CW is "Laziness". There is no way around it..... It takes daily practice..... If you are not willing to invest the time and effort you will never learn code. Not ment to be judgmental, it's just a fact!

Volume 2 Number 140
July 24, 1998
Edited by Bernie McClenny, W3UR

----------------------------------------------------------------------

DX News

----------------------------------------------------------------------

Fabio, I4UFH, and IK2QEI plan to operate from Crete Island (EU-015)
from 3 to 17 August. They will be at the QTH of SV9ANJ and will sign
SV9/I4UFH and SV9/IK2QEI. Activity is planned for 6 through 160
meters on CW and SSB. QSL via home calls.

Today is the 75th anniversary of the signing of the Turkish Republic
which took place on 24 July, 1923 in Lausanne, Switzerland. To
celebrate this event Turkish special event station YM75TA will be
active starting today through 29 October. On October 23, 1923 is
when the Republic of Turkey was founded by Mustafa Kemal Ataturk.
Amateur Radio Operators Nilay (XYL), TA3YJ, and Berkin, TA3J, will
operate this station on 10, 15, 20, 40 and 80 meters SSB. YM75TA
will give out signal reports and a serial number. Special QSL cards
will be available via TA3YJ either direct or via the bureau.

At its Board of Directors meeting on July 21, 1998 in San Francisco,
CA the Northern California DX Foundation re-elected the following
officers and directors:

President Len Geraldi K6ANP
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Lou Beaudet K6TMB
Director Rusty Epps W6OAT
Director Chuck Ternes N6OJ
Director Steve Thomas N6ST
Director Bob Vallio W6RGG
Director Glenn Vinson W6OTC

Al Burnham, K6RIM, formerly a Director, was elected Vice-President.

Bob Fabry, N6EK, was newly elected as a Director.

Jack Troster, W6ISQ, announced his decision to retire from the Board
of Directors.
```

Belarus Amateurs EU4AA, EW4EW and EW4MM will use special event calls EU200A, EV200M and EW200M during the EU HF Championship. QSL via home calls.

QSN

7Z1IS - SAUDI ARABIA - Ibraham was working Europeans and Japanese stations yesterday on 14210 between 19:45 and 20:45Z. QSL via SM0OFG.

9J2BO - ZAMBIA - JA's found Brian on 10110 at 18:50Z. QSL via W6ORD.

FT5XN - KERGUELEN ISLAND - Helios can often be found on 20 meters SSB around 11:00Z. Check around 14195. QSL via F6PEN.

OJ0 - MARKET REEF - Yesterdays activity was as follows:

GMT	Frequency	GMT	Frequency
03	7009 10102	18	7007
04	7012 10107	19	7007
08	14020	20	3507
12	14194	21	1824 3507
13	14195 21021	22	1824 3507
14	14195 24897 28020	23	3507

PZ1DV - SURINAM - Ron showed up on 14017 around 22:30Z, but be aware that he is not a very good QSLer!

TL5A - CENTRAL AFRICAN REPUBLIC - Alex usually starts his hay around 04:30Z on 30, 20, or 17 meters CW. He sticks around until about 05:45Z. QSL via PA3DMH. The logs for this station can be found at http://www.igr.nl/users/pa3dmh/

TY1IJ - BENIN - Sigi was working JA's on 14207 around 21:20Z. QSL via DK8ZD.

Me too. I used to try to respond both to the news group and directly but so many of the direct replys get bounced I normally don't do it any longer. I set filters on the subject so that e-mail with "XXX", "money" and such go directly to the trash can - I never see them. Gets rid of a lot of the spam since most of what I get is either X rated or how to make a million bucks in a week.

It would be a very boring newsgroup that had only posts from people
sucking up information by asking questions only and demanding email
replies.

I don't read newsgroups to read people's questions, I read newsgroups
to see what other people have to say. Since I'm already here, then I
might as well add to the newsgroup by answering questions when I can.

My replies hopefully to appeal to some. Perhaps they wanted to ask
a similar question, but were hesitant for any number of reasons. Or
perhaps they've never thought of asking such a question, but seeing
the answer in some way is helpful. By answering questions, I (and
others) help to keep those people reading the newsgroup, so at some
time in the future when there's a question they can answer, they will
be here to answer. Or maybe at some time in the future, someone else
will ask a question that's already been answered by myself or someone
else, and the people reading the messages today will be able to answer
the question tomorrow because the question and answer has been here
already.

And don't forget the whole point of FAQ's are to collect frequently
asked questions, and answer them, in an attempt to avoid the repetition
in the future. But by keeping things off in email, someone who's good
at cataloging won't have access to the answers, so they'll be unable
to get involved and create a FAQ for the newsgroup.

One of the things that annoys me is when I respond to someone's question
in the newsgroup, many times there will be a followup from the original
poster, but via email. Often, I never get around to answering them,
because I either have to look something up or because I just don't feel
like it. SOmehow, if you answer a question in the newsgroup, you become
an expert or maybe it's just that you are perceived as someone who will
be helpful. But when the poster does a followup in email, they lose
the potential of the collective mind of the newsgroup to respond.

I like it.
If the only reason to keep code other than because someone likes it, is
to weed out undesirables and to be able to send SOS in a holocaust, then
5 WPM should be fast enough for an emergency. I am not against making
the C class licence have the same element requirements as a general in
the written side, but I think 5 wpm is enough.

Mr. albert,

Dyslexia is a visual disorder. There is nothing visual about CW unless you are deaf. Ask the many deaf and blinf CW operators. The web pages you sent me also indicate that Dyslexia is a treatable disorder. In the case of aphasia I can see that being a special case. In fact, there are laws and provisions for people to exempt themselves from the CW requirement by having a waiver signed by a physician. I certianly would not be critical of anyone in this situation anymore than I would someone who participated in marathons in a wheelchair. I know several people from the ranks of amateur radio that have severe dyslexia. I am one of them.

Excuses are like assholes, everyone's got one!

There are ways to munge your address and still make it easy to reply. I'm using
one way.
And it REALLY DOES cut WAY down on spam. I was getting 10 spams a day. Since I

changed my address and started spamproofing, I'm getting 1-2 a week after six
months.

If you don't have a mouse to click or are using an obsolete newsreader, or don't
bother
to read the sigfile or the reply address, or are just plain stubborn, that's
not MY fault.

miker, the spam-free moron

>*read* that crap do you?). If you don't have that much time, what
>are you doing posting to net news?

AT LAST !!! Gary and I agree on SOMETHING !!!

If your time is SOOOO valuable that you can't delete a few junk
email messages, then mine is SOOOOO much MORE valuable,
that I don't have time to fix your NOSPAM.CLAM email address to
try and help you with something.

But as one last chance to get you normal, I'll offer you a solution
to your junk email problems:

1. Go to Deja News and sign up for an account.
2. Change your email address in your newsreader software to

whatever-you-signed-up-with@deja-news.com

3. Go back to Deja News once a week, and read any personal
mail you have. Delete the one or two junk email messages that
make it thru Deja New's junk mail filter.

Usually, anybody you want to get email from knows your email
address anyway....

And for you more parnoid types, I just read that the lastest
email address bots are running around looking thru HTML code
on web pages looking for email addresses too, so if your ham
club club has your email address listed on the club web page,
you are in big trouble....

Seems someone has been able to get 4U1UN back on the air and obviously
not with the Beacon antenna (W3LPL gave a beam direction on the cluster
at one point).

However, I wonder whether last night's operation will really serve the
purpose of re-establishing the station as something international.

All requests from VK/ZL/EU for QSOs have been ignored and at least 95% of
the QSOs (during the short intermezzo in CW on 17m it was 100%) were
US-stations, despite the fact that the bands were open in all directions.

Apart from that, the CW part (didn't last long anyway) was pretty
embarassing to listen to.

I have no definite feelings either way. My only belief is that one should take the code test every 5 years to show proficiency much like a driver's license test. Otherwise you are fraudulently using your license if you do not remain proficient. Too many time I hear persons tell me that they got the 13 wpm just to use the phone. Oh, well. Frankly i wonder why KW, ICOm et al have not pushed this revision before now.

SB DX @ WW $OPDX.367
Ohio/Penn DX Bulletin No. 367

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 367
BID: $OPDX.367
July 27, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W2LK, WB2RAJ/WB2YQH & The 59(9) DXReport, WB2YQH, W3UR & The Daily DX, K6RIM, NN6C, K8YSE, N9WDQ, 9K2HN, EA3CB, G3SWH, G3XTT, G4BUE & DX News Sheet, HA1AG, HL1SSG, I4UFH, IK4CIE, and Tomas Zapattini for the following DX information.

DXERS LOSE A MAJOR INTERNET TOOL! Dxers of the InterNet will lose one of the major mailing lists (run by Lyndon, VE7TCP) known as the "DX Reflector". This mailing list was widely used by many, and it was one of the first stepping stones to start other ham related mailing lists. Lyndon provided this helpful service over the last several years, and his hard work in moderating the list and keeping the mailing list focused mainly on DX turned out to be a major commitment and battle, only to be spoiled by a few individuals. Lyndon's services will be dearly missed, and I (KB8NW) would like to thank him personally for the enjoyment and help he has provided to the DXers of the world.

1A0, SOV. MIL. ORDER OF MALTA. Operators IK0FVC, I0JBL, I0CUT, IK0PRG, IK0MBB, I0HCJ and IK0HBN are now active as 1A0KM until August 3rd. Their planned activities are to be on 160-2 meters. QSL via IK0FVC.

5W, WESTERN SAMOA. The "DX News Sheet" reports that Sakuma, JI3WLT, is active as 5W1SA for the next three years. Operations will be on CW/SSB and RTTY with reported activity on 30-10 meters so far. QSL via JH7OHF.

9K7, KUWAIT (Attention Prefix Hunters!). Hamad, 9K2HN, reports to OPDX that the club station from the "Kuwait Amateur Radio Society", will be signing 9K7POW for their prisoners of war (POW's) still being held by the Iraqi regime. They will start operation on August 1st at 1200z and it will end 48 hours later on August 3rd at 1200z. There will be a special QSL card for this event. QSLs will be "OK" only via the Bureau. Please note that this is the first time 9K7 prefix will be on the air, and maybe it will be the last!! If you are a prefix hunter, it is your chance to work a new one!!

CARIBBEAN TRIP. Carlo, I4ALU, says that he will be going to Martinique (FM) and Guadeloupe (FG) for a vacation tour. Look for FM/I4ALU during August 6-18th and FG/I4ALU during August 19-27th. Activity will be CW only, 80-10 meters but emphasis will be put on the WARC bands. He will work with 100 watts and vertical antenna. QSL via I4ALU either via bureau or direct.

CF3, CANADA (Attention Prefix Hunters!). Look for special event station CF3FHG to be active August 8-9th in celebration of the 125th Anniversary of the Highland Games.

FO, AUSTRALES ISLANDS. Remember to look for Albert, FO5JR, from the Island of Rimatara. He will be there until August 13th. Activity will be mainly CW on 20 and 15 meters (10 kHz up from band edge). Also, remember, Albert does not like pile ups. He likes to carry on a QSO, which includes operator's name and QTH.

FT5X, KERGUELEN ISLAND. Helios, FT5XN, continues to be active from here and can usually be found between 14185 and 14200 kHz beginning around 1100z. QSL via F6PEN.

HB0, LIECHTENSTEIN. "The 59(9) DXReport" states that members of club station DL0HUN will be active now until August 2nd as HB0/DL0HUN. Activity will be on 160-10 meters from Malburn, 2000 meters above sea level. QSL via DL0HUN.

HL50/DS50, SOUTH KOREA (Special Prefix). Min, HL1SSG, reports that Korean radio amateurs are allowed to use "50" instead of their call area number to celebrate the 50th anniversary of Korean government after World War II. Korean government began on August 15, 1948, after Japanese rule for 35 years. All HL stations can use HL50. For example, HL1SSG can use HL50SSG, HL5CL can use HL50CL. Also, look for some Korean stations to use the "50" prefix signing a "/call_area". For example, DS1ABC can use DS50ABC/1, DS4DEF can use DS50DEF/4. The Korean radio amatuers are allowed to use "50" prefix during August 1-31st.

J48/SV8, IONIAN ISLANDS (Greece). Kiki, SV1BRL (YL), will be active until October from Kefalonia Island (EU-052) as SV1BRL/8. Activity will be on SSB, mainly on 80, 40, the WARC bands, 6 and 2 meters bands. If you were lucky to work her between July 24-27th, and during the IOTA Contest, she used a special callsign "J48KEF". QSL both callsigns via SV1BRL.

KH4, MIDWAY ISLAND. Look for Ted, NH6YK, to be active towards the end of the month (July 30 through August 12th) as KH4/NH6YK. Activity will be on SSB 20-6 meters. QSL via home-call.

NCDXF PRESS RELEASE. At its Board of Directors meeting on July 21, 1998, in San Francisco, CA, the Northern California DX Foundation re-elected the following officers and directors:

President Len Geraldi K6ANP Director Chuck Ternes N6OJ
Secretary Tom McShane NW6P Director Steve Thomas N6ST
Treasurer Bruce Butler W6OSP Director Bob Vallio W6RGG
Director Lou Beaudet K6TMB Director Glenn Vinson W6OTC

Director Rusty Epps W6OAT

Al Burnham, K6RIM, formerly a Director, was elected Vice-President. Bob Fabry, N6EK, was newly elected as a Director. Jack Troster, W6ISQ, announced his decision to retire from the Board of Directors. President Len Geraldi, K6ANP, thanked Jack for his years of service, and presented him with a plaque attesting to his outstanding contributions to the Foundation. Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

QSL INFO AND NEWS.....
PA/HA1AG was active during the IOTA Contest this past weekend from Ameland Island (EU-038). Operators were HA0HW, HA1AG and HA4GDO operating from the lighthouse on the island. QSL via HA1UF (bureau is preferred).

Les, W2LK, reports that the 3W6LK/3W6WE QSLs have arrived from the printer July 21st and will start going out this week. All direct QSLs will go first and then the bureau cards.

QSL cards for ZP6T (contest station) is only via ZP5MAL (the address is "OK" in any callbook).

If you got to work OJ0AU from Market Reef (EU-053), QSL to DL6LAU (bureau or direct): Carsten Esch, Kreuzweg 22, 21376 Salzhausen, Germany. The operating team was DJ6TN/Gunter, DK3DM/Heiko, DK7YY/Falk, DL6LAU/Carsten and DL8OBQ/Uli. They will leave Market Reef either July 27th or 28th early in the morning.

Phil, G3SWH, QSL Manager for 9M0C states that he has answered ALL cards received to date which do not have a query of some sort. That amounts to just over 17,000 QSOs confirmed. All these will be in the mail within the next week or so. Phil states, "I am now starting work on the queries, initially concentrating on Japan and the USA, as they represent the greatest numbers of queries. There are several hundred (if not over one thousand) items of mail in the queries box, and they will obviously take several weeks (if not months) to work through and clear."

QSLs for A61AJ. Bernie, W3UR (editor of "The Daily DX"), reports he is now up-to-date on all DIRECT QSL requests for Ali, A61AJ. He does not have the logs for April and May, 1998. He also does not have the logs for January through May, 1997. Ali is currently in the states until the end of August. When he gets back to U.A.E. he will send Bernie the missing logs. Bernie has about 100 DIRECT requests for this time frame. He will start the huge pile of bureau cards in late August after returning from vacation. Bernie states, "Please DO NOT RESEND ANY BUREAU QSL CARDS! I am amazed how many people send multiple, multiple, multiple bureau cards."

QSL ROUTE CHANGE. Bob, WB2YQH, reports that he is no longer QSL Manager for AJ2U/VP9 for 1998. AJ2U/VP9 via AJ2U now. Bob is no longer able to confirm contacts because he does not have any logs and QSL cards. All cards will be returned to the sender ADDED NOTE: Bob is available to

act as QSL Manager for a station. Computerized logging is preferred. Details can be worked out. Contact him by E-Mail (The599Rpt@aol.com) or to Callbook address.

The following Macedonia (Z3) stations can be QSLed via NN6C: Z30M, Z31GB, Z32GW, Z32XA, Z32XX, Z37FCA and Z350GBC.

OLD BRAZILIAN QSLS NEEDED. PS7AB reports to OPDX that he is looking for old QSL cards from Brazilian hams before 1940. He wants to include them in a CD-ROM he is preparing related to the amateur radio activites in Brazil. Those willing to help with original or photocopy, please contact with him via E-Mail (ps7ab@summer.com.br) or P.O. Box 2021, Natal/RN, 59094-970, Brazil.

SV9, CRETE. Juanjo, EA3CB, reports he will be on holiday here next month. Look for him to sign SV9/EA3CB/P August 15-22nd. Activity will be on 80-10 meters with operations mainly on RTTY with some contacts on CW/SSB. Remember, Juanjo is on holiday and will operate in between his stay on the beaches and site seeing. He will QSL automatically via the bureau one month after his operation. Juanjo states he prefers the bureau system but will also accepted direct QSL (repeat, he prefers bureau).

SV9, CRETE. Fabio, I4UFH, and IK2QEI will be active from here August 3-17th. They will be guest operators at SV9ANJ QTH. They plan to use the callsign SV9/I4UFH and SV9/IK2QEI (They have requested 2x1 callsign, but are still waiting, more confirmation later). Activity will be on 160-6 meters SSB and CW. Equipment will be an Icom 706, vertical R7, 4 element yagi for 50 MHz and a windom antenna for 80m/160m (depending on space avalability). USA and JA will be checked carefully on 80/15/10 meters. There is a possibility of 2 meters operations depending on propagation condition. DX Frequency will be used, and when needed, split operation will take place. QSL to respective home callsign via the bureau or direct to callbook address.

TK, CORSICA. By the time you read this, Robert, S53R, should be active TK/S53R until August 17th. Activity will be on all bands CW and SSB plus some satellite operations on RS-12/13. He plans to QSL all the QSOs automatically via the bureau.

USI ALERT. Harold, K1RV, has received permission from the Coast Guard to operate from Little Brewster Island in Boston Harbour. This is a club operation that is participating in the Lighthouses on the Air from Boston Light the weekend of August 22-23rd. His club will be using the callsign N1L. Boston Light was the first lighthouse in America and is now the only "manned lighthouse" in the USA.

VK9C, COCOS-KEELING ISLAND. Look for Hiro, JE5WJM, to be active next month from here, August 8-15th, as VK9CE. His equipemnt will be IC706 (100W) and wire antennas. QSL via home call.

WELL KNOWN DXER TO VISIT THE STATES. It has been announced that the North Alabama DX Club will be holding a DX Dinner Banquet during the Huntsville Hamfest August 15th, at the Von Braun Civic Center, Huntsville, Alabama.

Their guest speaker will be world known DXer Jim Smith, VK9NS. Advanced dinner tickets are $25.00 each and can be acquired by sending a SASE and the total amount for all tickets to the following address: Bruce Smith, AC4G, 15 Henderson Drive, Fayetteville, TN 37334

ZP, PARAGUAY. Word out of ZP-land states that Juan, ZP5MAL, will be active daily on 160 meters from 0300-0500z and from 1000-1130z on Saturdays and Sundays during their winter season (until September).

Gary,
Your postings are always informative and thorough, so I
appreciate your activity in this newsgroup. I would, however,
like to lobby for a different response to spam - both from
you, and from the rest of the newsgroup's readers.
While it may only take a few moments to delete the spam
you receive, the current level of spam activity on the 'net
is only the tip of the impending iceberg. These people are
technically capable of sending tens or even hundreds of
thousands of messages with a click of a button. If spammers
are tolerated instead of eliminated, we can look forward to
seeing a 1000:1 ratio of spam to desirable email. I, for one,
use my email for business and for pleasure, and its utility
would be entirely trashed by such a future.
You might feel that (a) you are an insignificant person
on the net, (b) you do not have the time to deal with spam,
or (c) you don't have the expertise to do anything but hit
the delete. These are the responses the spammers love. If
they send out 10,000 emails that are tolerated, and receive
only one positive response, they've made money! They clicked
a button, and you paid to download their refuse. And no,
there is no long-term safety in filters, or in impending
legislation. These panaceas will work only if spammers find
it unprofitable to circumvent them.
So - what should you do? Take the time to send out some
complaints. Never respond to the spammer's email - it only
verifies your address. Complain to the spammer's ISP, and
if they fail to act, complain to the ISP's ISP. Send out as
many complaints as time allows, even if it's just one every
week or two. Don't just complacently delete spam.

I recommend that everyone spend a little time reading a few anti-spam sites on the net. This is not just another conspiracy paranoia subject. It deserves your time and just a bit of your effort. Please see:

http://spam.abuse.net

Broaden your search from there. This site and others will explain how to effectively complain about spam.

Now, as to the subject of the original posting, whether you use anti-spam measures in your email address is your own choice. I hope people are tolerant of those who choose to do so. They are justifiably angry about spam.

Please forgive the tirade, and the off-topic post.

Seem to be a few issues going on in this thread:

1. Newsgroup postings requesting a personal/email reply.
Although we all recognize the benefit of public postings adding to the base of knowledge, there are legitimate reasons for requesting an email repply. As someone pointed out, people may not tune in regularly to that newsgroup. I believe that the method I use may satisfy everyone. My newsreader can reply to the group, the email, or BOTH. If a person requests an email response and I feel it is of general interest, I reply to BOTH. Really simple. If on the other hand, the question isn't worth replying to, then just don't reply. But no need to taake offense.

2. Anti-Spam munging.
The world is not homogeneous. Some people are more offended by spam than others. People who use a work account (like me) may be particularly sensitive to getting flooded by X-rated messages. What is my secretary or coworker going to think when she checks my email account for me when I'm out of town? And geeze guys, how long does it really take to erase a few characters in an address (as long as the need to do so is prominently pointed out)!

3. Munged (private) emails.
People who munge their reply addresses when they send *email* just need to be reminded that it doesn't help. Also, perhaps it was a mistake. I recently sent a couple emails to people in this group about an antenna question. Unfortunately, I had inadvertantly left my email address munged after doing a few news postings, and forgot to "unmunge" it. Bob graciously replied and reminded me of my error. Gary on the other hand apparently took offense and didn't bother to reply (last names deleted to protect the innocent). Such is life.

BTW.....

DO NOT AUTOREPLY
REMOVE "ZZZ" FROM EMAIL ADDRESS.

I don't know about downloading an application form, BUT I do have
some information that I hope you'll find helpful:

First, check out the following WEB page for new-comers to the
Ham Radio Hobby:

http://www.arrl.org/hamradio.html

Second, I strongly suggest that you visit some of the Ham Radio
Clubs in your area. Many of the Clubs are a GREAT source of
help for new-comers to the Hobby. The following link will
help you find clubs in your area:

http://www.arrl.org/field/club/clubsearch.phtml

To find out about the exams, check out the following link:

http://www.arrl.org/arrlvec/examsearch.phtml

An open letter to VK3CB and the group in Australia.

For the last 2 Sundays, I've heard what sounds like a DX net coming from Australia. I can hear your group around 10 PM Sunday Night (local time in California, USA). I guess that's Monday 05:00.

At this point, I can hear you calling, "CQ CQ CQ ... USA" and boy would I love to answer! However, I still need to do some final changes to my set-up before I can answer. When I do, I sure hope 20 meters is wide open.

I sure hope we can make contact soon. Untill then, I'll be getting all my equipment ready...

73,

Bob
KQ6WQ

NOTE:

My email address does not have CQ in it.

Just remove those letters from my address.

I think that the CW test should be replace with a HF packet network management test.

I still can think of any really use for CW now a days.

Everybody has drop the used of CW in military, coast guard, government, and all other areas of communications where getting the message out is important.

I'm always mystified by those people calling "CQ DX, DX ONLY, PLEASE" (well, some of them are polite enough to say "Please") and then spending 50% of their time telling respondents that *they* are not DX. I quite enjoy pointing out that I'm in the DX listings of the callbook, or asking them if *they're* DX. The general definition of DX now seems to be anything rare or anything not in the CQ caller's card collection (or maybe not with a nice-enough picture) Only telepaths can know whether or not to reply.

It's delightful to hear the minority who actually specify geographic regions or countries.

> A two-way QRP to QRP contact of 2000km on 80m within one's own country

But it's not always delightful to hear the results - one night recently I heard a few G land stations on 20 meters, and since that's a hard place to work from the Pacific, I started calling CQ UNITED KINGDOM. The reaction, judging from the spots from the rest of Europe on the cluster, was not a favorable one. But I did work a few guys from G land.

Folks,

I'm close to buying one of these. Before I make the plunge, I'd like input from those of you that have used one.

My alternate choice would be the FT1000MP, but fully outfitting one of these with filters gets the price up a bit more than I'd like to pay.

I would especially like advice from anyone using transverters in conjunction with the '870.

Thanks

Oh my God, I thought understanding Dutch was a problem, nope, I had my
problems with the radio stuff like:

> Our station is an old Yaesu FT-707. It's an oldie but a goodie! The 707 can deliver a clean 100 watts to the antenna which should be sufficient for some nice worldwide QSO's. We don't know for sure what antenna we're going to use. We can make a simple inverted V dipole for 20 meters and/or 40 meters. But maybe we can borrow a FD-4 which can be used on all non-WARC bands from 80 tot 10 meters. Anyway, if the antenna is not 100% resonant we'll tune it with a Yaesu FC-707 antenna matcher (not in the picture).

I think it's a Scouting Radio thing is it, can someone explain. What's
QSO's ?

Well, since you posted this to rec.radio.amateur.dx, I'm assuming you're interested in DX. PacketCluster is an invaluable tool for any DXer. I have worked perhaps 1/2 of my DXCC total due to PacketCluster. I could've done without, but it would have taken longer.

Sometimes it CAN be a hindrance, too. If I hear a rare or semi-rare DX station call CQ and I'm only running barefoot and probably have a marginal signal at his end, I don't need 200 stations with kW's suddenly materializing in a pileup on him due to a packet spot.

But that's all part of the game!

Since I'm an old Army brass pounder, not a ham - just what is a PacketCluster?

Hi, Ralph -
A packet cluster is a system of digital ham stations
(packet stations) that report 'sightings' of interesting
stations on the ham bands. DX chasers post when they see
any rare prefix, and many DXers keep a window open on
the packet clusters and try to jump at stations with whom
they want a contact. For example, see the following site
for the most recent 25 postings on one active cluster:

http://www.clinet.fi/~jukka/dx25.html

Since I've played only a bit with packet, I don't know
much about how the postings get there (all via Internet?
or typ. VHF packet stations?) or how this information is
passed around. HF packet? Internet links? Someone want
to fill in the gaps? (or correct my mis-information?)

73 - Bob, KI8AB

What happens in the other radio services doesn't necessarily effect us.
For example, domestic and international broadcasters use AM, yet hams
gave that power- and bandwidth-consuming mode up more than 30 years ago.
Your reasoning would have us using AM again in place of SSB and FM;
imagine the howls of the heterodynes! Jeff KH2PZ

Clearly we telepaths have no need of Amateur Radio.

Although with that fairly rare GM4 call, you needn't
resort to telepathy (?)

Well, many people are within radio range (mostly 2-meter FM) of a PACKETCLUSTER NODE. This is a ham who has set up a packet station to interconnect with other nodes much farther away. There can be up to 40 or 50 nodes connected to the PacketCluster network at one time, and each node could have 10 or 20 users (individual ham DXers) connected to it. So it is possible to have several hundred hams connected to this system. Let's say a W1 in Massachusetts hears 1A0KM in the Sovereign Military Order of Malta working people on 14195 kHz. He goes to his computer connected to his packet TNC which is connected by radio to his nearby PacketCluster "home" node and types "DX 14195 1A0KM Good signal!". The computer/radio transmits a signal to his "home node" which then relays it by similar radio/computer systems to all the users connected across his part of the country. They all get a line showing on their computer screens which looks like:

DX de W1XXX: 14195.0 1A0KM Good signal! 2330Z

Now all the people connected know that 1A0KM was reported on 14195 kHz by W1XXX at 2330Z, and if they need it for a band/mode/country, they jump in and try to work him.

Up until the last couple years, it was ALL by radio links. There has been more and more interconnection to Internet links though; now it is possible to even see DX spots arriving from stations in Japan or Africa. These may not be very relevant to a guy in Illinois, but it at least lets everyone know a certain station is active.

The PacketClusters can be used to report whatever the users consider DX; it isn't limited to HF. There are frequent spots for 50, 144 and 432 MHz weak-signal (SSB/CW) stations in rare parts of the country. Satellite DX is also frequently reported.

And during contests which permit the use of PacketCluster as an "assisted" class, the system gets so busy it can get overloaded!

I think that in order to be spared a morse code test, one should be able to display an adequate usage of one's native language with respect to grammar and spelling.

Now, wouldn't that make the numbers of CW licenses issued in the US take a considerable step towards a majority of the hams tested? Imagine the results...

I've had an opportunity to work with the FT-990 and the TS-870 and by far I appreciate the TS-870 because it has IF DSP. The 990 had AF-DSP. I found the AF-DSP very annoying because an interfering IF signal would still raise the s-meter/agc levels up to where it would be very difficult to copy the weak signal of the station I was trying to listen/contact. I don't know if the FT1000 has IF-DSP, but I really liked the 870 because of that one fact.

I hope I answered your questions...

2500. DX Cafe: just an Idea...but possible!

Newsgroup: rec.radio.amateur.dx
Date: 1998-07-29 00:00:00 UTC
From: Fabrizio Sartoni <rac2610@racine.ra.it>
Message-ID: <6pms0b$10m$1@pinco.nettuno.it>
Source record: 28132

Hello everybody.

This is Fabrizio, IK4VYX.

Just a few days ago, I had a rather nice idea.
What about creating a "DX Cafe" converse channel, in the Converse Ham server network?
That channel would reflect OH2BUA DXSUMMIT's web DX-Spots and might become a REFERENCE POINT for many DXers.
Any DXer could see what's on the bands, organize SKEDs, discuss pileups and propagation and so on, all realtime!
This resource would be accessible not only for Internet users, but especially for
radio packet users, who have not Internet access or can't stay connected to the
phone line for long times.
The core of this Idea is: "reflecting OH2BUA spots on the converse channel".
Well that's now possible with a software of mine, which I have tested for rather
long time with success (my experiments were carried out on channel 107).
The only thing I miss now, is a windows PC with a 24H permanent connection to set the system up.
The software runs under windows and is rather reliable and auto connects if the connection drops so it needs no human maintenance.

If you like this Idea and you have a Windows PC 24 H on the Internet, well: I can send
you the software with all the info on how to set it up.
Of course you will still be able to do your things, such as navigate with the browser and so on.

The software also allows to port ordinary DX cluster spots, both from RF connection and from telnet conection(s).

Any feedback about this idea is welcome.
Please reply to: "IK4VYX - Fabrizio Sartoni" <rac2610@racine.ra.it>
You can post this message on any DX circuit, if you find it might be of useful knowledge.

P.S.
Spend a few minutes to visit
http://home.sprynet.com/sprynet/wd4ngb/telnet.htm

That's the DXTelnet's home page, kindly hosted by Bruce (WD4NGB)
DXTelnet is a software package developed by me; that's the software used for the above experiment.

Best (((73))) de Fabrizio (IK4VYX)

Hi Wes,

Well, I've never used the 870 but I do have a 1000MP (about 12 days now) which I really like a lot. As far as 'loading it up with filters', depending on how you operate, the only extra filter you'd probably really need is the narrow SSB filter in one of the IF's. Maybe the 250 kc cw filter if you're a really big cw user. I'm not sure that having the narrow filters in each IF is necessary unless you have a really bad qrm problem at your qth. The MP comes standard with a 500kc cw filter which is probably narrow enough for most users needs. You can also narrow the bandwith with the dsp to some degree. Having the filters you need in just one IF would be the same as the 870's dsp filters. Both are fine radios but I just wanted a Yaesu this time around after having a few Kenwoods. Also, I liked the MP's dual receiver feature.

Good luck with your final decision.

This is the perspective from one end of the barrel. Let me tell you what it's like from the other end. Just picture this...

You're enjoying a nice little run of quick QSOs with people who know code--the guys who can both send and receive. It's a fun way to spend the evening. Then you finish a QSO and get hit with a blast of hundreds of callers. Included in that blast you hear the guys who are repeatedly sending "QRS QRS QRS"; there's another bunch who are blaring "CL? CL?" even though you just sent your call. Even if you can ignore this garbage and pull out a call, the guy on the other end keeps on calling you even after you answer him. Reason? He can't really hear you, but he knows you're there because he saw you spotted on packet. This problem has become far worse in the last couple of years as packet has gone global. Just because YN3XYZ can copy me on 160 doesn't necessarily mean HA0ABC can do the same...but lots of time he'll call me anyway on no more of a basis than wishful thinking. (Actually, he probably heard an ESP-level mumble at one point, so he just hopes I can hear him better than he can hear me. Wrong!)

Oh yeah, there's another category I forgot...the guys who can't tell the difference between 35 wpm and 50 wpm. They crank their keyers up to the max and then just start pressing that little button over and over again. Even if you manage to get the call and answer one of them, they can't even copy their own call at 35 wpm, so it's just a wasted attempt.

So...is packet really "an invaluable tool"? It's here to stay and certainly not going to go away. But I do think it has done an enormous amount of damage to the hobby. It has taught people all the wrong habits, deprived them of the opportunity and/or need to learn essential skills, plus it can really make life miserable for the guy at the other end who is the victim of being spotted. Time and again I have people come on and tell me I should get more action soon, since they just spotted me on packet. I think they

want me to thank them for it. Instead, I usually answer with "TKS INFO WILL QSY NW". And I do. I'd much rather enjoy working a few good ops who tuned around and found me on their own than a mob of lids just chasing packet spots.

Of course, I will acknowledge one exception to the above. That's during contests. Then it can be a big help to the guy who got spotted. You still have some of the usual problems, but somehow it's not as bad, and it does give your score a big boost. There, I appreciate being spotted. But outside of that...no thanks!

Bruce, N6NT

If you can only do 5 wpm that is about all you will be able to do within
a normal time span. Most people that REALLY run cw go fast enough to
have a fairly normal conversation. Besides not much different on fone.
Yer loud here, yep, here too, boy it sure is hot, yep, here too, hey you
still on yer old rice box? yep, how bout you?, yep, same here, etc,ad

>Bruce, N6NT

Geez, Bruce, I didn't realize California was rare these days... or did you
leave off the /WHATEVER on the end of your call ? I've been watching
the cluster here for 2 years and I don't see many W6's get spotted.
Anyway, I'm afraid I have just about the opposite view you have. When
I get on the radio, I want a pileup. I'm not interested in the weather in
Podunk, don't care who has what for an antenna, doesn't really matter
how much power anybody is running as long as I can hear them. If I
call CQ a few times and nobody answers, I spot myself. The reason I
turned the radio on is to pass out as many QSL cards as I can in the
time I have to operate. The nastier it gets, the more I like it. That's one
of the fun things about making a mess - controlling it. Builds operator
skills (mine). I've said many times, if you make a mess and you can't
control it, go watch TV. The only difference between a great big mess
and a nice orderly pileup is the guy on the business end of the deal.
I'm afraid I can't even agree with you on the contest part - I don't mind
being spotted on day two, but getting spotted during the first half of a
contest usually gets too many people on my frequency, which slows
things down. If you can only work 4 a minute, no sense of having 40 a
minute show up. As I said, Bruce, not sure where you are, but if you're in
California, maybe you should lower that 7 ele monobander down about
150' and stop pointing it at Europe.....

Jim, just for curiosity, what's your favorite method for
controlling the pileup? By the numbers? split? or something
else? Never having been 'rare DX' myself, I'm just curious.
In fact, I'd be interested in seeing a discussion of the
merits and demerits of the different techniques, if others
would like to chime in.

SB DX ARL ARLD030
ARLD030 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, 425 DX News, DXNL, JT1CD, KD3YK and Contest Corral from QST. Thanks to all.

SOV. MIL. ORDER OF MALTA. Operators IK0FVC, I0JBL, I0CUT, IK0PRG, IK0MBB, I0HCJ and IK0HBN are now active as 1A0KM until August 3. Look for them on 160 through 2 meters. QSL via IK0FVC.

TURKEY, TA. Special event station YM75TA will be active through October 29 to celebrate the 75th anniversary of the Republic of Turkey. Ops Nilay, TA3YJ and Berkin, TA3J, will operate on 80, 40, 20, 15 and 10 meters, SSB. QSL via TA3YJ.

KERGUELEN ISLAND, FT5X. Helios, FT5XN, can be found between 14185 and 14200 kHz beginning around 1100z. QSL via F6PEN.

COCOS-KEELING ISLAND, VK9C. Look for Hiro, JE5WJM, to be active from August 8 to 15 as VK9CE. QSL to home call.

MONGOLIA, JT. Special event station JU60MTZ will be active until August 31 to celebrate the 60th anniversary of the Mongolian Railway Board. QSL Via JT1CJ, Sh. Gankhuyag, P.O.Box 100, Ulaanbaatar-44, Mongolia.

AMSTERDAM ISLAND, FT5Z. Bernard, FT5ZI, is active in his spare time. QSL via F5PFP.

MIDWAY ISLAND, KH4. Ron, WA6FGV, and Frans, K6SHJ, will be active from August 3 to 6. They will use AH4/WA6FGV and WH4/K6SHJ on 40, 20, 15 and 10 meters, CW and SSB. QSL to their home calls. Ted, NH6YK, is also active from Midway until August 12.

CRETE, SV9. I4UFH and IK2QEI plan to operate from August 3 to 17. They will sign SV9/I4UFH and SV9/IK2QEI. Activity is planned for

160 through 6 meters on CW and SSB. QSL to home calls.

TAIWAN, BV. Juergen, BV3/DJ3KR, is QRV until August 12. QSL to home call.

CAYMAN ISLANDS, ZF. Jim, KD3YK, will operate ZF2JM from Grand Cayman Island from August 5 to 14. Operation will be QRP on 40 and 20 meter CW, and some 20 meter SSB. QSL to home call.

THIS WEEKEND ON THE RADIO. The QRP ARCI Summer Daze SSB Sprint, Ten-Ten International Net Summer Phone Contest and YO-DX Contest should keep you busy over the weekend. Please see August QST, page 105 for details.

Source record: 28149

Not to long ago I met an old time DXer and he has never used a net, list operation, or the DX Packet Clusters!! Nor has he ever subscribed to any DX news letters. Yes he is on the honor roll. He maintains a "True Blue DXer" needs no help in the pursuit of DX.

He sez a net spoon feds, a list is how well you can get through to the LIST STATION, and a packet cluster tells you where the DX is and their call (in case u can't copy it) and even where the last contact was made in a split operation. One needs not listen listen listen, just check the cluster spots, the old DXer said. He then asked me to differentiate between these operations -- durned if I didn't have some trouble answering him.

FYI -- As for me I don't work nets, no lists, but I do have the packet cluster.

Any who -- it was an interesting perspective -- how would you answer the old DXer???

73
Rod in San Diego
4 away from the big roll.

I must admit that there is much redundancey on CW, but if you look around, especially on the lower freqs., you can find some OT's, and me for that matter, having some good conversation.

It moved all over the place, Richard. There are about 600 people
signed up for DX-LIST. Others went to dx@qth.net If you have
a web brower:

http://www.guam.net/pub/midxa/dx-list.html

is where you can find info on DX-LIST, including a subscription
form. If not, and you want to subscribe, send a blank email msg
to dx-list-subscribe@makelist.com and the server will send you
back a verification message.

If you go to http://www.qsl.net you can find info on the QTH.NET
lists.

Well, Rod, the first thing I'd do is tell him to crank up his web browser
and go visit the All New List Lizards Home Page at:

http://www.qsl.net/kh2d/lizard/lizard.html

I'm sure he'd find that lots of people agree with his opinions on the
DX Net scenario.

As far as the packet cluster is concerned, it'll show you where the
bus stop is, but it won't get you on the bus.

>Bob, KI8AB

Hi Bob,

Well, there is, in my opinion, no standard solution. But
when things get really messy, split operation, I think, is
definitly the way to go. I wrote a long article called "Split
Operations - When and How" for our club newsletter a
few months ago, it's a bit too big for here, but you can
read it on the web at:

http://www.guam.net/pub/midxa/nl/nl_apr98.html

If you can't get on the web, let me know and I'll email
it to you if you'd like to see it.

The key element for a DX station in a pileup is control.
You have to do whatever you have to do to maintain
control. Sometimes you have to be rude, but I find
if I embarass a bad operator in front of the whole
world, it sends a quick message to the rest of the gang.
The people that I find who have the most trouble with
pileups are 'nice guys'. If you let one guy get away
with something, everybody will try it. If somebody
does something the DX doesn't want them to do, then
it's up to the DX to flat out tell them DON'T DO THAT !

The numbers thing works, but not real well, because
a lot of people don't understand propagation. For example,
from here in the Pacific, we can't just go 0-1-2-3.... when
working the U.S. because we have to take propagation
into consideration - the east coast (1,2,3) are hardest to
work. We can work 6-7 for hours after the east coast guys
are gone. So when I play the numbers game, I have to
constantly deal with 'when are you gonna work the 7's'
because people don't understand that I am not east
coast predjudiced, I am trying to work as many people in
each area as the propagation allows. No matter what

number you are working, the others are frustrated while waiting. We can't go 1-2-3 then 4, we have to go 1-2-3 then 8-9 then 4, because thats the way the propagation goes. Fours don't like that......

I can't work Europe by numbers, not very efficiently anyway, because I don't have enuff knowledge of European geography to know who is where.

Same thing when the DX station doesn't understand propagation, or the area they are working. It's not very efficient to start with area 0 and continue thru 9 working a fixed number of stations in each area. I get a kick out of DX stations working Japan by call areas - 3 guys from each number - there are 2.8 million hams in Japan, and 2.6 million of them are in call area number 1.....

A good DX operator has to understand the concept of 'pileup practice' - the big guns will call DX in a pileup even if they have worked the DX a dozen times on that band already. I use computer logging, which immediatly shows me contacts when I key in a call, so it's easy for me to figure out when I am being used for pileup practice. I don't just work the loudest guys, I try and listen for the guys who are half as loud as the big guns. If I see that a large percentage of people I am working are 'dupes', I will flat out announce - "There are a lot of stations calling me. Don't call me unless you need me for a new one on this band. If you do, the computer will catch you.."

One of my favorite pileup stories happened on 10 meters at the peak of the last cycle. I was working U.S. stations, early in the morning U.S. time, and concentrating on the east coast because I knew they were about to go away. Some loud five kept saying "When are you gonna work the 5's ? I can't sit here all day, I gotta go to work!" Since he was much louder than the east coast stations, and he posed his question on top of reports, I need to get rid of him, so I said "OK, who's the five who has to go to work?" He gives me his call and I key him into the computer only to find that I had worked him about six times in the previous month on 10 meters....

I think I said before that when I get on the radio my goal is to pass out as many QSL's as I can in the time I have to operate - I can't do that by working the same guys over and over again, so I have to be aware of how to work the 'new' guys. Sometimes I just disappear for a few minutes - when I do, the big guns stop calling immediatly - and I get a chance to listen for the guys who are much weaker that I normally wouldn't hear.

No two pileups are really the same, they all differ based on how many people are calling you, how urgent it is that they work you (how rare you are in their part of the world), and how strong signals are. Much easier to control a mess when everybody is 10db over S9 then it is when everybody is S2.

Anyway, Bob, I hope some other people chime in too. If you ever have the chance to get on the business end, I would highly recommend it. It's a lot of fun and a great learning experience.

THE REBUILDING OF 4U1UN

Recently there has been a fair amount of comment appearing on the subject of the status of operations at 4U1UN. As I was the Station Manager of 4U1UN for many years, I thought it could be useful to provide you with some information concerning the problems that arose at this station, and perhaps what can be done to improve the situation.

As many of you already know, for several years, 4U1UN in addition to its normal operating activities had been engaged in disaster related operations following the occurrence of natural disasters where as radio amateurs our responsibility was to render assistance when the normal channels of telecom were either destroyed or disrupted.

This was not a new idea, and has been part of the amateur radio tradition from the beginning. In 1986, in order to make the emergency operations more effective, and following the earthquake in San Salvador in October 1986, both Raymond, KB2BKO who had been a UN staff member (now retired) and myself (I was not a UN staff member) thought we should form a special volunteer group at UN Hqs and we came up with the name, "UN Amateur Radio Readiness Group".

In 1988, after Raymond became the President of the Amateur Radio Club, we began to recruit both UN staff and non-UN volunteers for the group. Shortly afterwards, as many of you know we then became quite active on the air from 4U1UN in promoting the "Radio Readiness Group" and many amateur stations were recruited to join in the effort. A training and coordination net was established and a call in and working frequency was set up on 14.268.

We tried to keep track of any meaningful disasters that had taken place and responded accordingly. And in this way, the Readiness Group operating from 4U1UN joined other already existing radio emergency nets that have done such good work in helping out after disasters.

Truly, what made the Readiness Group effective was the excellent cooperation that we received from any and all amateur radio stations that checked in on 14.268. If one reason can be cited for the success, as it was, of the Readiness net, it was the special spirit of radio amateurs who with their operator expertise can and have made a difference in so many crisis

situations. Maybe 4U1UN added some coordination, but its really the already existing amateur radio community that got the job done. It reminds me of a comment that Om Keith, NP2CM made during the Hurricane Hugo operation when we were talking about procedures that might be set up, he said, "Its not necessary to spend to much time on procedures, hams know what to do".

Unfortunately, at the same time as we sought to further develop the "Readiness Group", there was a small group of individuals at the UN, who for their own reasons sought to inhibit and impede the operations of the group. There were some rather serious overt efforts on the part of these people to close down 4U1UN's emergency ops which took many forms, including incidents where these individuals brought UN Security to the station to interrupt an emergency operation in progress -- very serious indeed and most unpleasant.

But many of us were oldtimers, used to working through the pileups, who don't give up so quickly. We were convinced that we were both legally and morally correct in conducting these type of emergency operations, and especially at the UN, and so we continued, but it wasn't easy. I, along with other principal operators of the Readiness Group HQs station, for example, Om Gunn, N2ATF; Carmelo, AA2FN; Bill, K2TT; Ken, WZ1A and others were not UN staff -- we were so called "outsiders" and therefore in effect became "moving targets" to be picked off one by one. There had been several excellent operators on the UN staff who had been at the station in previous years but they had retired. One person who we may cite as being very supportive throughout was the VP of the Radio Club, Om Vinny, K2FC.

Matters became more serious when in November of 1996, a UN Staff member, who at the time was not in the Radio Club himself, was responsible for the writing of a Memorandum which was disseminated to many persons within the UN Hqs which stated that the Readiness Group operations were prohibited because (in his opinion) they were not in keeping with a UN Staff Recreation Council regulation. His view was that since the radio club fell under the umbrella of a club organization at Hqs -- the aforementioned "Staff Recreation Council", that by carrying out emergency operations at the amateur radio station, we were in violation of a Recreation Council regulation which says that, "Clubs act in such a way as to be consistent with the primary purpose of recreation and avoid participation in activities which imply any official commitment or approval by the UN".

To begin with, we were confronted with a situation where an active effort was being made to stop a proven humanitarian activity which was operating in an organization, the United Nations, whose very charter emphasizes the saving of human lives and alleviation of suffering! In this case the writer of the

November 96 Memorandun was proposing, recommending, that because of a supposed technicality, the UN Amateur Radio Club should not be engaging in disaster related communications! That did not make any sense. But nevertheless, lets address the argument that the writer made. To my view, his interpretation totally disregarded the essential point where the authority for the amateur radio station -- 4U1UN - does not come from the Staff Recreation Council at all. The authority to create and operate an amateur station at the UN comes from the Secretary General to his designated Officer, where the UN undertakes to comply with the undertakings it has entered into at the various telecom conventions, all of which prioritize and support the involvement of amateur radio stations in disaster communications. Therefore, to say that the stations operations should be subservient to the Staff Recreation Council was a specious argument and in my opinion without merit -- the ITU agreed. The Staff Recreation Council, is an amorphous body which has no competency in telecommunications. In point of fact, the license to create and operate 4U1UN was not given by the Recreation Council but by an Assistant Secretary General.

In the same November 1996 Memorandum, the writer cited measures that should be be taken, "in order to avoid the continuance of such illegal activities and the presence of outsiders on UN premises" (this was a strange comment, I thought the UN belonged to all of us and was not some kind of secret society!!). The writer ended his Memorandum by stating that, "In addition, I believe that the presence of Mr. Rosen (thats me!) on UN premises should be permanently prevented".

Before continuing, I should mention that the writer of this Memorandum was not in the Staff Recreation Council and in fact most of the persons in the Recreation Council have praised the disaster, humanitarian operations of 4U1UN and the Radio Club! Nevertheless, the November 96 Memorandum was circulated to many within the UN who knew very little about amateur radio and took the statements quite literally, especially since the writer had not signed the document himself but had his superior (a higher level person) sign the Memorandum.

In my opinion, this campaign, in large part, was responsible for me and other non-UN radio amateurs in not having our ground passes renewed -- passes we had for ten years. And even staff members who had heard about our problems suddenly became afraid to associate with us!

Through all of this we did the best we were able to do in continuing to operate the station for both disaster and normal amateur communications objectives, and we tried to enlist and train UN staff -- this was very difficult as the station was located in a very small area, not even a room, which even then

wasn't available at most times during the day, and many evenings.

Besides the disaster operations, we tried to enter every contest we could -- we felt an obligation to do so because of the privileged status of 4U1UN. And by the way, in my opinion, dxers and contestors make some of the best emergency operators that can be found. Isn't that what makes the amateur service so important and special -- a service made up uniquely of highly skilled communicators (which includes CW skills, I can't tell you how many times CW has been used in passing important messages out of distressed areas). In addition, we always tried to bring in amateurs from outside the UN who wished to operate 4U1UN and did so with varying levels of success, always dependent upon the status of security measures in force at the time.

Our situation at the station became more and more difficult and finally on the morning of the 27th of January 1997, when I went to the station to complete installation of an R5B vertical, so the 4U1UN beacon could operate on all bands, even though I had been working with certain staff members of the Club earlier in the week, I found all locks had been changed and the beacon taken off the air and locked away in a cabinet! It was only after I wrote several Memorandums, which was supported by a Memorandum to the UN from Om Jack, W6ISQ that the beacon was restored to operation -- two weeks later.

To bring matters up to the present, we have asked to meet with senior level officials at the UN in an attempt to regularize this situation -- in our view, 4U1UN should not be relegated to being a station to be used for "recreational purposes" where disaster communications are considered to be illegal!!

Since January of 1997, the station has largely been off the air, although we note that some outside operators have been brought in from time to time, a total of a few hours operation over the last year. All of the yagis that we had installed over the years have been taken down and the only hf antenna that remains is the beacon vertical, the R5B.

But if we are successful in our discussions, antennas that have been taken down can be re-installed, thats not the problem. What is important is to have the backing of the UN administration, where they will take a direct hand in ensuring that the station can function correctly and appropriately.

To summarize, we think that:
a/ The UN Administration should take the necessary steps so that the amateur radio station can operate in compliance with all applicable international radio regulations. For one thing this could be assisted by withdrawing the radio license for 4u1un

from the UN Staff Recreation Council Radio Club and re-assigning this station license to a newly established UN Amateur Radio "Organization", or "Society" at UN Hqs.(i.e., a new group not affiliated with the Recreation Council as all "clubs" are. The immediate effect of such a change would be that the station would no longer be subject to the extraneous regulations of the Staff Recreation Council, an organization that should not be in a position to control the operations of the amateur radio station at the UN.

b/ The UN Administration should openly support the involvement of the UN Amateur Radio Station 4u1un in disaster related emergency communications. Such support is totally consistent with all of the treaties and agreements which the UN has entered into. In this regard, in addition, we would like to see the Administration support the volunteer Amateur Radio Readiness Group at Hqs. The Hqs section of the Radio Readiness Group had consisted of both amateurs and non-amateurs alike who had a common objective; the saving of human lives and the rendering of humanitarian assistance to those persons who have suffered the consequences of natural disasters.

c/ We would propose and would like to see the Administration approve steps that we could suggest, where 4u1un would be accessible to outside, non-UN, radio amateurs who would like to participate in the operations of the station. To our view, the UN station, 4u1un, should not be part of a "private preserve" to be operated only for the "recreation of staff members". 4u1un is an important international station, located in a organization which truly belongs to the world. It cannot be correct therefore that this station should be closed to all but a few individuals within the organization. In order to accomplish this objective would require that the station be set up in a location within the Hqs which would be acceptable to UN Security. There is no question that the security concerns at UN Hqs are different than, for example, many other UN agencies. One solution which could be proposed, is to establish the station in a more public and readily accessible area of the UN, where the operation of the principal equipments (near the roof-and the antennas) would be carried out by remote control, not very difficult to do nowadays.

d/ We would remind the few individuals associated with the Club, who have all but closed down this station for the last one and a half years, that as stated above, there is more involved in the operations of 4u1un than satisfying the "recreational" pursuits of staff members. (we would hasten to add, that the view of 4u1un as a recreational tool is not held by most staff members in the Club, most of whom we believe would support the positions that we have taken in this memorandum). In our opinion,at 4u1un, in effect the amateur radio voice at UN Hqs, there is a real

responsibility towards the entire amateur radio community to keep this station active and engaged in amateur radio communications.

We would greatly appreciate any opinion you may have on all of this, and we can be reached at: k2gm@contesting.com, or the landline is 212 987 4550 and fax 212 369 3427. In addition, if you wish to express your opinions to the UN you might consider sending either a letter or fax (sri no email available) to the Secretary General of the United Nations, Mr. Kofi Annan, United Nations Headquarters, Secretariat Building, Room 3800. New York, NY 10017 or by fax at 212 963 4879.

I will keep you informed as to developements.
And in the meantime, next time there is a disaster, the extended Radio Readiness net still exists (made up of amateur stations worldwide). Please look for a Radio Readiness controller on 14.268 and you are most welcome to join in any efforts underway.

If we are not able to resolve the UN issue, we will establish a new principal net control station for the Readiness group. Of course this will be from another location and another call sign. There have been several offers to accommodate the group elsewhere.

Finally, I wish to thank the many stations who have sought to help in this situation and who have posted comments on the DX reflector and elsewhere.

Vy 73 de Dave, K2GM

On behalf of the stations of the Radio Readiness Group.

>Rod in San Diego

I have worked "a few" on nets ... I can number them on one hand (and I have 296 countries worked so far). All except one I later worked outside of a net, usually on CW.

PacketCluster does not guarantee a QSO. Despite all the packet spots for the REALLY major DXpeditions of the last 4 years, it STILL often took me 15-20 hours of calling into pileups to get my first QSO.

LISTENING, and a lot of it, is still the best bet. Some of my more memorable QSO's were a result of that. I remember one night I heard TL8NG calling CQ on 40 CW. I called him but he didn't respond. I thought "perhaps he'll hear me if I call CQ near his frequency", so I QSY'ed up 1 and called CQ. It paid off ... Gene answered my CQ! Since he had no pileup, I had a nice chat with him for a while. Surprisingly, I spotted him on PacketCluster, and no one else showed up to work him!

Another time I heard a very weak signal with a small EU pileup on 40 CW. I couldn't quite dig out the call, so I just sat and listened ... for 3 hours. The signal built in strength, and it turned out to be CE0ZRC (my only Juan Fernandez QSO to date). I worked him. Just as I completed my QSO, I saw a packet spot for him appear from someone else. Then all hell broke loose! Another payoff due to listening; I don't think I'd have made

it through the pileup that ensued.

OTOH, to my knowledge the last operation on KP5 Desecheo was in December of 1993. At the time, I was not on packet, not on internet, and didn't subscribe to any DX bulletins. I was out of town for the Christmas holidays and missed one completely that I may have worked if I'd been on packet or internet. That was "the one that got away" and I still need it for an all-time new one. Who knows when an operation from there will be permitted again? My fingers and toes are crossed.

I'm not going to rule out the use of packet spotting in this day and age. It may have been something a "true blue DXer" didn't use in 1950 ... but then, so was a transceiver! (Those desk-crushing TX/RX combinations weren't what you'd call "carry-on luggage".) As we approach the end of the 20th century, I want to use all the tools availale to me. That next P5 may only be QRV for a day ...

73, Zack W9SZ

I like to tell the story about when I took the General test a couple of months ago. This old fart (I use the term with affection...he's a friend) about 85 years old came in to sit through the 20 wpm and 13 wpm while waiting for his 5 wpm test. While I stuggled through the 13 wpm he copied 100% perfect copy. He was pissed because now he has to study for the general written...

Well here my $ 0.02 worth, It took me 2 years to pass the 20 wpm for extra class. The only reasoned I stuck with it is because I have a $ 1500.00 radio setting on my desk and I wonted to be able to use all of the band and not just a little proton. I think if we don't do something to bring more interest to our hobby we are going to lose more bands. Look at the internet, You can communicate with any one in the world and don't have to take any test

Rod, I couldn't sum it up any better than Paul Dunphy, VE1DX, did in
one of his "Hugh Cassidy Style" DX Stories. . .

Only the Deserving

One of the Local QRPers came by the other day, carrying a large
envelope and a heavy burden. "What have you got in the
envelope?", we asked. "My DXCC certificate", the QRPer replied sadly,
"with all my endorsement stickers up to 175. Got it a
few days ago from the league." We were at a loss to understand the
forlorn look on the QRPer's face, for he had been one of
the more enthusiastic operators during the past few years. "What's
wrong?", we asked, "Haven't you been looking forward to
the day when you'd hit the DXCC mark? And didn't you hold off sending
in your cards till you had almost 200? That's pretty
impressive."

The QRPer sat down and stared at us wearily. "That's what I thought. I
spent a lot of time working these stations, and a lot
more time chasing down the QSLs. I thought I'd achieved something . .
. until I took this down to the local DX club last night.

Now I don't know what to think." We were not understanding at all here. "What happened?", we asked. The QRPer was sweating a bit so we got him a glass of water before he replied. "Well, all of the Big Guns took one look at my certificate and said it wasn't worth the paper it was printed on. They said that none of the DXCC certificates being issued these days were worth even sending for. What do you think of that?"

We had to know more, for these sort of statements were not in keeping with the amateur's code. "Why did they say that?", we asked. "They said I'd worked most of my DX from information I got off the packet cluster!", the QRPer said, jumping to his feet and downing his water in one gulp. "They said I was spoon fed the DX, that I didn't earn it by tuning around. They said that when they got their DXCC, they didn't have packet clusters. They did it the hard way and that I wasn't a real DXer at all!" He sat back down, seemingly having exhausted all his energy in this short outburst. We were properly sympathetic, for we had heard this sort of argument before. "Look at it this way", we replied, "You worked the DX using the resources you had available. You may have had help from the packet cluster spots, but you broke the pileups and worked the DX just the same. Take your DXCC certificate and put it up in your shack! You worked for it and you deserved it. Don't listen to those guys." The QRPer was not to be consoled. "But why do they have to belittle my achievements?", he asked, "Why do they say my DX is worth less than theirs?"

We were out of our league on this one. Although we'd heard some of the Big Guns put down packet clusters, we'd never thought about putting a value on DX or a worth on another's DXCC certificate. So, we decided to take the QRPer up to the hill to see the Old Timer. The QRPer repeated the events of the past few days as the Old Timer listened intently. "These guys who were putting down your DX achievements", the Old Timer asked, "would they be Joe and Rich, the guys who established the 2-meter DX spotting repeater about 10 or 15 years ago? And was Peter from down south of Palos Verdes involved too . . . the same Peter who set up the list of phone numbers among the DXers a few years before that? And didn't these guys work pretty much everything that moved with their 2-metre and landline network?"

"Yes", the QRPer replied, "those were the guys. Joe, Rich and Peter . . . but they didn't tell me about any repeaters or phone lists." The Old Timer smiled for a moment, stood the QRPer up and said, "They never do. Stand tall, my son! You are a DXer! Take your certificate home and put it on the wall above your rig. Remember what Albert said: All things are relative, some more so. And never forget, there are none so pure as the reformed. DX IS! It always will be. It was twenty years ago

for those guys and it is for you today!" The QRPer clutched his certificate, beamed with pride and was off down the hill to get a frame to hang it in the shack.

We looked at the Old Timer for a few minutes, then remarked "You sure made his day. And it's reassuring to know that DX is one of the constants of the universe, never changing in value . . . that all our DX achievements are equal." The Old Timer turned around and glared at us with a look we'd rarely seen before. "Listen Buster!", he shouted at us, "real DXing died when SSB and synthesized rigs hit the market! I earned my DXCC back when we used crystal controlled CW rigs and phone QSOs were AM! Those were the Great Days of DXing. There hasn't been a credible DXCC certificate issued since the league accepted the first QSL that had SSB written on it!" And with that, the Old Timer turned back to his rig, dialled up 75 metres and checked into the SPAM net!

Son of a Gun! What could we say? The Old Timer liked to quote Albert when he said all things were relative, but somehow he had found an exception to the rule! We decided to go back to our shack and check our QSLs . . . we recalled a dozen or so AM QSOs in our early days. Maybe we had less than 90 to go to get a real DXCC certificate! There are always some of the Eternal Enigmas and Mysteries of the Ages that even the most experienced DXers have trouble understanding!

Best Regards, Paul

KH2D said it well. He pointed out the trouble with being DX and working by the numbers, region, etc. AND he also said the DX has to control the pileup. To me this is a big problem, the DX station needs to take the bull by the horn and tell those calling how HE or SHE is going to run the pileup. If the DX does not then new operators (and some old) get the idea calling over someone else during the making of a contact is alright. Same thing with the guy saying he has to go to work and needs to break in for a quick contact...only to find the DX station has worked him/her before on that band.

I suspect the problem of the 'big guns' doing pileup busting just to prove there manhood will decrease as the propagation increases. Any real DXer knows you get the rare ones by listening and tuning around, not by shouting your mouth off. I can remember a OY Faroes Is as well as many others that to me points out this fact very clearly. I'm sure each and everyone of you can think of similar experiences. Course if you are a 'big gun' whose has worked them all what else are you going to do...

One that really frost me though is when you are having a nice conversation with some DX station only to be repetedly interrupted by someone yelling 'BREAK'...'BREAK'...'BREAK FOR A QUICK CONTACT'... If you don't have an emergency you can wait till the people having a pleasant conversation finish. This is one of the best things about amateur radio, making friends in far away 'exotic' places weather is it Birmingham England, Pago Pago, or Peoria and is much better than just 59, name here is Terry T-E-R-R-Y and qth is Keizer Oregon, bye. Common curtousy if you ask me.

Just my 2 cents worth.

Jim,

What a hoot!!! Laughed and laughed, ... though I'd die. :) :) :)

I had no idea such things existed, just spending way too much
time (and having way too much fun) on CW.

73,

> AC5OM

Well, that last statement is a bit of an exaggeration OM, but it
may one day get to that point. On the other hand, what is the
challenge in that? I thought part of the hobby was the way it
challenges you to learn new things and push yourself (I guess
you didn't enjoy getting up to 20 wpm at all and feel no
pride in having accomplished it) both in terms of technical
ability and operating skill. When you can get a ham license for
just sending in a few boxtops from the cereal box, that's when
ham radio will be really dead.

I should mention one thing - I have only an old TS520, and until
recently, did not have a second VFO. When faced with a DX op
working split on sideband, I had only my RIT, with about a khz
to move. Those of you who like working split, keep budget hams
in mind - look in closer to your xmit frequency once in a while.

When I first got my ticket - I thought there was no use for CW either. Then 10mtrs closed and it was all that was left. I sat and listened to 40mtrs - learned cw and started to enjoy it. Now can send and recieve over 30wpm by hand. Once you learn it you will enjoy it. Or at least that's the way it worked here.

Hi,
This is just to let you know about a new Internet "Webcluster" which I'm putting the finishing touches on right now. It will be up and running early this week, hopefully by Monday afternoon. It will show you the last 30 real-time DX spots and, soon, will be fully customizable to give you just the information you want. Please drop by at http://webcluster.ml.org (after Monday) and let me know what you think.
73,
Mike

Gotta tell you Dads' out there, the Novice Ticket makes a wonderfull father and son/daughter project. Try it. Don't get discouraged because the kids just "soak up" the code like a spong and you have to work at it. Thats just the way it is. Kids have NO problem kicking your behind on code. The theory portion will put you back on equal ground for a while. :o) A short while only though!

I agree and I remember that the late senator goldwater had two fantastic
base set-ups and pushed for code to remain but when he sat at his radios
he would use modems and computer 90% of the time.
All the code/cw amateurs that want code/cw to be part of testing and
operation need to wake up as do the no code/cw amateurs code needs to go
and proper manners need to be improved, We all need to help the
manufactures to promote amateur radio and get more of the public
interested and involved in amateur radio not to increase sales but to
keep the frequencies we have and to keep amateur radio ALIVE.
Come on now people amateurs/ham's men and women and teens lets get the
band wagon going and keep our hobby/passion alive and well and we need
to police our air-ways and help the fcc to get rid of the abusers the
foul language and dead carriers the trouble makers the one's that give
amateur radio a bad name off the air.

SAVE Amateur Radio promote it work to make it grow, work to make it Live for another hundred years or longer and as for me I have been getting my children hooked on amateur radio and hope the carry it on after Im gone.

SB DX @ WW $OPDX.368
Ohio/Penn DX Bulletin No. 368

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 368
BID: $OPDX.368
August 3, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2HJB, W3UR & The Daily DX, W6KNB, W6MD, K7FL, K8YSE, 7N2PYF, BA4TB, BY5QN, DL6FBL, EA2BUF, EA4DX, EB2DJB, EU1DX, EW4EW, F5NOD, F6AJA & LNDX, G3KHZ, G4BUE & DX News Sheet, IK0HBN, SM5MX and K.U.A.R.C for the following DX information.

3D2, FIJI ISLANDS. Shozo, 7N2PYF, will be active from here as 3D2PY between August 7-9th. Activity will be mainly on 20, 17 and 15 meters SSB. Operating frequencies will be around normal DX windows or IOTA window. He will use a TS-50 with a 100 watts into a wire antenna. He mentions, "Depending on the condition, I will try another bands" on SSB and CW. QSL via home call 7N2PYF (1997 and 1998 callbook address only or via the Bureau).

3D2DX ROTUMA DXPEDITION (Update). Roberto, EA4DX, reports that the 3D2DX operation is on schedule. 3D2DX will begin August 29th from the village of Fapufa on Rotuma (OC-060). He will be there for three weeks. After Rotuma, he willl sign 3D2DX/P from Fiji (OC-016) for 4 days more. He is leaving Madrid on the 24th, and after a short stop at Phoenix, AZ, where he will meet with members of the CADXA (8Q7AA-XZ1N guys among other ops) he will then head to Rotuma. The operation will be on 160-10 meters (WARCs included) SSB/RTTY only and on the usual DX frequencies. QSL via EA4CP: Jose D�az, Doce de Octubre #4, 28009 Madrid, SPAIN or Jose D�az, PO Box 50.546, 28080 Madrid, SPAIN. Photo QSLs will be ready 2 months after the end of the operation. More details can be found at the URL: http://www.qsl.net/ea4dx/index.html

7X, ALGERIA. By the time you read this Mark, ON4WW (ex-9X4WW), will be here again and hopes to be active soon. He expects to be issued the license/callsign 7X0WW. Activity will be CW on all bands. QSL via ON5NT. ADDED NOTE: While here, he will try to obtain a Mauritania (5T) license.

9M0, SPRATLY ISLANDS. The "DX News Sheet" reports that Uwe, DJ9HX, will be active from here August 11-19th. Activity will be on 40-10 meters

with an emphasis on 12 and 10 meters. QSL via home call (he prefers the bureau).

9M6, EAST MALAYSIA. Before and after his Spratly Island activity, Uwe, DJ9HX, will be active from two IOTAs. Look for him to be on Sabah (OC-088) August 6-10th and August 26-29th. Then from August 20-25th, look for him to be on Sipadan (OC-133). Activty and QSL info is the same as his 9M0 operation (above).

AH4/WH4, MIDWAY ISLAND. Ron, WA6FGV, and Frans, K6SHJ, will be active from here now until August 6th. Activity will be on 40-10 meters CW and SSB. They will be signing AH4/WA6FGV and WH4/K6SHJ, respectively. QSL via home call.

AND NOW FOR SOMETHING DIFFERENT! (Watch-a-Contest live on Internet). Ben, DL6FBL, has informed OPDX of a unique and different way to watch a contest. His group of contesters will be using a "WebCamera" in the shack! You will be able to see DJ9MH/Hajo, DL1MFL/Markus, DL2CC/Frank, DL2ZAV/Udo, DL4NAC/Martin, DL6FBL/Ben) and some other young SWLs/computer kids from DL6FBL's QTH during Worked All Europe DX Contest CW (WAE). The show begins August 8th (0000 UTC) and ends August 9th (2400 UTC). The contest callsign will be DA0FF. Ben suggests the following:

1. Find us on the air. Try +/- 3507, 7007, 7033, 14007, 14033, 21007, 21033, 28007, 28033 kHz.
2. Get on the internet and point your browser at http://www.boc.de.
3. For live video, choose "Server push" or "Java image".
4. Watch us for a while...
5. If you are not in Europe - call in and work us. (Sorry, no EU-to-EU contacts allowed)
6. If you are online, sign "WEB" after your report (like '599 001 WEB').
7. The crew will do funny things you can watch on the web.
8. Send us an Email and tell us what you think about our crazy team. Any comments (before and after the contest) are also welcome: E-mail to: dl6fbl@boc.de.

ADDED NOTE: Ben states, "If you don't find us at once, but don't want to miss the fun: we will display our current CQ frequency on the Web."

FP, ST. PIERRE & MIQUELON. Look for the Praire DX Group to be active from here August 26th to September 1st as FP/N9ND. Activity will be CW/SSB and RTTY with operations on 80-10 meters and possibly 6 meters. QSL via N9ND.

HL0, YOUNG-HEUNG ISLAND (South Korean IOTA). The Korea University Amatuer Radio Club (K.U.A.R.C - HL0T) has announced a five day IOTA DXpedition to Young-Heung Island from August 6-10th. KUARC was founded in 1976 and now has about 80 members. About twenty members will activate IOTA AS-105 using the callsign HL0T. This is the 7th DXpedition the group has put together since 1991. Young-Heung Island is small island that is located west about 80km from Seoul City, the capital city of South Korea (ROK). This island is famous for blue sea and beatutiful beaches and many

travellers have visited this island for summer vacation. Activity will be on the following (REPORTED) suggested frequencies: 40m (7090-7095 MHz SSB), 20m (14015-14030 MHz SSB), 15m (21020-21030 MHz SSB) and 2m (145.000 MHz). QSLs can be sent to the KARL bureau or directly to the address: 1, 5-Ka, Anam-Dong, Sungbuk-Ku, Korea University Amatuer Radio Club, Seoul, 136-701, South Korea.

MEDITERRANEAN IOTA DXPEDTION. Alvaro, EA3BUF, reports that he will be activating some French IOTA's during the month of August. Look for him to sign F/EA2BUF/p from Provence-Cote d'Azur Region Group (EU-95), Hyeres Islands (EU-70) and Lerins Islands (EU-58). QSL via F8REF (Bureau) or EA2BUF (Direct).

NEW IOTA TO BE ACTIVATED! Michael, BY5QN, reports that he and others will be going Pingtan (Haitan) Island (no ref. number yet), which is located to the Southeast of China's mainland near Fujian Province. This will be the first time amateur radio transmission will be used from this island. The callsign will be BI5P. Dates were not mentioned, but stay tuned for updates.

OPDX INTERNET SUBSCRIBERS will receive an additional bulletin containing the article/message called "CY9AA - Summer 1997" by Dennis Motschenbacher. K7BV, Editor - National Contest Journal.

QSL INFO AND NEWS......
QSL ROUTE CHANGE. Active contester Andy Melanyin, UA3DPX, frequently uses AC6WE for his overseas operations. His most frequent operations have been 5B4/AC6WE and IG9/AC6WE. Please send all QSLs to Andy direct at Box 9, 141400 Himki 7, Russia. Andy is currently unable to retrieve cards sent to the AC6WE address in Oregon or the W6 bureau.

1A0KM LOG SEARCH WEB PAGE. Sante, IK0HBN, reports that his Web page has the logs for the 1994, 1995 and 1996 operations of 1A0KM. His Web page also has the 1998's operation which is continuously being updated. Check it out at: http://qsl.net/ik0hbn

XV7SW QSLS. As reported earlier, Rolf, SM5MX, has now returned to his native Sweden after wrapping up his operation as XV7SW. Upon his return, about 500 QSLs were awaiting him with requests for direct replies. Rolf reports to OPDX that "All have now been expedited". Rolf also explains that many did not understand that XV7SW and SM5MX are the very same person, hence direct cards to Rolf's SM address could not be handled until his return recently.

ED2IZA QSL Route. Rafa, EB2DJB, reports that ED2IZA, which was active from July 24-29th from Izaro Island (North Spain), has the QSL Manager of EA2URV. Cards can be sent via the bureau or direct to: URV-ABRA, P.O.Box 323, E-48080 BILBAO, SPAIN. For more info, send an E-mail to: urv@kender.es -- If possible, the logs will be available on a Web page, in September.

EW5O QSLS. This is a special callsign being used during contests in 1998 by the Gomel Radio Club (EW8WA). QSL via: P.O.Box 105,

Gomel 246050, Belarus.

Steve, W6MD, reports that he is NOT the QSL Manager for YB2PBX. Tony's QSLs can ONLY be sent direct. However, Steve is the QSL manager for the following: YB2BRW, YB1XUR (new as of 7/20/98, but has logs for all QSOs) and YC9WZJ (also, new as of 7/20/98). All can be sent DIRECT via CBA ONLY.

Steve, W6MD, is also QSL Manager for T93Y, T93Y/5B4 and T94EU. Please send DIRECT (preferred) or bureau (only shipped out once a year). He mentions that the T93Y/5B4 cards are not ready; please be patient. It will be another month or so, then direct cards will be answered first.

BI4Q QSLS. Deal, BA4TB, reports that the first 2000 cards for BI4Q (AS-135) are printed in full color. QSLs are now beginning to go out as of July 26th. Any questions, send E-mail to: jsdxc@qsl.net
BI4Q QSLs go only via BY4RSA: P.O.Box 538, Nanjing, China.

QSLS for 8P9IF (IOTA contest). Bob/G3PJT and Derek/G3KHZ, who operated 8P9IF during the IOTA contest last weekend, requests QSLs should be sent directed to Bob, G3PJT. Derek states, "Without thinking, I said to several station to QSL to me (G3KHZ)!"

NOT THE QSL MANAGER. Paul, F8PX, reports that he is NOT 6W1RE's QSL Manager. Paul has received many QSL for 6W1RE. The correct manager is 6W1QV. F8PX had returned all QSLs received to the right QSL Manager, 6W1QV, with all green stamps and IRC.

S0, WESTERN SAHARA. The "DX News Sheet" reports that Mark, ON4WW, hopes to return here again sometime after August 3rd, as S07WW, when he goes back to 7X. QSL via ON5NT.

SPECIAL EVENT. Special event stations EU200A, EV200M and EW200M will be active from now until December 31st. The station will be on the air to celebrate the 200th anniversary/birthday of Adam Mitskewich. QSL Managers are as follows:
EU200A - EU4AA, Pavel Anatsky, P.O. Box 67, Lida 231300, Belarus
EV200M - EW4EW, Nikolaj Boltach, P.O. Box 99, Lida 231300, Belarus
EW200M - EW4MM, Kazimir Kopachel, P.O. Box 88, Lida 231300, Belarus.

TT, CHAD. Jim, WA4KKY, is reportedly back in Chad. If he becomes active again look for TT8JWM. This could be the last time you hear him. He is scheduled to leave August 7th or 8th. Activity will be SSB and RTTY with operations on mostly 20, 17 and 15 meters. QSL via N4RXL.

USI Alert. Hank, K2HJB, reports that he will be active from Montauk Point, Long Island, NY (NA-026) and Block Island, RI (NA-031) during August 17, 18, 19 and 20th. He will be around 14260 kHz (20 meters only). QSL via K2HJB or KB2PFP.

YL DXPEDITION/GATHERING. A group of YLs from 14 different countries will be active as JW0YL from the Svalbard Polar YL's 1998 gathering August 20-24th. They will be active on all bands.

Now, thats a earfull! Have you ever tried contacting the fcc to get rid of illegal op's? If you have you will know that it doesn't work. If we hear a illegal station, would would you suggest we do? We have had problems on the local repeaters here and have called the fcc until we are purple in the face and little gets done. After about 5 years of bugging them, they finally showed up. They got after one guy that a local had nabbed live and in color sitting in his car. Not a whole lot really happened, and all the worst offenders remain trashing the repeaters. What would you suggest we do about foul language if the fcc refuses to file because of first ammendmant rights? Dead carriers? I outcarrier them... I've found the fcc to be fairly useless as far as enforcement. Not their fault, they don't have the funds /man/woman power. I can think of a real good way to get the goofballs off the radio, but it pretty much entails me beating the crap out of them. Then, I will probably be the one in legal trouble. I can tell by your statements you don't have too much experiance dealing with the fcc. Also no way to self police if we can't make a legal radio citizens arrest. In other words, we can't do it with the present system. MK

Yep, thats because they lack the negative mindset to learning code. It's
all in the brain. If you think you will hate code, you will. MK

Not quite. Particularly between the ages of 6-11, children have the
ability to acquire languages and communications methods at rates
far exceeding those of adults. Making the assertion that a "negative
mindset" is the culprit may be emotionally satisfying if you have a
pro-Morse test agenda to promote, but ignores a lot of physiological mechanisms
behind how people learn.

Its amazing how we always want to lower our standards so that people can join the ranks. Why don't we just do away with things like algebra or english lit. in our schools, that way everyone could get their degree. I mean I have really never had much use for the 3 years of algebra that I took. My current career doesn't make use of it. English lit., well, that speaks for itself. The fact is that people just don't want to work at anything these days. They want it all for the minimum amount of effort. Sure you say the manufactures need more people to feed their market, or people with dyslexia are handicapped, but 20 years ago this wasn't even a big issue. Frankly, excuses are like asshole, everybody has one! We gave an inch with the no code and now they want a mile! I urge everyone to speak up, not only to the ARRL, but to your congressmen and senators. We worked hard for our HF privileges and now we are letting them slip away to anyone who wants them.

We welcome new people to the hobby, it is the only way to keep it alive. We understand the process of learning code can be intimidating but it is not impossible for anyone. Some of you guys wanting to drop the code should be ashamed of yourselves! What kind of example are we setting for or children when we present an example that lowering standards is okay to accommodate slow learners. Being a slow learner doesn't mean someone can't learn it just means it may take 2 weeks instead of 1 to learn the code. Should we do the same for our academic standards in our high schools and universities?

If we loose it then we are all to blame. The OT's that let it slip away, and the newcomers that worked to take it away.

Years ago, I paid $3000 for a 4.7MHz PC with only floppy drives. My friend just paid $1000 for a 200MHz Pentium PC laptop with 2G hard drive and CD ROM drive. Should I be jealous of him? Times change. Why should he pay as much as I did. Your HF privileges are not "slipping away" anymore than my PC above slipped away when my friend bought a better machine for less. Do you feel the same way about people who win the lottery? You don't have any less money even though they got something for almost nothing.

Nope, but then professional endeavors and amateur hobbies have never had much in common.

2564. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-03 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6q3358$b4g@news.Hawaii.Edu>
Source record: 28194
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman (KH2PZ / KH6)
(rec.radio.amateur working-group)

Neither have the price of technology, lotteries and code requirements.

> I'm not talking about lossing HF privliges and I appologize for wording it to
> give that impression.

What I am speaking about is that small barrier that separates people who have the self discipline enough to jump a hurdle instead of crawling under it. It sets a standard that invites the type of individual who doesn't require much policing. Someone who has worked for a privilege and wants to take care of it. Granted, amateur radio is not void of some huge problems. I hear a lot of racist crap on the low bands, jamming, obscenities etc. but for the most part the amateur bands are in fair shape (I only operate HF, so I can't in include 50+mhz in that statement). I have noticed that most of the rise in the amateur problems have increased over the past 10-15 years. I'm not sure what that means. Maybe someone can come up with an explanation.

If it were up to me, I would do away with any technical knowledge required for a license. In this day of plug and play technology who needs to know how a transistor works or how to plot a smith chart. The written is equally as difficult for me as the code is to some people. Is that next? Will it come to

the point that all one has to do is send in an application for a call sign?

73
Brent Scott, N5CLK

P.S. can anyone tell me why when I look for my old call sign on call sign databases it doesn't come up with a cross reference to my new call?

I think the telepaths must use radio to confirm the telepathic
contact, and then finally need to send a post-card to get things in
writing ;-)

> Although with that fairly rare GM4 call, you needn't
> resort to telepathy (?)

I wasn't aware of any shortage, there seems to be several fairly
active ones around here, up to just about everything from 80m ragchewing
to moonbounce.

Cheers

I understand. I suppose it must be due to a 50-50 mixture of poor manners and desperation. If you'd been calling another European country, I think you'd have had similar calls from G stations. At least by making an unambiguous call you've not contributed to any confusion, and I can't see how anyone could criticise you without it showing that they think that you doing your hobby must be for THEIR benefit. Perhaps they'd have been happier if you'd just called CQ DX and left them guessing what calls you would answer?

Thanks,
David GM4ZNX

I am planning on sailing to south pacific for live-long dx pedition.
I do not plan on comming back. Instead I want to do like Danny Greene
did in the 50's and 60's on his yacht "Yasmi".

Am I correct in thinking that Hams might want to fly out to where I am
and crew on the next let....and of course operate /MM and at the next dx
spot?

Any suggestions as to which spots to 'put on the air ' first.

Susan Meckley W7KFI/MM2 S.V. Menage-A-Trois (46' cutter rigged)

Ahoy -- Good Ship Menage-A-Troi
Avast ye DX Lubbers, and where might ye be sailing fer??
Skull Island sez ye, shiver me timbers buts thats the home of
K1NG Kï¿½NG and he don't low no Dxpeditions there.
Better plan on Fantasy Isle -- dey got Da Plane Da Plane!!
Or one might furl the scuppers and head for
Tabacco Spit next to Mary Cay

Avoid Grief Reef sez I
A good CW spot might be QueEss Cay
But Avoid Pay Atoll and Bootlegger's Strait, however
But Have a Bon Voyagee Maties sez I.

Me thinks your post is akin to Troll Atoll, Maties

73
Rod - land Locked in San Diego

Thank you for posting this notice of your Special Events Station.
Somehow, I missed the notice in QST, but spoted it in the
rec.radio.amateur.dx news group.

I was able to make contact with the station on 20 meters.

Unfortunatly, that happens to a lot of cruisin' hams..... But
most of them WERE planning on coming back....

>Am I correct in thinking that Hams might want to fly out to where I am
>and crew on the next let....and of course operate /MM and at the next dx
>spot?

I doubt it. But I'm sure you could find some cruzers that want to
go along. Check the inter island net on 14.315 at 0800z daily, I
think you'll find somebody to go along for the ride. When you get to
the DX spot, please don't operate /MM. Put your feet on the beach.
If you operate /MM you'll become famous like Don Miller, not like
Lloyd and Iris.

>Any suggestions as to which spots to 'put on the air ' first.

Yes, I'd recommend P5. I think that would probably be very popular with
everyone you speak to on the radio. Don't forget to enlist a QSL manager
before you go, and take along an Inmarsat terminal so you can email
back the logs. Have a nice trip.

The most important thought being lost in all aspects is that ham radio is a hobby. It does have serious sides (ARES/RACES/ARC, ad nauseum) but it should primarily be fun. I agree with a basic code test, in fact I never argued about the current system. It was a rite of passage.

I also enjoy assembling models, yet I do not have silk screening or painting perfected. For those who enjoy code they are free to embellish and enjoy this aspect. Similarly for packet, TV, etc..

When it ceases to be fun, get out. In the meantime let's accentuate the positive aspects of our hobby and quite debating items which will change. Versatility, after all, is what the majority of you have professed in your notes.
Godspeed

If you want to lose the HF bands, just keep CW.

Look at the trends in HF and VHF.

I rest my case.

Hello,

Is there a keyer on the market or can be easily made for my Bencher
paddles.
Also can I interface the keyer(when I get one) to my computer so I can
run it with Super Morse 4 (Morse Code program for computer)

Any information would be great. Please respond via newsgroups.....my
e-mail is acting up again.

Thanks.

Norm B.

I have a Morse program you can connect your key straight into com port 1
or 2 without any hardware. The keyer is provided in the software. This
is free at http://come.to/g0mdo. There are two programs DMORSE sends and
receives, RMORSE is receive only. Help yourself

I agree with your thoughts of not lowering standards be it radio or school. However, you can drop old outdated or non use techniques and put in place something of equal importants to keep the standards up and be more useful. Case in point, as far as higher learning in school: Drop the courses on how to operated a mathematic sliderule and put a course on how to program a computer. Twenty years ago, sliderules were widespread and people needed to know how to use one, because the electronic age hadn't come yet. Now that the computer age is here, sliderules are history. So drop the sliderule and put computer programing in its place, you haven't lowered your standards. You can do the same thing with radio license testing. I view the code testing about the same as learning the sliderule. Interesting but limited to todays world. If someone wants to learn either skill, go for it.

I wish I could have gotten by with only three years of algebra. When I went to college, we started in calculus and it was presumed everyone had a good foundation in algebra. Should we make everyone take calculus just because?

BTW, I am a General class and I learned code, but it was a nine month struggle and I have promptly forgot it. CQ, CQ, CQ.... MY NAME IS, MY QTH IS..... doesn't interest me. Don't miss code either. I am glad that I was exposed to it on the otherhand.

Special Event Station, South Bay Amateur Radio Club
At the Main Street USA Car Show, El Segundo, California
Saturday, August 8, 1998, from 12 noon - 5 PM California Time
1900Z - 0000Z

This is being put together at the last minute, so you
won't find this listed in QST. Worse yet, we don't
know if we will have our station running on 20 meters
in time for the event.

Look for Us in the General portion of the 20 meter band.
If we can't get our antenna right in time, we'll
be in the General portion of the 15 meter band.
If conditions are REALLY good on 10 meters, we may
jump to the Novice/Tech+ part of the 10 meter band.

I'm sorry that I can't provide any better information
on where to find us, but those putting this together,
didn't have a change to plan it out carefully.

Certificates will be sent to all stations worked who
send a BUSINESS-SIZE SASE.

W6SBA - Event Station
c/o Lehmans Flowers
321 Main St.
El Segundo, CA 90245
Phone: (310)322-5961

So drop the sliderule and put
>>computer programing in its place, you haven't lowered your standards.
>>You can do the same thing with radio license testing. I view the
>>code testing about the same as learning the sliderule. Interesting
>>but limited to todays world. If someone wants to learn either skill,
>>go for it.

I say limited basically because most CW people send and receive at a slow speed 5, 13, 20WPM or maybe more?) Yes there is a small percentage of people that can copy at 25+ WPM. CW is like speaking a foreign language and takes lots of practice but usually much slower than voice. Yes its fun for some and yes there are people that get very good at it. If a person likes the challenge, go for it, just like learing a second or third language. In my example, sliderules can get the job done, but they are slow compaired to todays computers and calculators. Should sliderules classes be mandatory? Or should they be phased out (which they are) and the high standards of whatever licensing program be maintained by introducing the study of new technology fitting to the subject? CW should not necesarrily be foregotton but less importantance should be placed on mastering it. A 5WPM test should suffice for all classes of license would be my recommendation.

I bet you more people are communicating by the new electronic internet than by CW. Face-to-face communication, followed by telephone and then followed by internet would be my first guess at the most used forms of communication. I don't belief CW would make the top 10 list.

I agree with Casey. What's wrong with a little challenge now and then to prove to yourself that you can and to the fraternity that you really want it.

As for justification for CW, I think there will always be a need for it. Imagine for a moment a worldwide catastrophy of some sort and you were able to survive, but your gear didn't. You have nothing but junk and parts left and you have to rebuild something to communicate. A sophisticated ssb unit is out of the question, but a simple oscillator is not. Hmmm, maybe CW isn't such a bad idea after all. John

>

While your argument makes sense on the surface, I wager the dropping of (more stringent) CW testing will not be accompanied by an increase in standards elsewhere in the test. I site the history of the testing program here as a clear example of how standards slowly, but surely drop.

It has been my experience that many opposed to the CW requirement simply don't want to spend the extra effort, regardless of the subject. They will be no more accepting of an increased technical requirement than they are the CW requirement. After all, why would most Hams need to know about resistors, transistors, tubes (gasp!), etc. when all they do is go down to RS and buy an HT. Why should they have to learn all that irrelevant stuff? They aren't building radios. All they need to know are operating protocols and a little bit on safe operation.

Give in on the CW requirement and the rest will surely fall. Do you believe the bands will be better after this? I don't. 5 wpm CW is not that hard, really. If, for whatever reason, 5 wpm is unreachable, there's still the Tech license. What with repeaters, packet and satellites, there's more than enough modern research work to do and fun to have on 50MHz and up. Why would anyone doing, for example, spread spectrum work want to be on the 80M band?

If they do succumb to the clamor, I hope they leave a little bandwidth on HF reserved for CW. It needs so little, given it's efficient use of spectrum.

Just my $0.02 worth.

ARLD031 DX news

ZCZC AE31
QST de W1AW
DX Bulletin 31 ARLD031
From ARRL Headquarters
Newington CT August 6, 1998
To all radio amateurs

SB DX ARL ARLD031
ARLD031 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, John, G0GDU, QRZ DX and Contest Corral from QST. Thanks to all.

FIJI, 3D2. Shozo, 7N2PYF, will be QRV as 3D2PY until August 9. Activity will be mainly on 20, 17 and 15 meters SSB. Operating frequencies will be around normal DX windows or IOTA window. QSL to home call.

SPRATLY ISLANDS, 9M0. Uwe, DJ9HX, will be active from here August 11 to 19. Activity will be on 40 to 10 meters with an emphasis on 12 and 10 meters. QSL to home call.

BOTSWANA, A2. Charlie, A22/W0YG, is QRV until August 22 on the lower bands, with a special effort on 160 meters. QSL to home call.

BELARUS, EU. Special Event Stations EU200A, EV200M and EW200M will be active until December 31, 1998. These stations will be on the air to celebrate the 200th anniversary of the birthday of Adam Mitskewich. QSL via operator's instructions.

MARTINIQUE, FM. Vincent, F5JMV will be QRV as FM5JV for 3 years beginning August 11. QSL via F5LNV.

ENGLAND, G. Look for Special Event Station GB98RH to be QRV until August 8 during the Sherwood 98 International Scout and Guide camp event held in the Sherwood Forest area of Nottinghamshire. Activity is expected on 80 to 10 meters, including 6 and 2 meters, and 70 cm, using mainly CW and SSB, with some RTTY and Packet. QSL via G0GDU.

SOUTH KOREA, HL. Amateurs in South Korea will replace their current call area indicator with 50 to celebrate the 50th anniversary of the Korean government. Look for HL50 and DS50 prefixes until August 31.

THAILAND, HS. Kurt, HB9AMZ, is QRV as HS0ZBS until August 11. He is active on all bands except 80 meters and the newer bands. QSL to home call.

WESTERN SARAHA, S0. Mark, S07WW, has been QRV on 15 meters around 0900 to 1000z. QSL via ON5NT.

CORSICA, TK. Robert, TK/S53R, is QRV until August 17. Activity is on all bands, including the newer bands, using CW and SSB, and some RS-12 activity as well. QSL via the bureau.

NEW ZEALAND, ZL. Barry, ZS1FJ, is QRV from the Great Barrier Island, IOTA OC-201, as ZL1MFW. He will be here for a few days, depending on conditions. QSL to home call.

THIS WEEKEND ON THE RADIO. The Maryland-DC QSO Party and the Worked All Europe DX CW Contest are all on tap for this weekend. Please see August QST, page 105 for details.

NO its not a bad idea for what you just said
just get rid of it as a testing method
keep the mode infact you caould even expand teh cw portiion of the
band as far as i am concern..just get rid of it as a test..we dont have
one for rtty to see if you can type 30-35 words
we dont have one for atv to see if you can get a pic on the air
we dont have one for phone to see if you speak the kings english in a
PROPER manner
WHY CODE

Hi Gary, if I knew your callsign I could, but just go to:

http://www.buck.com/cgi-bin/do_hamcall

and put in your call, and part of the info you will get
back is lat/long and grid square locator.

You say my argument makes sense on the "surface", well so does
everything you have mentioned. So!!!

>While your argument makes sense on the surface, I wager the dropping of
>(more stringent) CW testing will not be accompanied by an increase in
>standards elsewhere in the test. I site the history of the testing program
>here as a clear example of how standards slowly, but surely drop.

There are some people that definitely fit into the catagory you
mentioned, I do not fit into that mold however. I have "credit" in
13WPM CW as I have "credit" in three semesters of college calculus. I
have no use for either one and find neither one enjoyable or usefull
and after acquiring the passing grades(so I can go on and acheive what
I really wanted) for both fields of study, have promptly let them
go. Haven't missed calculus in 25 years.

There is some truth to the fact that why know the nitty-gritty about
capacitors and resistors if there is no radio kits available to
assemble anymore? How many radios have you built lately? Or are you
running one of those high priced solid state rigs with a solid state
amp, beam rotor and all the extras?

I am not one of those that is advocating lowering standards, just
changing the testing material to something equally as challenging but
usefull for most hams on an everyday bases. You don't need to know
calculus to be a brain doctor but perhaps if you want to be a rocket
scientist.

>It has been my experience that many opposed to the CW requirement simply
>don't want to spend the extra effort, regardless of the subject. They will
>be no more accepting of an increased technical requirement than they are
>the CW requirement. After all, why would most Hams need to know about
>resistors, transistors, tubes (gasp!), etc. when all they do is go down to
>RS and buy an HT. Why should they have to learn all that irrelevant stuff?
> They aren't building radios. All they need to know are operating
>protocols and a little bit on safe operation.

See my statement above, I have credit in 13WPM and it was ugly from
start to finish.

I am not bitter about CW. Really doesn't matter one way or the other
to me about testing or not. I have acquired all the privleges I care
for. In fact any form of HF doesn't excite me anymore. Researching
VHF radio site loctions, land ownership, repeater equipment
financing,-acquistion , linking radios, finding the area of coverage
and installation interest me much more than..... making very brief HF
contacts to far off stations that sound like Donald Duck, through
static crashes, thats if the band is up or down, AND then all you get
is "you are a 59, see ya". OR someone running a big amp, with a beam
overpowering everyone and not even responding to your barefoot weak
signal. Hmmmm, lots of fun for lots of input and very little output.
To each his own.

It just kills me to hear city folk, while traveling on vacation
outside of their small world, trying to get through to a far off
repeater with their little bitty HT and wondering why they are
marginal. I might add that some of these folks are big HF-CW fans, by
listening to some of their conversations with the locals. My $0.02
worth as well.

If you want a challenge, go to a real college and get a real degree
that will land you a real job. Or climb Mt Everst.

Please tell me where would you get electric power to run your rig if
your worldwide catastrophy occured? Do you think your electrical
wall socket would still be working? Damn few hams have the capability
to operate when local power is interupted for only brief times
(floods, hurricanes, ice-snow storms etc) Get real! If your
"worldwide catastrophy" occured and I survived, radios would be my
last concern. I would be getting myself a gun and heading to the
easiest food gathering source plus acquiring shelter, fighting off
roving bands of desperate starving people etc,

Kits!? We don't need no stinking kits!

Seriously, for at least ten years I have had almost monthly orders to Digi-Key, Mouser, etc. for parts. Right now I have incomplete: 220 MHz transverter, 144 and 432 MHz high-power amps, DDS VFO, microwave PLL design, 40-meter QRP transceiver, and probably a few others that have been buried by the above projects and forgotten.

Most of these will be done in a few weeks or a few months and by then I will be eyeing a dozen other projects to build. Homebrewing is not dead in this neck of the woods.

Have you got access to the WWW? Then you can do it yourself.
Look up your place at the Geographic nameserver
http://www.mit.edu:8001/geo
(there you'll find latitude and longitude for most places in the
United states - I wish we had something comparable for Europe ...)
and then go to
http://www.amsat.org/amsat/toys/gridconv.html
or
http://www.aber.ac.uk/cgi-bin/user/auj/locate.pl
where you can convert latitude and longitude to your grid square
locator.

No kits! There's plenty of kits available. I've built kits and from scratch. There's plenty of home brew articles around. I've also trouble shot and repaired my Icom 761 a couple of times including replacing the vco capacitors. I've modified the 761 filter selection circuitry as well. You'll never convince me there's no longer a need for theory - the need is greater than ever. The biggest need is to teach people how to set gain controls so they don't splatter all over the band.

Most of my ham friends in AZ have backup systems like
solar panels and/or propane/diesel/gasoline powered
generators in addition to food, water, and weapons.
IMO, all *serious* hams have backup power.

Regarding the US Amateur Radio license restructuring proposal by the ARRL:

I am currently a General class licensee, and an ARRL member. I obtained my General upgrade this past January. Prior to this, I was a Tech Plus licensee for around ten years, and a Novice before that for two years.

I was tuning across the 40m band last week, and overheard several Advanced and Extra licensees bemoaning the proposal, bleating about how they have already resigned their V.E. status and quit the ARRL. This is stupid! How I wished the discussion were being held in the General sub-band, so some opposing viewpoints could be heard.

I think the existing license structure is flawed. Disallowing Tech Plus operators HF voice below 28 MHz is to prevent them from talking to those who would encourage them to upgrade. This effectively cuts off the Tech Plus from most of the HF community, and has driven a wedge between two large segments of the amateur population. The US code requirements are out-of-line with the rest of the world. I know of many skilled Tech Plus operators who have either sold off their HF equipment, or have quit the hobby entirely - a shame. Clearly, somthing needs to be done.

In attempting to solve the problem, the ARRL may have gone a little too far. For instance, I am concerned that giving a Novice what amounts to a General ticket will remove any incentive to upgrade. Novices and Tech Plus operators should have to pass the General written elements BEFORE getting those HF voice privileges. However, the only alternative to the ARRL's proposal may be to maintain the status quo for many more years, and that is completely unacceptable. I understand that last month, only THREE novice tickets were issued.

Ever demonstrate low band DX to kids? When you make a phone contact, they can hear and understand what is going on. WOW! You're really talking to someone in Russia or the Canary Islands... COOL! Make the same contact in CW and they are lost. CW is alien, and appears to be a formidable obstacle to most people, regardless of the reality. Yes, we're a society of instant gratification - get over it...

Amateur Radio is losing steam and must be revitalized to offset new and exciting modes of communication that have no license requirements (i.e. the ubiquity of the Internet and cellular telephones). Our government has demonstrated a willingness to auction off underutilized radio spectrum to the highest bidder. If there aren't enough amateurs to justify and defend our frequency allocations, they will certainly be diminished.

Does anyone really think "lowering the standards" to 5 WPM code for HF phone privileges will result in a massive influx of CB-type operators? I don't think so! Rather, people with a genuine interest in radio will be given a chance to experience the thrill of making their first DX phone contact. Personally, I think we should retain the Novice, but add Novice HF phone sub-bands in 80, 40 and 20 meters, and dump the Extra Class. (Asbestos underwear on! ;v)

I think the ARRL proposal will go a long way toward increasing public awareness of, and interest in our hobby. I am all for it... YES!

Regards,
Michael Borowiec, N9EUZ

Congradulations to you Cecil and too all your friends for having backup power. Excellent!!! I also have backup power (solar) and all three of my VHF repeaters are solar powered.

I would be interesting just what percentage of licensed Hams have backup power systems like you have defined?

Hi,
CW is for HF and HF is for CW. Is it not?
I wonder what the trend is. There are lots of CW trafiic on HF bands.
Unless CW is banned(outlawed), I am on CW 99.9999999% I do have a
microphone too, tho. I can work CW all day, all night but no way with
that dang microphone. My family would try to kill me for disturbing
peace in the house, hi. CW and headphone, noone is disturbed.
CW is music to me, a form of arts, a way to meditate. Listen to a good
fist and enjoy!!!
Have a great week end, 73,
Tony, VE6CGX, Fists #3919

> Regards,
> Michael Borowiec, N9EUZ

"Disallowing Tech Plus operators HF voice....." - is an example of the "I want it all" mindset! They aren't being disallowd anything they can't earn by applying themselves to learn something further. Learning some more CW isn't like demonstrating the ability to perform unrelated brain surgery. CW is related to communications. Everyone is trying to redefine what the term "related skills" means.

Tech licensees have been successfully upgrading for years without having HF phone priveleges. Why do you think they will stop upgrading now?? The only reason I can think of is the "dumbing down" of America's youth by "allowing" them priveleges without teaching them how to earn them.

And....the only way that "US code requirements are out-of-line with the rest of the world" is that we use a graduated system to establish "incentives" to improve oneself. The "rest of the world" requires CW for amateur licensing - now some of us are proposing to eliminate the requirement. It seems to me that the US would then be the one who is out of step.

The whole CW discussion is only a red herring to justify the avoidance of applying extra effort to gain extra rewards.

2649. Ohio/Penn DX Bulletin #369

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-09 00:00:00 UTC
From: kb8nw@barf80.nshore.org
Message-ID: <MPG.1037dadfa0974baf989693@nntp.stratos.net>
Source record: 27981

SB DX @ WW $OPDX.369
Ohio/Penn DX Bulletin No. 369

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 369
BID: $OPDX.369
August 10, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2EWB, K2WE, WB2RAJ/WB2YQH & The 59(9) DXReport, AJ4Y, KF9YL, ARRL DX Bulletin, BD7JA, DL6LAU, EW4EW, G3KHZ, G4BUE & DX News Sheet, GW0ACH, JA1ELY, JT1KAA, PS7AB, VK9NS, YB4JIM, YC0LOW, Z32ZM and ZP6CW for the following DX information.

3V4, QERQUENAH ISLAND (Rare IOTA from Tunisia). Mome, Z32ZM, informed OPDX (and others) that he together with Dragan/Z32AU (HB9DNE), Hrane/YT1AD (Z31AD) and two other operators from the club station 3V8BB, will put this very rear island on the air for the first time in more than 40 years. They will activate IOTA AF-073 between September 11-18th. Their station will be on the air 24 hours a day with operations on CW, SSB and RTTY. The following are the suggested fequencies:
CW - 7005, 10101, 14024, 18073, 21025 and 28025
SSB - 7060, 14260, 18125, 21260 and 280460
RTTY - 7035, 14080, 18085, 21080 and 28080 kHz
(12 meters not used in 3V-land)
The team reports this expedition will cost a lot and any financial or technical support is more than welcome (especialy NEW or USED radios, amplifier, antennas, SWR, rotator, coax-line, electronic keyer and lap-top computer). The team would like to set up a second station. If you would like to help, donations can be sent to: HB9DNE-Dragan Kostevski, Hugsam Str. 3, CH-8833 Samstagern, Switzerland. Or direct to Dragan Kostevski's bank account: SPARCASSA-RICHTERSWIEL, Conto nr: 162.200.689.03
For any other information or questions please contact Mome, Z32ZM, via E-Mail: dalibor@freemail.org.mk
After the DXpedition takes place, a WEB page with logs and photos will be created, with the special "Thank You" page for the donors (This will also be on the QSL card).

5X, UGANDA. The "DX News Sheet" reports that Laurence, GM4DMA, will be active again August 14-21st as 5X1LH. Activity will be mostly on 17, 15 and 6 meters with 100 watts beaming to Europe. QSL via home call.

A3, REP. OF TONGA. JA2JW, his XYL JA2DPC and his second son JL2ONQ should be active by the time you read this. They are to arrive on August 10th and stay until August 14th (QRT at 0700z). They will be active on 80-6 meters, SSB/CW. They will use 100 watts into G5RV for 80-10m, dipole for 30m and a 6 element yagi for 6 meters. Check 28350 kHz for 6 meters schedule. Look for A35YH/JA2JW (mainly CW), A35PC/JA2DPC (mainly SSB) and A35NQ/JL2ONQ (mainly on 6m). QSL via each homcall.

A5, BHUTAN. Jim Smith, VK9NS, will be releasing a HIDXA announcement VERY soon about a possible visit to A5, Bhutan, towards the end of October. A separate bulletin will be issued as soon as we receive it. Meanwhile, OPDX InterNet Subscribers will receive a special additional bulletin that Jim put out earlier in the week about his good friend from A5 who passed away.

BI7, WEI-ZHOU ISLAND (New China IOTA). Yang, BD7JA, informs OPDX that after several months of hard work and planning, he and others plan to go to Wei-Zhou Island (Chinese island listed as "d" for the IOTA program). Members of the operating team will be BD7IA, BG7IB, BD7IX, BD7JA, BD7JG, BD7JK, BD7KW, BG7NI, BG7NQ and BG7SU. They will be on the island August 20th and leave August 23rd. They will use the callsign BI7W. They will be active on 40-10 meters with operations on SSB, CW and RTTY. Their station will be equipped with a TS-950, TS-690, FT-900, AS, 40-2CD and a generator. QSL via BD7JA: P.O.Box 1713, CANTON (510600) P.R. China). QSL ONLY DIRECT. This time the QSL card will be sponsored by Jose/EA5KB. At this time a WWW homepage is under construction and details will be forthcoming.

CE, CHILE. Steve, NE4Z, is active from Santiago as CE3/NE4Z. Activity is mainly on 28340 or 21340 from 2200-0000z daily. He has also been heard on 7031 (at 0345z), 14057 and 14188 kHz. Steve is planning to activate some of the CE IOTAs. Stay tuned! QSL is to AJ4Y: Paul Womble, P.O. Box 1207, Highland City, FL 33846-1207 USA.

EV200, BELARUS. Nick, EW4EW, reports that a Byelorusian-Polish special event station EV200AM will be activated between August 21-25th to celebrate the 200th anniversary/birthday of Adam Mitskewich. Operations will be from Novogrudok, Adam Mitskewich's native land. QSL via EW4WW or EW4MM. Meanwhile, the ARRL DX Bulletin states EU200A, EV200M and EW200M will be on the air for the same celebration until December 31st. QSL via operators instructions.

FM, MARTINIQUE. "The 59(9) DXReport" states that Vincent, F5JMV, will be active from here as FM5JV for the next 3 years beginning August 11th. QSL via F5LNV for a special QSL.

FP, ST. PIERRE & MIQUELON (Correction/Update). Last week we mentioned that the Prairie DX Group DXpedition would be going here (Aug. 26th to Sept. 1st) but gave the incorrect callsign FP/N9ND. The correct callsign is FP/N9PD. QSL DIRECT or via Bureau to N9PD (not N9ND as mentioned). As contacts are made with the stations from around the world, this activity will be reflected on the group's web page within minutes. For the first time hams and non-hams around the world will have the

opportunity to view and study the activities of a DXpedition as it happens. In addition to live ON-THE-AIR logs, the Prairie DX web site will include Amateur Radio related links, featured information regarding the islands of St. Pierre and Miquelon, plus updated photographs and sound files from the DXpedition. This unique, VIRTUAL DXpedition will afford hams the opportunity to immediately verify their contact with a DX station. The PDXG has a Web page available at: http://www.prairiedx.com

GB5, FLATHOLM ISLAND (Wales). Eleven members of the Barry Amateur Radio Society will be operating as GB5FI from this Welsh Island (IOTA EU-124) from August 28th to September 2nd. They will be operating on all bands on SSB, CW, RTTY, Slow Scan, Pactor and Amtor. QSL via GW0ANA, Nirvana, Castle Precinct, Llandough, Cowbridge CF71 7LX or Bureau. For more information about this operation and their club, check out the Web site: http://www.gw0ana.demon.co.uk/bars

JD1, OGASAWARA ISLAND. Look for Eiji, JQ1SUO, to be active beginning on the evening of August 14th until the morning of August 16th. He will sign JQ1SUO/JD1 and will operate mainly on 20, 17 and 12 meters. QSL via homecall.

KH0, MARIANA ISLANDS. Masa, JH6VLF, will be active from Rota Island (OC-086) as KH0/WD7CLP, October 9-12th. He will also be active in the VK/ZL/Oceania CW Contest. Activity will on 40, 30, 20, 15 and 10 meters CW/SSB. QSL via JH6VLF, Masanori Matsuyama, 303-JyunesuSuzuki, 1330-Hiregasaki, Nagareyama, Chiba, 270-0161, Japan.

PU5, SAO FRANCISCO ISLAND (BRAZIL). This Brazilian island located in the Santa Catarina State North Group (IOTA SA-027, and DIB 08) will be on the air September 10-14th. Look for the callsign PU5U, CW/SSB, 80-10 meters and the usual IOTA DX frequencies. QSL via Bureau or direct to: PP5LL, Jay Lira, PO Box 08, Florian&#65533;polis/SC, 88010-970

QSL INFO AND NEWS.....
Jim Smith, VK9NS, informed OPDX that he has just received the latest batch of VU2JPS logs from Mani by Registered Air Mail. Jim states that he will try to clear the outstanding cards before he leaves for the U.S. He mentions that he will carry some mail to the USA to be posted there upon his arrival.

Steve, K2WE (aka 3W6WE and XU2WE), reports all direct stateside QSLs for the 3W6WE DXpedition to Saigon from March, 1998, are in the mail. If you have not received your card by the end of last weekend, please let him know at "k2we@juno.com" (It may have been lost in the mail). He has about 50% of the DX cards done. Anyone who included return postage will get the card direct via Air Mail. All others will go via the bureau. The QSL is a full color photo card. The picture was taken on the roof of the Kasati Building where the station was located. The picture has Les, W2LK (3W6LK), on the left, and Steve, K2WE, on the right.

QSLs for special event station JU60MTZ (which celebrated the 60th anniversary of the Mongolian Railway Board) go via JT1CJ, Sh.Gankhuyag, P.O.Box 100, Ulaanbaatar-44, Mongolia.

OJ0AU, which was active July 21-27th logged, 14350 QSOs from Market Reef (EU-053). This included 2393 QSOs during the IOTA contest for a claimed score of 5.015.296 points. They operated with two stations most of the time. Conditions were disturbed due to an Aurora, but they were very satisfied with the results. QSLs should be ready in about 5 weeks. Please send your QSL (please ONLY use this NEW address) to DL6LAU: Carsten Esch, Kreuzweg 22, 21376 Salzhausen, Germany (direct or via bureau).

WOW!!!! Didi, YB4JIM, reports that a very bad economic crisis has been taking place in Indonesia, and for the past few months, all prices have doubled or tripled. Unfortunately, the effects have included the rise of postage costs (1000%!). That makes YB-ham's QSLing activity almost impossible during these hard times. Sending an IRC or dollars will not do because banks only take/change a $100 minimum and half postage cost to U.S. is 20 IRCs!.

XM3/CH3/CI3/VE8 POLAR BEAR DX-PEDITION 98 (CANADA). Just a quick reminder that this operation takes place next weekend. A group of Canadians have been authorized to use the special callsign XM3PBX for their Polar Bear Expedition train trip from Toronto to Moosonee (August 15-30th). They will also make a couple of stops on the way using the special callsigns CH3HBC/325, CI3XXV/25 and either VE8C or VE8I. For more details, see OPDX.363 (if you lost it, send an E-mail to the OPDX Archives at "opdx-request@nshore.org" along with the word "archive" in the "Subject:" line and then use the following command in the body of the message:
get volume98/363.0
For updates, check out the Polar Bear 98 Web site at:
http://webhome.idirect.com/~galati

XU, KAMPUCHEA (Cambodia). Steve, K2WE (aka 3W6WE and XU2WE), mentioned in his 3W6WE QSL announcement (above) to watch for an upcoming XU operation later in the year.

YE1, INDONESIA (Special Event). A group of ORARI members will go to Ujung Kulon National Park located in the western tip of West Java (OC-021), Indonesia, to operate as YE1ZI. This special event station is to commemorate the 53th anniversary of Indonesian Independence on August 17, 1998. The operation should be active on August 15th at 0000z and remain on air until August 17th, at 0500z. The team will operate on SSB and CW on 160, 80, 40, 20, 15 and 10 meter bands. QSL via YB0TK, direct (with SAE and mailcost/IRCs) to: Maruto, PO Box 6763 JKSRB, Jakarta 12067, Indonesia or YB0TK via bureau. Special certificates will be sent to those who are interested and able to contact YE1ZI on at least three bands (phone and/or CW, mixed) during its operation. Fee for certificate is US$ 10.00. Donations are still welcomed. For further information, please send E-mail to: mailto:dxuk@hotmail.com

ZF, CAYMAN ISLANDS. Look for Jim, KD3YK, to be active now until August 14th as ZF2JM. There have been no QSNs reported over the weekend. Jim plans to operate QRP CW on 20 and 40 meters. QSL via KD3YK.

ZP6, PARAGUARY. Doug, ZP6CW, has been quite active on 28027, 21027 and 18070 kHz CW. QSL via his manager ZP6CU - Dani, PO Box 73, Caacupe, Paraguay.

```
***
*** PRESS RELEASE
*** DATELINE - August 10, 1998 ***
*** PRIORITY - VERY IMPORTANT
***

The Bored Of Directors here at No-SSB International (tm) have
been commissioned to conduct some totally non-scientific research.
Through exhaustive efforts and at great expense we have determined
that over 500,000 licensed amateurs in the United States alone are
not affiliated with any organization. We feel this is because there are
not enough organizations available to give the average ham the
choice of joining an organization that fits his or her particular needs.

Well, we've fixed that problem ! Now there is something available
for EVERYBODY !

* No-SSB International (tm) http://www.qsl.net/kh2d/nossb.html
* No-FM International (tm) http://www.qsl.net/kh2d/nofm.html
* No-RTTY International (tm) http://www.qsl.net/kh2d/nortty.html
* No-SSTV International (tm) http://www.qsl.net/kh2d/nosstv.html
* No-QRP International (tm) http://www.qsl.net/kh2d/noqrp.html

No Dues. No Donations. No Meetings. No Commitment. Just click
EMAIL at the bottom of the page to tell us you want to sign up and
we'll rush you a membership number that you can proudly display.
Don't get left out - our computer can only handle really big numbers,
but we don't know HOW big, so send your email TODAY !!

All of these web page organizations are in place and ready to pass out
membership numbers to the amateur population of the world in
order to insure ham radio's future in the 21st century.

No restrictions apply. Make sure you include your amateur call sign
and the name of the organization YOU wish to join in your email.

OK, we know, sooner or later somebody is going to come along and
say 'I LIKE all that stuff. What is the right organization for ME ?'.
We thought of that situation too, so right now the members of our
Bored Of Directors are working on the buy-laws for an organization
for those of you who just can't find the right one where you feel that
you'll fit in. Coming Soon to a web page near you:

*** No-WhatEver International(tm)

The organization for the discerning amateur who's just not really
sure what the heck he doesn't like. Watch for our next press release.

Al Dolgosh <al.dolgosh@hamradio.org> wrote:
> "Disallowing Tech Plus operators HF voice....." - is an example of the
> "I want it all" mindset! They aren't being disallowd anything they
> can't earn by applying themselves to learn something further.

Don't give them EVERYTHING! There are LOTS of options, but what is key is the ability to CONVERSE on phone with hams of all license classes around the world. Give them a CHANCE to get bitten by the DX phone bug, and dangle more bandwidth and power in front of them, and they WILL upgrade. Right now, Tech Pluses are CUT OFF from HF phone below 28Mhz, and this is NOT a good way to entice or facilitate encouragement.

It's the seperate Advanced and Extra class I think ought to be eliminated. For instance, I would have proposed something like this:

CLASS	Frequency Allocations	Exam Elements Required
A	All frequencies	1C, 4A + some 4B
B	General & Advanced	1B, 3B + some 4A
C	General, limited to 100w out	1A, 2, 3A + some 3B
D	No code Tech & Tech+	10m phone 2, 3A

Extras become Class A, Advanced become Class B, Generals become Class C (with power over 100 watts grandfathered for existing licensees), and everyone else becomes Class D. You must pass the revised written elements to get the next higher class of license. Noone but the very few Extras lose ANYTHING, and they only lose exclusive use of very small sub-bands!

o This makes the "advanced" class A truly something special without reserving HUGE portions of bands for only a few.

o It gives Generals access to the large Advanced sub-bands in exchange for a harder written exam.

o It gives Tech Pluses power-limited access to General HF phone & CW bands in exchange for a harder written exam.

o It gives no-code Techs access to 10m phone in exchange for some HF questions. (or maybe not depending on International agreements).

Sure, this isn't perfect, but the details can be worked out. I'd like to see EVERY class of Amateur licensee able to have the thrill of HF phone DX contacts, sampling the full range of operating experiences.

> Tech licensees have been successfully upgrading for years without having
> HF phone priveleges. Why do you think they will stop upgrading now??
>
Read QST... They are NOT upgrading in sufficient numbers to keep this
hobby healthy. I'm not talking about "dumbing down". I'm talking about
giving someone who demonstrated 5WPM CW proficiency some HF phone beyond
the token privileges on the sporadic 10m band. What is the BIG DEAL!

> And....the only way that "US code requirements are out-of-line with the
> rest of the world" is that we use a graduated system to establish
> "incentives" to improve oneself. The "rest of the world" requires CW
> for amateur licensing - now some of us are proposing to eliminate the
> requirement. It seems to me that the US would then be the one who is
> out of step.
>
I wasn't suggesting the elimination of the code. It DOES serve a purpose.
However, I am arguing that the current license structure is flawed because
it isolates an entire group of hams in the VHF/UHF portion of the spectrum
just because they don't want to use CW. Why make people become proficient
at the difficult 13WPM level just to use HF phone? This is a hurdle for
the sake of a "weeding-out" factor that is totally unnecessary. There will
NOT be a huge influx of CB operators if you retain the 5 WPM requirement.
If there is a huge influx, it will be made up of people with a genuine
desire to progress in radio.

> The whole CW discussion is only a red herring to justify the avoidance
> of applying extra effort to gain extra rewards.
>
Baloney! I worked hard for my General, and I don't like the idea of
giving a General ticket to Novice and Tech Plus operators who haven't
demonstrated knowlege by passing General written elements. I am suggesting
that we ought to open the HF phone "door" to tens of thousands of dis-
enfranchised Tech Pluses out there. Give them a taste of what they are
missing, thereby creating incentive instead of RESENTMENT.

Current comment on the ARRL proposal is running 2 to 1 in favor of...
If we don't make alternative suggestions that make sense, you might
not like the alternative.

Regards,
- Mike, N9EUZ

PROPAGATION - by AD5Q HOUSTON, TEXAS -- AUGUST 1998

Midsummer typically does not offer many options for the DXer. 20 Meters is in great shape, but higher bands suffer from low daytime MUFs because the ionosphere is exposed to too much direct sunlight. We look forward to improved conditions on 15 & 10 in the fall, and work the night paths on 20. This not the peak season for any daypath bands.

There is, however, and interesting development that bodes well for the fall season on 10 Meters: the solar flux has climbed above 150 for the first time in the new cycle. Recent months have brought peak flux values around 130, which is good enough to open 10 to most of Europe in the fall. But parts of the world would remain inaccessible because higher flux levels are required to open paths across high latitudes, such as to Russia from Texas. With fluxes above 150 we will get these DX windows in the morning, and 10 Meters will be wall-to-wall with DX for the first time in a few years. Eventually the flux will be above 150 most of the time, and we will take these openings for granted. This fall they will be a novelty, and draw a great deal of attention and activity. Paths directly over the pole will still likely be difficult, but not on 15. A flux of 150 makes the whole world accessible on 15.

For now, most activity is on 20 and good conditions also exist on 17. On 20 the formula for DX propagation is simple: virtually any night path is open, and these openings extend to regions where the sun is low in the sky (late afternoon, early morning, or in the southern hemi-sphere where it is winter). Antarctic long paths are not in season, so most contacts into southern Asia must be made via the north. Conditions on 20 are really excellent, and a flux of 150 ensures that this band will be open all night. 17 is also open late.

Conditions on 15 are not that good, though it did sound like the east coast had broad windows into Europe during the WAE. From Texas, signals were mostly weak. On 10, South Americans were heard running Europe nicely on the north/south path - and some of these Europeans were copyable from Texas.

We will be out of the summer doldrums shortly. September is a month of radical improvement on daypath bands, and October will be really awesome unless impaired by solar storms. For now, enjoy the great nightpaths on 20.

Wkd FM0DX on 20 CW Aug/12/98 AM. Beam heading from Minnesota peaked at 50 degrees. I did not get a chance to check if it was long path. Does not appear to be Martinique or France. Drawing this conclusion based upon heading and very weak signal. Giving manager as F5LEJ.

Anyone know QTH for FM0DX.

Message-ID: <1F546114A5ABF924.A18B94BE71AF369C.B5D54119110E2FF6@library-proxy.airnews.net>
Source record: 28006

There has for considerable time been a dx reflector
available at qth.net. Initially, the usage was quite low
as the ve7tcp mailing list seemed to meet the needs
of the community very nicely.

dx@qth.net was merely an alternate, but available as
users saw fit.

qth.net and qsl.net are owned by k3tkj and jointly
operated by k3tkj, k7on, and kb9lpj as a non-profit
service to the amateur community at large.

We have over 55,000 users in over 200 countries and
send over 300,000 emails daily via 300 different listserv
mailing lists. There are over 44,000 different individuals
subscribed to these lists, most to more than one.

I suppose it is a "social" decision where the dx community
decides to post traffic, but the 4 servers and dedicated T-1
at qsl/qth.net were opened graciously for those exiting the
ve7tcp reflector.

As you may well imagine, with the huge diversity of interests
(lowfer to laser, cw to bpsk, etc) it is impossible to devote all
effort to any one group (e.g. dx), though this community is as
welcome as any other.

dx@qth.net will remain for the duration whether as a backup,
alternative, or "the" mailing list of choice (this is up to the users).

You can see the message traffic generated so far at:

http://www.qth.net

Please select the Dx Archives to view the html archives. In fact,
except to post, there is no need to subscribe if you have a web
browser. You can read all messages via www.

I hope everyone finds a dx mailing list suited to their tastes and
interests.

As majordomo-owner (responsible for all qth.net mailing lists)
I welcome suggestions and comments in serving amateur in general
or the dx community in particular.

Good luck with your decision.

73, Brian

Harry,

Are you looking for new, used, solid state, BA? $1,000 can
buy a lot of radio in the used market. Look at Ten-Tec rigs
for some great used values. You can get an Omni-C for $500 +/-
and Ten-Tec can still service it, should it need it. Should
be all the radio you need for a while.

Have you calculated antenna(s), mike and/or key, watt/SWR meter,
and/or tuner, etc., etc. into that thou dough? Or are you going
to sneak that in later under the xyl's nose? ;)

73 es congrats on the ticket,

Casey, KS7J, FISTS nr 3648, CC nr 450

There are 3 logical choices:

(1) Ten-Tec Scout: With the hand held mike and 3 extra band modules, it costs around $700 (new). On the plus side it performs very well AND is VERY easy to operate. I have the Scout and love it. Right now, I have to 10 meter, 15 meter, 20 meter and 40 meter modules for the Scout. If I ever decide to move to a "bigger" rig, the Scout will be moved to my car. On the minus side, the Scout doesn't have AM, FM, and can't receive all of the Shortwave frequencies. For me, this is no big deal. Also, if you purchase all the Band modules, the cost is about the same as some other rigs.

(2) ALINCO DX-70T, HF 100W/6M 10W $749.95 (HRO Price); DX-70TH, DX-70T W/100W 6M & EBC-9 $849.95 (HRO Price): A friend of mine has this unit and he loves it. The big plus is that you get the 6 meter band with this rig. There's also the ALINCO DX-77T, 100W HF $799.95 (HRO) Price, but I don't know what that unit is like. I heard that Tech-America is selling the Alinco DX-70T at a close-out price, but I don't recall the exact price.

(3) USED EQUIPMENT: This is one area where you need to do your homework. Are repair parts available for this unit? What to other Hams think of the unit? Having a fellow Ham who knows equipment might be a big help to guide you. If you could go over to the seller's house and have them show you the rig in action, you should be able to see if it's in good working order. Most Hams are honest and fair about their equipment, BUT there are some rotten Apples out there who will take advantage of others.

Remember to count all the costs; Does the unit come with a mike? What will the power supply to drive the unit cost? What other "extras" are needed to get it up and running?

I was able to put together everything for under $1,000. While I'm limited to 4 bands and I don't have a big tower or yagi; I still have fun working DX on the bands I'm set-up for. Just think how much better it will get as the sun spot cycle makes DXing even better. :-)

73,
Bob

If you can afford upto $1,000, you have a whole lots of choices in used market. What I recommend is, you get an used TS-830S or IC-735, and spend some money on your antenna, tuner, and other accessaries such as keyer. You can get a TS-830S in good condition for less than $450, and a IC-735 in good condition for less than $550. These two are excellent radios and still in demand in used market. I am using TS-830S and Drake C-lines (I have two sets), and I am really happy with them. I don't have IC-735, but this is a damn good radio and if you ask anyone who owns one, they will say the same thing. Don't spend too much on radios. I only buy used radios, and if you are a little careful in buying used gear, you can get a good deal and get a good radio.

You should remember that there are lots of things to buy beside the transceiver.

Good luck and hope you can make yourself and your wife happy.

Chris

a grand is a heck of a LOT of money for a transceiver. i suppose i would
ask these questions of you:

which rigs have you seen others using?

what kinds of bells and whistles do you REALLY want to use?

is that built-in automatic tuner REALLY necessary?

how often are you gonna use the rig?

have you USED any of the newer/older rigs? sat down in front of them and
twirled the knobs and dials?

do you want to maintain it (calibrate/tweek/retune) yourself?

can you deal with occasional transistor fails? do you want to?

what bands do you want to work?

what mode? CW, SSB, AM, RTTY, FM?

the older rigs suggested by VE3UVT are good choices (TS-830 and the Drake
C-line, tho the Drake R4B is a good choice for receiving). If you really
want to be budget minded, an HW-16 (75 watts CW on 80/40/15 meters) can
be had for about $60. it's an older tube-rig but gets you on the air.
you'll need a VFO for it, tho, as it was intended for xtal-only operation
for novices (VFO plug on the back for the Generals, etc).

2681. T30 & C21 activation 18/8/98 - 5/9/98. 80-6 & WARC

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-13 00:00:00 UTC
From: Spilt Milk <vk3alm@c031.aone.net.au>
Message-ID: <01bdc671$ba7b78a0$0fb80ccb@adam>
Source record: 28012

Jack Haden VK2GJH will be activating T30 & C21.
Bands: 80 - 10, 29.6FM, 6MX
Usual DX spots.
Emphasise on WARC due to many requests.
Apparantly the locals don't operate much on WARC.
IC-736 + Dipole, 1/2 WL vert for 24/29, A50-S

Schedule:
T30JH: 18/8/98 - 25/8/98: 80-10, 29FM, 6MX.
Depending on conditions Jack may dismantle the
Cushcraft A50-S and take it to Nauru, although
good propagation will be needed to justify the
effort required (30' up on a guyed pole in
Equatorial heat & humidity!)

C21JH: 26/8/98 - 5/9/98: 80-10, 29FM, maybe 6MX.

QSL: Direct VK2GJH ONLY
PO Box 99, Ryde, NSW, 1680, AUSTRALIA
(Note new zip code)
No IRC/USD - no return!
No BURO.

Jack is lucky enough to travel to T30 and C21 many times a
year on business and have time to activate these islands
whilst there.
He is looking for a kind soul to donate an easy to assemble
5 element yagi to permanently keep on Nauru. This would
guarantee C21 operation every time he travels there.
Who would like C21 on 6MX?

Got this off the fcc website: an e-mail form for commenting on the
big proposal:

(cut this line and all above)
<PROCEEDING> put-docket-number or rulemaking-number here
<DATE> filed-date-in-mm/dd/yy-format
<NAME> applicant-or-petitioner-name-last-first-mi
<ADDRESS1> address
<ADDRESS2> address
<CITY> city
<STATE> state
<ZIP> zipcode
<LAW-FIRM> law-firm
<ATTORNEY> lawyer-name
<FILE-NUMBER> file-number
<DOCUMENT-TYPE> 2-letter-document-type-code (use 'CO' for comment)
<CONFIDENTIAL> y-or-n
<PHONE-NUMBER> sender-phone-number
<DESCRIPTION> short-description-of-document
<NOTIFY> e-mail-address-response-destination
<TEXT> actual text of message...
Dear FCC...

(cut this and all below), email to ecfs@fcc.gov
Keep the <>'s and the stuff between < and >, replace the rest of the lines
with real info. AFAIK, the docket number is 98-143. Got this off the top
of the ../fcc98183.txt document. I don't know what to put for "file number",
I used "1". Think it refers to *my* file, not an FCC one.

Edit using an ASCII editor, then e-mail it to ecfs@fcc.gov

An automatic email receiver takes it in, and it needs all the <TAGS> so it
can make sense of it.

2683. Logging program for Amateur Radio?

Newsgroup: rec.radio.amateur.dx

ZCZC AE32
QST de W1AW
DX Bulletin 32 ARLD032
From ARRL Headquarters
Newington CT August 13, 1998
To all radio amateurs

SB DX ARL ARLD032
ARLD032 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, DXNS, The 599Rpt, QRZ DX, The Daily DX and Contest Corral from QST. Thanks to all.

UGANDA, 5X. Laurence, GM4DMA, is QRV until August 21 as 5X1LH. He operates mostly on 17 and 15 meters, with some 6 meter activity as well. QSL to home call.

KENYA, 5Z. 5Z4RL is QRV using SSTV. QSL via N2AU.

BARBADOS, 8P. 8P6QA is QRV using SSTV. QSL via KU9C.

AZORES, CU. CU4AH, CU5AV and CU7BC, will be QRV until August 19 as CU9A from Corvo Island, IOTA EU-089, Grid Square HM49LQ, on all HF bands. They will also be on 6 and 2 meters, 70 cm and 1.3 GHz ATV. QSL via operator's instructions.

TAJIKISTAN, EY. Nodir, EY8MM, is now QRV using SSTV. This is believed to be the first SSTV ever from EY. QSL via K1BV.

AMSTERDAM ISLAND, FT/Z. Bernard, FT5ZI, is now QRV using SSTV on 15 meters. QSL via F5PFP.

THAILAND, HS. HS9CA has been QRV on 15 meters using CW around 0000 to 0030z.

JAPAN, JA. Special Event station 8J1HAM will be QRV again in August from the Tokyo Ham Fair. Activity will include some SSTV. QSL via operator's instructions.

OGASAWARA ISLANDS, JD1. Look for Eiji, JQ1SUO, to be active until the morning of August 16. He will sign JQ1SUO/JD1 and will operate mainly on 20, 17 and 12 meters. QSL to home call.

GUAM, KH2. Dave, N2NL/KP2, can now be found on 160 meters. QSL via W2YC.

PAPUA NEW GUINEA, P2. P29KPH is QRV using SSB on 15 meters. His length of stay is unknown.

BENIN, TY. Sigi, TY1IJ, has been QRV on 20 meters around 2100z. QSL via DK8ZD.

MICRONESIA, V6. Peter, V63PD, is active from Chuuk Island, usually around 0100z on 30 meters. QSL via VK4AAR.

INDONESIA, YB. A group of ORARI members will be QRV until August 17 as YE1ZI from Ujung Kulon National Park located in the western tip of West Java. They will operate on 160 to 10 meters, using CW and SSB. QSL via YB0TK.

THIS WEEKEND ON THE RADIO. The ARRL 10 GHz and Up Cumulative Contest, The New Jersey QSO Party, North American Phone QSO Party, SARTG RTTY Contest, W/VE Islands Contest and the SEANET Phone contest will certainly keep contesters busy this weekend. Please see August QST, page 105 for details.

Norm,

I like "Log-EQF" myself. Here is the address of the gentleman that
made it.

Tom Dandrea, N3EQF
396 Sautter Drive
Coraopolis, PA 15108-9244
USA

(412-457-2584)

I don't use it for casual logging. I use it mainly during the various
contest's I like to play in. I believe he can send you, or tell you
where to download it from, a freeware version for evaluation.

If you need any further help, send me an e-mail.

I have used DX Base and it has been good. I have experimented with LOG EQF since that is what Mark, 8P6JG, uses and I am his QSL manager so getting log info would be easy.....

LOG EQF demos can usually be found on ham BBS systems like Cleveland Hamnet.....

Well, I use LOG-EQF. I think it's the most straight forward program out
there. I looked at about 6 different ones. It imports almost all other
logs including CT logs.

I use CT for contesting and then import the log into EQF.

You can find a demo at: http://www.itis.net/eqf

I also would like to say that when I had questions about the program before
I paid for it, Tom N3EQF answered my emails in about 10 minutes each time.
That was impressive. Good luck

For your $1000, you'd better be factoring in an antenna, coax, tower, rotator and lightning protection. Of course, the tower and rotator are optional if you will be using a wire antenna.

Stay away from the TS-8XX and TS-5XX radios (as well as other pre-80's radios) unless you fully understand the art of dipping and tuning of tube rigs. Although they are fine radios, most new hams are unfamiliar with those techniques so they are best left to the old timers out there. Also, they require retweaking every time you change frequency a little bit.

If it were me, I'd settle for a used Kenwood TS-430S or Icom IC-735 (oh, you'd better figure on the price of a 12 volt supply for those radios). Those "all solid state" radios require NO tweaking when changing frequency (unless you've also purchased an antenna tuner). If you get a newer rig with a built in tuner, you can even avoid THAT inconvenience. Plus, you get memory channels for jumping back to an old favorite.

Hope this helps.

Radio Randy

Where do ZQ1... and Z1... belong? Are these newly allocated?

A station with a ZQ1 prefix claimed to be located in
Macedonia (might be correct judging by antenna direction),
but isn't this Z3..., and ZQ should be something British?
Another station could be heard with a Z1 prefix - is this
Zimbabwe (according to the 1994 prefix list this should be
Z2)? Even the list at 4U1ITU's website does not mention it,
but it might really be located in Africa.

Just curious, Jan-Martin

Randy,

With barely my ticket in hand I had a TR-3, a DX-40, a 2-NT. It
really is not that hard to learn to tune these rigs. You are making
it sound like a black art or something that takes months of experience.
I learned to tune mine with either or both help from the manual
and tips from BA enthusiasts in the NGs. It's just not that hard.

Of those rigs, however, the 2-NT is probably the most rugged and
easy to tune. Those can be had, by the original poster, for around
$100 +/- and add a Heathkit VFO for around $50-75 and a 2-C receiver
for another $100 and he'd have quite a nice starter rig, a poor
man's C-line, for about $300.

MHO,

Casey, KS7J, Trustee FISTS Northwest, K7FFF

I have to disagree strongly. The older Kenwoods (TS-520,530,820,830) are
excellent rigs and would be great beginner rigs. If you had the intelligence to pass you
novice or tech-plus exams, you can easily master "the art of dipping
and tuning" tube finals -- especially if the finals are 6146s like in the
Kenwoods. Also, you don't have to tweak if you change frequency a "little bit" (of course,
an undefined amount here).

Don't stay away from those older rigs -- there great.

---------- I have been using the brand name DELTA dipole for 10-40 meters. I have it as an inverted V in an attic up one story and able to reach from Russia to Australia and Japan, Africa to Argentina and Iceland and all in between with 100 watts SSB from the Chicago area. Width band width using as Knwd 440 with autotune.

Harry OM,

I highly recommend the TS820 or TS820S. They are easy to use, rugged
and reliable, have pi-net output (can match anything within reason on
coax feed), cover 160-10M plus a spare band position, can be modifed for
WARC bands if you find you really want them (I modified mine for 30M),
has BUILT IN power supply, has FSK built-in (For AMTOR, PACTOR, RTTY),
is REPAIRABLE if needed, and automatically selects the narrow CW filter
for FSK receive, something the TS430, TS440, TS530 cannot do (they all
have no FSK, the button labeled 'FSK' on the TS430S notwithstanding).
The tuning of an output pi-network is a trivial process you will learn
in about a minute or so of practice. You can find them for $400 and it
will be worth about that whenever (IF) you want to sell it in years
hence. I have been using mine for CW and FSK daily for 19 years now,
and I would not part with it.

'Nuff said?

Yep! It sure does. I wonder if he and his club even know? My virus program
picked it up immediately and cleaned it like it should.

First - It is a Word macro virus, Not simply the normal run of the mill virus.
Once someone picks it up they need to go out and locate a file called
"scanprot.dot". If anyone needs it, mail me. I'll send it to you via E-mail.

Hi Elvis, look at http://www.mindspring.com/~hypersoft for Hyperlog. It is available in a trial version with all functions working only a limit on number of contacts you can enter. Works good here and is easy to setup and use.

Humm,

The Kenwood TS850 is a very good rig and is totally solid state... no tune
but it does cost about $900 used.

But I do tune my amplifier to this day and learned on radios you have to
tune. In fact most HF amplifiers sold today require tuning. It's a good
thing to know and is easy. Also makes you able to operate almost any
station in emergencies if you get into the emergency communications part of
the hobby.

I'd stay away from the Kenwood 430 as it had slow switching and did not work
well on digital modes like Amtor.

I would emphasize the radio with what available money you have and then
build around it as you get into the hobby and more time to save up. Don't
skimp on the radio too much inorder to have lots of other gadgets at this
stage of starting into the hobby. I would do with out is a radio that has
the WARC bands, 30 meters, 17 meters, and 12 meters included.

My all time favorites that perform well are Icom 765, 735, Kenwood 940, 440
and 830 or even the well known 520 and 530's ($350+). The 830, 940 and 850
were very notable. If you want to go mobile someday then get a solid state

this time around and when you upgrade, use the old radio for your mobiling needs. You will save money in the long run and generally the 440 or 735 fit well into this category.

Good luck.
Have Fun

ATTENTION ALL

If anyone has downloaded the 1 kilowatt amp project from the Southside Amateur Radio Web Site please scan the linear.doc as it contained a CAP family macro virus.

I have provided a macro scanner on the web site if you do not have virus scanner capable of checking for macro viruses

The current file that is online is clean and is date stamped 8/16/98 8:43am.

Thanks to Bob Bethman N0DGN/4 for the alert

My sincere apologies for any inconvenience caused

Roy,

I have been made aware of the problem and it has been rectified

There is also a macro virus scanner on the site for those that do not have one.

Roy, I don't think it is funny either.

However please in future don't bag me or the society I represent publicly if you have NO INTENTION of sending me an Email alerting me to the problem.

It was an honest mistake which I am sure you have made at least one in your life!

Thanks to Bob Bethman N0DGN/4 who DID email me and let me know

Ok guys:

I expected a LOT of feedback on that post. I'm not condemning radios with tube finals, hell, I still own an FT-101ZD and am currently using IT in my shack instead of the 735. But then, I've been around tube rigs for awhile now and, other than tube replacement cost, am quite comfortable with them.

There are a number of advantages to solid state rigs including general coverage receivers and no tuning requirements. These are coupled with lower power requirements while running mobile (you CAN'T argue THAT) and a compact design. Let's not forget memory channels (No, I know you can plug crystals into an old radio, but why?)

You guys can talk all you want about the virtues of tube finals but I would STILL insist on a solid state rig for our club station. That way, all new hams (even the ones who can't program the local repeaters in that new handheld) can operate with a minimum of assistance.

Besides, I've NEVER owned a tube rig that could run 100 watts on RTTY like my 735 can.

I would agree with getting solid state over tubes if the money outlay is even close or you hope to do any mobile HF work. But if money is tight, there are lots of good inexpensive tube rigs out there that allow you to get into the hobby without shelling out a lot of dollars. If you do any CW, I would hold out for a rig that had WARC band ability in solid state or tube.

The 735 may run 100 watt RTTY well because it does not have a power supply built in to cool and the Kenwood 850 runs cool on RTTY and SSTV too. But power supply ability needs to be adequate for long duration transmit times. It should be noted that a power supply (or batteries with a battery charger) is an extra cost item in the equation of buying a solid state rig, something that was not mentioned in the previous posts and needs to be considered as one looks at all the options and cost tradeoffs.

Either way, jump in and have fun.

Ron

Sorry for getting the name wrong (oops)

I am not doing this to make enemies from anyone (besides you look like a pretty big bloke <g>)

I am glad that you had the courtesy of warning everyone, but like I said it would have been nice to be told about the problem at the same time via Email (I don't normally browse the news groups).

If I had know of the virus prior to uploading it it would not have gone on the site, but these things happen. I know, I know I should have checked it but I didn't, an oversight on my part, and now I have to wear your (and everyone else's) wraith.

You are entitled to your opinion about me, however, uploading a virus was not premeditated and I have learned to "scan everything" (no matter who the trusted source of the file might be)

The problem has been fixed. If you don't believe me DL the new copy and test it.

Like I said I don't want to make enemies, my sincerest apologies if I have offended or caused any grief to you or anyone else.

Regards
Adam

I bought a used FT-101E in late 1993 after being fairly inactive for 13 years or so. It is a very nice rig and I worked my first 150 countries or so with it. The drawbacks are that it doesn't allow split operation (I didn't have the external VFO) and you have to take the time to retune it when you change bands (not fun in a contest). But the receiver in mine is excellent and I did the modification for 30 meters with no trouble.

>

My TS-440S has 100 memory channels. That would be a big bag of crystals!

Yes, the solid-state rigs are optimim for new hams wo don't want to fiddle with output tuning knobs, and club rigs tend to take a lot of abuse, so tube finals may not last too long there. My TS-440 seems to be very comfortable running 100 watts out on RTTY.

I will point out that Word macro viruses DO NOT give ANY symptoms to the person that is infected. The only possible warning is when someone with a virus detection program happens to try to work with that file. That is why the viruses are so malicious. Your view, Ron, is a misinformed one. I work at a government facility and see these things constantly come in. ONLY by a mandated and enforced policy of virus scanning software installation can they be thwarted rapidly and easily.

The only people deserving of such language are those that create these things.

> if you if you have a goddamn problem about me telling EVERYONE ahead of time
> not to download a viruses program then your probly the shithead that put it
> up !!!

Personally, I have no problem with notifying everyone. However that includes the person with the problem DIRECTLY. If not, the problem will not be stopped.

Unfortunately this is simply a sign of these high tecnological times.

---------- I have a question for those who have responded to the original posting (not my posing) ---- do any of the programs allow time stamping of the QSO without having to change your computer date/time settings? I want to have the program convert the time to Zulu rather than having to re-set the time for my daily use of the computer and then having to change it again every time I use the LOG.

I'm looking for software that runs under Windows 95 to calculate
headings and distance when two lat and long positions are inout.
Please reply via e-mail, any assistance would be appreciated.

Jim

SB DX @ WW $OPDX.370
Ohio/Penn DX Bulletin No. 370

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 370
BID: $OPDX.370
August 17, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The GOLIST, WB2RAJ/WB2YQH & The 59(9) DXReport, K4QD, K8NA, K8PYD, 9M2TO, BD7JA, BG5RV, DJ5AV & DX News Letter, G4BUE & DX News Sheet, GM4SUC, HA5COK, HA5FA, JA3ART, JH6VLF, PP5LL, PY5BF, RA0FF, VE3CUI, VK8AN and YO3FWC for the following DX information.

3B9, RODRIGUES ISLAND. The "DX News Letter" reports that Frank, AH0W, has announced a large scale international DXpedition for this autumn.

3W, VIETNAM. Reports indicate to look for 3W6AR, 3W6UB and 3W6HCK from August 23-26th, as 3W6TV, operating mainly on SSTV. Meanwhile, JA3ART reports he will be in Vietnam as 3W6JJ from August 22-27th. He will be active on all bands CW/SSB/SSTV and RTTY if possible. QSL via JA3ART, P.O.BOX 62, Sakyo Kyoto 606-8691 JAPAN.

5W, WESTERN SAMOA. Look for Hansjuergen/DL1SDV and Rainer/DL2BFH to be active between August 20th and September 11th as 5W0HP and 5W0BF respectively. Activity will be on CW/SSB/RTTY/PACTOR. Reports indicate that they intend to activate 5W0HP on Pactor on 14063 or 18104 kHz around the clock. QSL via their home callsigns.

7Q, MALAWI. Look for Ely, IN3VZE, to be active as 7Q7CE until September 7th. QSL via home call.

ALMOST A POSSIBLE NEW ONE! Last week some 6,785 voters on the tiny Caribbean island of Nevis voted to breaking away from their larger neighbour St. Kitts to possibly become one of the world's smallest states. However, the Nevis voters have, by a narrow margin, voted no on independence from St. Kitts.

BI5, PINGTAN ISLAND. By the time you read this, the Fujian Islands Hunting Club of China may have finished their Dxpedition to Pingtan Island with the call BI5P (ending August 17th). This is the first time amateur radio transmissions were broadcast from this island. For more details see the

Web page: http://www.fortunecity.com/meltingpot/manchaca/844/

BI7, WEI-ZHOU ISLAND (Update). Yang, BD7JA, reports that the operation of BI7W which takes place August 21-24th (see OPDX.369), will also be active on 80 and 40 meters.
They will use the following frequency:
3525 kHz CW Mode; 3800 kHz LSB Mode,
7025 kHz CW Mode; 7055 kHz LSB Mode*

* They will sometimes listen above 7125 kHz for some America stations.

C6, BAHAMAS. "The 59(9) DXReport" states John, KS4SO, plans to operate from Coco (Little Stirrup) Cay (IOTA NA-054) August 24th, mainly CW.

CY9, ST. PAUL ISLAND. The "DX News Sheet" reports that Duane, WV2B, plans to be active September 9-14th as CY9/WV2B. The operation will depend on the weather conditions. QSL via home call.

FREE AWARD AVAILABLE! The European Athletic Championship will be held in Budapest, Hungary, August 18-23rd. During this special occassion 13 stations/organizers will be active during the Championship. If anybody can work 7 or more different stations from the list below during this period, they can receive a nice diploma/certificate for free. No applications, no fees and no IRCs are needed. Just send in your QSLs for these stations to this address: Radioclubs, Box 383, Budapest 114, H-1537 HUNGARY. The list of 13 stations are:
HA5AF HA5ARX HG5BEJ HA5CCI
HA5COK HA5COX HA5FA HA5NK
HA5OFN HG5UZ HA5VZ HA5WG
HA5KFV
Also, check out the Web page at: http://ural2.hszk.bme.hu/~fg214

HEARD ISLAND DX ASSOCIATION ADDRESS. Requests have been made as to where to send donations to HIDXA for Jim Smith's (VK9NS) Bhutan DXpedition. Send them to: HIDXA, P.O. Box 90, Norfolk Island, NSW 2899, Australia

HEY, WHAT ABOUT THE STATUS OF H40, FO/A AND FO/M? Great Lakes DXAC, Ted Pauck, K8NA, informs OPDX that the DXAC voted on Temotu Island (H40), and have approved it. It is now up to the Membership Service Committee (MSC) to approve it. No vote has been taken on FO/A or FO/M yet.

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 1998. A full list of stations (plus QSL information) that are participating in the International Lighthouse/Lightship Weekend from 0001z on Saturday, August 22nd, until 2359z on Sunday, August 23rd, can be found at the following Web page:
http://www.qsl.net/gm3zdh/lighthouse.htm
There are over 100 stations at lighthouses and lightships in 38 countries.

IOTA NEWS.....
AS-073. Tex, 9M2TO, reports that he will be active from Pulau Perhentian, Perhentian Island, as 9M2TO/P from August 28-31st. Activity will be mainly CW on 20/15/10 meters (Normal DX Frequency). QSL via JA0DMV through the JARL Bureau.

NA-067. Eddy, VE3CUI, states that he will be activating Ocracoke Island, North Carolina for one week commencing on or about August 23rd. The usual IOTA frequencies shall be used with an emphasis on CW. The call used shall be VE3XZ/W4. He will be using 100 watts output, with a roof mounted ground plane for 10/15/20 meters, a ground mounted ground plane for 40 meters, as well as dipoles for 80/40 meters (he does not anticipate any 160 meter activity, unless specifically requested). QSL via VE3CUI direct or via the bureau.

SA-024. The first "Young Lady Brazilian Dxpedition" from Comprida Island is scheduled to take place October 29th through November 2nd. Callsigns to be used are PR5YL for SSB and PS2S for CW. Activity will be on all bands 80-10 meters (check the IOTA nets). The YL team will consist of: PP5ASN/Alda, PY5OA/Arilda, PT2TF/Teresa, PY5LO/Lourdes and PY5NT/Adri. QSL Manager is Jay Lira, PP5LL, P.O.Box 08, CEP 88.010-970 - FPolis-SC, Brazil.

SA-027 (Update). The Sao Francisco Island operation that is scheduled for September 10-14th, will use the callsigns PU5U for SSB and PW5L for CW. Operators will be Luc/PP5AVM, Rod/PP5AP, Jay/PP5LL, John/PP5YZ, Fox/PY5BF, PY5HSD, Wil/PY5ZT and PY5HSD.

J3, GRENADA. Look for W8KKF/J37K, NH7CC, NH7C/J38NA, ES7RE, WA8LOW/J37L, W5WW, K5PN, VE3RZ, N6HR, IK6CAC, IV3VIA, DL6LAU, KP2A/J37A, WO9Z, and W9IXX/J3X to be active once again from October 20-27th. Some will use a J3 callsign or sign as J3/callsign. The group will be active as J3A in the CQWW SSB Contest as a Multi\Multi station. Operations will take place from the National Emergency Relief Organization emergency operating center. QSL J3A via WA8LOW and others via their home callsigns.

KH0, MARIANA ISLANDS (Correction). Masa, JH6VLF, informed OPDX that he supplied us with the incorrect information (in OPDX.369) about the callsign he will use on Rota Island. He will be using KH0/KD7CLP (Not WD7 as reported), October 9-12th. QSL via JH6VLF.

NORTH AFRICAN ACTIVITY. Ghis, ON5NT, QSL Manager for Mark, ON4WW, reports that Mark is back in Algeria after having been on holiday in Belgium. Mark has now reportedly received a license for Mauritania (5T) and is planning to travel again through S0 and 5T in the coming weeks/months. So keep your ears open for S07WW and 5T5WW. Ghis promises to keep us updated as much as possible on those activities. All cards via ON5NT. Meanwhile, Ghis states that he has received the pictures for the upcoming S07WW QSL.

QSL INFO AND NEWS......
Mario, IK6GPZ, sysop of IK6LOH PacketCluster node, reports that Nespeca, IK6WQU, has obtained the special contest callsign "II6M" and and all QSLs should go to IK6WQU.

VK8AN/6 and VK8AN QSLs. Dan, VK8AN, states QSLs for either VK8AN or VK8AN/6 (Troughton Is, OC-154) may have mistakenly QSLed via the bureau. If so, it is unlikely that their card will reach either Dan or his QSL manager Alan, VK4AAR. Unfortunately, those who have

not received a return QSL may have to try again. Please QSL only direct with return postage to VK4AAR (1995 or later callbook) and a card will be returned to the sender within days. Dan is confirming QSOs with Alan via E-mail, so there is little delay in his responding.

RK0FWL/p was active during the IOTA Contest and was the first station active from Moneron Island. QSL via CBA or Bureau. A QSO log search is available at: http://www.qsl.net/ra0ff/RK0/moneron.htm
RA0FF as a log search collection (nearly 200 logs) at:
http://www.qsl.net/ra0ff

CHECK YOUR IRCs! Buzz, N5FTR, would like to remind everyone to watch out for improperly stamped IRCs. There are many of these IRCs out there which are actually useless. Buzz has almost received 100 bad IRCs improperly stamped for requests for the H75A QSL cards. Buzz states that this is nearly $60 he would have to pay for return postage. He also feels that he can not sell these IRCs on the "second-market" because they are of no value. Buzz has decided that any requests that he receives with improperly stamped IRCs will be returned via the bureau. Most of the valueless IRCs that are received are stamped only in the first box on the left. Many are not stamped at all.

H75A QSLS have been received from the printers and QSL requests should be received shortly. Buzz states, "Everyone's patience is appreciated and we think the wait for the fold-over card will make it worthwhile." Buzz, N5FTR, reports that he is the QSL Manager for the following stations that are currently active: P29BW (rare IOTA OC-008), TU5GD, ZD7JP, OA4DHW, 5T5TY, and A41KJ. He also has the logs for the following stations (Some are QRT; others waiting for propagation): H75A, J87CQ, KG4CM, KG4DD, V31BR, V31ML, P29BT, 9M8BT, 9M8FH, 9M8YL, Z21BA, C91J, C9RJJ, and PJ0/KB5DZP.

Bogdan, SP5CPR (5N3CPR), reports that he is now temporary QRTed but is in Nigeria. He is currently working hard on QSLs and states cards will be sent out upon his return home. Cards will be answered direct and via the bureau.

Ciprian, YO3FWC, informs OPDX that the Romania (YO) Call Book is now on-line. He states that you will be able to find addresses or E-mail addresses of many hams in Romania. Check out the Web page:
http://www.qsl.net/yo3kaa/

YB2ERL ADDRESS. YC2ERL has changed his prefix/callsign to YB2ERL. The QSL route is: Bambang Suryo Widodo, JL Permata Gading J-161A, Semarang 50176, Indonesia -or- P.O Box 1191/SM, Semarang 50011, Indonesia

VP8, FALKLAND ISLANDS. Jan, K4QD, will operate as VP8CRB from the Falkland Islands for three weeks from December 26, 1998, to January 16, 1999. Jan will be assisted in the Falklands by Bob, VP8BFH, and Tim, VP8CKN. Operations will be on all bands and modes. Emphasis will be on geographical areas, bands, and modes that are most needed by DXers. A

special callsign, VP8TTY, will be used during RTTY operations including the January ARRL RTTY Roundup. Jan states that plans for his trip are firm, tickets are in hand, most equipment is already in place or in hand, operating arrangements are made and the VP8CRB license has been renewed. Jan, K4QD, and Bob, VP8BFH, were members of the 1995 South Georgia Island VP8SGP DXpedition (along with team leader Al Hernandez K3VN, and Vince Thompson, K5VT). This Falklands DXpedition is a four year reunion for Jan and Bob, and it is being personally funded. Any donations for cost, shipping of antennas and equipment, which will be left in Falklands, and QSL cards are welcome. QSL route, donations and questions are via Jan Heise, K4QD, 614 Dundee Circle, West Melbourne, Florida 32904, USA. Phone: 407-956-2482. Web site and online log info will follow. Jan's E-mail address is: k4qd@palmnet.net

XX9, MACAO. Jon/WB8YJF and Leo/K8PYD will be operating from here for the CQWW RTTY Contest. They are hopeful that they will operate with their previous callsign XX9YD. Activity on CW and perhaps SSB will take place prior to contest. Leo reports that the airline tickets are purchased and accomodations being sought at this time. QSLs will go via K8PYD. There will be more information reported as it becomes available.

I would have to add the Icom IC-751A to that list too. I just bought one used and love it! This radio holds it's own when even compared to today's NEW radios. It has a hot receiver and all the bells and whistles anyone would need in a first HF rig. I would recommend the 751A to anyone looking for a quality used radio. Just my 2 cents... 73

Saw a number of posts regarding logging programs. All of them seem to be for Windows based PCs.

does anyone know of similar programs for the Macintosh?

Thanks in advance,
73

Yes. DX4WIN does exactly that. In the Preferences settings you can state your
offset from UTC and the program will make the corrections automatically. Great
program... and fabulous support. There's a demo version available on the web
site: http:\\www.erols.com\pvander

I use HyperLog and there are no problems in doing what you want.
You just set the correct offset between your local time and UTC, then the
program will log the QSO's with the time you want.

2732. RE: K4M Midway QSL CARDS?

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-17 00:00:00 UTC
From: Preferred Customer <jskapiak@inficon.com>
Message-ID: <01bdca06$c3b86ca0$460ad30a@jskapiak.LI_SYR_PDC>
Source record: 28063

Has anyone received a qsl card for the K4M Midway Island operation that was held in conjunction with the K7K Kure Island operation? I received my K7K card but nothing yet for the K4M operation even though it 's the same qsl manager.

Any information would be appreciated.

Thanks & 73,

John K2SY

Hello Nicolas -- see url below for Hong Kong.
http://www.ac6v.com/page2.html

For Pitcarin see URL:
http://www.wavefront.com/~pjlareau/pitc1.html

As for "Who test the full acces buckmaster services?" Not sure of the question?? The only callbook service that I know of that covers all countries is the Flying Horse Callbook -- not available on the web, however see URL:
http://p1k.arrl.org/catalog/f-dx-callbooks.phtml
Describes BuckMaster coverage as well.

HI.

Thank you for honk hong callbook's adress.

About buckmaster when you buy the CD you can search with all part off
the name or adress. Everybody can search with the call but when you
buy the full edition in CD you have different search possible

I want to see how he work before buy because it's very expensive for
me :)

There aren't a lot of good new rigs in that price range, but some very
good used equipment can be had around $900-1100.

Some candidates would be Icom-761, 765, Yaesu 890, 990, Kenwood 850, 940,
early 950's.

Shop around, including places like Burghardts, AES, etc.

73 and tight lines,

Hans, K0HB

Swisslog for windows can do this. You can enter the difference between
UTC and your local time but you can also stop the automatic insert of time
and do it yourself.

Isecond the motion DX4WIN. I used DXBase for several years but Like
DX4WIN better been using it 10 Mo now. I have over 25,000 QSO's in the
database going back 25+ years. never had a problem by all means down
load the demo

To whom it may concern:

It has come to my attention that someone has posted a faked message
to this group back on 4/11/98 making the message APPEAR to have been sent by me.

It was not.

I hereby notify this group that I did NOT post this message and that the headers
were faked by someone, apparently for the own benefit.

I know nothing about this situation, nor am I interested in it.

Some individual was apparently out to damage the FCC by sending this over
Usenet, but I assure you that this was NOT sent by me!

I am not involved with anyone's QRM wars or inter-personal
conflicts and I want no part of this. I do not know any of these people.

To whom it may concern: please do not fake messages using my address or name

Sincerely,
Brian Carling, AF4K

From: flash <flash@news.mail.org>
Newsgroups: rec.radio.amateur.dx
Subject: FCC Internal Security Problems
Date: Thursday, February 05, 1998 12:48 PM

FOR IMMEDIATE RELEASE February 4, 1998
INFORMATION:
Goodfellows Net on
3901 kHz, nightly.

FCC OFFICIAL AND BETTER AMATEUR RADIO FEDERATION
OFFICIAL MAINTAIN AFFILIATION VIA
AMATEUR RADIO AND THE TELEPHONE

A FCC official and a Better Amateur Radio Federation official are exchanging information via amateur radio and the telephone.

William C. Houston, WD4LUQ, a Federal Communications Commission official assigned to the FCC's Powder Springs, Ga., office and James V. O'brien III, KD4CDB, chief of enforcement for the highly controversial Better Amateur Radio Federation, have been observed on several occasions conversing with each other on amateur radio repeaters owned by Houston.

O'brien is a high profile figure in the B.A.R.F's malicious interference campaign to drive amateur radio public service nets off the air. He is also a convicted felon, according to information supplied by the clerk of the court in Paulding County, Ga.

Houston and O'brien were tape recorded in Atlanta, Ga., last month by a ham radio operator who monitored their conversation on the 444.700 mHz repeater. They were making arrangements to exchange information via the telephone. "I hadn't spoke to you in a while. I need to speak with you on the telephone," Houston is heard saying on the tape. "I heard from our friend again and need to talk with you. My telephone is open. My number is...you can call me now," O'brien replied.

O'brien has made several on-the-air references to an informant. They are followed by long-winded diatribes, supposedly based on the informant's information, about a former FCC employee's labor relations with Compliance & Information Bureau managers and alleged FCC enforcement actions against public service nets, according to the same Atlanta, Ga., ham radio operator who taped the conversation between Houston and O'brien last month.

"I was a union official at the now deactivated FCC Powder Springs monitoring station, and I find it astonishing how O'brien is cognizant of so many lurid details of my labor relations with Compliance & Information Bureau managers, most of which involved highly confidential labor negotiations. They were facts which only a FCC official would have access to," said George Arsics, W2ZB, who resigned from the FCC in 1996 and is now a corporate communications analyst in Atlanta, Ga.

"I understand O'brien has taken the facts he has obtained about me from this informant, added several obvious falsehoods, and from what I've heard, he has created some comical but very untrue stories about me. I have no idea why I am a subject of his fantasies," said Arsics.

"I do notice, however, that O'brien tends to focus his hatred towards successful professionals and authority figures. These include Dr. Donald Scott, K1IDF, a college professor; Dr. Charles Schwartzbard, AF2Y, a retired dental surgeon; and Mick Slater, N9PGE, a retired police officer," said Arsics.

"There is in fact a private sector concerted monitoring effort, involving several entities, going on right now to uncover ethical and other improprieties inside the FCC," said Arsics.
"The FCC's Powder Springs office does not operate in a vacuum. It is subject to the same regulations and laws as any other federal place of employment. For far too many years, far too many things have been ignored or swept under the carpet away from public scrutiny. I have read transcripts of amateur radio conversations which contain references to CAD software, eight foot copper ground rods, lightning arrestors, ham radio and electronic equipment repairs, and many other interesting topics. When pieced together, they tell an interesting story," said Arsics.

My all-time favorite, above all the fine programs already mentioned here,
is Hyperlog. It's available on the web in a full featured shareware version.
Absolutely flawless!

ARLD033 DX news

ZCZC AE33
QST de W1AW
DX Bulletin 33 ARLD033
From ARRL Headquarters
Newington CT August 20, 1998
To all radio amateurs

SB DX ARL ARLD033
ARLD033 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, DXNS, 425DXnews, The 599Rpt and Contest Corral from QST. Thanks to all.

VIETNAM, 3W. 3W6AR, 3W6UB and 3W6HCK will be QRV from August 23 to 26 as 3W6TV, using mainly SSTV. QSL via operator's instructions. Meanwhile, JA3ART will also be in Vietnam and QRV as 3W6JJ from August 22 to 27. He will be active on all bands using CW, SSB, SSTV and possibly RTTY. QSL to home call.

ITU HEADQUARTERS, 4U/ITU. IV3TMV and IV3NVN will be active from 4U1ITU in Geneva until August 26. QSL via operator's instructions.

WESTERN SAMOA, 5W. DL1SDV and DL2BFH plan to be QRV until September 11 as 5W0HP and 5W0BF, respectively, using SSB, RTTY and Pactor. Look for 5W0HP on Pactor on 14063 and 18104 khz. QSL via home calls.

CHINA, BY. The BI7W operation from Weizhou Island is scheduled for August 21 to 24. Emphasis will be given to 80 and 40 meters, using CW and SSB. QSL via BD7JA.

ARMENIA, EK. Special Event Station EK88L is QRV until August 31, and again for one week in December, to commemorate the victims of the earthquake in 1988 that destroyed the town of Leininakan, now called Gyumri. QSL via IK2DUW.

ANTARCTICA. Oleg, UR8LV, is active as EM1LV, and plans to be QRV on RTTY every day on 14081 Mhz from 1900z until the band closes. He is active from the Ukrainian Antarctic base Akademik Vernadsky located on Galindez Island. QSL to home call.

FRENCH POLYNESIA, FO. FO0YAM is QRV from Bora Bora, using CW and SSB on 20 and 15 meters. The length of stay is unknown. QSL via JK1FNN.

ST. PIERRE AND MIQUELON, FP. The Prairie DX Group will be QRV from Miquelon Island, IOTA NA-032, from August 26 to September 1 as FP/N9PD. Continuous operations are expected on 80 to 10 meters, and possibly 6 meters, using CW, SSB and RTTY. QSL via N9PD.

ST. LUCIA, J6. Mathias, DL9BQ, is QRV until August 21 as J6/DL9BQ, using SSB on 20 and 15 meters. QSL to home call.

PERU, OA. DL9GMM is QRV as OA4/DL9GMM, using CW on 30, 20 and 17 meters. QSL to home call.

WESTERN KIRIBATI, T30. Jack, VK2GJH, will be QRV in his spare time until August 25 as T30JH. Activity is centered on the newer bands. QSL to home call.

MACEDONIA, Z3. Zoki, Z31GB, is QRV using SSTV. QSL via NN6C.

THIS WEEKEND ON THE RADIO. The TOEC WW Grid CW Contest is on tap for this weekend. Please see June QST, page 87 for details.

2759. Are you ready for the QRM crunch on 10 meters this fall?

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-20 00:00:00 UTC
From: Richard Earl <w9juc@juno.com>
Message-ID: <35DCEFE7.8C67BA1D@juno.com>
Source record: 27940

The rise in sunspot numbers for Cycle 23 is occurring now!

From the Midwest Trans-equatorial propagation is a daily occurrence,
with South Pacific appearing around 9pm to 12am local time. In addition,
Southern Europe and Africa occasionally in the early AM.

The Naval Ocean Systems Center predictions for cycle 23 predict the year
2001 to be the peak year with an average sunspot number less than 80.

The duration of cycle 23, with average annual sunspot numbers exceeding
50, will be 7 years.

Practically speaking, this simply means that you will have the
opportunity for band openings over more years, however, wave propagation
during operating
hours, will shift more rapidly than previous cycles.

I have been retired for the last two years (with a lot of time on my
hands) and have developed a 2 element Delta Loop Driven Array Antenna
with a F/B Ratio 4.5dB greater than a conventional quad antenna.

You can view a photo of the antenna, performance charts and graphs and a
further overview of current 10-meter activity on my web page.

Thank you, 73
RICH W9JUC
P.S. WEB PAGE IS AT
http://homepage.interaccess.com/~jpearl/DeltaXray.html
Or search ALTAVISTA or INFOSEEK or LOOKSMART first page under

Message-ID: <35DECA40.A21517F3@techno1.com>
Source record: 27944

I have all this waiting to swap for hf receiver with digital readout for

decoding.
Drake has noisblanker board, and crystal calibrator board fitted, all
slots are full, radio works as this radio should, but it needs some
loving care has manual but not original.
Laptop also has 500mb h/drive and spare 124mb h/drive, this 386 is not
one of them big
bulky things,
it is the size of laptops that are made today.
what can i say about pro-63 except it is a pro-63.
Thanks.......Jim. UK only.

2764. ABC News June Interview with Osama bin Laden, YA1OSB/P

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-22 00:00:00 UTC
From: hpm_1aw@my-dejanews.com
Message-ID: <6rn5vn$3n5$1@nnrp1.dejanews.com>
Source record: 27945
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.amateur.policy

Osama Bin Ladin:

"Thanks be to ARRL. It is hard for one to understand if the person does not understand Hams. In our religion we believe that ARRL created us to worship radio. ARRL is the one who created us and blessed us with this religion, and orders us to carry out the holy struggle "jihad" to raise the word of ARRL above the words of the unbelievers. We believe this is a form of worship we must follow despite our financial ability. This is a response to Westerners and secularists in the ARRL world who claim the reason for the awakening and the return to FCC restructuring is financial difficulties. This is untrue. In fact, the return of the people to ham radio is a blessing from ARRL, and their return is a need for ARRL.

This is not a strange issue. During the days of jihad, thousands of young men who were well off financially left the Arabian Peninsula and other areas and joined the fighting"hundreds of them were licsensed in Afghanistan, Bosnia and Chechnya. We pray ARRL grants them DXCC status.

Your ABC TV network interviewed this nut on June 8, 1998 and let him use ABC as his sounding board for his psychotic ramblings. If ABC News didn't stink so badly it wouldn't need to pander to terrorists for ratings.

Maybe I don't have a call anymore because opinionated hams like you don't let the rest of us express our opinions on the radio without ROTTEN QRM. Maybe I know from experience what loser nerds so many of you are.

Why don't YOU turn in your American Communist Party/PRESS ID card ? The Russians gave up on that John Lennon commie peace crap in 1991.

SB DX @ WW $OPDX.371
Ohio/Penn DX Bulletin No. 371

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 371
BID: $OPDX.371
August 24, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The GOLIST, WB2RAJ/WB2YQH & The 59(9) DXReport, KH2D, W3HNK, K4RB, WX5L, N6HR, K8NA, DF4RD, DJ5AV & DX News Letter, EA3BT, EA3AOK, ER1AA, F2CW, G4BUE & DX News Sheet, GM4FDM, IK2XDE, ON5NT, PY1KS, PS7AB, RA1QHJ, SV7CLI, VE3ZZ and ZS5BBO for the following DX information.

3W, VIETNAM. Peter, 3W6EA, has informed several people that he is restricted to the following frequencies (using only a maximum 500 watts): 14160, 14260 and 21160 kHz. His activity has been mainly around 1500 to 1630z, but he has been heard as early as 1245z. QSL to: P.O. Box 121, Ho Chi Minn City, Vietnam.
Meanwhile, the "DX News Sheet" reports that Mirek, VK3DXI, will be active from August 29th through September 4th as 3W6DXI. Activity will be mostly CW. QSL via DL4DBR.

9V, SINGAPORE. "The 59(9) DXReport" states Mirek, VK3DXI, will start his next multi-year assignment here in October and hopes to regain his 9V1XE callsign.

AFRICAN ACTIVITY (5X, 5Z4 and E3). Jacky, F2CW/ZL3CW, is currently in Africa for a 4 month mission. He is based is Kenya where he is expecting a callsign, but it may take several weeks ("If not months!", he states.) Jacky reports to OPDX that he is currently in Uganda for a few weeks. He has already applied for a callsign which normally takes a week (if he is lucky it will be 5X2CW). So look for him to be active soon. Probably the most exciting news is that Jacky will be going to Eritrea soon, but he doesn't know yet if it will be possible to obtain a license there. "I will try!!!", states Jacky. QSLs will be via ZL3CW, Jacky Calvo, PO Box 593, Pukekohe 1800, New Zealand.

BV9P, PRATAS ISLAND. Randy, WX5L, reports that during the New Orleans International DX Convention, Paul, BV4FH, who was a member of the last trip to Pratis Island, explained how difficult it has been to obtain

proper authorization to return to this highly sensitive island. He went on to say that they are very close to getting the "OK" to return sometime between 30 and 60 days. BUT, he needs our help. Paul needs input from the DX community to accompany his final push in a few weeks. He is requesting E-mail's to be sent with a short message indicating our desire and needs for Pratas Island to be activated. If you need it for an all time new one, mention that, if you need it for 5B DXCC, mention that or whatever. Each message received, Paul will make a hardcopy of it and submit it as a package to show evidence of the needs and desires of the DX community to the governing authority. He feels that good representation will be the culmanating ingredient for approval so that the 10 member team can accomplish their goal possibly as soon as October. He did mention as soon as approval is granted, it could happen very fast as they would be flown in on C-130's as soon as the team can be assembled. Let's give Paul the help he needs to make the Pratas Island DXpedition a reality. Pauls E-mail address is: bv4fh@ms2.hinet.net

C2 NAURU. Look for Jack, VK2GJH, who will once again be active from here between August 26th and September 5th as C21JH. Activity will be on 80-6 meters, but mainly on the WARC bands. QSL only direct to: Jack Harden, Box 99, Ryde, NSW 1680, Australia.

C56, THE GAMBIA. Members of the Bavarian Contest Club (BCC) are organizing a DXpedition here in October, 1998, which includes the participation in the CQWW DX SSB Contest. The Team consists of: DF4RD/Dieter, DL5NAM/Chris, DL8UD/Uwe, DL9NDS/Uwe, OE2VEL/Wolf and OE9MON/Karl. They will depart on October 14th, and will stay until October 27th. There will be activity on all bands (including 6 meters, if they get the permission) before and after the Contest on SSB and CW. There is a possibility of participation in the WAG-Contest (October 17-18th). More details will be forthcoming (callsign, QSL info, etc.) as soon as possible. Meanwhile, check out the BCC Web page at: http://www.uni-erlangen.de/~unrz45/BCC

DO YOU NEED ZS3? Edwin, ZS5BBO, reports to OPDX that he has received a number of requests regarding activity from the ZS3 area in South Africa. He states, " There are few hams in this area, let alone serious DXers." Edwin wants to know if there is a serious demand for contacts from this call area, and if so, he will consider going to this area in December, 1998. At this stage this is just a survey, but he would appreciate any feedback regarding this matter. His E-mail address is: zs5bbo@icon.co.za

ER27, MOLDOVA. Now until August 31st, look for the special callsign ER27A to be active in commemoration of "Independence Day" for the Republic of Moldova. QSL via ER1DA: Valery Metaxa, P.O.B. 9537, Kishinev MD-2071, MOLDOVA.

FM, MARTINIQUE. Nuria/EA3AOK and Josep/EA3BT have announced that they will be active from here, October 20-26th, as FM/EA3AOK/P and FM/EA3BT/P. Their activity will be mainly on SSB and RTTY, with some CW, with operations on 80-10 meters, including the WARC bands. They will take part in the CQWW DX SSB Contest with the special callsign TO8B. All the QSLs will go via EA3BT. For more up-to-date details, check out their Web page:

http://www.redestb.es/personal/j_gibert

FT5X, KERGUELEN ISLAND. This will be the last week to work Helios, F6IHY, as FT5XN because he will be leaving the island on August 28th. Activity seems to be around 1100 and 1200z. Check 14165, 14190, 14260 and 21267 kHz. Also, check 10103 kHz around 1400z. QSL via F6PEN.

H40, TEMOTU PROVINCE (Added to DXCC List). If you are not an InterNet Subscriber to the OPDX, you missed the announcement that the ARRL Awards Committee has accepted a recommendation by the ARRL DX Advisory Committee to add the Temotu Province of the Solomon Islands to the DXCC List. The addition will be effective with contacts made beginning 2359z on March 31, 1998, and after. The DXCC Desk will accept QSL cards for Temotu Province (H40) beginning October 1, 1998. QSL cards received before that time will be returned without action. Temotu Province includes the Santa Cruz, Reef, Duff and Vanikolo Island groups.

KH2, GUAM (Top band). It has now been reported that Gus, K4SXT/KH2, and Dave, N2NL/KH2, are now both active on 160 meters from Guam. Both were heard around 1000z, one on 1828 kHz and the other on 1831 kHz. QSL N2NL/KH2 to W2YC.

KH0/KH2 UPCOMING ACTIVITY. The Mariana Islands DX Association members have announced that they will be making an effort to supply as many Guam and Saipan multipliers as possible in the VK/ZL Oceania DX Contests on October 3rd and 4th (SSB), and October 10th and 11th (CW). Activity will be on 10/15/20/40/80 meters on both CW and SSB weekends. Active stations from Guam will be KH2D, N2NL/KH2, NH6D/KH2, K4SXT/KH2, WH2U, KH2JU, N4UQM/KH2 and NH2E. Active stations from Saipan will be WH0AAV, KH0CE, AH0D, NH0F, NH0D and NH0E. QSL info for MIDXA members can be found on the club web pages at http://www.guam.net/pub/midxa/

PROJECT DX TEAM (Italian Island Activity). Members of the A.R.I. Lomazzo (Co), Italy plan to activate four different islands this week. The operators are: I2OGV/Giovanni, I2RFJ/Ivano, IK2JYT/ Giovanni, IK2XDE/Andrea, IK2XDF/Giampaolo and IK2XNW/Luca. Their activity will be on SSB and CW, and if is possible also on RTTY. Look for them to be on: Bacucco Island (IIA RO-04) August 25th; Piallazza Island (IIA FE-01 and IOTA EU-155) August 26-27th; Baron Island (IIA FE-03 and IOTA EU-155) August 28-29th and Scannone di Goro (IIA FE-05) August 30t. QSL all operators via the QSL Manager IK2XDE (Bureau or direct to: Andrea, P.O. Box 3, I-22072 Cermenate (Co), ITALY

QSL INFO AND NEWS.....
Hillar, N6HR, reports that the TF3IRA QSLs for the IARU 98 HF Championship have been received from the printer, and ALL QSOs will be QSLd unsolicited via respective bureaus. "Check out the c-o-l-d Vatnajakoll icebergs coming down from the glacier!", says Hillar. QSLs will go out week of August 24th.

K8NA is now the QSL Manager for Tim, NO7F/KL7, activity from Fox Island (IOTA NA-059), Alaskan island group.

The DXpedition by Nick, RA1QQ/1, from the Arctic Islands (in the European part of Russia) has ended. Nick visited 3 islands: Kildin Island (EU-082), Korga Island (EU-160), and Kharlov Islan (EU-161). Around 3000 QSOs were put in the log (1040 QSOs were made in during the IOTA Contest). Nick was alone in this expedition, and his financial expenses increased. After solving all financial problems, all QSL cards will be printed and sent out.

The QSL Manager for the special event station J47LHA, which was operating during the Lighthouse/Lightship Activity Weekend, is SV7CO: PO BOX 46, 68100 Alexandroupolis, Hellas-Greece.

ADDRESS CHANGE. Padelis, SV5AZ, QSL Manager for J54RDS and SV5RDS (the Dodecanese Radio Amateur Association on Rhodes Island) has changed. His mailing address and his new address is: Padelis Vassiliadis, P.O. Box 329, GR 85100 Rhodos, Greece

AP2TJ via W3HNK. Joe, W3HNK, request PLEASE use a #10 business size SASE or a 6 1/2 x 4 3/4 European size SASE as his card is HUGE!

S0, WESTERN SAHARA (Update). QSL Manager Ghis, ON5NT, reports Mark, ON4WW, will be touring again through the Western Sahara. He will be active again as S07WW from August 25th until September 1st. As this is a working trip for Mark, most of his operation will be during the local evening and night hours. He will give updates on his low band skeds while there. Mark also now holds a 5T5WW callsign and will likely be active from Mauritania while passing through. He will not stay overnight there (5T), so this could be a local daytime operation. The date August 26th was mentioned. QSL via ON5NT.

SPECIAL EVENT. Look for special event station EK88L to be active now until August 31st, and again for one week in December. This is to commemorate the victims of the 1988 earthquake that destroyed the town of Leininakan (now called Gyumri). QSL via IK2DUW.

TZ, MALI. Bob, K4RB, reports to OPDX that he is in Bamako and has just received his TZ6DX license. He plans to be on CW/SSB on 40-10 meters including the WARC bands. He was heard this past weekend on 15 and 17 meters, on CW, 18079 kHz at 1800z and 21010 kHz at 1415z, and on SSB, 21331 kHz at 1900z. QSL via K4DX if a Georgia address, otherwise the old callsign of WA4FVT. Bob states, "Nice to be back on the air after a year off and find all these vastly improved condx!"

USI AND IOTA ALERT. Gregg, VE3ZZ, will be active from Hilton Head Island, S.C. as VE3ZZ/W4 (NA-110 and USI: SC-002S) from August 29th through September 12th. He will be looking particularly for Europe stations on the normal IOTA frequencies. QSL to VE3ZZ via Bureau or direct to:
PO Box 1345, Ottawa, Ontario K1P 5R4, CANADA.
Also, just a reminder that Eddy, VE3CUI, will be active from Ocracoke Island (NA-067), North Carolina, USA, for one week, commencing on or about August 23rd. Activity will be mainly on CW, especially on 40 meters on 7040 kHz (on 80-10-meters, the usual IOTA frequencies). His callsign will be VE3XZ/W4. QSL via VE3CUI (bureau).

V3, BELIZE. Just a quick reminder to look for W5JYK, K5KR and W5ZPA to be active this week from Ambergris Caye (NA-073) signing V31YK, V31KR and V31MP (Refer to OPDX.357). Activity will start August 26th and last until the 30th. Look for them on CW/SSB/RTTY with operations on 80-10 meters. QSL via homecalls.

ZW4, BRAZIL. Marcus/PY4SM, Pedro/PY4TF, Arthur/PY4ART and Ailton/PY4ACL will be on the air as ZW4SM from September 4-6th, in celebration of the 176th anniversary of the "Independence of Brazil". They will be operating on the following suggested frequencies:
CW - 3507, 7007, 14007, 21007, 28007 and 50110 kHz
SSB - 3777, 7077, 14177, 21177, 28477 and 50110 kHz
QSL via the Bureau or via PY4SM - P.O. Box 120, Belo Horizonte - MG, 30.123-970, Brazil

Oh yes, just because I don't kneel and kiss Dave "I know more than all the people on earth and Christ put together" Sumner's shoes, while praying to the ARRL version of the crucifix, their logo. Who'd want to be one of you, when SWLs have more fun. We actually >>TURN THE TUNING KNOB EVERY DAY<< while you nerdss argue over nets and restrucuturing.

Hi all;
I recently found some IRC'S at a post office,(after
trying 5 different ones). and after reading the latest ohio/
penn dx bul wonder if mine were properly stamped or not, they
are in a foreign (to me) language. there are three boxes on
bottom, the one on the right is stamped by the PO employee.
It says Timber du bureau qui effectue (run! the tree is
falling?) thanks Jim kw3u

While I can't answer your question, I also read the Ohio/Penn DX Bulletin and am thoroughly confused. For example, I had read for years that the use of the old "surface mail" IRCs was fine and that regardless of whether they said surface or air, they would be redeemed at the air mail rate. The advice in the OPDX bulletin seems at variance with other information that I've read from many sources.

I've found, as others have mentioned, that most postal employees don't know much about IRCs. I've certainly redeemed some over the years without the origination stamp (on the left side) without difficulty. However, it's been years since I've actually bothered to redeem an IRC.

I did a search of the USPS web page and found a number of catalogs of directives pertaining to IRCs. Unfortunately, the actual directive publications do not appear to be on the web. Can anyone with definitive knowledge (i.e., someone with access to the manuals, and not secondhand info from a postal employee who may not be familiar with the rules) shed some light onto this? Exactly what is required on the IRC to be valid
for redemption? Does the postal service employee have any official guidance on whether he/she can take mis-stamped coupons?

Over the years, I've received numerous "mis-stamped" IRCs. As I buy them on the secondary market and suspect that most managers dispose of them on the secondary market, it may not matter too much. I guess that in many (most?) instances, IRCs are used as a form of barter currency that makes the rounds numerous times before actually being redeemed (if ever).

Thanks for any information.

According to the discussion on one of the reflectors, IRC's are stamped in the left hand box when issued, marked with a value in the center box by some countries, (150 YEN, 95 cents, ect.) and are canceled in the right box by the post office who redeems them. (Which I watch them do when I take mine to the post office). Some countries will put an acutal postage stamp in the center box when the IRC is purchased. I think, judging from a few thousand I have seen, that sounds like a correct description of the intended system.

In the 15 years I've been redeeming them, I have never had anyone at the post office reject any of them, irregardless of what is stamped or not stamped where. The only difference in IRC's at the (U.S.) post office here is the country from which they were issued - any IRC not issued in the U.S. gets a 60 cent stamp, and any IRC issued in the U.S. get stamps at the value marked on the IRC at the time of issue minus 1 cent. U.S. issued IRC's always have a value stamped in the center box in red and if the price goes up they will add additional postage stamps at the time of issue. (When IRC's went from 95 cents to $1.05, the post office just stuck a 10 cent stamp on the 95 cent ones and sold them for $1.05).

Basic thing to remember about IRC's is that they are ham radio funny money. Some of them have been flying around with QSL cards for years. The other thing to remember is most post office employees don't have any idea what they are. I just looked thru a pile I have here, some are U.S. 42 cent ones from 1977, and some are incorrectly stamped on issue (in the right box) by the U.S. post office that sold them.

Don't throw them away because of 'improper' stamps - stick them in with a card, and somebody else will stick them in with another card, and then a QSL manager will sell them to somebody else who will stick them in with another card, and so on and so on ......

If it wasn't for hams, the U.S. post office would probably sell 100 IRC's a year....

73, Jim KH2D

2779. Hamfest India '98

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-25 00:00:00 UTC
From: Jim Finney <jpfin@worldnet.att.net>
Message-ID: <35E22671.EC88296E@worldnet.att.net>

Not necessarily. Germany and Italy (to mention only two European countries) *print* the country name in the left hand box. *No* further stamp is needed.
I noticed that many hams (and even post office people) refuse to accept these IRCs although they are 100% OK.

For technical reasons that may not be interesting to you, an AM
transmission of 1W average carrier power will have a Peak Envelope
Power of 4W when fully modulated.

If the maximum power of the output circuitry of your set is 4W, as it
appears to be, then there will be no available modifications that
will not cause great distortion, a difficulty to receive your
transmissions and severe intereference with adjacent channels.

ARLD034 DX news

ZCZC AE34
QST de W1AW
DX Bulletin 34 ARLD034
From ARRL Headquarters
Newington CT August 27, 1998
To all radio amateurs

SB DX ARL ARLD034
ARLD034 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, 425DXnews, The Daily DX, DXNS, EA4DX and Contest Corral from QST. Thanks to all.

ROTUMA, 3D2. Look for Roberto, EA4DX, to be QRV as 3D2DX from August 29 to September 19. He will be active on 160 to 10 meters, including the newer bands, using SSB and RTTY. QSL to home call.

VIETNAM, 3W. Mirek, VK3DXI, will be QRV as 3W6DXI from August 29 to September 4, using mostly CW. QSL via DL4DBR.

LIBYA, 5A. Abubaker, 5A1A, is normally QRV on 21290 khz around 1800 to 1900z, looking for North American and European stations. QSL to PO Box 74421, Tripoli, Libya.

NAURU, C2. Jack, VK2GJH, will be QRV as C21JH until September 5. Activity will be on 80 to 6 meters, but mainly on the newer bands. QSL to home call.

SOUTH SHETLAND ISLANDS. Stan, HF0POL, can often be found on 30 meters using CW from 2000 to 2100z. QSL via SP3BGD.

ITALY, I. Look for Special Event station IY2ARI to be QRV from September 1 to 30 to celebrate the 50th anniversary of Radio Rivista, the monthly journal of the ARI. QSL via I2MQP.

DJIBOUTI, J2. Fred, J28FA, is usually QRV on 20 meters CW around 2300z. His length of stay is unknown. QSL via F5MXH.

GUAM, KH2. Gus, K4SXT/KH2, and Dave, N2NL/KH2, are now both active on 160 meters. Look around 1000z with one on 1828 khz and the other on 1831 khz. QSL via operator's instructions.

WESTERN SAHARA, S0. Mark, ON4WW, will be active again until September 1. This is a business trip, so activity will be mainly during his local evenings and nights. QSL via ON5NT.

CENTRAL AFRICA, TL. Alex, TL5A, continues to be very active. Look for him on 40 meters CW between 0400 and 0430z. After which, check 1827.5 khz, and then 30 meters after 0500z. QSL via PA3DMH.

BELIZE, V3. Look for W5JYK, K5KR and W5ZPA to be active until August 30 from Ambergris Caye, IOTA NA-073, signing V31YK, V31KR and V31MP, respectively. Activity will be on 80 to 10 meters, using CW, SSB and RTTY. QSL via home calls.

BERMUDA, VP9. Rush, W4QA, will be vacationing on Bermuda from September 1 to 3, and plans to be active as W4QA/VP9. Look for him on 20 to 10 meters using CW. He may also try the newer bands. QSL to home call.

THIS WEEKEND ON THE RADIO. The SCC RTTY Championship, Hawaii QSO Party, BUBBA Summer QRP Sprint and the South Dakota QSO Party will keep contesters busy this weekend. Please see August QST, page 105 for details.

2796. Pessegueiro Isl. DXp. Homepage fully updated !

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-27 00:00:00 UTC
From: Jos&#65533; Emanuel Ribeiro de S&#65533; <ct1eeb@mail.telepac.pt>
Message-ID: <01bdd150$16738420$53c641c2@host.telepac.pt>
Source record: 27972

Hello,
The Pessegueiro island DX'pedition 1998 IOTA EU-167
Internet Homepage is now FULLY UPDATED and running in
a diferent server...
Please check the next URL:

http://www.qsl.net/cq2p

Among its new features you can find:
---> Our performance in the IOTA Contest (mainpage)
---> Fully statistics by Continent, Regional area and Country (mainpage)
---> DX'pedition photos (notice the amazing "Thunder for Down-Under"
VK6LC phased verticals for 7 Mhz in the photos... its just beautiful
!)
---> Logs Online checking (check if you are in the LOG of CQ2P, the CT1's/p
callsigns (EU-167) and in past NPDXG DX'peditions, all LOGs are
available
for checking now !).

As the regular page uses frames and if your computer gets in
trouble to get thru them or if nothing happens, you can try to
get directly to the matter, so, try the next URLs:

Main page:
http://www.qsl.net/cq2p/main.htm

Photos page:
http://www.qsl.net/cq2p/photos.htm

LOGs online checking:
http://www.qsl.net/cq2p/Online.htm

Ofcourse viewing the full page with frames is better
(http://www.qsl.net/cq2p)

Its all for now...
Thanks for giving us a call to EU-167 and CU in the
next IOTA DX'pedition... !

(QSLs will be mailed very soon)

73 and good DXing,
Jos&#65533; de S&#65533; CT1EEB
DX Editor "Portuguese DX Bulletin"
Dx'peditioner to EU-145, EU-150, EU-167, NA-204

Hmmf? Did somebody say there's someone on from Lower Gibipp?

I think I still need that on 3 bands! What's the frequency, Kenneth?

Hello, Spike ....

This is an excellant and informative site for the active ham. I
strongly suggest all to "bookmark". Gee, all you need now is the latest
24 hour forcast for band conditions from WWV at 18 minutes after each
hour.

Good job es 73!

Source record: 27894

The rise in sunspot numbers for Cycle 23 is occurring now!

From the Midwest Trans-equatorial propagation is a daily occurrence,
with South Pacific appearing around 9pm to 12am local time. In addition,
Southern Europe and Africa occasionally in the early AM.

The Naval Ocean Systems Center predictions for cycle 23 predict the year
2001 to be the peak year with an average sunspot number less than 80.

The duration of cycle 23, with average annual sunspot numbers exceeding
50, will be 7 years.

Practically speaking, this simply means that you will have the
opportunity for band openings over more years, however, wave propagation
during operating
hours, will shift more rapidly than previous cycles.

I have been retired for the last two years (with a lot of time on my
hands) and have developed a 2 element Delta Loop Driven Array Antenna
with a F/B Ratio 4.5dB greater than a conventional quad antenna.

You can view a photo of the antenna, performance charts and graphs and a
further overview of current 10-meter activity on my web page.

Thank you, 73
RICH W9JUC
P.S. WEB PAGE IS AT
http://homepage.interaccess.com/~jpearl/DeltaXray.html
Or search ALTAVISTA or INFOSEEK or LOOKSMART first page under
"10 meter 2 element delta" (in quotes)

Yep, a cool site indeed, and you can get those latest WWV reports and much
more with ABW++, available from URL below.

Source record: 27896

Greetings All,

Briefly ABW ++ displays the currently active NCDXF beacon over a topographic map, along with the solar terminator. Tools for setting the system clock are also provided.

ABW ++ will download and display up to five selected Space Environment Center (SEC) solar reports and forecasts. In addition, ABW++ provides the comprehensive SEC glossary of solar terrestrial terms. This glossary

is in windows help format and may be of significant help when interpreting the propagation reports and forecasts.

The ABW++ "Get Time" and "Get Latest Reports" functions make use of an internet connection.

Look for the "Active Beacon Wizard ++" link at the URL below.

73 & Good DX,
Jim--

I have some comments on DXers on my home page, look:
Please visit my World Wide Web Site, you have never seen a page like it.
You will see:

1. See Hillary do something naked.
2. A blond naked chic.
3. Attacks against Burt K1OIK's opinion of ham radio in a national publication for broadcasters
4. Burt's opinion on the First Affair in the White House with a picture of the new fist couple.
5. An actual picture of Burt on the throne.
6. The writings of me and others on ham radio, hear a typical ham contact.
7. The warm side of K1OIK, hear me speak, see me with famous people.
8. A test for your SVGA monitor
9. Pictures of me and my family.
10. Did common German's enable the holocaust?
11. See now the future of ham radio.

Burt Fisher Teacher of video, broadcasting and electronics
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

SB DX @ WW $OPDX.372
Ohio/Penn DX Bulletin No. 372

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 372
BID: $OPDX.372
August 31, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1FK, K1XN & The GOLIST, W1TYQ, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, W4QA, DF4RD, F6AJA & LNDX, G3SXW, G4BUE & DX News Sheet, I2MQP, JF2MBF, LA2PA, ON5NT, VE3CUI, YB4JIM, ZP5AZL, ZS2CR, ZS4BS and ZS5BBO for the following DX information.

3D2, ROTUMA (Update). This is a reminder that by the time you read this Jose, EA4CP, should be active as 3D2DX until September 19th. Activity will be on SSB/RTTY on the following suggested frequencies:

SSB - 1824.5, 3775, 7045, 14195, 18135, 21295, 24945 and 28395
RTTY - 14083 and 21083 kHz

Check out the Web page at: http://www.qsl.net/ea4dx/index.html
QSL via EA4CP: Jose Diaz, Doce de Octubre # 4, 28009 Madrid, Spain
For E-mail QSLs, send to: 3d2dx@earthling.net

5V, TOGO (Also 9G). Just before going to print OPDX received a press release from Roger, G3SXW, announcing that eleven operators will activate 5V7A from Togo, West Africa with seven one-kilowatt stations and 17 antennas in November. This will be the third consecutive 5V7A entry to the CQ World-Wide CW Contest by the Voodoo Contest Group. Some 15,000 CW contacts are expected on the six non-WARC bands during the weekend of November 28th and 29th. A few days before and after the contest the operators will be active (including WARC bands and possibly RTTY) with personal call-signs from Togo and possibly also from Ghana. The complete press release with more details will be sent to all OPDX InterNet Subscribers.

9M6, EAST MALAYSIA (Also HS0). Phil, G4JMB, currently in Bangkok, Thailand, as HS0/G4JMB and is hoping in the near future to receive the callsign HS0Z, will be operating from Kota Kinabalu, East Malaysia, between December 7th and January 16th (1999). Also, again during the

months of March and April as 9M6CT. Phil also reports that there is a NEW QSL Route for his G4JMB, 9M6CT, HS0/G4JMB and VR2CT. Both the U.K. and Oxnard, CA, addresses are NO longer valid. Being retired, Phil has decided to handle all his QSLs himself. The address to which to send QSLs is: Philip Weaver, P.O.Box 7, Patpong Post Office, Bangkok 10506, Thailand.

8Q, LOHIFUSHI ISLAND (Maldives). Operators Zhen/KB3CCC (YL), Yuu/JR2KDN, Yasu/JI1NJC, Hiro/JJ1AEB and Nob/JF2MBF will be active from here September 15-23rd, and have requested the following callsigns 8Q7LI, 8Q7US, 8Q7CC, 8Q7HA and 8Q7BB, respectively. Their licenses will be ready by the beginning of September and if there are any changes, an announcement will be made immediately. Activity will be on CW/SSB/RTTY on 160-6 meters. They suggest:
160m - 1822 QSX 1830 and up (QSX 1908 and up for JA)
10m - 28022 (CW) and 28480 (SSB)
6m - 50105 (Beacon) QSX 50135 and up (6m beacon will be sending "CQ CQ CQ DE 8Q7BB QSX 135 ES UP K".
Even though activity will be on all bands, there will be an emphasis on 10 meters for West Coast (NA) via both Long Path and Short Path. ALL QSLs are via JR2KDN (Bureau or direct with a SAE+IRC or GS to: Yuu Yoshida, 4th Floor Kato Bldg, 529 Rokugaike, Kita-ku, Nagoya, 462-0002 Japan). If you have any further questions, requests, opinions etc., please feel free to write to Nob, JF2MBF, at: vr6jj@dxers.net
LAST MINUTE UPDATE: Nob, JF2MBF, informed OPDX this past weekend that the group has decided to bring satellite equipment for AO-10. Listen for them on 145.890 +/-.

8Q, MALDIVES. "The Daily DX" reports that a huge German team (which we have noticed contains some NODXA members) are planning to operate from here October 18th to November 5th. Operators include (X)YLs and OMs: DG0OBN, DL7IQ, DL7VYL, DL1SYL -and- DJ7TO, DK1BT, DL2RUM, DL3APO, DL6SXI, DL7BY, DL7IO, DL7UBA, DL7UTM, DL7VLA, DL7VRO, ON4CHE. The OMs will use 8Q7IO, while the (X)YLs will use 8Q7IQ. They will be active on all bands from 160-10 meters on CW, SSB and RTTY. The emphasis will be on the CQ World Wide SSB DX Contest. Two to three transceivers will be used simultaneously. On 80 and 160 meters they will use a Titanex V80E vertical. Probably more details will be forthcoming.

A6, U.A.E. The "LNDX" French DX Bulletin reports that Daniel, F6ARU (ex-VU2DRU and JY9RU), will be in A6-land for one year. No other details were given.

EM, ANTARCTICA. The 59(9) DXReport states that Oleg, UR8LV, will be active as EM1LV from Vernadskogo Base on Galindez Island. Oleg will be on RTTY daily from 1900z on 14080 kHz using (45 bauds/170 Hz shift).

ET, ETHIOPIA. The "DX News Sheet" reports that Steve/G3VMW and Andy/G4ZVJ will now be active September 16-30th, and also Alan/G3XAQ from September 19-30th from the British School club station, ET3AA, at Addis Ababa. It is possible that they may use their own callsign ET3MW, ET3VJ and ET3XA. They are planning to use "big LF antennas". For more information, check

the G3VMW Web site at: http://www.bramham.demon.co.uk
The Web site will have a log search available after the operation. QSL via G3VMW.

FK, NEW CALEDONIA. The "LNDX" reports Philippe, F5PFO (ex-J28FO) has received his FK8VHT callsign. He is currently setting up his station and will be on the air soon.

JW, SVALBARD. Leif, LA2PA, will be going to operate from Spitzbergen (EU-026) on September 11, 12 and 13th, using the callsign JW2PA. Leif mentions if propagation permits he will be active on the higher bands (15, 12 and 10 meters) as much as possible. QSL via LA2PA.

"MY BONNIE LIES OVER MY OPERATION!" Eddy, VE3CUI, who went to Ocracoke Island (IOTA NA-067), N.C., to be active but was limited to a grand total of 36 hours, courtesy of---you guessed it---Hurricane Bonnie... Eddy, states to OPDX, "I barely got set up, did the obligatory island tour with the family, etc. when the dreaded call was received early on Tuesday morning for all non-residents to EVACUATE. Too bad, as the inverted 40-meter ground plane was just becoming interesting. I did manage about 5 pages of QSOs, but nowhere near to what I had planned. The time spent in planning & logistics for the trip actually exceeded our time on the island! We are NOT defeated, however---our plan is to re-visit Ocracoke again in June of 1999, some 3-4 weeks AHEAD of the normal hurricane season there (July to November, inclusive). Apologies to all who may have needed NA-067, but, in the words and spirit of the Toronto Maple Leaf Hockey fans everywhere, '...Just wait until NEXT year!'... Hi Hi."

NAVASSA ISLAND STATUS. Dave, K1FK, reports to OPDX that he has received a recent E-mail from Mr. Joe McDermott at the U.S. Department of Interior, Office of Insular Affairs, in which he indicated the Science Team has concluded it's expedition to Navassa Island and has made an initial verbal presentations to Secretary Babbitts office. Secretary Babbitt held a press conference on Navassa and the Science Team's visit to the island and its surrounding waters on Friday, August 14th, at the National Press Club. Initial information on the science team findings is avialable at: http://www.cmc-ocean.org/navassa.
Dave states, "He (Joe McDermott) also indicated that the final, written report of the Science Team probably will not be available until late this fall, perhaps as late as November, which implies (based upon my previous communications with DOI) that any approval of applications for access to Navassa Island submitted to the DOI, will not be acted upon until the final report has been received by the Office of Insular Affairs."

OLDEST "YL HAM" IN THE WORLD??? Colin, ZS2CR (Chairman of the Border Radio Club, East London, South Africa), informs OPDX that Iris Hayes, ZS2AA, the Honorary Life President of his Club, will be 95 years old (or is it young?) in October this year. Iris is still active on the air ... and still drives a motor car! They believe that Iris may be the oldest YL ham in the world and would like to publicize this, but would first like to be certain of this fact. If you know of another YL ham (active or not) who is older than Iris, please would you be kind enough

to drop Colin a line on packet (address not given) or via E-mail to:
rroberts@dolphin.ru.ac.za

PIRATE ON THE SATELLITES. Virgil, KC8CUM, reports that someone is using his callsign on the satellites and that he has been receiving QSLs for the contacts. He states he does not have the equipment to work the birds and please do not send the cards.

QSL INFO AND NEWS.....
Akhmad, YB4JIM, reports things are back to normal. As of August 15th, the Indonesia postal system will "take an IRC to cover FULL postage cost to related country!" He states, "Thanks for that... so QSLing in YB now posible with one IRC ONLY, no greenstamp."

Med, 7X4AN, has requested that only the following address be used for QSLing: Boukhiar Mohamed, P O Box 30133, Barcelona 08080, Spain. His Algeria address and QSL Manager DJ2BW are no longer current.

SM5MX ON THE MOVE AGAIN. After a brief stay in Sweden, Rolf, SM5MX (ex. XV7SW) is now moving to Japan. So, if you need a QSL card for a QSO with XV7SW, Rolf suggests you should send your cards via hi QSL Manager SM3CXS, either directly or via the bureau. If you want to reach him in Japan, here is his address: Rolf T Salme, Embassy of Sweden, 1-10-3-100 Roppongi, Minato-ku, Tokyo 106, Japan.

Richard, 9J2DR, will go back to France in September. He can reply all QSLs for his 9J2DR, YS1DRF, PT2ZDR and TR8DR operations. QSL to his home address in France at: Richard Dandine, 10 rue de Chuignes, Faucaucourt-en-Santerre, 80340 Bray sur Somme, France.

By the time you read this, Mark's, S07WW, will be ending or over. Thanks to his QSL Manager Ghis, ON5NT, he reports that a multi-color picture (showing Mark surrounded by Saharaui children) will be on the QSLs for the S07WW operation. Cards are being printed in Germany. QSL 5T5WW and S07WW via ON5NT: Ghis Penny, Lindestraat 46, B-9880 Aalter, Belgium

SPECIAL EVENT. The International Jewish Arts Festival of Long Island (IJAFLI), sponsored by the Suffolk Y Jewish Community Center, will take place Labor Day weekend, Sunday September 6th and Monday September 7th. Members of the Great South Bay Amateur Radio Club will operate from IJAFLI in New York using the special event call W4Z. The "W" representing USA and the "4Z" representing Israel. The portable amateur station W4Z will make conatcts with amateurs in Israel to demonstrate the capabilites and good will of amateur radio. General contacts will also be made during the festival. QSL direct only with SASE with to Rich Tygar AC2P, 5 Chelmsford Dr, Wheatley Heights, NY 11798 USA. Frequencies: SSB 14.240-14.270 MHz.

TRIP AROUND THE WORLD. Roger, KF8OY, reports to OPDX that he will be traveling around the world this fall and plans on operating from the following places:
Location Dates Callsign Status of License
--------- ----- -------- -----------------

South Cooks October 22-24th ZK1OOY Secured
Vanuatu October 25-27th YJ1OY Secured
Philippines October 28-30th * Pending
Singapore Oct 30- Nov 2nd * Pending
Seychelles November 6-9th S79OY Secured

Operations will be mostly SSB with some CW. All QSLs must be sent DIRECT to KF8OY. No bureau cards will be accepted. All QSL request must be accompanied with SASE. Roger will update us on the callsigns and licences before he leaves on October 15th. There is an outside chance of him operting from India, but he is having trouble securing a license.

VP9, BERMUDA. Rush, W4QA, will be active as W4QA/VP9 from September 1-3rd. Activity will be on 20, 15, and 10 meters. Look for him on CW in the early mornings (5-8 am) and late evenings (10 pm - 12 am) [all Bermuda times]. Rush mentions to look for him 7 kHz up from the band edges (i.e 14007, 21007, etc.) and that his operating schedule may be somewhat erratic because this trip is a much needed vacation for him and his wife. QSL via W4QA (1997 or later CBA): Rush Johnson, 100 Horseman Cove, Matthews, NC 28105-7760

VU3, INDIA. It has been reported that Gerard, F6EGX, has received the callsign VU3AGX. Look for him to be active with his IC-756 radio using a quad and dipoles.

ZA0, SAZAN ISLAND. Four to five operators from the Radio Club Partizani, will activate this Albanian during the period between September 2-15th, using the callsign ZA0IS. More details are forthcoming. QSL via Arben Goxhaj, ZA1K, Box 1, Westbrook, MN 56183, USA.

ZD9, TRISTAN DA CUNHA (Update). Edwin, ZS5BBO, reports some good news and bad news regarding Ian, ZD9IL, and the Island of Tristan Da Cunha. Ian was just recently on holiday to Cape Town in South Africa, but is now headed back to ZD9 land. The good news is he should be back on the air by September 5th. Unfortunately, the antenna that was donated has not been shipped due to the high cost of shipping from the USA. Edwin continues to appeal to local Hams in South Africa and others for assistances to help sponsor to get the antenna to ZD9. Therefore, Ian will still only be operating using dipole antennas and 200w. Also, in Ian's rush to go to ZS-land he left the logbook on the island of ZD9 and therefore there has been another delay in sending out the QSL cards. The logs will be sent back on a ship to Edwin and hopefully they will arrive in ZS land in October. Once these arrive Edwin states he will get all outstanding QSL cards out. So, he requests that if you have sent out a QSL card to Ian to please be patient. You will get a card if you have sent one!! So, keep a look out for Ian from about September 5th, operating on all bands SSB only. QSL via direct to: Edwin Musto (ZS5BBO), P.O. BOX 211032, BLUFF, 4036, SOUTH AFRICA

ZP0, PARAGUAY. Tom, ZP5AZL, reports that he will be active with his special contest callsign ZP0Z during the WAE SSB Contest (September 12-13th) and the All Asian DX Contest (September 5-6th). Activity will

be on SSB and on all bands during both contest. QSL via W3HNK.

ZS3, SOUTH AFRICA (Update). With regards to last week's bulletin (OPDX.371) on contacts needed from the area "ZS3", Dennis, ZS4BS, JOTA Coordinator, reports that over the weekend of October 17th and 18th, ZS3KBS will be on the air from Kimberley for the Jamboree-on-the-Air. The main aim of the station is to work other Scout stations, but he is sure they will not mind working a few DX stations. QSL information will be given out by the station operator.

2824. Re: heil mics on icom radios

Newsgroup: rec.radio.amateur.dx
Date: 1998-08-31 00:00:00 UTC
From: K2RXY <K2RXY@worldnet.att.net>
Message-ID: <6sd6gf$bur@bgtnsc03.worldnet.att.net>
Source record: 27905

Well, you have at least 3 choices:

1. Just plug it in and crank up the mic gain and/or compression and/or vox gain until you get decent vox response and ALC deflection without insulting the ears of the folks on the other end. Some Icoms will actually work with the Heils like that.

2. Plunk down $54 and buy the Heil HMP preamp, which is designed primarily for the Icom.

3. Build your own preamp to pump up the volume.

I went with #2 for my IC-756 and haven't regretted it. The HMP makes the VOX a tad super-sensitive (apparently a serious problem with IC-706 MkII's) but I've learned to adjust for it (or TO it). I've got the Micro Pro headset, and the mic boom attachment to the headset is plastic-on-plastic and when jiggled, it makes enough noise to trip my vox. The boom mounting is the problem, NOT the HMP, in this case.

Hope that sufficiently muddies the water for you!

DX4WIN 16 and 32 bit versions at :

http://www.erols.com/pvander/

It covers DXCC, WAS, WAZ, IOTA, plust others. Run's PacketClusterï¿½ and control radio. Can compare DX spots to your log and issue an alert. Also it can query a Callbook. Imports contest logs.

I use it but have no vested interest. Just a site for you to take a look at.

Mel,

Snake Isl is located in the Black Sea. For DXCC it counts as Ukraine, it doesn't count for IOTA (like all other Black Sea islands). QSL manager is K4MZU. I suggest QSL direct - he doesn't answered my bureau requests but was quite fast with a dierct request for KC4AAC.

Good DXing

Zoli HA1AG

To all radio amateurs

SB DX ARL ARLD035
ARLD035 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The599Rpt, 425DXnews, Daily DX, INDX and Contest Corral from QST. Thanks to all.

UGANDA, 5X. Jacky, F2CW, hopes to be active possibly as 5X2CW from Kampala for the next few weeks. QSL via ZL3CW

NEPAL, 9N. Vlad, 9N1FP, has been active on 30 meters around 2100 to 2200z. QSL via RU6FP.

UNITED ARAB EMIRATES, A6. Ali, A61AJ, will soon be active. QSL via W3UR.

BAHRAIN, A9. David, A92GE, has been QRV on 30 meters around 2000z to 2100z.

TAIWAN, BV. Wendy, BV2RS, has been QRV on 20 meters around 1200z.

ITALY, I. ARI Cesena members are expected to operate Special Event Station IQ4LYR until September 7. QSL via I4YTY.

SWALBARD, JW. Borge, LA4KQ, and Olav, LA9OI, will be active mostly on CW as JW4KQ and JW9OI respectively, until September 6. QSL to home calls.

SOUTH SHETLAND ISLANDS. Ricardo, LU1ZI, is QRV on Sundays on 3630 khz at 0230z from Tenierente Jubany Base. QSL to Base Cientifica Jubany, Correo Argentino El Palomar, Via Base Marambio, 9411 Antarctic Argentina.

GREECE, SV. Gabriele, SV8/IK3GES/P, expects to operate from IOTA EU-113 and EU-158 until September 6. Later on, he may be QRV from EU-052. QSL to home call.

MALI, TZ. Bob, K4RB, is now active as TZ6DX from Bamako. He will be here for a multi-year assignment and will be active on most modes. QSL via K4DX

CHAGOS ISLANDS, VQ9. Dale, W4QM, will be active again on all bands using CW. QSL via W4QM.

ALBANIA, ZA. A number of operators from Radio Club Partizani expect to be active as ZA0IS using CW and SSB from Sazan Island, IOTA EU-169, on various days until September 15. QSL via ZA1K.

GIBRALTAR, ZB2. Resident ZB2 stations may use the ZG2 prefix during September to celebrate Gibraltar National Day on September 10. QSL via regular ZB2 callsigns.

SAINT HELENA ISLAND, ZD7. Barrie, ZD7MY, has been found QRV on 20 meters around 2200 to 2315z looking for US stations.

THIS WEEKEND ON THE RADIO. The All-Asian DX Phone and the LZ DX Contests are on tap for this weekend. Please see September QST, page 103 for details.

I think something very close to this is almost certain to be approved.

Personally, I don't have much trouble with it. I'd kinda like to see
exactly what they have in mind for toughening the written. And I
would like to see some CW-only and RTTY-only segments (as well as some
common ground) established to keep these folks out of each other's
hair.

(especially when, as I feel is inevitable, we come to have no-code HF.
Whether one thinks it's a good idea or not, I think one has to
acknowledge it *will* happen.)

2860. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1998-09-04 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <6snt42$3ke@news.Hawaii.Edu>
Source record: 27792
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman (KH2PZ / KH6)
(rec.radio.amateur working-group)

Amateur Radio Special Event - W4Z
The International Jewish Arts Festival of Long Island

The International Jewish Arts Festival, the premier Jewish cultural event on Long Island, provides a unique opportunity for the community to experience the strong cultural heritage of the Jewish people.

IJAFLI XIV, sponsored by the Suffolk Y Jewish Community Center, will take place Labor Day weekend, Sunday September 6 and Monday September 7. 1998.

Members of the Great South Bay Amateur Radio Club will operate from "The International Jewish Arts Festival of Long Island" in New York using the special event call W4Z. The "W" representing USA and the "4Z" representing Israel. The portable amateur station W4Z will make contacts with amateurs in Israel to demonstrate the capabilities and good will of amateur radio. General contacts will also be made during the festival. QSL direct only with SASE with to Rich Tygar AC2P, 5 Chelmsford Dr, Wheatley Heights, NY 11798 USA. Frequencies: SSB 14.240-14.270 MHz.

Additional information at http://www.gsbarc.org/W4Z.html

Chris,

If you can't recognize satire (and accept the fact that a national "institution" like ABC is a fair target), then it appears your vision also may be obscured by an overburden of granite.

2864. New Propagation Mailing List

Newsgroup: rec.radio.amateur.dx
Date: 1998-09-05 00:00:00 UTC
From: Ian Wade <ian@dowrmain.demon.co.uk>
Message-ID: <YHlKhGAb5M81EwuQ@dowrmain.demon.co.uk>
Source record: 27796
Cross-posted to: uk.radio.amateur,rec.radio.amateur.dx

Bearing in mind the recent threads on propagation in this group, I came across this in another group which may be of interest:

++

ANNOUNCING THE "UNIVERSITY OF PROPAGATION"

A couple of days ago I thought "wouldn't it be nice to have a reflector dedicated solely to HF propagation matters", so I established the "ELayer@egroup.com" reflector. I invited several hundred hams to join.

Within hours I found out that another propagation reflector, "prop@lyris.digimark.net" has existed for sometime. This made me feel a bit foolish, having set up a duplicate service which need not exist.

This morning, however, ELayer has nearly 200 subscribers (in just 48 hours) from around the world (W/K, VE, G, JA, DL, CT, BV, BY, OH, YV, PY, SU, PA, XE, HB, VK, DL, EA, and some others I can't determine). Clearly the idea of "ELayer" has some interest, and maybe I should not shut it down.

So what to do? Yesterday I asked the subscribers of "ELayer" for their opinion. Many have responded, and all said "keep ELayer in operation". The general tone of the responses was that there is a place for a new reflector with an "educational" focus, and not so much toward day-to-day developments, an area already well served by "prop@lyris.digimark.net".

Fortunately, our initial list of subscribers contains more than one genuine "world class" propagation guru. A couple of them have volunteered to be "visiting professors", and I hereby accept their services! We have inadvertently created an environment ready-made for "Propagation 101, 201, and 301".

Accordingly, "ELayer" will remain in operation, and I will try to steer it in an educational direction. We will not try to duplicate the good services of "prop@lyris.digimark.net", but rather fill a different niche.

If this sort of reflector appeals to you, and you can accomodate YADEMR (Yet Another Darn E Mail Reflector) on your mail list, you will find a subscription form on my web site at:

http://members.delphi.com/HansK0HB/index.html

...or you just send an empty email message to:

ELayer-subscribe@egroups.com

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 373
BID: $OPDX.373
September 7, 1998
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster WB2RAJ/WB2YQH & The 59(9) DXReport, KF2TI, K4DX, WD4NGB, W5ZPA, KH7RS, K7WX, K8AL, WD8MGQ, CE6TBN, DJ5AV & DX News Letter, DL7IO, EA3NY, EA5GRC, G4BUE & DX News Sheet, HB9AMO, JA1ELY, JI3ERV, JO1CRA, ZP5AZL and ZS5BBO for the following DX information.

5V7A WEB SITE. Warren, K7WX, reports that he has finished the code for the 1998 5V7A contest DXpedition Web page. This is the Web site for the West Africa VooDoo Contest group lead by G3SXW. They have had the first place CQ WW CW DX Contest multi-multi score for five out of the last six years. The previous URL (http://www.getnet.com/~k7wx/5v7a.html) is no longer functional. If you have a link to this prior site, now may be a good time to update it to the current URL: http://voodudes.com/
This new site is a complete re-write and has some interesting features. Check it out!

8Q, MALDIVES (Update). Holger, DL7IO, has informed OPDX with some additional information on the upcoming "Berlin-DX-Group/NODXA" DXpedition to the Maldives, October 18th-November 5th (on the air, Oct.19th-Nov.4th). He reports that 20 people (not 20 Hams) plus kids will travel to 8Q-land. Holger states a couple of the operators are experienced, "but also some are newcomers in the DXpedition business. So, please remember this if the guy is not running a 200 + rate." A complete list of operators/details can be found in last week's, OPDX.372. The group will be taking about 150 kg of aluminum and titanum with them along with 5 transceivers, notebooks and 3 amps (400W). "So it should be possible to get in contact with us", states Holger. They will have 2 V80E (20m high) verticals for 80m and 160m so they can operate on both bands at the same time. They will also be able to run 3 RTTY stations simultaneous. Also, part of their luggage are 2-3 beams (starting at 40m in length), towers (10/15m and smaller) and verticals like a R7 and HF9V. The group now has a 8Q7IQ/8Q7IO DXpedition Web site online at: http://www.qsl.net/8q7io
The log search page has been tested and is working. This will be updated

daily (Of course no logs are in it now). They will also have an active E-mail address at: 8q7io@qsl.net -- Holger will retrieve the mailings until their departure, and than the E-mails will be forwarded to 8Q7 so you will be able to send them your comments, tips, sked-wishes etc... (but please remember that only once a day they will retrieve the messages). The QSL route is, of course, DL7VRO. Cards will be printed after the tour, so it will take about 3 months. PLEASE NOTE THE FOLLOWING: They prefer E-mail request for QSLs. Cards will be go out via bureau. Another important announcment is the new E-mail address for Fritz, DL7VRO: dl7vro@ibm.net By the way, Fritz is QSL Manager for following callsigns and QSL requests via E-mail are "OK" (bureau): 3D2AO/IO/XO, 5V7HR, 9I2A/M/Z, C56/DL7UBA, CT3/DL7UBA, CT3/DL7UTM, EA8/DL7AU, EA8/DL7IO, ED8CMT, FW/Y31XO, FW/Y58IO, H44IO/IQ/XO, SO1HH, SO5OE/1, T21XO, T28IO, T25AO, TN2M, TN4U and YJ0AIO/AIQ.

CY9, SAINT PAUL ISLAND. If the weather permits, look for Duane, WV2B, to sign CY9/WV2B in the middle of the week (September 9-14th). QSL via WV2B.

E3, ERITREA. Bruce, WD4NGB, reports that he has been working on a DXpedition for the last 5 months to Eritrea (E3) for the "Space A DX Group" (Please refer to OPDX.341). Eritrea is number 5 on the ARRL DXCC needed list. In case you do not know, Eritrea has been tied up with a border problem since May 6th with Ethiopia. Bruce was told in April to send a request in writing and they would process it. The border problem has since taken priority for them, of course. Bruce received a fax from Eritrea last week saying that they would be able to complete action on his request on September 16th. He has requested the callsign E31DX. This DX pedition will be by the "Space A DXpedition Group" with a few selected other operators also. They will have 10-12 operators to operate 3 stations 24 hours a day. Bruce states he wants to do this as near to the Fall Equinox as possible, and also allow enough time for the border problem to be resolved or remain stable. Since many of the operators have plans for one or both of the CQWW contests, they will be making their tentative plans for November 3-18th. The group feels that doing this near the Equinox will give them the best world wide coverage on all bands from 160-10 meters and maybe even 6 meters. Bruce says, "Things on the border have been very stable since the first part of June, when the UN and other groups got involved to help with this problem. If the border maintains as is, we should be able to firm up our dates soon. At this time we have 3 operator spots vacant. We are looking for operators that have prior DXpedition experience, with least 300 countries confirmed and with extensive low band experience. Since we do not have any operators from Europe in our group, they will be given preference in the remaining spots." The list of operators at this time are, WD4NGB/Bruce, W4WX/Bill, W6RJ/Bob, W6KR/Rob, JH1AJT/Zorro, XE1CI/Nellie, K5VT/Vince, KO4RR/Joe, and N5VL/Vance. They will have online logs available, with daily updates. They have set up 3 Web sites to make sure that at least one of them will be up at all times:
http://qsl.net/eritrea
http://members.xoom.com/eritrea_

http://members.xoom.com/space_a/eritrea.htm
Donations for "Non operator" expenses can be sent to Bruce Richards, 533 Briarwood Dr, Clarksville Tn. In the event that for any reason this trip does not take place, all funds will be returned. Any large donations by a group or individual will be shown on the QSL cards. At the completion of the DXpedition, all funds received with the QSL cards will be used to defray the cost, not on other trip expenses. Bruce states that they will make another announcement in a couple of weeks as more information becomes available. If you wish to fill one of the remaining spots, contact Bruce at: wd4ngb@m2.sprynet.com

FS, SAINT MARTIN. Eddie, EA3NY, will be FS5PL during the CQWW RTTY Contest, September 26-27th. He will also be on SSB and RTTY before the contest. He will use a FT-900 (and possibly Ameritron Amp) with a A4S Cushcraft antenna (with an add on kit) for 10-15-20-40 meters and a dipole for 80 meters. To setup skeds with Eddy, send E-mail to: ea3ny@bitradio.com for skeds

IOTA NEWS.......
NA-148. Tony/WF1N and Lou/W1DIG (ex KA1DIG) will be on the Isles of Shoals/Appledore Island September 18-21st, starting around 1900z, Friday and ending about 1500z Monday. Operations will be on 40-10 meters (17m possible) on/near the usual IOTA freqs, SSB. QSL direct or bureau via home calls. Any questions, E-mail Tony at: megahertz@webconn.net

AS-024. Operators JR6USF/6, JJ1LIB/6 and JP1LCI/6 will be active from two small islands, Shimiji and Kamiji which belongs Yaeyama Island. Activity will be September 11-12th.

AS-117. JI3DST/3 will active from Awajishima (PM74) next weekend, September 12-14th and then Okunojima (PM64), also AS-117, November 21-23th. Look for him on or around 14260 and 21260 kHz.

J43, GREECE. The "DX News Letter" reports that the Diploma Interests Group (DIG) club station J43DIG has announced that they will be on CW and SSB on the usual DIG frequencies from Septemeber 9-26th. QSL via bureau to DJ8OT or via Eberhard Warnecke, Box 101244, D-42512 Velbert, Germany.

KH2, GUAM. Ramon, WH6ASW/KH2, is a resident on Guam and has been very active. He is active on CW and SSB (maybe more on CW). He likes 17 and 20 meters. He is a Science teacher at a High School and gets on the bands after work. No specific QRNs were reported and none were found on the cluster network. QSL to VK4FW.
Meanwhile, if you were lucky during the past weekend to work AH2R or NH2C, QSL via JI3ERV. Operators were JG3RPL/N1BJ and JI3ERV/NH2C. Their activity was to be on 160-6 meters (especially 160/80m) with operations on SSB/CW/RTTY and activity in the All Asia Contest (PH).

KP2, VIRGIN ISLAND. The "DX News Sheet" reports that Bill/W4WX, Bill/N2WB, Clarence/W4CJK, Chris/VE3FU and Ernie/W5OXA of the Clay County DX

Association (CCDXA) will be active October 19-27th, using their home callsign /WP2, /NP2 or /KP2. During the CQWW SSB Contest, they will use WP2Z from the Windwood contest station. They are currently looking for someone to replace Joe/W4USN, who was part of the team but has had to withdraw after a stroke. If interested, contact Bill, W4WX, at: w4wx@bellsouth.net

LU, SOUTH SHETLAND ISLANDS. "The 59(9) DXReport" states to look for Ricardo, LU1ZI, on Sundays, on 3630 kHz at 0230z from Tenierente Jubany Base. QSL direct to: Base Cientifica Jubany, Correo Argentino El Palomar, Via Base Marambio, 9411 Antartica Argentina.

NEW IOTA. Operators HR1RMG and YN1RFV/YN6 will activate the station H76C between October 6-11th from Cardon Island (group D of Pacific Ocean Islands of Nicaragua) and the expect to receive a new IOTA reference number during the operation. QSL via HR1RMG.

NEW IOTA TO BE ACTIVATED FOR ONLY 24 HOURS. Look for W5BOS/7 to be active and on the air to commemorate the great storm of 1934 when winds of 100 knots and seas covered the entire island including the lighthouse on Tillamook Rock. Lanny, W5BOS, has been granted permission to operate from Tillamook Rock lighthouse (Terrible Tilly, 45.56N 124.01W). This is in the Oregon state group, little letter (a), the last of the unnumbered island groups in the USA. The operation will be for only 24 hours, beginning at approx 2200z on Monday, September 21st. Lanny will be using 100 watts and a small yagi plus a dipole for 40 meters. Suggested frequencies will be: CW - 7030, 14040, 21040, 28040 and SSB - 14260, 21260 and 28460. Lanny will do all that is possible to get the European and South East Asian as well as North and South America IOTA operators in the log. For info and pictures of the island and the lighthouse, check out the WEB site: http://www.worldlights.com
QSL via W5BOS: Lanny Phillips, 8381 FM 2101, Quinlan, Tx.

N1V, NAVASSA DXPEDITION. Dan, K8RF, continues to work and put together a DXpedition to Navassa Island, but the dates are not set yet, however they should be around November or December. The callsign will be N1V. Operators include K8RF, WA4DAN, AA4NC, W4WX, K7BV, DJ9ZB, KG4CQ and three others to be announced when schedule is firmed up.

QSL INFO AND NEWS......
KH0/JH1UUT was active this past weekend from Rota Island (Mariana Island). The operator was JH1UUT (President of JNT DX CLUB). QSL to his CBA.

Mike, W5ZPA, reported to OPDX that he and others have returned from their DXpediton to Ambergris Caye, Belize, and even with the very poor conditions in four days, they made a total of 3,200 QSOs. The island lost power two times while they were there. The QSL routes are as follows: V31YK to W5JYK -- V31KR to K5KR -- V31MP to W5ZPA.

ZS5HAM was active during last weekend's SARL HF Field Day Contest by the Highway Amateur Radio Club operating from Montaseel, about 40km

west of Durban. QSL to : The Highway Amateur Radio Club, P.O. Box 779, New Germany, 3620, South Africa.

ZW40SD was activated this past weekend by the Santos Dumont Air Boy Scout Group 20/PR to comemorative the group's 40th anniversary. QSL via PY5AWB: P. O. Box 6025, Curitiba - Parana, 80011-970 Brasil

SPECIAL EVENT. In celebration of the 200th anniversary of the first pioneer settlement in Guernsey County, Ohio, the Cambridge Amateur Radio Association will operate the special event station W8G on the 19th and 20th of September. QSL via W8VP, Box 1804, Cambridge, Ohio 43725. Suggested frequencies will be:
SSB - 3860, 7260, 14260, 21360 and 28485 kHz
CW - 30 kHz up from band edges.

SOUTH AFRICAN SPECIAL EVENT STATIONS (ZS3 and ZS75 by ZS5BBO)..... ZS75SIG. The "South African Corp Of Signals" will be celebrating their 75th anniversary in November, 1998. Edwin, ZS5BBO has applied and has already been allocated the callsign ZS75SIG. He will be activating this call sign as a special event starting on October 30th through November 30th. He is hoping to be active on the following bands: 80m, 40m, 20m, 15m, and 10m SSB (They will also be activated on CW). A special QSL card will be printed for this event and will ONLY be sent if QSLs are sent direct (NO QSLS via the bureau). Please enclose 1 U.S. greem stamp or 2 IRCs for postage. The QSL information is as follows: Edwin Musto (ZS5BBO), P.O. Box 211032, Bluff, 4036, South Africa.

ZS3MM. Edwin, ZS5BBO, states he will be active from the "City of Diamonds", Kimberley, December 19-24th (possibly the 25th) as ZS3MM in memory of the late Bill Upton (ZS4MM/ZS3MM). Edwin states that Bill was responsible for him becoming a ham. Also, due to a survey Edwin carried out on the InterNet, he has been informed that many stations require ZS3 for various awards. He will be active on 10, 15, 20, 40 and 80 meters SSB ONLY. QSL via ZS5BBO to the above address only. Please enclose 1 U.S. green stamp or 2 IRCs for postage.

TZ, MALI (Update). As reported a couple a weeks ago, Bob, K4RB, is on the air from Bamako as TZ6DX. He will be there for a multi-year assignment and will be active on most bands and modes. He is an avid CW contester. He was heard this past week on 15 meters CW between 1800 and 1930z. His QSL Manager is K4DX (ex-WA4FVT). K4DX is good in 1998 sources only. Any address for WA4FVT since 1973 is still good. Specifically, the address is: Bill Strickland, 355 Segrest Circle, Athens, GA 30605 USA

XR40, CHILE. Look for the special event station XR40TC to be active during all the month of Septemeber to celebrate the 40th anniversary of the Radio Club Temuco. QSL via the buearu or direct to CE6TC: P.O. Box 1234, Temuco, Chile.

YI98, IRAQ (Special Event). Between September 22nd and October 1st, look for the special event callsign, YI98BIF, which will be used to celebrate

the 10th Babylon International Festival. It was mentioned that any ham radio operator is invited to the festival and can visit the ruins of the old Babylon City (2656 BC). OTHER YI NEWS: Pierre, HB9AMO, reports that during his 3 months stay in Iraq, he twice visited the Radio Club of Baghdad, YI1RS, and also met the President of the Iraqi Radio Club, Mr. Anan M. Aswad, YI1DX. He has learn the country has about 30 hams with a YI licence, but the only radio station they are permitted to use is the Radio-Club of Baghdad (from here they can use their own callsign). The station has old equipment with a small 3 band beam and a 40m dipole. The WARC band are permitted to be used, however 80m and 160m are not allowed. They cannot use their Yaesu FT-101E any more because of a broken pair of final amplifier tubes. This makes their activity very low because they have to use an old fixed frequency radio station. If anyone has a pair of 6JS5C tubes or equivalent (6KD6, 6LB6, 6LR6), they could be sent to: Radio Club of Baghdad Iraqi Association for Radio Amateurs, PO BOX 55027, Baghdad, Iraq. Pierre also mentions that the main activity of the radio club station is usually on Friday around 1200-1400z.

ZG2, GIBRALTAR. Start looking for ZB2 stations who MAY use the ZG2 prefix September 5-13th to celebrate Gibraltar's National Day which takes place on September 10th. QSL via their regular ZB2 callsign.

ZP0, PARAGUAY (Prefix Update). Tom, ZP5AZL, reported last week he would be using ZP0Z during the WAE SSB Contest. This has changed! Tom has been informed by the Paraguay licensing authority that ZP0 callsigns will no longer be issued. Look for Tom to use the callsign ZP5Z in the upcoming contest and possibly future contest. QSL W3HNK.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send InterNet Mail to one of the two following addresses:
kb8nw@barf80.nshore.org -or- aq474@cleveland.freenet.edu
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

After 25 steps this could reach all 260 million people in the USA. Most
several times! Who is left to send the responses back?
Zoram

2876. Loop Antennas

Newsgroup: rec.radio.amateur.dx
Date: 1998-09-07 00:00:00 UTC
From: "Richard L. Vecera" <vecera@ibm.net>
Message-ID: <35F37874.84F4BF39@ibm.net>
Source record: 27808

Hi,

My wife is a nite owl and enjoys listning to "Old Time Radio".
There is an AM station in the Dallas/Ft. Worth area that broadcasts the
old programs at night. To the point. We live in Austin, Tx. Will a loop
antenna like the Palomar LF-1 improve the reception much over the ferite
loop that is in her little AM/FM radio? I have tried a long wire with
my Kenwood R-2000 and don't see much difference between it and her
transistorized AM/FM portable. In many ways her's works better because
it is directional and she can turn it for some amount of null while I
get stuff from all directions. Bottom line. Would I be wasting $200 by
buying the Palomar?

Thanks,
Dick

Probably. What you ought to try first is a box loop. You can make this
yourself for very little money. Make a 1 meter on a side square frame
out of wood furring strips. Wind 6 turns of wire around this frame (around
the box perimeter), spacing the wire about two wire diameters between
turns. Put a broadcast variable capacitor across the ends of the coil. Now
wind one more turn around the box and hook that up to the receiver.
Peak the signal with the capacitor and turn the loop for a compromise
between best signal pickup and best noise and interference rejection.

This should give you a nicely directional loop. Signal strength will be
down from a long wire, but the receiver should have enough gain to
make up for that, and the directional characteristic will let you null
noise and interference. That'll give you a better SNR, and that's what
you really want anyway.

Instead of using the one turn coupling loop, you can also just place
the portable *inside* the loop, orienting it for best coupling to the
loop. This may not be as directional, but it will still offer a useful
improvement over the loop in the receiver alone.

From: Smith-Gaspard <w4ono@citrus.infi.net>
Message-ID: <35F51F63.E9A@citrus.infi.net>
Source record: 27812

Hi, John ....

You have more then enough room. Space your two verticals at 90 degrees. Wind a one foot diameter coil of RG72 coax to 270 degrees lag. Run two coax cables to the shack. Each connected to each vertical in multiples of 180 degree length (52 Ohm Z). At the shack, install a two position antenna switch. On the antenna switch install a PL-259 "T" connector to each antenna position. Install PL-259 connectors to each end of your 270 degree lag coil and connect one end of each, to each "T" connector. Now connect your two transmissions lines to the remaining "T" connectors. This will phase each vertical 180 degrees difference when you switch the antenna switch. Don't forget to connect the "common" to the rig. Also, install the two verticals in the directions you want. such as Eu/Oc, North/South, East/West, etc. I use a six element phased vertical array on 10.1 mHz. The take off angle is so low it is hard to QSO local hams in the US. Good luck es 73.

With the new version 2.0 of GRAPHPAP, a free and unlimited software, you can now print customized graph paper with polar coordinates. The radial scale can be linear, logarithmic or quadratic. This kind of stationery, almost impossible to find, is very useful for propagation/field strength plots.

You can also print any kind of cartesian graph paper combining linear, logarithmic, quadratic or gaussian scales.

Downloadable at : http://perso.easynet.fr/~philimar/

WA0L, MILLS, MARK GARDEN CITY, MO just tuned up on 14.226.4 and completely silenced my ts-690sat with a s9+40 signal ... and the same on SSB when he made his contact with 7X4CV. That sort of signal from MO to NH has to be full power plus a massive gain antenna system -- any idea what it is? Couldn't find an E-mail for him. -- Thank You! & 73, DavidC AA1FA

Hello,

Just wanted to let anyone/everyone know where to get some minitubes if
they need them. I just bought some from Allen Sauder
allens@sauderelectronics.com at a
really great price(especially for being 12AX7's). Anyway, he gave me
this list of tubes he has in stock. If anyone wants to buy any or get
ahold of him his email address is above and his number is 717-865-5001.

Anyway, here's the list, sorry for it being so big:

DX Bulletin 36 ARLD036
From ARRL Headquarters
Newington CT September 10, 1998
To all radio amateurs

SB DX ARL ARLD036
ARLD036 DX news

This weeks bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The599Rpt, 425DXnews, QRZ DX, Daily DX and Contest Corral from QST. Thanks to all.

ROTUMA, 3D2. Roberto, EA4DX, has been QRV as 3D2DX on 20 meters around 1200z. He will be here until September 19. He will be active on 160 to 10 meters, including the newer bands, using SSB and RTTY. QSL to home call.

UGANDA, 5X. Jacky, F2CW, hopes to be active possibly as 5X2CW from Kampala for the next few weeks. QSL via ZL3CW.

NEPAL, 9N. Satish, 9N1AA, has been QRV on SSB, but mostly using RTTY. QSL via N4AA, except JA stations via JM2HBO.

UNITED ARAB EMIRATES, A6. Ali, A61AJ, will soon be active. QSL via W3UR.

BAHRAIN, A9. David, A92GE, has been QRV on 30 meters around 2000z to 2100z.

TAIWAN, BV. Wendy, BV2RS, has been QRV on 20 meters around 1200z.

DJIBOUTI, J2. Fred, J28FA, is usually QRV on 20 meters using CW around 2300z. QSL via F5MXH.

SOUTH SHETLAND ISLANDS. Ricardo, LU1ZI, is QRV on Sundays on 3630 khz at 0230z from Tenierente Jubany Base. QSL to Base Cientifica Jubany, Correo Argentino El Palomar, Via Base Marambio, 9411 Antarctic Argentina.

MALI, TZ. Bob, K4RB, is now active as TZ6DX from Bamako. He will be here for a multi year assignment and will be active on most modes. QSL via K4DX

CHAGOS ISLANDS, VQ9. Dale, W4QM, will be active again on all bands using CW. QSL via W4QM.

VANUATU, YJ. Hide, 7M3VAL, is active as YJ0AAU. He has been QRV on 40 meters using CW. QSL to home call.

ALBANIA, ZA. A number of operators from Radio Club Partizani expect to be active as ZA0IS using CW and SSB from Sazan Island, IOTA EU 169, on various days until September 15. QSL via ZA1K.

GIBRALTAR, ZB2. Resident ZB2 stations may use the ZG2 prefix during September to celebrate Gibraltar National Day on September 10. QSL via regular ZB2 callsigns.

THIS WEEKEND ON THE RADIO. The ARRL September VHF QSO Party, Worked All Europe Phone Contest, North American Sprint, and the Ohio and Indiana QSO Parties are all on tap for this weekend. Please see September QST, page 103 for details.

The place is a sellers paradise. Not uncommon for units to go for 2, even
3 times their actual worth. The buyer is happy, the seller is extremely
happy. What more could you want?

Those auctions are real scams. I just looked at the one ZDnet is
promoting, apparently run by Egghead. They show required minimum bids
for some items equal to everyday retail prices I've seen. And then you
add an inflated shipping cost.

Caveat Emptor!

2897. Pirate YB0DX

Newsgroup: rec.radio.amateur.dx
Date: 1998-09-11 00:00:00 UTC
From: Smith-Gaspard <w4ono@citrus.infi.net>
Message-ID: <35F91E23.2E3C@citrus.infi.net>
Source record: 27732

After calling CQ DX on 10.102.10 beaming 270 deg from Florida, YB0DX gave me a call at 1137 UTC. Said his op was Ayung. Switched phasing to 45 deg (Eu) and his sig got stronger. Switched phasing to 350 deg and his signal peaked 599 looking at Ohio, Pa., or Mich. area.

YB0DX and several other Indonesians were running 59+ on Saturday morning on 10m with beam headings
over the north pole from the east coast. This certainly doesn't sound like a pirate.

I think most people don't realize that many of the outrageous prices on Ebay are NOT real !!

So far eBay has made two changes: Several weeks ago which added a key to each bid form. With a little work, programmers were able to get around this. Now eBay is about to make a new change, which will randomly change security methods, making it almost impossible to write a snipe program. Now eBay says sniping is still allowed, but automated programs won't work anymore. Why disable automated programs? Because it allows "bid robots" to roam freely on eBay. What do they do? They bid insane amounts on thousands of items and hours... with no intention of paying, bumping out people who would. Sniping is the practice of waiting to submit your bid seconds before the auction closes making it impossible for anyone to place a bid after you.
As you can see, thousands of bids per hour are being made that are completely bogus!
If a bid is so outrageous that it doesn't seem real, it probably isn't!

Interesting I was not aware this was hapening. Has anyone here sold
an item on ebay where the successful bidder could not be identified?

I've sold many items and never once was unable to identify the buyer.

I haven't had this happen to me (yet), but I know I've seen many items re-listed a few days after the auction closed, with a note indicating that the seller had been "stiffed", or the buyer never responded to the seller's emails. Sounds like auto-sniping to me.

Actually, I've sold things on eBay for prices that astonished me, and I have yet to be stiffed by a buyer (at least on a high-$$$ item; I have been stiffed on a couple of nickle-n-dime items). However, you're right; there are plenty of items that close at totally unrealistic prices, and I'm certain that no one, even a rich dude with lots of money, would bid that high.

Nope. I've got several items on ebay right now that seem pretty normal prices. The Heath amp is a little low and Philmore chrome mono tube preamp seems a little high... But it is NOS unused in it's original box w/ paper work and parts bag.... - the S&G safe lock seems a bit light - but I figure there's just not that much demand for that kind of high secruity lock... The plasitic model submarine kit at $52.00 is just about right - I paid $40 ea. from a dealer for two of them about a year ago - so like I said - that seems about right... The Mini Pops rhythm unit who knows??? I'll be happy where ever that ends up (came on the Hammond A100 I bought a few months back - on ebay - which was super low!!! (you can't hardly touch a Hammond B3/C3/A100 class organ around here for under $3500 - and nice ones reach $6000 -- I bought a _really_ sweet A100 in great shape for $1500 - on ebay... The bid robots must have been asleep! (as were about a zillion others looking for a good deal on tonewheels!). Old multimeter at $1 is maybe a tad low - I've sold some pretty pricey stuff on ebay - never had a problem with the high bidder...

best regards...

Unlike other auctions E-Bay only offers items for sale by
individuals and then they get a percentage of the selling price.
E-Bay sells nothing itself. Those high prices on E-Bay are the result
of _Human Nature_, people let their ego's get out of hand and then pay
ridiculous prices just to win the bid. I always buy items via
pricewatch www.pricewatch.com or off the misc.forsale newsgroups and
then sell via E-Bay.

Hi John OM,
You have to remember, ebay is not in the 'real' world, it is just the
SF Bay Area, HI! Too bad there is not an 'ebay' in some other part of
the country where prices paid for things are much lower.

>rarity/popularity?

Hi Allen,
the DXCC-Yearbook (ARRL) contains a "Most-Needed DXCC-countries list". The
following DXCC-countries have been within the "Top Ten" (last edition):

1, North Korea
2, Scarborough Reef
3, Pratas Island
4, Yemen
5, Eritrea
6, Bhutan
7, Andaman & Nicobar Islands
8, Tromelin Island
9, Macquarie Island
10, Glorioso Island

2909. September Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1998-09-11 00:00:00 UTC

PROPAGATION - by AD5Q HOUSTON, TEXAS -- SEPTEMBER 1998

September is a month of radical improvement in high band conditions. The ionosphere is cooling off from the overheated conditions of summer, bringing higher daytime MUFs. Recent advances in solar activity also mean higher MUFs, and set the stage for our first great fall season of the new cycle. 10 Meters is opening up big time. It's time to kick the CB'ers off the CW band, or at least get 'em to move above 28.3 and pay their 10-10 dues.

The 10 Meter DX season runs from October through about March with reliable openings to Europe almost daily (except in geostorms). Some parts of the world will remain difficult to reach on 10: those involving high latitude paths over the pole. In winter this path is in darkness. Sunset at the north pole is later this month, and the northern darkness will expand throughout the fall. Thus, polar daypaths begin to close just as 10 is opening up. Opportunities to work these paths are limited, and are at their best early in the fall while most of the Arctic still receives daily exposure to sunlight. For this reason, I have always felt that October was the best month for world-wide propagation on 10. To catch the openings at high latitude, get on the band shortly after sunrise - or watch for polar signals as the band closes in the evening.

The 10 Meter season is not at peak as I write this because it is still September - late summer. Summer is the WORST season for 10 Meter work - even a high solar flux doesn't help much. However, the transition from these summer doldrums to spectacular fall conditions in October is very dramatic and occurs mainly in September.
